The trouble is that the way Powell and Company are talking this could be
a TRUE story in a few years. How much would the Amalgamated
Consolidated-United Mega-Corp. pay at auction for an exclusive
assignment at 40m? or 10m, or maybe for ALL of HF?

You may think this is a troll now, BUT?!?!?!?!

Haven't heard this, but it wouldn't surprise me. It looks like a halfway
decent residential neighborhood surrounding it on most sides, and I'm sure
the golf course improved residential values too. The Hara does seem more
than a bit out of place at that location.

Can I charge NiMH batteries with a NC-50 Rapid Charger?

I just got a new FNB-25M NiMH battery pack (for my FT-530) and want to know if it's ok to charge it with my NC-50.

5285. Roger Weiseman and his infatuationwith gays (was: Re: Ewwic Blowsmen the Phoenix areas repeater QRMer.)

That's where the commercial/governmental demand is, and where we use it far less than could ever justify keeping all of it. You can expect losses up there. It's as good as done, AFAIC.

Well, it makes sense and if it happens, I am sure they'll find somewhere else to host it. Shoot, maybe they'll find someplace that has air conditioning when it is hot and heat when it's cold. Hara has neither. I would like to see it moved.

....written by a fellow who probably never knew the love of his father
(though I suspect that Shit/Snit may
have very well been hatched...or shit...rather than born in the standard
biological matter).

73,

Steve

(Hey, Snit: Don't forget, you said you killfiled me, so of course, you
can't respond to this post, because you can't
read it...because you killfiled me. Right?)

5299. Amateur Radio Mobile in a 2001 VW Passat

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-05 23:30:42 UTC
From: "Stephen P. Johnson" <stephen.p.johnson@worldnet.att.net>
Message-ID: <Ce7z6.12293$RF1.819836@bgtnsc06-news.ops.worldnet.att.net>

I am trying to get my ICOM 706 Mk2 G ham radio running
in my new 2001 VW Passat. I am hearing a lot of digi-noise
and S9 birdies every 19.5 KHz through all of the HF
bands. All of the grunge is coming in through the
antenna, not the power leads. I spoke with VW corporate
and they told me to talk to my dealer. The dealer told me to go to Radio
Shack. The dealer said VW is not selling shop manuals for the
2001 Passat, so I don't have much to go on.

Wonder is anyone has tried operating a ham radio in a VW
Passat and knows how to deal with all the noise!

Steve Johnson, N2FT

>Passat and knows how to deal with all the noise!
>

Well, that's a generic problem. Lots of vehicles generate noise. Best
way to track it down is to start removing fuses from the fuse blocks, one
by one until the noise goes away. Once you have identified a particular
fuse circuit as the cause you can start troubleshooting the devices on that
circuit.

5302. Ohio/Penn DX Bulletin #505 (*Corrected)

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-06 02:50:00 UTC
From: kb8nw@barf80.nshore.org
Message-ID: <$opdx.505.2001@ampr.org>
Source record: 91281
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.info

MESSAGE FROM KB8NW: After about 7 days of no connection to the outside, BARF-80 BBS is now back on-line connected to the InterNet (Details in next week's bulletin). To OPDX InterNet Subscribers and readers on the various UseNet groups, "We are sorry for the delay".

SB DX @ WW < KB8NW $OPDX.505
Ohio/Penn DX Bulletin No. 505 (*Corrected)

The Ohio/Penn DX PacketCluster
DX Bulletin No. 505 (*Corrected)
BID: $OPDX.505
April 2, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KA1GJ, NC1L, K2FRD, W3HC, W3UR & The Daily DX, WN3VAW, N4AA & QRZ DX, N6RT, W7TSQ, K8YSE, WA0RJY, 9Y4VU, EA5BY, GM4SUC, HL1IWD, I1JQJ/IK1ADH & 425 DX News, IK7JWX, JA3MZB, JI3DST, ON5NT, OZ5MJ, VA3RJ, Zik and ZK1CG for the following DX information.

SPECIAL NOTE FROM EDITOR: As of 2230z Thursday, March 29th, BARF-80 BBS lost its ISP mailer until possibly April 2nd or 3rd. This is due to a changeover of DSL ownership and equipment/hardware/cable (which will not be available until then). This means your editor will probably lose all of his mail sent between March 29th and April 2nd or 3rd. If you have sent something for the OPDX, PLEASE send it again after April 3rd. Also, OPDX's InterNet Subscriber will be receiving their bulletin one to two days later than normal due to this changeover. I am very sorry for this inconvenience. However, OPDX.505 will be available as usual at the K8YSE OPDX Home Page. Provisions are being taken to have OPDX.505 uploaded to the various DX Reflectors and UseNet groups..... Thanks de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th March, through Sunday, 1st April there were 237 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9U, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6,

There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 49 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,15,21,22,23,24,25,26,31,34,
35,43,58,59,68,69,70,71,72,73,74,90

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

4W, EAST TIMOR. Neville, VK2QF, is once again active from here as 4W/VK2QF.
Reports indicate that he will be active on all bands 80-6 meters CW/SSB
until April 5th. Over the past weekend, he was spotted on 15 and 10 meters
CW. Check 10 meters after 0100z and 15 meters after 0830z. QSL via his
CBA.

5R, MADAGASCAR. Sigi, 5R8GT, was quite active this past week on 12 meters
and some other WARC bands. Check around 24942 kHz between 1630 and 1730z.
Also, check 10104 kHz after 0300z, 18142 kHz around 1630z and 21242 kHz
after 1730z. QSL via DK8ZD.

5X, UGANDA. Graham, 5X1GS, was active over the past week on 10 meters.
Look for him on SSB on/around 28460 or 28475 kHz after 1030z and again
after 2000z. QSL via WB2YQH.

C9, MOZAMBIQUE. Joe, G3MRC, was active this past week as G3MRC/C9. He
was heard on 28029 kHz between 1330 and 1600z. QSL via home callsign.

D70, SOUTH KOREA (Special Event/Attention Prefix Hunters). A group of
HL operators will be active now through May 25th with the special callsign
D70IAF (Delta Seven Zero India Alfa Foxtrot) to celebrate the opening
of the "Incheon International Airport". They were spotted last week on
CW/SSB/RTTY/PSK31. Check the following frequencies: 7006, 7070, 14014,
14070, 14086, 21070 and 21290 kHz. QSL Manager is Lee, HL1IWD, and he
prefers QSLs be sent via the bureau.

DXCC NEWS. Bill Moore, NC1L, DXCC Manager, reports that "Documentation
has been received for ET3VSC and cards will now be accepted for DXCC
credit."

E4, PALESTINE. The "425 DX News" reports that Gunter, OE1GZA, will be
active from Ramallah until the end of next year as E4/OE1GZA. Activity
will only be on 30-10 meters at this time. It is recommend that direct
QSLs should be sent (as bureau cards will not be answered for a long time)
to: Gunter Zwicki, c/o SICT, P.O. Box 91196, Ramallah, Palestine.

H40, TEMOTU PROVINCE. Ron, ZL1AMO, continues to be active as H40RW and has been heard on 7007, 14025, 14226.5, 14236, 21028 and 28024 kHz. QSL via home callsign.

INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 2001 (Update). Mike, GM4SUC, reports that planning for this year's International Lighthouse/Lightship Weekend, Saturday 18th and Sunday 19th August, is progressing very well. A list of stations that have already confirmed their participation can be found at the following Web site: http://www.vk2ce.com/illw/2001.htm Rules and information on the weekend can also be found at: http://www.vk2ce.com/illw/index/html If you require any more information just contact Mike at: GM4SUC@compuserve.com

IOTA NEWS.....
AS-NEW. The Korea DX Club (KDXC) has an IOTA DXpedition scheduled for May 5-6th (only two days) to one of the Kangwondo Province Islands. The island name will be announced later because of military security. This will be a new IOTA and will also be the last IOTA in South Korea. They plan on using a beam and amp during this operation. QSL via HL1XP. All contacts will be confirmed via the bureau automatically.

AS-024. Nasu, JM1TUK, will be active from Ishigaki Island from April 4-16th. He will use the callsign JM1TUK/6 and will be operating on 40-15 meters using a TS-50 and groundplane. QSL via JM1TUK.

AS-056. Masa, JA6GXK, will be active from Danjo Archipelago (Meshima Island) during the following dates: April 10-20th, May 1-10th and June 1-12th. This will not be a DXpedition, and Masa will be active only during his spare time. He will be active from a lighthouse on Meshima. Suggested frequencies are: 7 MHz, 14260 +/-10kHz or 21260 +/-10kHz. QSL only via the Bureau.

AS-056. Joe, JA4PXE/6, will be active from Danjo Island starting around 2200z on May 4th, ending May 6th at 2200z. He will be operating on 14260 and 21260 kHz +/- QRM, and 50.145 MHz. QSL via JA4PXE.

AS-079. Look for JH0BLI to be active from Miyako Island, May 3-5th. He will use JH0BLI/6 and will be active on 40-10 meters CW/SSB. QSL via JH0BLI.

EU-174. There is a correction to last week's bulletin. Look for operators Eddy/ON6HE, Dirk/ON5CT and Frank/ON4AAC (not ON4AAX as mentioned in OPDX.504) to be active from Thasos Island between May 27th and June 3rd.

LYNX DX CONVENTION. The LYNX DX Group is proud to be hosting its annual Convention in Alicante, Spain, on April 28-29th, 2001, at the Hotel Melia Alicante. DX forum guests will be: N4XP (K5K), F2VX (A52FH), EA4DX (T24DX + 8Q7XX) and CT1EEB (4W6EB). For more info about the Convention, check the Web page: http://www.lynxdxg.com/conv2001/index.htm

NORTHWEST DX CONVENTION 2001. The Western Washington DX Club (WWDXC) is proud to be hosting the Northwest DX Convention in Seattle on July 20-22th, 2001. The special event will be held at the Everett Holiday Inn (Web page http://www.rogueweb.com/holidayeverett/). DX Forum guests will be Bill Fisher/W4AN, Carl Luetzelschwab/K9LA, Bill Moore/NC1L, Al Rovner/K7AR, Garry Shapiro/NI6T, Dennis R. Motschenbacher/K7BV and others. For additional information and details, check the Web page at:
http://www.wwdxc.org/convention
Or send questions to WWDXC, P.O. Box 395, Mercer Island, WA 98040 or E-mail to: convention@wwdxc.org
OPDX InterNet Subscribers will receive the complete WWDXC press release as an addtional bulletin.

QSL INFO AND NEWS.....
Frank, 9Y4VU, informs OPDX that all QSL requests, including the cards by QSL Managers W3EVW and NY3Y up to September 2000, and all direct requests received up to March 23rd (2001) have been answered and mailed by March 23rd. He apologies for the delays.

Doug, N6RT, reports that the A52CO log is now available online at:
http://dx.qsl.net/logs

Take, JI3DST, was expected to be active from "O Island" (Ooshima-mura Munakata-gun Fukuoka-ken) during the past weekend as JI3DST/6. QSL via the bureau.

*TX5CW QSL UPDATE. It is recommend that QSLs for TX5CW be sent to Jacky's ZL3CW address instead of his F2CW address as reported last week. QSL to: Jacques Calvo, P.O. Box 593, Pukekohe, Auckland 1800, New Zealand.

Dr. Jeffrey Parker, KA1GJ, informs OPDX that all QSLs received to date have been answered for his V73GJ operation during January 2001. Confirmation of contacts with V73GJ are via KA1GJ.

Zik a member of "Radio Sekcija Kozara" (YU1AAV), informs OPDX that QSLs for YZ1V should go via YU1AAV. QSL via the bureau or direct to: Radio Sekcija Kozara, Jurija Gagarina 210, YU-11070 Novi Beograd, Serbia, Yugoslavia.

ZX0F, active from Fernando De Noronha Island as a Multi-Single entry during the CQ WPX Contest, gets QSLed via W3HC.

ZX5J, active from Boa Vista as a Multi-Multi entry during the CQ WPX Contest, gets QSLed via VE3HO.

SPECIAL EVENT (IOTA Operation). Look for special event station OZ5HCA to be active from April 2-8th. The special callsign OZ5HCA will be used to commemorate the birthday of the fairy tale writer "Hans Christian Andersen" (suffix HCA). The QTH of OZ5HCA will be located in Odense on the "Island of Fyn" (IOTA EU-172 and for the Danish Island Award FY-001).

THE SURPRISE OF WEEK. Mike, GM0HCQ, showed up as VP8SGK on South Georgia. He was active on Friday and Saturday, but it is reported that he will only be there for a few more days. However, he is there to work, and his

operating is unpredictable or may have ended. Keep watching 14052 kHz.
According to his Web page at http://www.qsl.net/gm0hcq/
Mike is a crew member of the "Ernest Shackleton", a British Antarctic
relief ship. There is a possibility he may also go to South Orkney Island.
QSL via: Mike Gloisten, Rose Cottage Kinlochleven, Argyll, PA707RE,
Scotland, U.K.

VK9, COCOS KEELING/CHRISTMAS ISLAND. Jurek, SP9EVP, currently active as
VK9KCP from Cocos Keeling as this bulletin is being written, is expected
to be on Christmas Island soon (if not already there). He seems to like
12 meters a lot but has been on 40/30/20/17/15/10 meters. Activity should
end April 6th. QSL via home callsign.

VO2, LABRADOR, CANADA (DXPEDITION Update). Fred, K2FRD, reports to OPDX:
"Many thanks for adding my Labrador DXpedition to the OPDX List. I feel a
little insignificant being listed next to the likes of 3G, 5R, and 9G, but
from the hits I've received on my Web site and the E-mail messages I've
received, I'm going to be very busy up there!" (ed. Hey Fred, "DX IS")
Fred also mentioned that, based upon all this feedback, he has updated
the Web site with additional bands, frequencies, and schedules. All info
may be found in: http://sites.netscape.net/thefred3/labr1

WAIS WEB SITE. Alfred, IK7JWX, informs OPDX that you can find the rules
on the "Worked All Italian Squares Award" (W.A.I.S.) on the Web site:
http://www.qsl.net/ik2uvr/

SOUTH COOK ISLANDS. Victor, ZK1CG, has been active on 20 meters SSB
recently. Check above 14200 kHz after 0630z and again around 1500z. Also
active is Jim, ZK1JD, on 20/10 meters SSB. Check 20 meters after 0400z
and 10 meters (above 28470 kHz) after 2330z. It was mentioned this week
by Victor that Jim, ZK1JD, would like QSLs sent direct to: Jim Ditchburn,
PO Box 491, Rarotonga Cook Islands, via New Zealand. The Cook Islands do
not have a QSL bureau, so all cards for ZK1 must go direct or to any
managers indicated by operator. Any cards sent via the QSL bureau get
dumped in the trash can. Victor states, "If you are QSLing direct, please
include a self addressed envelope and 2 IRCs or a green stamps to help cover
the cost of the postage and QSL cards." Jim/ZK1JD, Victor/ZK1CG, and
Tuatai/ZK1CY (Also ZK1MA when he is in North Cook) are the only local
hams on Rarotonga, South Cook Island that are operating. QSL ZK1CG to:
Victor Rivera, P.O. Box 618, Rarotonga Cook Islands, via New Zealand.

ZY0, ST. PETER AND ST. PAUL ROCKS. Joaquim, PS7JN, showed up as ZY0SAT
on March 1st, on 14267 kHz and was active between 2300 and 0200z. He
will be here through April 15th. Remember his is activity will be limited
to his free time (his afternoons and evenings). QSL via PS7JN.

2001 Northwest DX Convention - DXing in the 21st Century!

The Western Washington DX Club is proud to be hosting the Northwest DX Convention in Seattle in 2001.

Dates: July 20-22, 2001

Location: Everett Holiday Inn (www.rogueweb.com/holidayeverett/).

Activities:

Friday and Saturday - Hospitality Suite hosted by the Western Washington DX Club

Saturday -

Programs from 9AM through 4PM -

Internet Portals for Ham Radio - Bill Fisher, W4AN (eham.net, contesting.com)
DXing on the Back Porch of Cycle 23 - Carl Luetzelschwab, K9LA
DXCC Manager - Bill Moore, NC1L

YK9A DXpedition - Al Rovner, K7AR and others
Other programs to be announced!
DX videos hourly all day!

Saturday Dinner - Garry Shapiro, NI6T, "Confessions of a Mad Reefer" (a summary of his adventures to several rare reefs and islands)

Sunday -

DX Breakfast - Guest Speaker, Dennis R. Motschenbacher, K7BV - "Tales of East Timor, 4W6/K7BV"

Fantastic raffle prizes!

Prices:

Complete Package (Programs, Saturday Dinner, Sunday Breakfast): $62 (2 Free Raffle Tickets if you register early! $5 late fee if you register after July 10, 2001!)

Programs: $20
Saturday Dinner (London Broil, Salmon, or Vegetarian): $30
Sunday Breakfast: $12

Additional Information will be announced at www.wwdxc.org/convention as our plans continue to progress. Send questions to convention@wwdxc.org or to WWDXC, P.O. Box 395, Mercer Island, WA 98040.

From: I2UIY <i2uiy@cqww.com>
Subject: EU Sprint 2001
Mime-Version: 1.0

EU SPRINT 2001
In 1994 the EU Sprint Gang (I2UIY, OK2FD, DL6RAI, and G4BUO) organized the first European Sprint contests. For 2001 there have been some rule changes, introducing an awards programme and bringing the Spring Sprints forward in the calendar. You can find past scores and other information about the sprints by visiting the official EU Sprint web site at this address: <http://loja.kkn.net/~i2uiy/>.
The BIG news is that now we will award a certificate to the winners in each country but this is not all. Three nice plaques will be awarded for the top three scores from all four contests combined. Therefore, please red circle the four EU Sprint saturdays on your calendar, we will be looking for you starting April 14!

EU SPRINT 2001
The EU Sprint Gang hereby invites you to participate in the four European Sprint Contests held in 2001.

ENTRANTS: any licensed station may enter the Sprint. European stations can work everybody; stations outside of Europe can work only European stations.
CATEGORIES: Single Operator ONLY. Only ONE signal may be aired at one time.
DATES:
EU SPRINT Spring:
* SSB: second Saturday in April - 14 April 2001 - managed by G4BUO
* CW: third Saturday in April - 21 April 2001 - managed by B.C.C.
EU SPRINT Autumn:
* SSB: first Saturday in October - 6 October 2001 - managed by I2UIY
* CW: second Saturday in October - 13 October 2001 - managed by OK2FD
TIME: from 15:00 UTC until 18:59 UTC.
BANDS: 20, 40 and 80 metres only.
Pilot frequencies are: SSB: 14.250, 7.050, 3.730. CW: 14.040, 7.025, 3.550
EXCHANGE: all of the following data MUST BE PART OF THE EXCHANGE:
a) your callsign,
b) the other station's callsign,
c) your serial number starting from 001 (RST not required),
d) your name or nickname.
Please note that BOTH stations MUST repeat BOTH callsigns DURING the exchange.
A valid exchange is: "OK2FD de I2UIY 118 Paolo" while "OK2FD 118 Paolo" is NOT a valid exchange.
SPECIAL QSY RULE: if any station initiates a call (by sending CQ, QRZ?, etc.), he is permitted to work ONLY one station on the same frequency. He must thereafter move AT LEAST 2 (two) kHz before he may call another station or before he may solicit again (CQ, QRZ?, etc.) other calls.
VALID CONTACTS: valid contacts are QSOs correctly logged and confirmed. Each operator may use ONE and ONLY one name during the Sprint. If the exchange is copied incorrectly, that operator will receive zero (0) points. In case of miscopied callsigns, both stations will receive zero (0) points for that QSO.
SCORING: each valid QSO counts one 1 (one) point. The final score is the total number of QSOs.
AWARDS: Colorful certificates will be issued to the winners of each Sprint, and to the leaders in each country. A special plaque will also be awarded for the top three scores from all four contests combined. To be eligible for this award an operator must enter at least three of the Sprints in the year. Results will be forwarded as soon as possible to Leagues, magazines and bulletins.
LOGS: a single chronological log is required. Please send us your log via email or on a floppy disk, if you use computer for logging. Use any of the available software or send a plain ASCII file. A separate summary sheet is also required. Please send us the right files: for DL2NBU software, send yourcall.ASC; for N6TR software, send yourcall.DAT; for IK4EWK software, send yourcall.DBF.
If you want the latest release of the DL2NBU software, you can download it from the EU Sprint web site:
<http://loja.kkn.net/~i2uiy/free_sw/eu_sprint.zip>.
Log files must be sent NO LATER than 15 days after the contest to:
<eusprint@dl6rai.muc.de>. The receipt of your electronic log will be confirmed.

If you do not receive a confirmation within two days, try again or use the postal
system.
Disk logs, or paper entries must be posted NO LATER than 15 days after the contest to the appropriate address:
* Spring SSB Sprint: Dave Lawley, G4BUO, Carramore, Coldharbour Road, Penshurst, Kent, TN11 8EX, England, UK.
* Spring CW Sprint: Bernhard Buettner, DL6RAI, Schmidweg 17, 85609 Dornach, Germany.
* Autumn SSB Sprint: Paolo Cortese, I2UIY, P. O. Box 14, 27043 Broni (PV), Italy.
* Autumn CW Sprint: Karel Karmasin, OK2FD, Gen. Svobody 636, 674 01 Trebic, Czech Republic.

Thanks in advance for your participation de: G4BUO, I2UIY, OK2FD, and the B.C.C. Sprint Committee.

Woger hadda go beddie-bye for the night. His mommy told him to turn off her computer because it was nearing his curfew. Woger obliged, shut off mommy's computer, and toddled off to bed. Tonight is mommy's turn to read Woger some Fairy Tales....she knows how much Woger likes little Fairy Tales..or is it Fairy Tails?
Be nicey-nice to mommy, Woger. After all, she pays the bills and it IS her house you live in.

5304. Looking for article on Digital Remote Sensing Power/VSWR Meter

Newsgroup: rec.radio.amateur.misc

I remember reading a new product review, within the last few years,
for a digital, remote sensing, power/VSWR meter. As I recall it could
switch between two remote sensors in order to monitor two antenna
systems. It would have been in one of the major Amateur Radio
publications. Sorry that I don't have anything more to go on.

Can anyone jog my memory?

Thanks in advance,
and 73, Joe, W5OS

5305. Can we sue the ARRL?

Newsgroup: rec.radio.amateur.misc

The ARRL has made a mockery of its constitution and by-laws, and they've trashed the good principles on which Hiram Percy Maxim founded the organization. Enough is Enough, it's time to sue.

Anyone know if we can sue them? Can you sue an organization that has not followed its by-laws and constitution in recent years? How much is the League worth right now?

Thanks for any info or advice. I'm not an attorney.

I am posting here because of some of the nasty things I have read in this group and in QRZ discussions regarding freebanders. We who use the frequencies from 27.405 to 28.000 have more in common with hams than you might think. We are good operators and have knowledge of propagation and skip conditions. We use Yeasus, Kenwoods and Icom radios just like you do, so we know technical issues as well or better. However, the attitude of some hams toward us is rude and condescending. We are treated like 2nd class citizens. This should not be. We have the same rights under the constitution as legal hams do. For those that do not wish to be under Uncle Sam's thumb, freebanding is a viable alternative to getting a ham radio license. What I am saying is that maybe the next time you meet a freebander you might talk with him before you condemn him.

I am QRT and standing by. (No flames answered. Please reply via email)

Well, since you're such a dullard that you can't figure out how not to cross post this crap and are too much of a coward to use your real name, I don't hold much hope for your case.

Exactly what "good principles" has the League trashed? Please fill us in...

I live not far from Dayton, but haven't heard this. A lot of events
that used to be held at Hara Arena are now held at "The Nutter Center"
which is a little further down the road at Wright State University. It
is a much newer facility and if Hamvention ever moved there, it would
probably be an improvement IMHO.

Hi there

"DW" most likely stands for dual-watch (monitoring 2 channels almost simultaneously by switching from 1 to the other and back again).

Hope this helps.

Regards.

I want to stand up for the ARRL. I think they have followed their organization documents. The members have voted for and elected directors who have made tough decisions based upon the facts they know. Did you vote? Did you speak out?

Amateur radio is changing and the ARRL must be responsive to that change - whatever it takes. They are they best organization to represent amateur radio and in my opinion have done a great job. The directors are pretty much volunteers who spend a lot of hours doing their job.

I would like to thank the directors and the staff at ARRL.

Regulation of the RF spectrum is quite constitutional and you are
breaking the law by violating the regulations. The only part of the
Constitution that should concern you in this activity are the parts
about "due process."

In any case, you argue that you know as much as the mainstream of ham
radio. If that's the case, why haven't you bothered to get the
license?

>For those that do not wish to be under Uncle Sam's thumb, freebanding is
>a viable alternative to getting a ham radio license. What I am saying is
>that maybe the next time you meet a freebander you might talk with him before
>you condemn him.

I can't say I'm familiar with the freebander community, but I have
been acquainted with one or two folks who participate. The only thing
I wish on you would be a visit from the FCC and that you have your day
in court.

But what's this business of being under Uncle Sam's thumb? Yes, the
government regulates ham radio. It also regulates lots of things. It
regulates the roads. It regulates the skies. It regulates the water
you drink and the air you breath --and it does so because we ALL have
rights --not just you.

You claim that you can flout regulations wherever you feel they're
unjust. Yet you make no claim as to why these regulations are so
terribly unjust. I think you're getting away with flouting the FCC
because you can and because YOU think you aren't hurting anyone. Gee.

What if someone said that prostitution doesn't hurt anyone and that a
great place to prove this would be in front of the school your

children (or other young relatives) attend? In their minds, they're right. In your mind, you'd probably disagree. Where do their rights end and yours begin?

Laws and Regulations are where society sets the dividing lines between opposing views and needs. Regulation is all about the standards of where your rights end and mine begin. Yes, regulation is an act of politics.

This is what good politics is all about. It's about compromises. It's about deals. It's about give and take. And most of all, it sets the standards of what's acceptable and what isn't.

We tend to see the worst of politics because that's what is news-worthy. We don't tend to see where it works well. A working regulation which represents a fair compromise is a ho hum event. Considering the size of the Code of Federal Regulations, it's amazing that there are as few conflicts as there are.

Yet, you act as if such things don't apply to you. What arrogance! I think the RF exposure regulations the FCC has imposed on hams are utter nonsense. I still adhere to them. Why? Because my opinion (whether well founded or not) doesn't matter to those who enforce this regulation. Nor should it. The opportunity to voice your opinions was when the regulations were being made. And by the way, I have made comments. You win some and you lose some. That's life.

I will acknowledge that "civil disobedience" is an accepted form of protest. Show me what injustice you are protesting and why you think it is so heinous that you are performing an act of "civil disobedience" (as compared to simply lobbying your representation) and I'll listen.

>I am QRT and standing by. (No flames answered. Please reply via email)

I hope you acknowledge this is no more a flame than your original post.

By the way: QRT is a morse prosign meaning "I'm off the air". I think you really meant "K" ("over" or "go ahead") in morse. If this is an example of how you think you know as much if not more than the average ham, you're not making much of a case.

Problem with Remote Control of JRC 345 Receiver

Hello,
i have a big problem with a JRC 345 HF Receiver, i have made a PERL program
to control this radio with my Linux pc. After a few remote command from PC
to Radio is not possible to control the radio.. i can switch the
frequency from remote only 10 times and then the radio will stop the
remote controll. I have try other
pc and other tipe of program but the problem is back again. Anyone is using
here a JRC 345 with any type of Remote Program ???

Best Wishes and thanks in advance Andrea Borgnino IW1CXZ - Rome Italy

Over the last 40 years I have heard this same sort of thing. ARRL this, ARRL that. I have YET to hear any serious suggestions to improve it (the ARRL). Just a lot of bitching.

Some time back, in the sixties, Wayne Green started up the 'Institute of Amateur Radio'. What a flop and what a goof.

So, anyone got some suggestions? some solutions? And BTW what exactly is the problem?

I guess this means that if the freebanders choose to, they can pick ANY
frequency range and operate it and call it 'freebander 2' or whatever?

What a bunch of goofs.

You have nothing in common with hams. They operate legally under authority granted by the FCC after they have proved their abilities and EARNED the right. You operate as a criminal.

> We are good operators and have knowledge of propagation and skip
conditions.
> We use Yeasus, Kenwoods and Icom radios just like you do, so we know
technical

You want respect because you illeagally operate good equipment? That's like the armed robber wanting respect because he uses a Colt Python instead of an FIE .22 pocket auto.

>However, the attitude of some hams toward us is
> rude and condescending. We are treated like 2nd class citizens. This
should
> not be. We have the same rights under the constitution as legal hams do.

Agreed, but the Constitution does not give anybody the right to transmit. It gives you the right to get off your butt and pass an FCC exam if you want to operate - same as a Ham. To do otherwise is criminal behavior.

> For those that do not wish to be under Uncle Sam's thumb, freebanding is
> a viable alternative to getting a ham radio license.

Self justification? So, if you are too lazy or stupid to obtain a Ham license, then it's OK to just go ahead become a criminal?

>What I am saying is that maybe the next time you meet a freebander you
might talk with >him before you condemn him.
>

Don't waste your time here. Why not plead your case to the FCC and see if you can convince them ?

> I am QRT and standing by. (No flames answered. Please reply via email)

And you should stay that way until you become licensed...

5323. Re: Can we sue the ARRL?

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-06 20:28:15 UTC
From: Lou <tech@dp.net>
Message-ID: <9al91i$qo1$1@news.dp.net>
Source record: 91103
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.swap

Can they (ARRL) be sued? I'm not a lawyer. But an Attorney friend once told me in general conversation - ANYONE can be sued... "Winning" the case is another matter. Does the party launching the suit have legitimate grounds to even attract an Attorneys interest? Yes they get paid to do it, but I doubt any (intelligent) lawyer would insult his/her intelligence and reputation with a frivolous lawsuit. The case has to have merits. Otherwise, you are merely wasting your time and money. Can you prove the ARRL hasn't "tried" to do as they have said?

I'm not a member of the ARRL. I was back when I first was licensed (80s). I don't agree with all their policies either. Sue them? No..... Nothing worth suing for. It is just a dis -agreement of policies. I'm not saying they are totally wrong either. But I will say this, if it weren't for the ARRL, I think Big Business would have sucked up a good portion of, if not all of the Ham Bands - moons ago.

There was a comment made of whether the staff or board was doing volunteer work. To some extent, that is true, not sure to what extent. So to the extent that they are doing it free of their own time, energies and maybe dollars, you have to applaud them for that.

I too am a volunteer in other services. Being a volunteer is often a thankless job, but if someone didn't step up to the plate to do it, who would? Certainly not the critics. It is easy to whine and moan and groan. If you can't appreciate the efforts, step up and offer to help or stay out of the way altogether instead of making things worse. As the saying goes... "Lead-follow-or get out of the way".

The FCC is a governmental agency.... Overseen by the powers that be. Arm twisting can be done. It happened with the Code with the introduction of the Waiver/simplified testing. If I'm not wrong, King Hussein of Jordan (now deceased/Amateur Radio Operator) had a friend in the US that couldn't muster the grade for whatever reason, so he asked the President to help out. And, whalah! Code waivers......changes in the CW testing for those who couldn't copy it like thousands before them. My point is, they can also be"convinced" to cut the bands to sell off. Let's face it folks, the majority of the equipment manufacturers who make our beloved ham radios are also 2 way radio manufacturers. So, they won't lose out. They can merely stop production. They could do like Uniden did to the Bearcat parts inventory when they bought them out. DESTROYED ALL. No repairs to be made. Will it happen? I don't know, but it is feasible.

So, maybe we don't agree with the ARRL completely. Let them go down the tubes and see where we stand 15 years from now. If I"m not wrong again, they fought for scanner, tower and other rights, when the states started cracking

down. How many of you whiners are ready to take on the fight - ALONE? I certainly can't afford a lawsuit for such a cause.
My cash is tied in to buying food and clothes and keeping a roof over my head. As much as I enjoy radio, it is still a HOBBY. My family needs come first and foremost. I may not support the ARRL presently in dues, but I DO applaud the things they've done right. Someday soon, I will rejoin to help ward off the wolves.

Technology is changing dramatically. WE (Ham Operators) and yes, maybe some CBers as well, are a part of that process through developing modes of transmission such as packet and so on. IF no one is there to stand up for the rights of radio operators Ham and CB alike, it is highly possible, we all will be taken off the air in the near future.

Enjoy your Ham/CB hobby today, for tomorrow, it could be GONE!

Just an opinion...my 2 cents.

total bullshit.....if someone is that bad off from a few hits
of grass, then they've got other problems to begin with and
smoking a joint isn't the root cause you and others seem to
think it is.

Want to do society a favor ? - outlaw cigarette smoking ! and
alcohol, all KNOWN and PROVEN killers (alcohol causing birth
defects in pregnant mothers, fatalities from DWI's, smoking
causing lung cancer, etc, etc)...

Someone doing a bong, is pretty mellow and harmless to
themselves and others. Not obnoxious a-holes like the
drunken animals at football games rioting and fighting.

"junkies" my ass ! are you from the Joe Friday school of
prejudicial views ? this so called 'war on drugs' is a
huge waste of tax dollars the way prohibition was back
in the early part of the century.....

legalize it, regulate it, tax it ! solve all your problems
right there....

The problem is,
you are encroaching on frequencies for which you have no authority to be on, which are also allocated for Either Government or military use. You (or those who are confessed freebanders) INSIST on using devices that are not FCC type accepted for any band (LINEARS) and generally create a lot of "spectrum splatter" with such devices.

Some freebanders have gone so far as to actually start using (without proper license) big chunks of the 10 or 12 meter bands. This is called irresponsible operations (and is also a criminal act).

You say you are aware of technical issues, yet you are completely *unaware* of the havoc you create. that empty space between 11 and 10 meters is there for 2 reasons:
1. 27.5 - 27.9 is allocated to the US military
2. 27.410 - 27.5, 27.9-28.00 are guard bands (no signal allowed)

Why should we (the amateurs) respect lawbreakers such as yourselves?

You do more harm to either service than you could possibly be aware of (read the QST article about unauthorized intrusions into the 10 meter band).

In response to the question, I suppose I can answer since I am a lawyer.

You can sue almost anyone. Certain entities like the government and foreign countries may need to give you their permission. If you can show the lawyer that there is a lot of money to be made, he or she might take it on a contingent fee. Otherwise, you must pony up the cash up front to finance it. A small case like this would probably require $20,000 cash just to begin.

The next step is to show that you have special standing or are an injured party. If you are not a member of ARRL, your case would be thrown out unless it was something like an assault or some other personal injury.

Assuming you have standing, then you must show that ARRL did something that adversely affected you.

If you get that far, then you have to convince the court what they should do to remedy the problem. That would normally be an injunction or monetary damages.;

Griping will not cost a thing. But, it generally is not productive.

And any lawyer filing a frivilous lawsuit risks what are known
as Rule 11 sanctions - big cash penalties for filing a suit
which s/he knows - or should have known - has no merit.

>There was a comment made of whether the staff or board was doing volunteer
>work. To some extent, that is true, not sure to what extent. So to the
>extent that they are doing it free of their own time, energies and maybe
>dollars, you have to applaud them for that.

The League president, vice presidents, and directors are
volunteers, with the exception of the Executive Vice President
(currently Dave Sumner) who is a paid employee. The directors
are elected by the membership, and the officers are elected or
appointed by the board of directors.

I am studdying for the Technician exam, and don't even have a transmitter yet. Before I got into the details of the exam, I realized how little I actually knew.
Let me give you an analogy, drivers in South Florida, the worst in the world:
1. Turn signals are non-existent. The rules are that you must signal a lane change. I've seen a few accidents with injuries occur because of this.
2. The left lane is the fast lane. Ive seen cars back up traffic by driving below the interstate minimum in the left lane, and almost cause accidents becasue of this.
3. Items in the bed of a pickup must be secured. People have been literally impaled by items that have fallen from the trucks of sloppy contractors.
4. The speeds on entry/exit ramps must be followed. I can push them in my 'Vette, but 4 or 5 fuel tankers tip over every year because of some jackass, who usually perishes in the fire.

I could go on and on. Life would be safer and traffic would flow better if everyone followed some simple rules. I appreciate the fact that certain frequencies are protected by the FCC for ameteur bands so I have this opportunity to get into the hobby. And in the long run, commercial use of radio benefits by respecting the amateur bands and the hobby. It may not be life or death, but the airwaves are like roads, and if we don't have rules and don't follow them, everyone suffers.

Why don't you find a different cause, like legalizing weed?

5339. W4AMP warned to stay off HF bands a fact.

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-07 04:56:57 UTC
From: KC8JBO <mommasboy@mommashouse.punk>
Message-ID: <9am6hi$q5q$0@pita.alt.net>
Source record: 91120

Yes, it is a fact. W4AMP has been warned to stay away from certain HF frequencies by the powers that be. W4AMP is now in the process of selling yet more of his Ham gear and used the feeble excuse that, "the electric bills were getting a bit too high anyway." It probably would have helped if he'd have paid them to begin with. That is his story. He mentions nothing about his warnings and thinks that this is his secret.

AMP can now be heard on the local 11 meter bands and on occasion puts in an appearance on the 220 MHz band. He has a handi-talkie for 220 and a CB mobile rig he uses as a base station.

If you know of anybody who is hiring, AMP is a multi-licensed and college accredited Electrical Engineer, and carries a minor degree as a Biological Technician. He claims he has had six figure job offers from numerous overseas corporations, but prefers to remain in the Hiram, Georgia area in his rented shack.

W4AMP is continuing his education and it is expected that he will pick up at least three more "degrees" in the following months. His worth as a prospective employee will then increase and probably fast approach the seven digit income level. He may then be able to garner as much as $14,235.34 per annum, thereby meeting the seven figure goal he set for himself.

Heck, at that rate he can even afford a new Hefty bag for his car window.

My God are full of yourself or what.

Maybe you need to sit down and have a look at yourself.

Maybe its not the people on the radio it is YOU!!!!!!!!

If this is all you have to bitch about you really need to have a good
hard look at yourself.

W4AMP has a web page and you can see it at http://www.qsl.net/kd4cdb/

Be warned. This page is very, very primitive with LOTS of uncompressed graphics in the way of photos on it. It takes a full seven minutes to download and you may fall asleep before it opens up on your screen. There is not much on it to see anyway except for some poorly done scans of QSL cards and a few photos of some blue pigeons and parakeets.
W4AMP is not, despite his numerous degrees, able to design an eye catching web page.
You may want to wash the car, order a pizza and watch a movie while waiting for this site to download.

5345. DTC Contest (Easter Monday)

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-07 09:06:58 UTC
From: DTC <dtc@muenster.de>
Message-ID: <9aml6h$rm0$1@news.citykom.de>
Source record: 91123
Cross-posted to: es.rec.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

DTC CONTEST
"Deutschland-Contest"

NOTICE: NEW RULES!

This HF contest has been created by Deutsche Telegrafie Club e.V. in order to promote the active use of Morse telegraphy on the amateur radio HF bands as well as to support the interest in the DARC DLD awards. The DLD awards issued by DARC focus on working as many as possible of the DARC's local sections which can be identified by their "DOK".
DOKs consist of a letter (indicating the region) followed by two numbers (which identify the local section of DARC).

Name:
Deutschland Contest ("DC")

Date:
every Easter Monday each year (in 2001: April 16, 2001)

Time:
08:00 bis 11:00 local time in DL (= 06:00 - 0900 UTC)

Frequencies:
3.520 kHz - 3.560 kHz and 7.010 kHz - 7.035 kHz

Call:
CQ DC oder CQ TEST

Participants:
all licensed radio amateurs as well as SWLs

Classes:
Class 1: more than 25 W output
Class 2: 5 - 25 W output
Class 3: max. 5 W output (QRP)
Class 4: SWLs

Exchange:
RST+ QSO-no. / one's DOK
Non members of DARC as well as foreign amateurs of cause omit the DOK infomation.
Example: 559003/A06

Points to claim:
- every QSO counts 2 points
- every different DOK worked counts 1 multiplier point

- every DXCC country worked counts 1 multiplier point

Final result:
total points=(sum of QSO points)x(sum of DOK multiplier points)x(sum of DXCC points).

Scoring will be according to the respective classes.

Logs:

Logs have to show all relevant data of the QSOs made. In addition a cover sheet is required providing information about the class and output used as well as the call, address and signature of the participant. SWL logs have to provide both calls of a QSO and at least one full rapport being exchanged therein.

Deadline:
Log should have been mailed before May 31.

Manager:
Frank Schmitte
DL1YDL
Kanalstrasse 41
D-48147 Muenster
GERMANY
Final results and scorings are available by ordinary mail if a SASE is included with the log entry. Also, if an email address is given final results and scorings will be forwarded by email.
Log entries may also be sent by email: dl1ydl@muenster.de (Subject: "DC-Log")

A reading comprehension problem, Harry? He was talking about those who use cannabis "daily," not "a few hits of grass" or "a joint."

> Want to do society a favor ? - outlaw cigarette
> smoking ! and alcohol, all KNOWN and PROVEN killers
> (alcohol causing birth defects in pregnant mothers,
> fatalities from DWI's, smoking causing lung cancer,
> etc, etc)...

Okay, but what does that have to do with drugs (getting the topic back to drugs in general, not just cannabis)? What I see above is an argument for making alcohol and cigarettes illegal (an argument I don't agree with, by the way), not a valid argument for making drugs legal. Contrary to popular propaganda, most people who use cigarettes or alcohol will experience no bad side effects (that's right - most smokers die from old age, not cancer, or whatever). The negative effects of drugs, on the other hand, are immediate and wide-spread (crime, overdoses, etc). And, by the way, much of that crime would still exist if drugs were legal (the addicted drug user would still need money to support his/her habit).

> [snip] this so called 'war on drugs' is a huge waste
> of tax dollars the way prohibition was back in the
> early part of the century..... [snip]

And in the years since prohibition, alcohol abuse (not normal use - abuse) has climbed to almost staggering levels. And there is absolutely no reason to believe that drug abuse will not do the exact same thing. And, when you consider the number who die today from drug

abuse, this country can ill afford a massive increase in the number of people abusing drugs.

In most states, the left lane is the passing lane. You're not supposed to be in this lane unless you're actually passing another vehicle, and you're supposed to move back to the right lane as soon as possible after passing that vehicle.

> 4. The speeds on entry/exit ramps must be
> followed. I can push them in my 'Vette, but
> 4 or 5 fuel tankers tip over every year

> in the fire.

Actually, many of these truckers have accidents on those entrance and exit ramps exactly because they were following the speed limit. With a load that will shift (liquids, etc), the driver should proceed into the ramp at about half the posted speed limit. Obviously, you can get away with following the speed limit on most ramps (which is why so many push it). But, on those ramps with an unusually sharp curve, the driver following the speed limit is going to find himself in a very hairy situation.

We have one of those ramps right here in town. It starts off with a smooth, gentle, curve, but it ends with a really sharp curve that cannot be seen until you're almost in it (even car drivers are taken by surprise, but the result is not as dramatic). I've sat there several times just watching the surprised response from truckers. It ranges from trying to take the curve as wide as possible (holding on for dear life) to simply steering straight and slamming on the brakes. And I've seen more than one trucker almost lose it, right down to the tires on one side actually leaving the ground. If that curve was just a little bit longer, we would see accidents there every single day.

5349. Auto-FAQ Sent to Over 20,000 rec.radio.amateur.misc Posters

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-07 12:58:02 UTC
From: pschleck@novia.net
Message-ID: <3acf0e34$0$80855$45beb828@newscene.com>
Source record: 91128

In September of 1996, I started mailing an introductory message to all new posters to rec.radio.amateur.misc. This is accomplished via a special Perl script originally written by comp.infosystems.www.* FAQ maintainer Tom Boutell, who uses it on comp.infosystems.www.authoring.html, to send each poster such a letter once, and only once, to a given E-mail address. It runs from a Unix cron job on my host every morning at 2 AM and queries my local news server via NNTP for the headers of any new articles posted to this newsgroup. About 10 new posters on average receive the message each day. Though substantially silent-running and low-maintenance, the script has suffered from two minor "oops" events:

1. Some as-yet undetermined file write error (possibly from a quota hard-limit on the system) truncated my previous-poster file to zero, and accidentally sent the message twice to a small number of recipients (essentially the posters of articles to rec.radio.amateur.misc in my local news spool on Friday, February 19, 1999).

2. A bug in Version 1.2.1 of the Typhon news server (installed by my ISP on or about April 3, 1999) which caused "References" instead of "Reply-To" headers to be returned when requested by the script using NNTP protocol, thus addressing the automated welcome messages to Message-ID contents. This mildly annoyed one postmaster who redirected to his mailbox all E-mail addressed to his domain, but with invalid mailboxes (e.g., the numeric, pseudo "addresses" used for Usenet article Message-ID headers).

In both cases, the problem was easily diagnosed, fixed, and enhancements were made to the script to ensure that the problem would not happen again.

Here are the milestones in terms of number of recipients, and the date each milestone was attained:

Recipients: Date: Average Recipients/Month (approx.):

0 September 21, 1996 N/A
5,000 July 5, 1997 625
7,500 December 7, 1997 500
10,000 June 2, 1998 420
12,500 December 20, 1998 420
15,000 September 29, 1999 280
17,500 May 30, 2000 310
20,000 April 7, 2001 250

Note that the rate is tapering off (likely following an exponential saturation curve).

Here's a breakdown of recipient's reactions to the letter over the last 55 months. All feedback was politely replied to, usually with a version of the rebuttal arguments given below:

About half of one percent of all recipients strongly objected to it. Spamming and junk mail seems to have rubbed sensibilities raw with regard to receiving unsolicited, possibly automatically-sent, E-mail. Also, there's obviously just no pleasing some recipients, including the one person who angrily replied that he did not ask to be welcomed to this newsgroup (sigh!). Two others (out of the 20,000 recipients), accused me of illegal "spam" and threatened to have my account, my ISP, and possibly my ISP's upstream connection if necessary, "permanently removed from the Internet." Since this didn't happen, I can only assume that these threats were disingenuous (Hint: If there truly is a problem, please let me know about it, but I cannot constructively respond to misrepresentations, insults, and threats). I choose to endure this occasional abuse because experiences in other newsgroups demonstrate such automated welcome messages to be "just barely redeeming" in terms of dealing with the massive influx of new users.

Another half of one percent thought it was a bit wordy (the message needs to be "one size fits all" and some recipients might be very confused without some background explanation; the message attempts to get to the point as quickly as possible, and some careful pruning and rewording of the message has helped reduce complaints, but pragmatically the message is also optimized to minimize the amount of followup correspondence I have to engage in). No one has complained about the length of the message in at least a year.

A handful of recipients complained that they did not post to the newsgroup (they did, usually by following up to a crossposted article in another newsgroup). In this case, the message was at least useful to warn users about such unintended crossposting. An increasing number of cross-posts (leading to followup postings) among rec.radio.amateur.misc, rec.radio.amateur.equipment, and rec.radio.swap caused a few more incidents of this type about a year ago, but these seem to have gone away as well

A handful of recipients didn't read the entire message, or didn't understand it, and asked to be taken off the mailing list (of course, this isn't a mailing list, and removing their address from my database would have the opposite of the desired effect). Two people even asked to be removed from the database anyway, each stating that they never intended to post to the newsgroup again (I honored their unusual requests).

A handful of recipients pointed out that they had been participating on the newsgroup for many years (It's possible that if you haven't posted in the last 55 months, or posted but the article didn't reach my local news spool, that you could potentially get this new user welcome message

the next time you post. However, you will certainly not get it more than once to the same E-mail address.)

About one percent complimented me for sending it (which I appreciate).

The overwhelming majority did not respond, indicating one of several possibilities:

- they approve of it
- they disapprove, but not enough to bother replying
- the mail was misdelivered (I got a few bounces, often from deliberately munged From: or Reply-To: addresses to ward off "spam.")
- they don't care

So, my impression is that the project is at least a qualified success, and should continue in its present form. At the very least, it seems to be substantially non-controversial. Having primed the previous-poster database with over 20,000 E-mail addresses, the chances of bothering an experienced reader with an unneeded introductory message is greatly reduced, and will get even smaller with time.

I'd be interested in hearing your opinions on this project. I'd also like to solicit volunteers to initiate similar projects in some of the special-topic newsgroups (perhaps starting with my previous-poster database as a baseline, and modifying the message to contain pointers to the more topic-specific FAQ's and information; the .digital.misc, .homebrew, .equipment, and .policy newsgroups seem to be good candidates for a project of this type). Barring any objection, I may choose to do this myself in the near future.

For those who are curious, here is the current version of the message, slightly modified in response to feedback as the project progressed.

Subject: WELCOME to rec.radio.amateur.misc
Newsgroups: rec.radio.amateur.misc
X-Loop: rec.radio.amateur.misc-auto-faq@oasis.novia.net

Hello,

This E-mail message is automatically sent to every new poster or cross-poster (as of September 21, 1996) to rec.radio.amateur.misc (and its associated mailing list, Info-Hams). It should be sent once, and only once, to each unique E-mail address. As the subject says, this is a welcome message. The Internet amateur radio community welcomes you to the newsgroups, including rec.radio.amateur.misc, and welcomes your input, opinions, and constructive participation. To help make you feel welcome, experienced participants like myself have chosen to systematically inform you, as a new poster, about useful information resources and user tips to help you get the most out of these newsgroups. I hope that you will consider this message in that spirit.

Please note that this is a one-time mailing, not a mailing list, and the presence of your E-mail address in my database prevents you from getting

the message again the next time you post. Because of this, a request to "take me off of your mailing list" would not only not make sense, removing your address from my database would actually have the opposite of the desired effect (where you would be considered a first-time poster the next time you posted, and get the message again).

* * *

1. The news.announce.newusers newsgroup, moderated by Jon Bell, et al, contains a number of very informative articles providing an overview of net-etiquette, suggested writing styles for electronic forums, and other various do's and don'ts concerning Internet culture. If the articles have expired at your site, you may also view them via your World-Wide Web (WWW) browser (such as Netscape, Mosaic, Lynx, or Internet Explorer) at:

ftp://rtfm.mit.edu/pub/usenet/news.answers/news/

2. The Amateur Radio Frequently Asked Questions (FAQ) List, formerly maintained by Diana Carlson, KC1SP and Ian Kluft, KO6YQ, has recently been resurrected by John Seney, WD1V. The majority of the original content of the FAQ remains the same, but now it's a hypertext document with hundreds of links to radio-related sites and is a significant resource to all students of amateur radio - regardless of their license status. It may be accessed as a WWW Page:

http://wdonev.ne.mediaone.net/hamfaq/index2.html

It is also available in text form. Send an message to John's E-mail address below with the words "HAM FAQ" on the subject line.

Please direct any submissions, feedback, or administrivia regarding the FAQ to wd1v@amsat.org.

3. The Amateur Radio Elmers Resource Directory is an excellent supplement to the FAQ as it's a directory of "Elmers" (mentors, experts, and gurus) for amateur radio who can answer questions via Internet E-mail and via the various resources (such as special-topic FAQ Lists and WWW pages) that they maintain. It is accessible both as a WWW page:

http://www.novia.net/~pschleck/elmers/

and as flat text files:

ftp://ftp.novia.net/customers/pschleck/elmers/

Please direct any submissions, feedback, or administrivia regarding the Amateur Radio Elmers Resource Directory to elmers-request@novia.net.

4. The Guide to the rec.radio Newsgroups, originally written by Jay Maynard, K5ZC, is now maintained by Jeffrey Herman, KH6O. It provides an excellent overview of all of the USENET newsgroups devoted to amateur and CB radio. It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/personal-intro

5. The rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet, also originally written by Jay Maynard, K5ZC, is now also maintained by Jeffrey Herman, KH6O. It contains a number of good pointers for reading and posting articles concerning the buying and selling of radio and radio-related equipment on the USENET newsgroup rec.radio.swap (which, with the sole exception of rec.radio.amateur.boatanchors for vintage equipment, is the only appropriate forum for such articles). It may be accessed from:

ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/swap-guide

Please direct any submissions feedback, or administrivia regarding the above two resources to jeffreyh@hawaii.edu.

6. The national amateur radio society of the United States, the American Radio Relay League, has a presence on the Internet. You may access their comprehensive and informative home page at:

http://www.arrl.org/

or their automated file server by sending a message with the word "help" to:

info@arrl.org

(They also have information about amateur radio organizations in other countries.)

7. Read the newsgroup first to see if your question has already been answered. You may also view, and search for keywords in, older news articles (going back to March of 1995) at the Google (formerly DejaNews) archive:

http://groups.google.com/

Many topics have been discussed before, often in great depth, but the articles have expired from your local news server. Services like Google allow Usenet a much longer "institutional memory" that can greatly benefit both new and experienced users.

8. If you do post to the newsgroup, give as many details as possible. After you post, read the newsgroup for a week or two to see all replies to your posting. If you wish, ask for responses by E-mail and offer to post a summary if others are interested in the answer to your question. Note that it is (almost without exception) inappropriate to post your article to all (or even a significant subset of) rec.radio.amateur.* newsgroups. Please pick only the most relevant newsgroups (usually no more than 2 or 3), and post your article as a simultaneous cross-post (check your newsreader documentation) so that only one article is propagated, and the article is only shown once in a newsreader.

9. Remember, USENET newsgroups are based on the idea of mutual aid. USENET only works if we put as much into it as we get out of it. Good luck with your experiences with amateur radio and the amateur-radio-related USENET newsgroups.

73, Paul W. Schleck, K3FU

(Text of article adopted from Tom Boutell, World Wide Web FAQ Maintainer, with modifications.)

Leland C. Scott and another amateur, doug adair, have conspired among each other and have been attempting to start all kinds of trouble in another group for quite some time now. A visit to the cb room will reveal a bit of these folks true nature. Do a back search and see how doug came into the group and how he digressed from there. Leland has just recently stepped up his forging of names of regulars in the other group, targeting me because he does not agree with my political views and, well, to be perfectly honest, he is a bit troubled. I am a cber, I do not use foul language, I do not use excessive power, and I do not trespass into ham bands. This is the only post I will make. Any others are forgeries.

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately
and
maliciously interfering with the radio operations of other licensed
Amateurs
on the 14 MHz Amateur band. This interference has occurred at various
times
in the last several months and includes broadcasting music and other
unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be
self-policing. Operation of the type described above is contrary to the
basis and purpose of Amateur Radio and degrades the service for
legitimate
users. This serves as a Warning Notice that such operation will not be
tolerated. Additional incidents of operation of the type described above
will result in a monetary fine being levied against you and in
revocation
proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

Enforcement Bureau

The ARRL is nothing but a publishing house now for QST, the most
expensive BLACK AND WHITE magazine around..!!!

AND, it's mostly advertising.....

I will never be a sucker for another 'subscription'.....

What has the ARRL done for us lately.?????

You are so far off base it isn't even funny. Who is John Perry Jr.? What blueriver.com account? You need to learn how to interpret headers.

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately and
maliciously interfering with the radio operations of other licensed Amateurs
on the 14 MHz Amateur band. This interference has occurred at various times
in the last several months and includes broadcasting music and other
unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be
self-policing. Operation of the type described above is contrary to the
basis and purpose of Amateur Radio and degrades the service for legitimate
users. This serves as a Warning Notice that such operation will not be
tolerated. Additional incidents of operation of the type described above
will result in a monetary fine being levied against you and in revocation
proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

Enforcement Bureau

There will always be disrespect for so called freebanders who operate illegally. If you want respect, then do what is necessary to earn respect and don't operate illegally.

As we speak, "commercial interests" are running operational
tests on spread-spectrum data transmission on HF. We're
starting to see the deleterious effects of concentrated
"sharing" SS and conventional modes in the same spectral bands
at UHF and SHF.

HF propagation measurements and forecasts are routine now,
courtesy of equipment, techniques, and studies funded by
Uncle Sam's military purse and easily for sale to the said
"commercial interests".

Tim, I have supported you insofar as the flames have been concerned. Some of the language - well, you know about that in the rec.radio.cb newsgroup! I'd like you to consider that radio (as well as highways, telephones, etc) is not an unlimited resource. All users have to share what spectrum is available. As you know, there is a power shortage in California. Perhaps, given more money, they can import more power. Just perhaps your house may lie in the way of power lines to be constructed. You wouldn't be happy. Somewhere, decisions must be made. I doubt you'd like someone broadcasting his 'dj special' right on top of your favorite television station. The same can be applied to traffic. If there were no rules, no traffic lights, no cops - you can bet very few people would be able to get anywhere. Some agreements have to be made - we call them laws. Probably all of us males in the newsgroup have participated in a speed contest at least once. Maybe we choose a deserted stretch of road where no one will get hurt. Maybe, maybe not. If the rules aren't enforced, the problem simply spreads into the main streets of towns, cities - well, you get the idea. These 'extra' frequencies are allocated to someone, whether the forestry service, amateur service, or whatever. There IS, of course, a service to join if you want to experiment. That is the amateur radio service. The tests are just about stone dumb easy. About the only thing that isn't there is 'you can transmit anywhere anytime you like'. My gut feeling is that the enforcement hasn't arrived in force yet for two reasons: one, the FCC has been really stripped to the bone - and two, the move has been away from HF for years - to the internet, satellites, UHF and microwaves; therefore fewer complaints. If someone tries to cut someone else off on the road (since it is HIS street) and ends up rear ending your car kitty-corner across the lanes (like happened to me about 3 weeks ago), you might really start reconsidering your position.

I happen to be John Perry and this guy has been harassing me for the matter of two months. Actually, I haven't checked in this newsgroup for two months. I can count several occasion where he has accused me of being someone else. Its pretty disgusting to notice his behavior considering that I have never had anything to do with the guy. I do realize that he is a baiter who has no life other than to cause trouble. Actually, I am still on blueriver.net and expect to be a subscriber far into the future. They have a great internet service provider! I have never even received a phone call or complaint from Craig Brown for any matter. Actually, I have spoken to Craig on a few occasions and he has never mentioned anyone bitching. As a matter of fact, I support his service 100 percent because he is strongly in favor of free speech and is just a good common person. So I fully support his service and the fact that he is a common person trying to earn a living. I would also like to state that his service is quite excellent and I have never had any trouble with downtime or not being able to connect. Try saying that with other national ISPs. I was on another ISP and had nothing but trouble staying connected. Again, its another attempt by certain individuals to smear other and begin their libelous activities. So Roger has it all wrong again but what else is to be expected. Actually, his posts about me are very libelous. However, he is not worth the money to take legal action against. I doubt if I would get much anyway even when I would win the case. It would be a pretty much hands down case of which I could afford and win. Actually, I am surprised that he has not been lit up legally so far. He has made these libelous writings against many people in this newsgroup. For example, he accuses me of being gay and AIDS infected. Neither is true especially considering that I have never had any sexual conduct with anyone. Actually, I would even submit to an AIDS test to prove this just for the satisfaction of discrediting white trash in this newsgroup. Certain people in here like to exhibit those smears to harass and harangue other amateurs. Personally, I have seen that a lot of people in this newsgroup are really tired of the crap in here. I can say that honestly and even place my hand on the Holy Bible to swear the truth. That is something that the libelous scum cannot claim nor would they have the fortitude to do so. Actually, the truth is that I have a very sucessful future coming up in front of me. I have a good job, make good money, have a college education, and many other pursuits of good moral and legal character. Actually, I am just tired of the cheap personal attacks and libelous comments being made in this newsgroup against my name. Actually, I haven't even been involved in this newsgroup for several months. Mostly, just check in here and see if there is some decent postings regarding ham radio topics. However, some miscreants wish to libel and harass other people. Actually, I am looking forward to the day when justice is meted out in regards to these matters. Actually, in the next month or so I am going to take my morse code exam and general test and get on HF. So I have a lot of things to do with my life, which is something that

many in this newsgroup cannot say. Actually, I don't have much more to say to the filth in this newsgroup other than for you all "TO GET A LIFE, AND DO SOMETHING PRODUCTIVE WITH YOUR LIFES RATHER THAN WASTING AWAY IN SOME SILLY FLAME WAR" Its too bad that many people in here have no life other than running their mouth. Oh well, its no wonder why they have no friends.

Sincerely,
John Perry

Hahahahaha!!!!!! Pretty funny considering that I have never lived in a trailer at all. Nor, do I live in a shanty. Nor has Craig kicked me off his server. Actually, I have been on Craigs server for 3 1/2 years and very pleased with his service. And furthermore, I will never have a Prodigy ISP for an account. Actually, I didn't even post anything regarding the letter. I wasn't even home or close to a computer when that was posted. Actually, its ok that you post my phone number because if I start getting harassing calls, the phone company will be informed. It would be nice for some halfwit with a sub-80 IQ to do so and then get their asses busted by the phone company and authorities for harassment. I hope that the children who do that crap get the punishment that they deserve. I would think that some people would have a bit more class. I happen to be John Perry and this guy has been harassing me for the matter of two months. Actually, I haven't checked in this newsgroup for two months. I can count several occasion where he has accused me of being someone else. Its pretty disgusting to notice his behavior considering that I have never had anything to do with the guy. The act must have been from Glen Dale, WV. That's folk humor there.

WELL, the fourteen year olds figure into Roger's method of operation, but the fact that they are girls is unusual. (he prefers boys) Yes, Roger is alleged to be fond of smearing feces on and about himself and others. After all, he has been spewing same on this group for months.

> duty and attained the highly distinguished rank of Seaman (E-2).

WOW! Did this person do all that AND get shot from the skies in Lebanon?
That's packing a lot of action into six short months. In fact, that's a lot
of "packing" period. It is very unusual for Navy E-2's to fly in helicopters
but if this person did all this in so sort a time, O'Loser must have been
nothing short of a Navy SEAL. The Navy marksmanship team, too? Man! What a
life of adventure!
Working in a nursing home must be pretty dull after all these heroic deeds
of derring do. Emptying bed pans is quite a let down for a Hero.
Maybe Mattel can fashion their next action figure after O'Loser...call it
the Lebanon Loser. They could include a six pack and a balloon with a very
large Baloney sandwich. Also included could be not one, but two facsimiles
of Honorable Discharges to display behind the Lebanon Loser Action Figure.
Batteries not included.

>neighborhood thugs who currently murder witnesses.

Those who take the long view, and plan accordingly, will have a survival
characteristic that gives them an edge on the stupid criminals. I have heard
stories of local "crime lords" who made sure _their_ neighborhood was peaceful
and safe, because it prevented the police from showing up at "awkward" times.
Besides, crime in the streets is bad for "business".
Remember, even Robin Hood had to start with people who were just trying to
get by - he gave them an "ideology" that allowed them to do more than survive.

>x no archive

But this post WILL archive your comments...

>The ARRL is nothing but a publishing house now for QST,

Well of course the League is a publishing house. On January 29, 1915, the Connecticut Secretary of State recorded the incorporation of the League under the following three articles:

"Article 1. The name of said corporation shall be The American Radio Relay League Incorporated.
"Article 2. The purposes for which said corporation is formed are the following to wit: The promotion of amateur radio, the organization of amateur radio stations, the promotion and regulation of amateur radio inter-communication, and the relaying of messages from station to station, and the printing and publishing of documents, books and pamphlets necessary to any of the above purposes.
"Article 3. The said corporation is located in the town of Hartford and the State of Connecticut."

Lucky for us that second article includes printing and publishing:
We participate in a self-taught technical hobby/service; not a day should go by without us gaining new knowledge WRT to electronics. The only publications I have always been able to turn to when questions arose which needed immediate answers were the League's pubs.

For some 85 years the ARRL has produced a handbook written so that even a novice can learn and understand from it. The government thought so highly of the Handbook that it was used to train military communicators during WWII. For the longest period, the Handbook was the greatest selling technical book ever published, in and out of ham radio.

During the 50s when SSB was finding its way into ham radio, there was no pub one could turn to to learn about this new mode except the League's SSB Manual. Also during that decade the FCC relaxed the regs regarding mobile operation - no one else published a mobile manual except the League (1955).

To whom could you turn to for the great ideas and techniques that appear in the Hints and Kinks booklets? Propagation and antennas: The Antenna Manual. Who else in the 60s produced a VHF Manual? And when that VHF crowd began exploring FM: The FM and Repeater Manual. The very first book in the 80s devoted to amateur digital comms was the League's Get Connected.

Publishing affordable technical books was one of the original goals in the League's charter; for 85 years they've made information available to the layman that was nearly impossible to find elsewhere. How in the world could you possibly find fault with this business side of the League?

Every ham shack I've ever visited in the last 30 years has had many League pubs on its bookshelves. We are (or at least were) a group with a voracious appetite for reading and learning. Luckily, the League has been able to feed us what we most desired.

Ham radio and reading are inseparable; and it takes a business to do what the League has accomplished.

73, Jeff KH6O

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Steven A. Tunder
72643 Glasgow Road
Freeport, OH 43973
Licensee of N8WGM

Dear Mr. Tunder:

The Commission has been made aware of an ongoing personal dispute between
you,
and there have been allegations of interference or jamming on the
Twenty-Meter
Band.

The purpose of this letter is to caution you both to review Section 97.1 of
the Amateur Radio Service rules, and to make certain that whatever disputes
that may exist are not carried over to Amateur Radio frequencies.

Please call me at 717-338-2502 if you have any questions about this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur radio

Enforcement Bureau

I am studying for my ticket and came across some questions refering to a "Gentlemen's Agreement".

Ex.

Which of the following frequency ranges is reserved by "gentlemen's agreement" for DX contacts during international 6-meter contests?

D. 50.100 to 50.125 MHz

--

A quick look in the ARRL Handbook and I didn't see anything about this "agreement"? Where is this written if anywhere?

Thanks,

Scott McClements

666, FUCKHEAD...priase SATAN!!!!!!!! BWHWHWHWHWHWHWHWHWHWHWAAAA!!!!!

Say, you still felching your dead grandmother, FUCKWIT?

It's the first of April, and Nuisance's Father, we'll call him "Joe" is out
of
town on business. He returns home to find out that his wife is at the
hospital
in labor having their first child.
He rushes to the hospital, and goes to his wife's side. She has already had
the child. He goes to the nursery to see the baby Nuisance.
He spots the name on a crib and motions to the nurse. She points at the crib
and Joe says, "Yes, he's my son."
The nurse picks up Nuisance and drops it on the floor.
Joe is aghast. The nurse says, "Don't worry." She picks up Nuisance and
slaps
it hard across the face several times. Joe turns white in horror as she
throws
Nuisance across the nursery. Joe is about to faint as she holds the Nuisance
by it's testicles and swings it around her head.
Joe screams, "Stop you're kiling my baby!!!!"
The nurse responds, "April Fools... It was born dead..."

BWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!
You think they'll be able to trace it back to my house??? bwhahahahahahaha!!
Maybe I shared your number with a few people throughout the United States, maybe some abroad, maybe not, how are you going to get them all, IDIOT?

>It would be nice for some halfwit
>with a sub-80 IQ

And it still would best your IQ, inbred Perry the Fairy. Your parents must've
been heavy drug users during your conception, Fairy.

> to do so and then get their asses busted by the phone
>company and authorities for harassment. I hope that the children who do that
>crap get the punishment that they deserve. I would think that some people
>would have a bit more class.

Come on, Perry the Fairy, stamp your feet.... BWHAHAHAHAHAHAHAHAHAHAHAHA!!!!

> I happen to be John Perry and this guy has been
>harassing me for the matter of two months.

You're babbling, Perry the crossdressing Fairy.

>Actually, I haven't checked in
>this newsgroup for two months. I can count several occasion where he has
>accused me of being someone else. Its pretty disgusting to notice his
>behavior considering that I have never had anything to do with the guy. I do
>realize that he is a baiter who has no life other than to cause trouble.
>Actually, I am still on blueriver.net and expect to be a subscriber far into
>the future. They have a great internet service provider! I have never even
>received a phone call or complaint from Craig Brown for any matter.
>Actually, I have spoken to Craig on a few occasions and he has never
>mentioned anyone bitching. As a matter of fact, I support his service 100
>percent because he is strongly in favor of free speech and is just a good
>common person. So I fully support his service and the fact that he is a
>common person trying to earn a living. I would also like to state that his
>service is quite excellent and I have never had any trouble with downtime or
>not being able to connect. Try saying that with other national ISPs. I was
>on another ISP and had nothing but trouble staying connected. Again, its
>another attempt by certain individuals to smear other and begin their
>libelous activities.

Backpedal, my thick-headed puppet.

>So Roger has it all wrong again but what else is to be

And *IF* I'm so wrong, why are you writing TWO fucking posts with
essentially
the same content to whine about it, FUCKWIT?

>expected. Actually, his posts about me are very libelous. However, he is not
>worth the money to take legal action against. I doubt if I would get much
>anyway even when I would win the case. It would be a pretty much hands down
>case of which I could afford and win. Actually, I am surprised that he has
>not been lit up legally so far. He has made these libelous writings against
>many people in this newsgroup.

Translation: Perry the Fairy would have to go to the "Legal Aid" office to
actually spend his meager McDonald's or 7-11 wages to afford a lawyer.

>For example, he accuses me of being gay and
>AIDS infected. Neither is true especially considering that I have never had
>any sexual conduct with anyone.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Perry the Fairy ADMITS to having sex with ANIMALS.....BWHAHAHAHAHAHA!!!!

>Actually, I would even submit to an AIDS
>test to prove this just for the satisfaction of discrediting white trash in
>this newsgroup. Certain people in here like to exhibit those smears to
>harass and harangue other amateurs. Personally, I have seen that a lot of
>people in this newsgroup are really tired of the crap in here. I can say

5399. Chinese now holding recon radio operators hostage.

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-08 07:04:48 UTC
From: "William F. Hagen" <whagen@inreach.com>
Message-ID: <3AD00D90.5909B37@inreach.com>
Source record: 91179

Since the chinese are now holding our 24 military recon radio operators hostage for their own political and military gains, which have nothing to do with international law, I think the president of the US should Make the following statements.
Call on the immediate release, set an immediate time and date, and back it up with the threat of grevious consequences including a rescue operation to bring them out.
Call on all americans to boycott chinese goods.
Call on all chinese in the country to disavow communism or leave the country immediately.
Recall all embassadors, and send all chinese embassadors home.
Send all chinese ships out of port, and have all allies do the same.
Freeze all chinese assets, and exclude china from international banking, finance, stock markets, or any other international financial institution.
Call for an international blockade of chinese ports.

It is time for countries who claim to stand for what is right and just to act, and not be threatened by terrorists or swayed by economic pressures.
All americans should stand up against this type of criminal act against their countrymen, and send a message to the chinese communists that their time has come to end their tyrannical control of China.
We want our radio operators back and we want them back now, no more games. Period.
William F. Hagen

Hey, Rog. What's a "pracher"? I searched the dictionary, even the West Virginia dictionary, and nowhere is the word "pracher" to be found. Enlighten me, oh glib one, if you can.
Garsh...you don't attend church? That is really no surprise. I suppose your life membership in NAMBLA would preclude that, wouldn't it?
Are you sure that Jesse Jackson is not your father? You do have the skin tones and the facial structure of Whoopi Goldberg....but I suppose that is just a happenstance, eh?
Now go give Big Marie a kiss on her cheek and shut off her computer before she wakes up and grounds you again. Maybe if you are a good little Woger she will make you your favorite breakfast. You know...fried foreskins and grits with smegma?

> I have heard
>stories of local "crime lords" who made sure _their_ neighborhood was peaceful
>and safe, because it prevented the police from showing up at "awkward" times.
>Besides, crime in the streets is bad for "business".

Galveston Texas had wide-open illegal gambling thru the mid-1950's
under the supervision of local "crime lords". Otherwise, crime was
extremely low. This was primarily because the bosses thought crime was
bad for business and would scare off the tourists. So they took steps
accordingly.

Low crime was also part of the tacit contract with the local citizens
and law-enforcement. Supposedly, there was a 4-year period in the 1930's
when there was not a single rape on Galveston island.

Do you get the feeling in the pit of your stomach that the ARS is being
set up
for a Humpty-Dumpty type of fall? There is a nagging feeling that all
this
dropping of qualifications that shoves the ARS ever closer to a CB-like
atmosphere is not without some goal in mind......

You have my vote! Cut them off at their knees and cut them off NOW! They need our money more than we need their cheap goods.
Let local retailers know you will not purchase Chinese goods.
Let your elected officials know that you want all Chinese officials ousted from our borders. Better yet, why not "hold" some of them in detention centers and offer to exchange them for our service men and women?
If they get away with this, they will only become more bellicose...they will not be appeased. Meet force with greater force and be decisive about it.

No need to sue the ARRL. No need at all. What would that accomplish, anyway? The simpler solution is to just not join. Fewer members would force the ARRL to raise dues. Higher dues equals fewer members and diminishing returns. The concept is simple...no money, no ARRL. What could be easier than that?

Always use a separate supply for logic than you do for the motors and
actuators. These two supplies can be and probably should share a common
ground (-) however!!

To combine batteries to increase how long they will last, use batteries
of the same voltage rating, charged to the same voltage, and then
connect them in parallel, all their positives together and then all
their negatives together and then use the combination of them as one big
battery of the same voltage.

To combine batteries for greater voltage connect batteries of the same
capacity in Amp-hours in series, plus to minus, and plus to minus in a
line, and the remaining end poles are the plus and minus of a large
battery of the same capacity as one of them, but higher voltage.

freebanding, those bands are allocated for a specific use while they may not get used often they do have specific uses, like some of the freq's below the 40 cb channels are for oil spill emergencies, like that is going to effect me in ohio. but regardless it is there for that reason. so lets out it this way, say you have several phone lines to your house (I do), one for regular phone use and one for internet access. and someone comes along and pirates your internet line for their pesonal use, you may only go online long enough to check email or do a quick web search, so it isn't in much use, but when you do need to use it, you find someone else has pirated it and is using it, wouldn;t you be upset, after all that line belongs to you not them.

I am not a ham YET, I amplanning on aking the test this month. those ham radios and the amps are sitting in a closet on shelves. I do not need power to talk to my friends, and for dx,,, it isn't a challenge to talk around the world with 1kw power, want a challenge? talk dx on a plain barefoot radio. I have done it it is alot more exciting. I am looking forward to gettingmy ticket and trying to make contact with low power.

O'Loser's helicopter could always be easily identified by the
Glad trash bag that was taped over one of the windows. LOL LOL LOL

O'Loser dreamed up most of the navy combat stories while working
in the galley cleaning dirty pots and pans, then would go to the navy
exchange and purchase the appropriate medals and ribbons for the
imaginary combat adventures. O'Loser was unmasked as a fake when
a REAL navy SEAL spotted the gold wings on O'Loser's uniform.
O'Loser was stupid and didn't realize enlisted personnel wear silver
wings.

And you're still full of stinky stuff. The ARS is loaded with
clandestine
freebanders -including you, if anyone can believe what you have said.
Yeah, I know, you say when a freeebander gets a ham license he is no
longer a freebander. That's not all youv'e said that is 100% wrong.
CW will be used as long as there a few OTs who still know how to use
it. When they're gone, CW is essentially gone as a useful communications
tool.
When there is no longer any effective difference between hams and
freebanders/CBers, then there can be no rational nor effective defense
of any part of our spectrum. You are helping to bring that sky down as
much as any (other) rabid codehater.

What is the question number? Not a well worded question. The "gentlemen's agreement' are also know as "band plans", which are not a FCC regulations. These plans are developed to reduce interference among operators. A amateur radio license requires that you accept interference and to not cause interference. So indirectly, bandplans are an operating requirement. Operators use 50.100 to 50.150mhz for international contacts, which is very very weak signal work. I believe that segment is always reserved for international DX, not just during contests.

I show the international 6m DX bandplan as 50.100 to 50.125, with the American calling frequency to be 50.125. There was a movement to increase the DX segment by moving the American calling up to 50.200.

Band plans are reported in ARRL's QST magazine. Look for "The World Above 50mhz" written by Emil Pocock, W3EP. You can also pick up free bandplan charts at the hamfests.

These questions are the frequency memorization questions. They other similar questions on the tests. The band plans are extensive, and you can not remember the entire plan, so memorize the question answers. Good luck.

I see it a little differently. Back during the Reagan years, the FCC was being nagged to open up bands for paid customers. Their only defense is that the bands are being used already. The Congressional Red Army (wanting all that commercial money) looked at the books and says "where are they?" and the FCC decided to boost the number of hams overall (thus the no-code Tech) AND boost the number on HF (thus Novice Enhancements).

Those same middle-managers are still at FCC, and they see that ham radio is almost trouble-free, compared to commercial radio enforcement.

Consider the following common scenario. Someone becomes a ham, buys a radio, and puts up an antenna on the back of his car. That is so much fun, he puts a rig in his apartment, using a mag-mount on the balcony. Then he gets into packet, and discovers that he can stick a digipeater on the top of the skyscraper where he works for a couple of day's pay. A couple of months later, he moves to the suburbs and decides that he wants HF privs, so he goes down and passes the upgrade exam. Then he puts up a mast with a cheap, used-from-the-hamfest antenna. That works okay, but he then goes from 100W to 500W, and wants a better antenna system, which consists of a 40-foot tower and a really good antenna. After a few weeks, he climbs the tower again to mount his VHF antenna, a UHF antenna and to string a wire for his daughter's SWL radio.

Total FCC investment in the entire package: Accepting 1 certification that he has passed the Tech, another for the General, and a license for the digipeater, all of which take a total of 5 minutes' work.

The same package for a commercial user? Two user licenses (each requiring coordination for EACH frequency being used), 7 footprint maps, and about 50 man-hours out of the Commission budget, to take up a very small chunk of spectrum. If there is any complaint about interference, a challenge to allocation, or addition of more radios (when cars begin to breed), the resource drain goes up in a big hurry.

Hams are big on the "self-policing" idea, meaning that there are thousands of frequencies that the Feds don't have to monitor. Commercials users demand INSTANT control of any problem, and that's expensive, too.

Trust me, they would rather have us than the commercial guys, and that's a large part of the reason that they have made it easier to get a license, made the license longer, and reduced the code.

5413. Anyone use an Drake L7 with a 1000 MP?

Was wondering if I need to use a keying relay with the radio. I have a 12 v keying relay I used with my Kenwood 850 and Kenwood 922 years ago. Do I need it or is the relay in the 1000 MP able to handle the voltage on the L7? Thanks.

5421. Newbie question - ATV / Telemetry

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-08 19:09:11 UTC
From: R C <zarquon@no.spam.zarq.dhs.org>
Message-ID: <9aqd0n$kr9$1@news-int.gatech.edu>
Source record: 91201

Just recently got interested in amateur radio, and have a few questions on a project I'm working on. If I'm asking in the wrong place, I'd appreciate an appropriate steer.

I'm designing a remote control/telemetry system for a model aircraft. The model aircraft is controlled on the aviation control band (75 mhz, IIRC), but I'm adding an A/V downlink (standard 900 mhz ATV camera from Supercircuits, .450 watts.) Since the audio portion is unused (it would be fairly boring, just the buzzing of the servos and the whine of the motor) I'm planning on using it for my telemetry downlink (weight is important in this application).

Question 1) Is this considered bad form in ATV to put data on the audio carrier? This is an extremely low-power application, so I doubt I'll be stepping on anyone's toes, but I figured I'd ask.

Question 2) I'll be transmitting my telemetry data by using FSK or PCM or similar methods (only have a 4Mhz AVR to do the en/decoding, so it has to be fairly simple). Can I transmit my ID in the telemetry stream, or should I add a CW ID routine?

Thanks,
Robert Cicconetti

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately
and
maliciously interfering with the radio operations of other licensed
Amateurs
on the 14 MHz Amateur band. This interference has occurred at various
times
in the last several months and includes broadcasting music and other
unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be
self-policing. Operation of the type described above is contrary to the
basis and purpose of Amateur Radio and degrades the service for
legitimate
users. This serves as a Warning Notice that such operation will not be
tolerated. Additional incidents of operation of the type described above
will result in a monetary fine being levied against you and in
revocation
proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio Service

5424. Problem with TS-940 - AGC or S-meter

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-08 20:07:44 UTC
From: n5zgt@swcp.com
Message-ID: <3ad0c508.96732087@news.swcp.com>

Hello Everyone,

I'm having a problem with my Kenwood TS-940S, in that I can receive signals, but they are rather weak sounding and my s-meter does not deflect to show their signal strengths. Sometimes, however, the signals sound great and the s-meter does work properly. And other times it takes a station with a 20db-over signal to move the s-meter (but even then the meter doesn't show them as being 20-over nine).

I've used another radio to compare stations to figure this out. My RF gain is set correctly (fully clockwise) and I have any other filters turned off. And I have checked all of my coaxial connections, and they are good. The antenna being used is a beam up 40 feet. Yet I'm still unable to figure this out.

I'm wondering if anybody might be able to offer some clues as to what can be causing this, and what I could possibly do short of sending it to Kenwood for repair (if they still work on a rig this old). Has anyone else had this problem with their TS-940?

Thanks and 73,
Brian, N5ZGT

Note also that in some areas, the "local bandplan" may deviate from the
national one. However, such will usually be noted on some local organization's
literature (or web site).

Actually, my grandmother is still alive and well. Of course, it just shows
that you are a piece of trailer trash by insulting my grandmother. Actually,
she is a much better person than you will ever be. Secondly, she is a very
faithful Christian lady. Hope that hell ends up being very hot for you. Just
showing your West Virginia colors again!

Don't forget that any current Technicians where the prior license code was an "N" are also "tech plus" - having upgraded from NOVICE instead of having been "downgraded" from a true license saying "technician plus."

What else can be expected from West Virginia. A good percentage of the people residing there are married to their sisters and own cousins. Plus, they throw their garbage down the hillside out the back door. Talk about laziness and white trash.

Remember, certain parts of Appalachia are notorious for having a lot of very dumb people. I know a lot of people who have been through Glendale. Many people there have eyes that cross and are close together. Not to mention, the green teeth of the shiteater variety. Put a couple of quarters in their ears, and their mouth drops and teeth fold back. All the while the Deliverance is playing in the background and a notorious loser from Glendale loves hearing the saying "Umm, You got a pirty mouth. Of course, in many cases when a hillbilly gets a divorce, his ex stays in the family because she will always be his sister. Not to mention the people with 8 kids running around barefoot outside the shack while mom and dad collect welfare. What the hell is wrong with this picture? You think that a lot of the lazy bastards would get a job and some sort of life instead of having more kids to place in welfare. Not to mention, the mass amount of bastardy caused by overabuse of alcoholic beverages. Makes one wonder how certain West Virginians came into this world. Of course, perhaps that explains why his brain is nonexistent.

You shouldn't be relating your life story here again. Why do you always talk about this stuff? Were you psychologically traumatized as a child? If so, please seek professional help.

Mara's chosen quoted SLee@houston-hunks.com (Stagger Lee) in alt.2600 on 6 Apr 2001 19:47:49 GMT as saying:

gah, get back in the KF

5438. Usenet Death Penalty against cotse and mail2news?

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-08 21:38:17 UTC
From: John Bowers <jb2101@bimminy.org>
Message-ID: <3AD0DA49.70430FF3@bimminy.org>
Source record: 91208
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc

Over in the news.admin.news-abuse groups, I see that a number people are calling for a UDP against cotse and the mail2news gateways that it uses (for those who aren't familiar with a UDP, it basically means that major news servers will refuse to accept posts from cotse, until it cleans up its act).

It seems that Steve Gielda has become viewed as a Usenet abuser in certain circles, and that they are actively considering blocking his service completely.

If that would happen, why then KC8JBO and several other abusers would go away.

Wouldn't that be a shame?

5439. Ohio/Penn DX Buletin #506

SB DX @ WW < KB8NW $OPDX.506
Ohio/Penn DX Bulletin No. 506

The Ohio/Penn DX PacketCluster
DX Bulletin No. 506
BID: $OPDX.506
April 9, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, N2IM, N3CR, W3EH, W3UR & The Daily DX, KJ4UY, N4AA & QRZ DX, AI5P, N5FG, KH6BZF, K8YSE, 4Z1GY, CO2TK, CE6TBN, DJ7ZG, DL1EK & DX News Letter, DL2SBY, F5PBL, F6AJA & Les Nouvelles DX, F8BBL, FM5BH, G3SWH, HA0HW, HK3JJH, HK5MQZ, IK7JWX, JA3MZB, JA0DMV, JI3ACL, PA1AW, RW3GU, SM0AGD, UR5EAW, UT7ND, VA3RJ, VK4AAR, Z32AM, ZK1CG and ZL3CW for the following DX information.

SPECIAL NOTE FROM EDITOR: Last week was a rough week for your editor. After about 7 days of no connection to the outside world, BARF-80 BBS was finally back on-line connected to the InterNet on Thursday, April 12th. How bad was the connection missed? After several hours of down-loading, BARF-80's backlog of messages was just over 1400 messages (and this does not include all the amateur radio UseNet New Groups). We were very lucky (and thankful) that "APK.NET" held all messages (few were lost) until the new DSL service was reconnect with BARF-80's ISP "NSHORE.ORG". The DSL service that pulled the plug because of bankruptcy effected over 1000 ISP and 81,000 users in northern Ohio. We are glad it is back!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1/April, through Sunday, 8/April, there were 233 countries active. Countries available: 1A, 3A, 3B8, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH3, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, R1MV, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T30,

T31, T7, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK,
UN, UR, V5, V7, V8, VE, VK, VK9N, VK9X, VP2E, VP2V, VP5, VP8, VP8/o, VP9,
VQ9, VR, VU, VU4, XE, XU, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU,
YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 54 ITU Zones available during the past week.
ITU Zones that were not active are:
3,4,15,21,22,23,24,25,26,31,34,35,43,58,59,69,70,71,72,74,75,90

PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its
size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3A, MONACO (SLIM ALERT). A station signing as 3A2DX was heard active on
April 4th, on 28495 kHz at 1400z and then QSYed to 15 meters CW. This
station is a "Pirate/Slim". DO NOT QSL. Save your money. Buckmaster also
has this station listed as a Pirate.

3W2KF IS NOW QRT. Claude, F5PBL, is now back in France as of April 2nd.
He sent OPDX the following and requested that we publish it:
"Tnx to everybody for the calls. Despite a high level QRN on my side, I
hope I have answered to most of your calls (except USA ... sorry guys,
the QRN was S9 towards the States ! Did my best but ...). That was my
very first DX trip so sorry for my lack of experience in pile-ups
managering! QSLing is OK via bureau or direct (Claude TERRIER,
18 allee du Mail, F-92360 Meudon-la-Foret, France). Note that the address
in Villeparisis (Zip 77270) is OK also but not the quickest one and
please avoid Aulnay (Zip 93600) because the Postal services will soon
stop the forwarding to me. QSL cards should be printed and delivered
within 6 weeks now. I will then start the answering process, starting with
direct requests, of course. I will NOT answer to eQSLs, sorry." For more
updated information and the log (which will be available soon), check
out the Web site at: http://www.qsl.net/f5pbl

4X, ISRAEL. Look for Yoram, 4Z1GY, to sign with the special callsign
4X2K during the Holyland Contest, April 21-22nd. Activity will be on SSB
and CW on 80/40/20/15/10 meters.

8Q, MALDIVES. Phil, G3SWH, and his XYL Jan, will be in the Maldives between
June 4-11th. Phil has been allocated the callsign 8Q7WH. This will be the
usual holiday type of operation, and he will have his IC-706 and R-7000
with him. Phil will be active on all bands 40-10 meters, CW only, as time
allows. QSL to his CBA with SAE and return postage or via the RSGB bureau.

8Q, MALDIVES. Peter, HA2SX, will be on tour again to the Indian Ocean. He
has received his old callsign which he used last year. Look for him to
sign 8Q7KK again from April 14th through May 4th. He will be using his
FT-1000MP Mark V w/200 watts. His antennas are a DX-88 + 160 m kit and
a windom antenna (by DK9FN) for 80-10 meters. His main operation modes
will be CW/RTTY/PSK31 and some times (only during his local daily time)

he will be on SSB and for special requests, on SSTV. Request for SSTV skeds should be sent by E-mail until April 12th. Peter's E-mail address is: kalocsa@infornax.hu QSL requests should be sent only to the following address: Peter Kalocsa, MARKO, Bakonyi ut 20, H-8441, HUNGARY. Peter will try to be active in the following contests: JA-DX, TARA PSK31, ES-OPEN-HF, YU-DX, and SP-DX RTTY.

9Y, TRINIDAD & TOBAGO. Charlie, N2IM, will be operating from Trinidad, as 9Y4/N2IM, April 26th through May 4th. He is expected to be on 20, 15, 10, and 6 meters, and possibly other bands. He will be using dipoles and 100 watts. Look for him on the air in the early morning and late evening. QSL direct to N2IM.

CO/CM, CUBA. Eric, F5SSM, will be in Cuba from April 23-30th. He will try to operate if he can get a licence.

DXCC NEWS. Bill Moore, NC1L, DXCC Manager, informs OPDX that documentation has been received for the operations listed below; cards will now be accepted for DXCC credit: 3XY2D Guinea and 3W2LWS Vietnam

EK, ARMENIA. Daniel, F5LGQ, will be here from April 9-21st, signing EK8ZZ. Look for him to be active during his evening around 1600-1700z.

FJ, SAINT MARTIN. Philippe, F6BXE (ex-TR8DX and FG5HE), has been active as FJ5DX since March. At the moment, he has been heard on 12 and 20 meters. He was heard this past week on 14176 kHz around 0300z.

FO & FO0/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS. Marcel, ON4QM/FO0DEH, will once again be active from this area, possibly the same dates as last year (Sept. 25th through Nov. 25th). He will be active from Pukapuka (OC-062) in the Tuamotu Island group, then from Rapa (OC-051) in the Australes and may be again from Reao (OC-238) in the Tuamotu.

FO0/A, AUSTRAL ISLANDS. Alain, F2HE/FO0CLA, is now active from Tubuai Island (OC-152) in the Australes. He will be there until April 27th. He will then move to Rurutu (OC-050) "maybe" without a radio. QSL via F6CTL.

FS & PJ, ST. MARTIN AND ST. MAARTEN. George, W3EH (ex K2KTT), will be at his St. Maarten home from April 11-17th. He will be on the air as PJ/W3EH and FS/W3EH, mostly on 10 meters phone (28.450 to 28.500) with appearances on other bands and CW depending on propagation.

HK0, MALPELO ISLAND (Update). By the time you read this Pedro, HK3JJH, should be on his way or may even be active from Malpelo. He is expect to be active from HK0 at the beginning of the week and stay active until around May 7th. QSL via N4AA. He was heard this past week and weekend active from a Lighthouse on Isla La Palma (IOTA SA-017) as HK3JJH/5.

HK0, MALPELO ISLAND (2nd Operation Update). Jairo/HK5MQZ and Hiro/HK5QGX have announced that the DXpedition originally planned between April 8-21st has been cancelled. The reason for this cancellation: The second voyage of the only ship that sails to Malpelo was cancelled; the scuba group that had originally contracted the ship cancelled out. Jairo informs OPDX that

the first sailing from April 6th and 13th has no problems and would have taken place. They had planned to sail on April 6th on the first trip and return to Buenaventura on the second sailing. But their second trip was cancelled and they did not have any possibilities for the return trip. Therefore they cordially present their apologies to all colleagues who were interested in this operation.

HONOR GIVEN. The Magnolia DX Association (http://www.mdxa.org) has sent an appreciation plaque to Chuck Brady, N4BQW, for his one man operation as 3Y0C. They wanted Chuck to know how much the DX community appreciated his one man operation from Bouvet Island. Chuck endured many hardships and much improvising to allow many thousands of DXers world-wide to make a contact with the VERY rare DXCC entity.

IOTA NEWS.....
EU-051. Look for IE9/IZ8AJQ and IE9/IZ8DBJ to be active April 26-29th from Ustica Island. Activity will be on 10/12/15/17/20/30/40/80 meters, using CW, SSB, RTTY. If if is possible, they will also try to work PSK31. QSL via homecalls direct or bureau:
IZ8AJQ - Erminio Cioffi (di Michele), Piazza Umberto 1 n.16, 84036 Sala Consilina (SA), ITALY
IZ8DBJ - Mario Pesce, Via Privata Falcin.2, 80070 BACOLI (NA), ITALY.

EU-096. Pekka, OH1lU, will be active from Kustavi Island April 13-15th. Their is no QSL information at this time.

EU-098. Wolfgang, DH3ZK, will be active from Poel Island April 13-16th. This island will stop counting for IOTA on February 01, 2005. He will be on 15, 20, and 40 meters using SSB and RTTY. QSL via home callsign.

EU-146. Eric, F5SSM, will be signing PA/F5SSM, April 14-16th, from Shouwen Duviland.

OC-154. Dan, VK8AN, has decided to take his equipment back to Troughton Island for his next few tours. His activity is expected to take place April 10-24th, May 8-22nd and June 5-19th. If there are any alterations to those dates we will be advised. Dan has some changes planned for this time. Besides his 3 element tribander and IC-738, he will have a linear amp (FL2100) to help a bit. Later he might try a vertical on either 12m or 17m and a long wire for 40/80/160 meters. QSL to VK4AAR (as before) DIRECT ONLY to: POB 421, Gatton 4343, Australia. A Reminder: Do NOT send SASE with Aussie stamps unless you have access to the right series (this is IMPORTANT). It is better to send USD (or IRC if you must).

SA-069. Pat, CA1URH, will be active from Santa Maria Island near to Antofagasta in the north of Chile. His callsign will be 3G1M from April 13-15th. Activity will be 40/20/15/10 meters. QSL via CE1VLY: Pat Valero Dazarola, P.O. Box 103, Santiago - 21

Chile.

J2, DJIBOUTI (IOTA Op). Jean Louis, J28NH, and others will be active as J28CDX from Dijboutian Island of 7 Freres (Sept Freres Brother) IOTA AF-059. They will be there from April 12-16th.

KH2, GUAM. Shige, JI3CEY, will be active as KH2/JI3CEY on HF and 6 meters from Guam between April 21-23rd. This is a short DX holiday from KH2JU's rental shack. QSL via homecall bureau or direct: Shigeru Yokoi, 2-138-1-704 Hamaderasuwanomorichonishi, Sakai-City Osaka 592-8347 Japan.

KH0, SAIPAN. Look for Akira, JA3AOP, to be active April 13-17th. Activity will be on all bands and 6 meters. There was no callsign mentioned. QSL via JA3AOP.

QSL INFO AND NEWS.....
TX5CW QSL CORRECTION. It is recommend that QSLs for TX5CW be sent to Jacky's ZL3CW address instead of his F2CW address as reported last week. QSL to: Jacques Calvo, P.O. Box 593, Pukekohe, Auckland 1800, New Zealand (NOT to Chatham Island, New Zealand).

Erik, SM0AGD, informs OPDX that all direct QSL requests received up to April 1st, for his January/February 3C1AG operation, have now been answered and were expected to be in mailed sometime last week.

The 5A24PA special event station by Abubaker is history now. Currently, Abubaker is working to get the logs sorted and sent to Alex, PA1AW. Alex reports that after he receives the logs, it will be about 2-3 weeks to get the cards, and another 2-3 weeks to get the cards out in the mail. PLEASE NOTE: Alex is NOT the QSL Manager for 5A1A. QSLs for 5A24PA go to: Alex van Hengel, Schoener 85, 2991JK Barendrecht, The Netherlands.

9M2TO QSLS (New address). Tex, JA0DMV/9M2TO, informs OPDX that all QSLs received before March 31st (2001) have been sent out to the JARL Bureau. PLEASE NOTE: The JA0DMV address has been changed. The new address is as follows: Tex Izumo, 827 Nakanojyou Ueda, Nagano 386-0034, Japan.

A61AJ QSL Situation. Bernie, W3UR, Editor of "The Daily DX", reports that all direct U.S. requests received prior to March 23, 2001, for QSOs prior to January 1, 2001, have been answered and are now in the mail. He is now (1/5 through) working on all direct DX QSOs received prior to March 23, 2001, for QSOs prior to January 1, 2001. Bernie hopes to have this completed by the end of this month. Next will be all direct requests received after March 24, 2001. He also states that 95% of all QSOs are now on-line at: http://www.dailydx.com/a61aj_search.html
If your QSO is not in the on-line log, more than likely it is in one of the hand logs. Please do not panic.

Kasimir, DL2SBY, reports that he has been active as LX/DL2SBY, IS0/DL2SBY, TK/DL2SBY and HB0/DL2SBY. However, many stations continue to QSL via the wrong address. His correct address is: Kasimir Bastian, Gruenaeckerstr.39, 71069 Sindelfingen, Germany.

Gene, UT7ND/ER0ND, QSL Manager for ER4DX, ER0N, ER/UT7ND and ER0ND, informs OPDX that many envelopes have been ripped open by what he calls " mail rats " and return postage in the SAE has been taken. He states that he can not send these QSL cards back direct, so cards will be sent back via the bureau. Gene recommends that when sending QSLs to him, use envelopes that are dense and sealed with tape. Also, it is better/safer to use IRCs.

NEW address for Fred, IK7JWX, (also IQ7J and IQ7J/7): Alfredo De Nisi, Vico della Cavallerizza, 4/d, 73100 - Lecce - Italy

Recently, AH7X was on Guam for the CQ WPX Contest. His QSL routes as AH7X go via JP1NWZ. Also, AH7X/PORTABLE is via JP1NWZ.

TO5T logs for the last CQ WPX Contest are now online at the following Web page: http://www.madinina.fr.fm
QSL TO5T direct via FM5BH not W3HNK.

VK0MM QSLS. Alan, VK4AAR, reports that he is pleased to announce that the backlog of QSLs for VK0MM have been cleared. He adds that each day's mail is now being processed the same day and mailed back the next day (24 hour turn around now!) Alan, states, "Just want to say 'thanks a million' to those amateurs that heeded our request for generosity with funds which we donate to Camp Quality (a children's cancer support charity). So far we have donated close to $20,000.00 and more will be welcome. US$$ are easily donated but IRCs will help a bit if you can't get greenstamps. Don't get the wrong impression... donations don't "buy" a card... you MUST be in the log also, of course. Please visit the Macquarie Island web site (it is regularly up dated)....."
http://www.geocities.com/vk0ld/1.html
QSL DIRECT ONLY to VK4AAR. Important reminder.... Do NOT (repeat "NOT") waste your time (and Alan's) asking for a QSL card for VK0LD. Cards are NOT available. Details on the above web site.

QSL Z39A to: Radio Amateur Society Of Macedonia, P.O. Box 14, Skopje 1000, Republic of Macedonia.

SPECIAL EVENT. Look for special event station 8J3EAG to be activated on 80/40/20/15/10 meters and VHF bands by several operators. Activity will take place from April 28th through May 27th during the East Asian Games from Osaka city (East Asian Games's Web site: http://www.eagocweb.com/) This station will also help in trying to promote publicity of Osaka to be a candidate for the next Olympic Games in 2008. Information about this station and an online log search can be found on the following Web site:
http://www.qsobank.net/cgi-bin/logserch.pl
QSL via JARL Bureau or direct to the JA3DBD: Souichi Miyamoto, 6-9-2 Habikigaoka, Habikino Osaka, 583-0864 Japan.

SPECIAL EVENT. Pepin, CO2TK, informs OPDX readers to look for station T40VPG to be active durings the 40th aniversary commemoration of the "Victoria Playa Giron", from April 14-15th. Activity will be on 160/80/40/20/17/15/12/10/6 meters on SSB and 2m FM, reference number EL-92. QSL via CO/CM Bureau.

SPECIAL EVENT. The special callsign TM6JUN will be on the air from "Utah Beach" from June 1-10th. Suggested frequencies are:
CW - 3526, 7026, 14026, 21026, 28026 and 50206
SSB - 3644, 7074, 14174, 21174, 28574 and 50200 kHz.
QSL via F8LDX (preferably via the bureau).

SU, EGYPT. Members of the Russian Robinson, and Russian Contest Clubs (RW3GW and RN3OA) will operate as SU1HR as Multi-Single in the CQ WPX Contest and a few days before and after the contest. A special award is available for two QSOs on different bands. The QSL and Award Manager is: Valery Sushkov, RW3GW, P.O.Box 3, 398000, Lipetsk, Russia. The log will be available at the RRC Web site at: http://rrc.sc.ru/

SV9, CRETE. Laurent, F8BBL, will be on the Island of Crete (EU-015), near Heraklion, as SV9/F8BBL, from June 25th through July 2nd. Activity will be on 160-6 meters CW/SSB using an IC-706MKII w/100w and long wire (L:80m) into an ICOM AH4. QSL card via home callsign (CBA 2001).

TM, FRANCE. Patrick, F6OIE, will use the TM0A callsign from May 13-25th. He will be active on all bands SSB/CW and is expected to participate in the CQ WPX CW Contest.

TX0C, CHESTERFIELD ISLAND (Update). Jacky, F2CW/ZL3CW, reports to OPDX that they found a 48 foot yacht last month capable of carrying up to 6 passengers. Originally, they wanted to travel with 4 operators and 2 divers in order to help share the cost. Unfortunatly, they could not find 2 divers. So, instead of leaving with 2 empty spaces (which still has to be paid as the charter and is a fixed price regardless the number of passengers) they decided to invite 2 more operators. The operators now are: F2CW, F5CW (FK8VHY), FK8FS, FK8FU, ZL1GO (JA4EKO) and FO3BM. They will be leaving Noumea, April 24th for a 3 day journey. In route they will be using the callsign TX4A/MM (for prefix hunters!). Their estimated time of arrival (ETA) is Friday, April 27th. They plan to depart the island on Thursday, May 3rd. They will again use the callsign TX4A/MM on their way back to Noumea (3 to 4 day journey). QSL for TX0C and TX4A/MM are via ZL3CW.

UZ5, UKRAINE (6 meters). Look for grid square LN08 and LN09 to be active from June 2-11th, by UX2MM, UX2MF, UX5MZ, UR5LCV, UX7MX, UX7MA, UR3MP, UR5MID and UR5EAW. The group of Ukrainians will be active as UZ5M in the IARU1 50 MHz June Contest and the UKSMC. QSL via UX2MM (Box 59, Lisichansk, 93100).

V4, ST. KITTS AND NEVIS. Larry, KJ4UY, will be operating again as V47UY in May from the 10th through the 16th. He will be staying at Karl's, V44NK, shack on Nevis. Larry is sending a KT34A and 2 element Hygain 40m beam as soon as he can find out how to do it. QSL to homecall, KJ4UY.

V5, NAMIBIA. Nick, ZS4NS, is expected to be active as V51/ZS4NS from April 10-20th. His activity will be mainly on 6 meters (listening on 50.110 MHz). He will, however, be active 20/15/10 meters also. QSL via N7RO.

VP9, BERMUDA. Rich, AI5P, will be operating as VP9/AI5P from April 29th through May 9th, from Hamilton Parish, Bermuda. This is primarily a holiday

trip with operating as a possibility. The emphasis will be on CW and on the WARC bands. QSL via AI5P.

ZB2, GILBRALTAR. Babs/DL7AFS and Lot/DJ7ZG will be active again, this time as ZB2/DL7AFS and ZB2/DJ7ZG from April 23-30th. Activity will be on 80-10 meters RTTY/PSK/SSB. Look for more info (and their logs) on the Web page: http://www.qsl.net/DL7AFS
Lot reports that they are still looking for a light weight power-amp (p.e.500-700 Watts) for their DXpeditions (Weight of 8-12 kg, incl.PS 120/220V is welcome). If you can help or have some helpful ideas, contact Lot at: DJ7ZG@t-online.de

ZD7, ST. HELENA. The ZD7K team is now active. Activity is expected to last until April 12th. QSL via GW0ANA.

ZK1, SOUTH COOK ISLANDS (Update/Help Need). OPDX received another message from Victor, ZK1CG, and he states the following (edited): "Jim/ZK1JD and myself are both running barefoot rigs. Jim has a dipole up about 30 to 40 feet for 20 meters, I know this because I threw the rock over the tree Hi Hi. He also has a vertical and a 5 element monobander on 10 meters up 20 to 30 feet pointed at a very high tree. I Have a G5RV up 35 feet and a Vertical and a Icom 751A (Thanks to W7VV Roger and Sue). I do have a KT34A that's on the ground that I'm trying to get parts for. It is over ten years old and has not seen much action on the Ham bands. I would love to get it up and running before we go to North Cook in October for CQWW SSB Contest with the group from Seattle and Canada for one week. If anyone has a old KT34A with usable parts on it that they would like to see and hear operating from both North and South Cook please contact me. I know not many old and used KT34As are around but you never know your luck...
I am running on a single battery at the moment so if anyone hears me FMing, let me know so I can save the rig. Yes, I know you may need the contact, but I like to skip around to the new bands when possible to give the hams a new one on 17 and 12 meters....... Regards, Victor, ZK1CG". QSL ZK1CG to: Victor Rivera, PO Box 618, Rarotonga Cook Islands.

From: Phil Kane <Phil.Kane@nospam.spam>
Message-ID: <cuvyxnansvbet.gbhqeq5.pminews@ca.news.verio.net>
Source record: 91227
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

On Sun, 08 Apr 2001 15:08:09 +0000, Keith Wood wrote:

>Total FCC investment in the entire package: Accepting 1 certification
>that he has passed the Tech, another for the General, and a license for
>the digipeater, all of which take a total of 5 minutes' work.

Separate license for the digipeater is no longer required
unless it's a "club" station.

>The same package for a commercial user? Two user licenses (each
>requiring coordination for EACH frequency being used), 7 footprint maps,
>and about 50 man-hours out of the Commission budget, to take up a very
>small chunk of spectrum.

All done by the licensee, his consultant, and the private
sector frequency coordinator. The FCC no longer does the
drudge work. If the coordinator approves the application
(submitted electronically by the applicant to the coordinator
and forwarded by the coordinator to the FCC, again
electronically) the FCC issues the license essentially
untouched by human brain unless there is a problem. Even then
the coordinator has the primary responsibility to resolve
issuance problems and disputes.

I once appealed to the FCC when I felt that the coordinator was
putting up ureasonable documentation barriers for my client to
meet when the client applied to set up a system to replace
someone else's abandoned system. Their reply was "sorry, bub,
the coordinator has the final word nowadays".

>If there is any complaint about interference,
>a challenge to allocation, or addition of more radios (when cars begin
>to breed), the resource drain goes up in a big hurry.

Done by the coordinator under a MOU with the FCC.
>
>Hams are big on the "self-policing" idea, meaning that there are
>thousands of frequencies that the Feds don't have to monitor.
>Commercials users demand INSTANT control of any problem, and that's
>expensive, too.

Again, done by the coordinator under a MOU with the FCC.

>Trust me, they would rather have us than the commercial guys, and that's
>a large part of the reason that they have made it easier to get a
>license, made the license longer, and reduced the code.

That I agree with wholeheartedly.

AIDS INFECTED "JPERRY" <japerry99@hotmail.com> confessed to being a FUCKWIT:

>You shouldn't be relating my life story here again. Why do you always talk
>about this stuff? Was I psychologically traumatized as a child? If so,
>I need to seek professional help.

When he was smaller, the unwashed troll JPerry goes up to his father and
says,
"Hey, Pop, know how old I am today?"
His father says, "No...how old?"
Johhny says, "I'm eleven!"
Johhny goes into the kitchen and says to his grandmother, "Hey, Grandma,
know
how old I am today?"
She says, "Come closer..."
She unzips his jeans and reaches her thin, spotted arm down into his
underwear.
She fondles his genitals for a few minutes and then she says, "You're
eleven."
He says, "How could you tell?"
She says, "I heard you tell your father."

Ill-educated "JPERRY" <japerry99@hotmail.com> lamely babbled:

>I don't really give a damn what you think.

Bullshit. You replied in that shrill, little girly voice very defensively.
How's that dead grandmother you like having sex with? You've adamantly
denied
being on here in two other posts, trying to make up shit as you go along.
So,
"actually," you're a fucking liar.

It will be funny when Dick Elliot
>or someone else lights you in court .

Fuckwit. You always were in the classes for the reatrded kids, though,
weren't
you, Perry the Fairy? It was amnusing to hear how you defecated in your
pants
in the classroom.
It will be equally funnier when the law enforcement authorities knock on
your
door with the FCC when they catch you qrming bands the STUPID FIARY
TECHNICIAN
isn't authorized to operate on. Got a beam heading from that today and it
came
form you vicinity.

Looks like you are wrong again on several counts. My education is far superior to yours. If you are such a bastion of intelligence, then tell us where you went to college and what you have done for a living. Oh, thats right, we do know that WV has large percentage of people living on the dole. Of course, a lot of them sit on their fat whopper asses while someone else pays the bills. Actually, my family are quite good, clean common people. Of course, that would bring about your jealousy considering that you can't claim the same. Too bad, so sad! No, my background about West Virginia comes from people who realize that the place is about the closest you can get to the Third World in the US. Of course, an ill educated maggot of your ilk cannot realize that West Virginia is not utopia. That would be a concept far above your IQ of approximately 65. That might been too much credit in your favor. Actually, I have seen single celled organisms with much more potential than you could ever exhibit. Hit the road and don't let the door hit you in the ass. Or is that your face, we can't tell the difference?

Only in your wildest dreams that youll ever make it. Enjoy hell. Actually, my grandmother is a much more classy person than you can ever be. Too bad that the mental institution did not give you appropriate assistance. Of course, it shows what kind fo idiotic psycho that you are. You are certainly a kook.

Actually, I have two parents that I financially help out. Yep, I have a pretty good job too. I bought my own computer with cash. Too bad the welfare department bought yours. Or was it a Social Security check? You shouldn't ask other people to buy your personal belongings, quite shameful. Oh, and by the way, post your picture and Ill post mine. Well, see who gets laughed out of the newsgroup. I'm 6 foot 3 and 250 and very well built.

Actually, the United States is a great country even with its problems.
People like you don't want anyone with an opinion to say their piece. So who
is the Nazi now? I have the right to free speech and if you don't like it,
then tough shit! Actually, its people of your ilk who try to harass others
into being silent that ought to hit the road and get on the next boat to
Cuba. By the way, I fully support our military vets and the guys who went to
Vietnam. Many of which I am friends with and understand their concerns such
as Agent Orange. What have you done for this country lately? I am not too
crazy about going to the Arab countries anyway. They would be more of your
liking and moral perspective.

> It's hard to beleive that this news group has become worse than cb.

Only because Reily Hollingsworth has successfully cleaned up
14.313 and much of 75 Meters. It's now too hot to conduct this kind
of stuff on ham radio as the FCC DF equipment (coupled with the DSCS
satelite system) can pinpoint an RF emitter from DC to daylight anywhere
on the planet in 5 seconds. Therefore, all the great old QRM'ers
we have come to know and love from 14.313 are now down here on the newsgroups.
Kind of a shame really as it was always more spontaneous in it's
comedic value when it was on the air instead of having to
read it in cyberspace. I sorta miss 14.313 really, it was ham radio's answer to
Comedy Central. (if anyone can say "hello" to "bathroom-man" for me, I would
appreciate it! He helped me diagnose and fix my malfunctioning toilet
on 14.313 a few years ago. He may have been an un-ID'd QRM'er but he
has sure got to me a master plumber in real life. He actually diagnosed
the problem on the air right on the nose having never seen my commode)
Stuff like this you miss from the .313 of the olden days, along with the nightly
Mike and Judy show which was no doubt the most popular soap opera on
20 for many years...

Another attempt to harass people, huh Roger? Do you file false reports to get people into trouble? Actually, I have never been anywhere but 2meters. I have listened for SW and Ham for years and then finally decided to get my license. I strictly obey all terms of my license since that is done by agreement with the FCC Part 97. Can you say that you have followed Part 97 to the letter? I have followed the letter of the law fully and have no problem doing so. I don't break the law and have no intention of doing so. Can you say the same? I have never even been below 30 MHZ. I don't even have 6 meter potential. What is your bone with Steve Tunder? I have emailed him on a couple of occassions and seems like he is a really good guy. Of course, in your mindset you dont like him. Tell us, I would like to hear your story.

Here is what is happening. The government can do what ever it wants. It is slowly doing that. The people want one thing or tell the government one thing and the government does what ever it wants. Even if the government sides with a minority view they lose if the majority wants something else. The bottom line is all lose if the government goes with the minority view. Georgia is a great example of this! So we will probably lose ham radio in time. I would gladly trade 220 MHz for 27 MHZ and I would gladly trade 2 meters for 24 through 30 MHz

Well well twisted head
You freebanders have NOTHING in common with me. Most freebanders genrate interferance. I don't! All freebander violate the rules and regs both part 95 and 97 just to name a few. Today and amateur license is easy to get and 5 words a min. cw in not much to ask for the love of the art. I myself dislike cw however I learned it and earned my amateur radio privaleges. Where as freebanders don't. You freebanders and cb trash are the reason we hams have to go to alot of extra expense and time to set up our amplifiers on 10 meters. You freebanders are the reason we hams have to deal with a thing called type acceptance. You freebanders make it to where it is illeagal for me the ham to manufactor more than one amplifier a year. So I think that you the chicken band freeloader have NOTHING in common with me tha Amateur Radio Operator. I also take great ofense that you think that you do. GO GET YOUR LICENSE! If you are a ham using that part of the band for illeagal radio use then you should have your ticket revoked and your equipment seized.

Sounds like a case of remembering all good if fact there was no good and your in denial! Good
work Riley Holingsworth. Now if we could have the FCC get Darrel Beard so all this illeagal freeband activity can stop in Madison, Clark, Oconee, Franklin, Ebert, and Banks counties here
in the great state of GA.

If you were to truly boycott chinese goods you would stop using your computer as your case was made in china,
your keyboard and mouse, in china, most if not all your cabling, joysticks, I/O cards and some mainboards.
By the way, I don't consider Taiwan a part of China, not even politically.

Ill-educated four-eyed GEEK "JPERRY" <japerry99@hotmail.com> who couldn't pass
the General exam becuase of his mental retardation gibbered:

>Looks like you are wrong again on several counts. My education is far
>superior to yours.

"It looks like you're wrong again on both counts," obviously, English isn't your primary language, bedwetter.

> If you are such a bastion of intelligence, then tell us
>where you went to college

Poor Perry the fairy, he went to that tenth rate barber college and he thinks
he's educated. Poor little thing, still a virgin, but he does like those
little boys, don't you, Johnny?

>and what you have done for a living. Oh, thats
>right, we do know that WV has large percentage of people living on the dole.

And an even larger percentage in Indiana, especially on your dirt road.

>Of course, a lot of them sit on their fat whopper asses

Always talking about your mommy's ass like that......one would think you'd get
your fill of putting your tongue up her ass all day, but not you, johnny the
limpdick babbling fool..

>while someone else pays the bills.

And in your case, it's Mommy and Daddy paying all your overdue credit card debt....

> Actually, my family are quite good, clean common people.

Yeah, for convicted felons and
drug-dealers......BWHAHAHAHAHAHAHAHAHAHAHAHA!!

>Of
>course, that would bring about your jealousy considering that you can't
>claim the same. Too bad, so sad! No, my background about West Virginia comes
>from people who realize that the place is about the closest you can get to
>the Third World in the US.

No, again, Doodlefuck, that would be your delapidated, bleak, dreary
ramshackle house there on the dirt road by the polluted lake. No wonder
Indiana ranks in the lowest spot for education. Too bad your IDIOT father
built it on that former landfill and toxic waste dump, which explains your
low, sloping brow, your rotten buck teeth, Virgin boy.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!

> Of course, an ill educated maggot of your ilk
>cannot realize that West Virginia is not utopia. That would be a concept far
>above my IQ of approximately 65. That might been too much credit in my
>favor.

Yes, John the AIDS carrying Fairy, it is much too optimistic for a Fuckwit
like you. How many times did the high school football team give you wedgies?
I
heard you were their pet geek to torment.

> Actually, I have seen single celled organisms with much more
>potential than I could ever exhibit.

Hmmm, been looking at your mommy's Venereal disease records again?

> Hit the road and don't let the door
>hit you in the ass.

MAKE me hit the road, you chickenshit.

> Or is that your face, I can't tell the difference?

Given the fact that you had to repeat the 4th grade 5 times, that's not
surprising. Usually, you have your tongue so far up your dead grandmommy's
ass
you think eveybody looks like that.

AIDS INFECTED FAGGOT "JPERRY" <japerry99@hotmail.com> does his favorite impression of "Pee Wee Herman" thusly:

>Too bad that you don't have much of a life. So sorry for you. Must be a
>quite pathethic life that you lead.
^^^^^^^^^^^^^^^^

You misspelled "exciting, " Fuckwit. Now run along and change your
underwear,
you've pissed your pants again. Poor Johnny, being sexually abused by his
parents like that.

Limpdicked Message From "JPERRY" <japerry99@hotmail.com> as he whined:

>Too bad Cotse doesn't have any sense because they should have booted your
>ass a longtime ago.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!! There's a true communist
if there ever was one. Thanks for admitting your Communist thinking, perry
the
aids-infected Fairy. Die of aids real soon, maybe the pain of causing one of
your school friends to die won't weigh heavily upon that little bb of a
brain
in that oblong, malformed head.

>By the way, Blueriver.net is one great ISP. They know the meaning of free
>speech. So keep on harassing moron. ["So keep on harassing, moron."]

I am harassing a moron. Whine and cry about it, you 250 lb. baby. Some
"college education," you have there, typical of the farmers of Indiana, who
don't know the proper punctuation of a sentence. "So keep on harassing
moron."
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
IDIOT.

I think I need to replace the final transistors in my HF rig. They are the two CTC CD2545 models. However, I cannot find these ANYWHERE. The
online lookup service said they are discontinued by a manufacturer without a web address. Doe ANYBODY know where I could get these or at least a
comproble substitute? Thanks!
Ross, AC7JO

OBESE CUMSWALLOWER "JPERRY" <japerry99@hotmail.com> whined:

>Actually, I have two parents that I financially help out.

Because they're too fucking drunk, drug addicted and plain lazy to keep a
job.
Two parents that are no longer together because of domestic abuse....

>Yep, I have a pretty good job too.

Cleaning toliets with your tongue is NOT a good job, FUCKHEAD.

>I bought my own computer with cash.

Yeah, down at GOODWILL....BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!

>Too bad the welfare department bought yours.

That's news to me..and them. Maybe I'll tell them you're impersonating one
of
their employees. It won't look too good when you're arrested yet again.

> Or was it a Social Security check?

No, STUPID, I'm still to young to get Social Security. Take off your shoes
and
PRETEND your webbed feet have toes, maybe that'll help you count correctly.

>You shouldn't ask other people to buy your personal belongings, quite
shameful.

It never stopped you from asking daddy and mommy to buy your ham equipment.
Too bad they reverted to type and stole it.

>Oh, and by
>the way, post your picture and Ill post mine. Well, see who gets laughed out
>of the newsgroup.

You think I'm going to just mindlessly do what you say, FUCKWIT? FUCK OFF.

How's that, dicksmoking FAGGOT?

>I'm 6 foot 3

OBESE CUMSWALLOWER "JPERRY" <japerry99@hotmail.com> whined:

>Actually, I have two parents that I financially help out.

Because they're too fucking drunk, drug addicted and plain lazy to keep a
job.
Two parents that are no longer together because of domestic abuse....

>Yep, I have a pretty good job too.

Cleaning toliets with your tongue is NOT a good job, FUCKHEAD.

>I bought my own computer with cash.

Yeah, down at GOODWILL....BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!

>Too bad the welfare department bought yours.

That's news to me..and them. Maybe I'll tell them you're impersonating one
of
their employees. It won't look too good when you're arrested yet again.

> Or was it a Social Security check?

No, STUPID, I'm still too young to get Social Security. Take off your shoes
and PRETEND your webbed feet have toes, maybe that'll help you count
correctly.

>You shouldn't ask other people to buy your personal belongings, quite
shameful.

It never stopped you from asking daddy and mommy to buy your ham equipment.
Too bad they reverted to type and stole it.

>Oh, and by
>the way, post your picture and Ill post mine. Well, see who gets laughed out
>of the newsgroup.

You think I'm going to just mindlessly do what you say, FUCKWIT? FUCK OFF.

How's that, dicksmoking FAGGOT?

>I'm 6 foot 3

Suuuure you are.. More like 5' 3".

>and 250

LARDASS.

>and very well built.

Oh, how do you get that wonderbra over those massive sagging tits, titboy?

DRAFT-DODGING COWARD "JPERRY" <japerry99@hotmail.com> whined loudly:

>Actually, the United States is a great country even with its problems.

Hey stupid, do you always begin every fucking sentence with "Actually," you sound like a fucking IDIOT when you do.

>People like you don't want anyone with an opinion to say their piece.

Shut the fuck up, you racist Nazi piece of shit.

>So who is the Nazi now?

Translation: "WHAAAAAAAAA" Whine and cry, bedwetter. Your "posts" remind everybody what a fucking inmature, little whiny, pussy, girl you are Fairy.

> I have the right to free speech and if you don't like it,
>then tough shit!

Fuck off, COWARD. You're too much of a FUCKING PUSSY to even ENLIST in the military.

>Actually,

Actually, you're a fucking stupid shit.

>its

"It's," clown college boy.

> people of your ilk who try to harass others

I "harass" IDIOTS like you who prove what a fucking idiot they are every time
they open their stupid mouths.

>into being silent that ought to hit the road and get on the next boat to
>Cuba.

Perry the Fairy, do you really squat to pee?

>By the way, I fully support our military vets and the guys who went to
>Vietnam. Many of which I am friends with and understand their concerns such
>as Agent Orange. What have you done for this country lately?

I served in the U.S. Military, you fucking COWARDLY PUSSY. That's what I fucking done for this country. Served it for fucking dopeheads like you to be
able to post their stupid shit on the internet.

I am not too
>crazy about going to the Arab countries anyway. They would be more of your
>liking and moral perspective.

Y"eah, like you know ANYTHING about me or International Affairs, college
dropout.

Boycotts of (mainland) Chinese goods would not hurt them anyway... they have the stuff made by prisoners in the first place, and can sell to any country in the world because they are cheap... What most would be boycotting anyway is Taiwan, which is not part of Communist China, and marks most if not all of their merchandise "Made in China"..

The earliest radio station KDKA is in Pittsburg EAST of the Misissippi.

If there is a real reason it is lost in antiquity. The line was at the Rockies at one time so those of us in the Mid-Continent have a mixture of both and there are Ks East, the most famous being KDKA in Pittsburgh. There was also a spate of 3 letter calls in the late 20s.

There is a resident historian on rec.radio.shortwave who can probably give you the gory details.

At one time, more or less pre-WW2, amateur calls in the lower 48 were Ws and Ks were assigned to the territories, K6 was Hawaii, K7 Alaska, etc. Life moves on.

Uhm... Brenda Ann, I have one simple word for you; FALSE!

Your statements lack authenticity. First: If, in fact, products are made by prisoners (as are some here, in the U.S., as well as *other* countries) it certainly is not all of them, as your statement implies. Second: By international law, Taiwan must inscribe their name on finished products manufactured there. This time, you go a step further, asserting that "most, if not all, of their mechandise..." is marked "Made in China." FALSE! There is an absolute ton of products with "Made in Taiwan" all over the place. Wake up, sister!

Somebody, please... what is it with this group? I lurked here, thinking that people who would listen to international broadcasts on SW would be above average in their understanding of the world, geography, culture, etc. To the contrary, it seems that many of you have never even ventured outside of your own state! Damnation! Just because you' heard', somewhere, the mainland China, and Taiwan, are separate political entities, doesn't mean that you need to extrapolate that into some bogus theory that you pull directly out of your anus!

Religion is all about control. They want to make sure people continue to
reproduce.
Abortion and contraception are also no no's.

A freebander who converts over to legal hamming after he gets a ham license
is no longer a freebander, Dick. What is it about that true statement that
you don't understand?

Some of my Yaesu's have done the same thing - sounds like signals are somewhat 'muted', at about 1/3 their normal strength although the controls on the rig are set okay...and it's an intermittent problem...doesn't happen all the time...

Sometimes my turning the rig off/on will correct the problem and bring the signals back to normal listening level, sometimes just pushing the enter key (like to enter a frequency manually) will reset whatever has gone wrong and return the rig to normal.

I realize you've got a Kenwood and I'm talking Yaesu, just wanted to let you know that I've had two rigs with your same problem - a 1G serial number FT-990 and a 0E serial FT-1000MP. When I've called Yaesu tech support they've denied any knowledge of the 'quirk' and go into their Sgt. Schultz routine - "I know nothinnnnggggg" - effectively leaving me to solve the problem. So much for Yaesu tech support.

Give the Kenwood techs a call - maybe they can help. How about passing along the answer back to the group?

I don't think your hopes will be fulfilled. Unless you can explain exactly why you choose to break the law, and how your behavior represents a form of civil disobedience that can somehow benefit society, I think your activity shows an appalling lack of care and respect for the rest of society.

I can't respect "freebanding". This is a prime example of uncivilized behavior. You know what the law says. You could get a license (or so you claim), and yet you flaunt the laws and regulations we all live by. And then, to top it all off you ask the community who are governed by these laws to respect you.

What an example of arrogance and stupidity! If this is a typical example of the way you think, I can see why you don't have a license:

You are an idiot*.

I hope you get caught and they throw the book at you.

So, what do you freebanders do that is worth of respect?

Do you offer your communications services for public service events or disaster recovery agencies? Nope. Can't do that.

Do you teach kids in schools all about radio? Nope. You're performing an illegal activity. Can't do that either.

Do you conduct research of any kind? Nope. A respectable article would have to identify you by name. Can't do that.

So, did you at least achieve something notable? Nope. Didn't even have to pass a test of any kind. I mean, who would make an award for an illegal activity?

Gee. What do you guys do anyway? OH, that's right. You cuss and splatter all over each other. And some of you get *embarrassed* about this.

I don't know how anyone could respect that, or why you'd want them to.

From: Jim <nj3t@surfshop.net>
Message-ID: <td3rd2oboeoaf5@corp.supernews.com>
Source record: 90995

Hi and thanks for reading this.

I have a Icom IC 3230H dualband rig with a problem mic.
Seems that as soon as I plug the mic into the rig it keys the transmitter.
I checked the obvious possible problems (mic cord) but still the mic keys
the rig when plugged into it. I plugged an HM-36 mic into it and all works
fine. (The HM-36 came with my IC 737). I'm looking for a schematic
for the HM-56A mic so I can trouble shoot it.

Does anyone have a copy of it's schematic ?

Is there anyone that has had this same problem ?

Thanks,
Jim

>How much is the
>League worth right now?

I'd say a tornado going by 225 Main Street in Newington should be able to make at least $950,000 worth of improvements *minimum*.

A lawsuit would be a very good thing for the ARRL at this time. It would reveal to the Board of Directors what they should be focused on and not the things they have been focused on of late. If you did sue them you might not even have to go all the way to court. You could drop the lawsuit if the League Board of Directors would admit and agree that:

1.) Restructuring was a mistake. Ham radio is dumbed down now.

2.) Restructuring isn't producing knowledgable operators.

3.) They were wrong in proposing their restructuring proposal.

4.) That their restructuring plan was only meant to increase membership not improve ham radio.

5.) Their restructuring plan ignored the wishes of the membership.

6.) They made a mistake in not opposing the FCC restructuring plan.

7.) That they agree ham bands are now worse since April 15th 2000.

8.) That they will work to promote better licensing standards and exams.

9.) That they will stop acting like bunch blithering idiots.

10.) That they'll listen to their members and not ignore them.

If the League would agree to these I might even rejoin and start supporting them again.

"The Bathroom Man" is far from dumb and you oughtta see where he lives. I
have. Carefree Arizona is a very AFFLUENT community outside of Scottsboro.
It lies between Sedona and the greater Phoenix area. Beautiful homes framed
by Camelback Mountain. "The B.M." owns a major plumbing supply company out
there- a business worth many millions. There's a lot of green in the bowl.

NTE has a substitute: http://www.nteinc.com/

Select Semiconductors under the Crossreference drop-down menu. The equivalent is NTE317.
Then select Online Ordering to see where you can buy them.
For example, Mouser Electronics sells them for $60. Good luck.

You already kno why it isn't true. A former freebander who grabbed a
cheap and all-too-easy ham license while retaining his freebanding ways
for his usual forays outside the ham bands hasn't contributed anything
positive to the ARS.
Now tell us that rulebreakers outside the ham bands will be model
citizens inside them.

Well, Gromit, get ready for the flames, f.e., "You're obviously a liberal commie fag monkey lover."

Or something along those lines.

Yes, you'd think shortwave listeners would, by means of their exposure to the world and its cultures, be more well informed on matters international. Methinks the informed ones tend to lurk a bit more than the less - informed ones, but I'd rather not generalize, because that would be equal to impuning them, and then the flames would REALLY be on!

(big grin)

That's what I had in mind, but I haven't kept up and wasn't aware of the
"no separate" change.

No, but they are still responsible for it being properly done and
certified. Even when someone else does the work, it's still a pain and
it still sucks up resources. I can't think of a single government
agency chief who thinks that it's properly funded for the workload.

5545. TenTec Dinner at Dayton

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-10 02:09:04 UTC
From: Mark Erbaugh <mark@nospam.microenh.com>
Message-ID: <3ad26ccb$0$12825$f5f63664@news.tdin.com>
Source record: 91025

Hi,

I am coordinating a dinner get together for TenTec enthusiasts the Friday night of the Dayton Hamvention. It won't be anything fancy. I'm just getting a count and will make reservations for a table (or room) at a Dayton area restaurant. We'll just order off the menu and everyone is responsible for their own bill. Dress will be casual. The site is not yet determined as it depends on the anticipated turn out and the availability of Friday night space.

Just drop me an email with a valid return address and I'll let you know when and where.

73,
Mark, N8ME

BWHAHAHAHAHAHAHAHAHA..... You still think the quadratic formula has
parentheses in it. BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Maybe you should've looked at that Math website you "garnished" your
"knowledge" of the quadratic formula a little closer, sheep-fucker.

><sweeps hat off and bows>

Hmmm, you can really see why you have that CASE of Rogaine, cone-headed
geek.

The GAY-TEAM
- In 1972, a commando unit was sent to prison by a military court for gay
acts
they committed. These men promptly escaped a maximum security penitentiary
to
the San Francisco underground. Today, still wanted by the government, they
survive as soldiers of gay fortune. If you have a problem, if no one else
can
help, and if you can find them, maybe you can hire The Gay-Team. -

"Howling Mad" Eric Oyen- This flaming homo went insane after his
participation
in the deal a meal program failed one too many times. He now resides in a
mental hospital but The Gay Team frequently breaks him out when going on
assignment. He constantly annoys Herpes but he is still a valuable member.

Sgt. Herpes Herbie- The enforcer of the group, he pities the fool who dont
like drag queens. Although he can't stand Oyen, deep down he likes him and
has

saved his ass many times. His specialty is working on mechanical things such as hooking a vibrator to a car battery and new ways to tie back his schlong so
he appears as a woman.

"CUNTFace"Pubic - The best looking of the group, queers worldwide would do anything to get to see that fat naked ass. This smooth talking snake is the master of charm. Whether the assignment is infiltrating enemy lines or surviving on an island full of straight people, usually gets the blowjob done.

Hannibal Stagger Lee- The leader of the group. Using his vast array of eyeglasses and feather boas, he is truly the master of disguise. He can pass himself off as almost anything, from straight to bisexual. Stagger just loves
it when a plan "cums" together.
Just don't bend over in the shower with them.......

Exactly what rules do you think they would break? They have their choice
of modes, frequencies, and power. It is analogous to someone driving
without a driver's license for awhile and then getting a license.

We should expect the staunch support of China by Tim. After all, he is a resident of Canada, the very country that opened up relations with Communist China in the late 60s. Heck, the only people farther to the left than Pierre Trudeau were Brezhnev, Castro, Ceaucescu, Ho, and Chairman Mao.

TS850 -- 80-million serial number (1996 - late production). Loaded! Has Digital voice recorder, Voice synthesizer, cascaded high quality 400 Hz INRAD cw filers in both IF's, 1.8 kHz INRAD narrow SSB filter. Has been modified to make auto antenna tuner work on transmit AND receive. An absolute "10" cosmetically and electronically.

Was used to make 909 QSO's and a clean sweep in 2000 ARRL SSB Sweepstakes with only 100 watts.

Also have DSP-100, which enhances SSB and CW signal on transmit.

Sell whole package for $1400 plus actual shipping cost.

e-mail Steve at W3SY@arrl.net

Yup! Woger is up and running again. Just look at the times of his posts. Obviously Rog has no woman in his life other than his Mommy. He is 46 yoa and still living at home. Whatta guy!
He has been home, what? Six years since moving back, according to him? Let's see...that would make him forty years old when he moved back in with Mommy. This is rather odd for sure. He is now forty six and still living at home with his mommy. This is even more odd!
Something is very, very wrong here! Oedipus suffered from a similar malady....

And if you ARE a member you still don't have a de facto voice. They can
and do routinely ignore the bulk of the membership- those who differ
with 'official' philosophy.

Boink, indeed, Gromit!

I've been a monkey lover for many, many years, naturally, and I, too, am a homosexual (but please don't tell my fiancee, she'd be very upset). On behalf of all homosexuals (who, of course, speak for each other as a group quite freely), I've got to say that "*" would never make it in our little clique - he has the WORST taste in shoes, and very bad breath!

Got my ham license in 1983, back in the 7th grade (good old days...we had a ham radio club at Washington Junior High), and I think I started my quest into homosexuality the first time I fondled a mike!

(giggling)

Of course, "*" will take this quite seriously (he does read our posts, even though he claims to have killfiled every one of us, and the entire NATIONS of Canada and the UK). But I hope "*" doesn't take it too seriously - you see, I'm rather taken, and he's just got no taste - fella doesn't know how to dress!

Fairyishly yours,
(Hey, is that a word),

Steve

Have you served in the military? If so, branches and dates, please. I wanna see bonafides, Snit. I doubt very much that you'd rise to the call (emasculated male metaphoric imagery aside), as you don't have the guts.

Sneeringly yours,

S.

Hmm... how do I say this without coming across too abrasive? Let's
see now... ok, here goes.

#1 You don't know me, at all. Therefore, you have no basis from which
to make your flimsy judgement.

#2 You seem to have difficulty with lexical processing. In other
words, the overall logic of what you say is disjointed, and rather
poorly articulated.

#3 It seems that you do not have the slightest understanding of the
term "patriot." Additionally, you seem to be under the delusion that
one can "own" threads, and therefore tell others to "get out."

#4 You would very likely benefit from seeing a pyschiatrist,
regularly, because you definitely need help. Pity you have so much
hatred for people whom you don't even know.

If you have nothing of _value_ to add to the discussion, then please
don't post useless blathering. Thank you, kindly.

And a final suggestion; rot in hell, bitch.

Nice post, "Stevie." I understand what you mean, girlfriend...
PUH-LEESEEE! My wife never understands my homosexuality, especially
when I turn on the HF radio, and start humping the ac/dc converter
from behind! (not only am I bisexual, homosexual, asexual, non-sexual,
amoral, immoral, immpotent, and dislexyic, but i'm also a deeply
devout satanist... i worship the DEVIL, every chance i get! hatred
and fire are my two closest companions! hmm, perhaps i should cast an
evil spell, on "*"? Gosh, it's ju)st heavenly, the feeling, when
tuned to 30 meters! Gush! Gush!

Hmm... I'm concerned that "*" might not find us attractive. :(Do
you still think he'll do us up the bum? I sure hope so. Bumming
around with radio butties is the best fun! Hmmph... I bet he's got an
extra large, super deluxe model mic!

Well, toodles for now, and may satan look over you, and destroy anyone
who thinks about you in the "wrong" way. Evil will prevail!

See you in hell,

gromit, assistant lord of the underworld

Damnation! What's the herry, JPERRY? You act like Communism is some kind of replicating cancer growth, multiplying deep within your mind. Ah ha! That will be my evil channelling for this morning.... yes, with the power given to me by the allmighty SATAN (can you say, SAYTUHN?), I shall transmit cancer, of the most destructive kind to japerry99@hotMALE.com! Oops... wait a minute. Lord Darkness, SATAN, mentioned to me that evil might have difficulty being routed via TCP/IP protocols. Drats! Hmm... wait, I know! I'll have JPERRY listen, read, eat, breathe, the "HAL TURNER RADIO SHOW" for 24 straight hours. That'll trigger some form of cerebral malfunctioning. Wow, could it really happen? I mean, think of it, SATAN and the "HAL TURNER RADIO SHOW" as strategic partners! Wow, talk about the ultimate!

I see it now, Hal "Satan's Hate Monger" Turner, will begin each show with "Highway to HELL", by Lord Satan's favorite group, "AC/DC" (and of course, the favorite group of *all*COMMUNISTS, HOMOSEXUALS, MENTALLY HANDICAPPED PERSONS, ENVIRONMENTALISTS, LIBERAL SCUM INTELLECTUALS, CATHOLICS, and anyone else that the oh so R I G H T wing is afraid of). YES! WHAT A GREAT INTRO TO HAL's NEW SHOW, sponsored by none other than SATAN!

IN SATAN AND COMMUNISM WE TRUST,

gromit, SINOPHILE with HOMOSEXUAL thoughts of gang banging the entire listening audience of the "HAL TURNER RADIO SHOW," while reciting from the Communist Manifesto (strictly for emphasis). Sorry Hal, SATAN called, and I had to follow. After all, I am liberal scum. Puhahahaha!

So telling someone its not a good idea to incite people against Chinese resident in the US since lots of them have nothing to do with the PRC is "staunch support" of the PRC? Damn, sounds like you need to work on your reading comprehension. You do realise don't you that most Chinese in the US aren't from Communist China?

Hey Vince.. restructuring is a fact. Get over it.

A multiple choice 20 WPM Morse code test doesn't teach anyone much.
It's no loss.

Taking "inventory" of their "assests" for possible future "action."
Hmm... sounds like an coded way of saying you want to check out their
UNITS and have a big ole' gangbang down at the glory-hole.
Satan approves of your burning desires for the flesh, Lloyd. Now, get
on down to that glory-hole and get your hands on some Chinese ass-ets,
and units! Have fun!

I've only an ultra-light, would that do? I enjoy flying it at low
altitudes, while only wearing a jock-strap. I also have installed
ultra high-power loudspeakers on the wings, and thus would be able to
re-broadcast the "HAL TURNER RADIO SHOW" to ward off any of the
opposition.
>
>JOIN THE BOYCOTT OF CHINESE GOODS

Their backs have already been broken, while slaving away to make all
the things you have in your home. Your so-called Christian Christmas
relies heavily on the broken backs of the "commies" so that you can
enjoy more "Christian products" designed to increase your ability to
alienate all others with points of view that differ from the
"faithful." (read crap-full).

However, Satan would be proud of your BOYcott. He thinks the young
boys make the best sexual sacrifices, as you seem to do. Just ask Hal
Turner, he has vast experience with young BOYs on COTTs. Now, you go
on out their and get you some Viager, and rev'em up! Good times!

Dr P,

Heh. Having just left there, I can assure you that isn't the case anymore. The old Balinese is still there, though, empty and rotting away on its pier. Shoud fall right in when the next good hurricane comes close.

Another intersting thing about Galveston is their opting out of the Social Insecurity scam back in the late '70s/early '80s. The county still takes the same amount out of the workers' paycheck as under SS, but invests it privately. When the worker retires, he/she actually gets MORE per month in benefits than their previous monthly salary, not less like the SS ponzi deal.

It was so successful (and so embarassing to the gubmint) that the door was slammed closed on that "loophole" posthaste. The last I heard, the gubmint is trying to force the county back into the SS system, since every day it operates on the free market, it exposes SS for the fiasco it is.

Dr J (no not the basketball player)

What does that statement have to do with the topic? People who operate
without a license (for an operation requiring a license) are breaking
the rules. After they get the license they are no longer breaking the rules.

How do they know what the bulk of their membership thinks? I'll bet
90% of ARRL members have never let their thoughts be known to the BOD.
With so few members who ever actually make their thoughts known to
the BOD, the BOD can rationalize almost any philosophy.

Suddenly, I seem to have a discrepancy between the operating frequency and the display reading on the ham bands with my VX-1 HT. The display seems to read about 10 kHz low on 2m (i.e., repeater on 146.79 comes in when the display is set to 146.78) and there is also an actual frequency vs. display error on 440, although I have not yet estimated the amount of offset. There seems to be no discrepancy on the FM broadcast band (but of course the channel steps are larger and 10 kHz error would be hard to notice). This discrepancy seems to have just appeared suddenly. A hard microprocessor reset didn't change anything. Anyone else ever have this problem and/or know of a cure?

What cha wanna bet that the "thing that must not be named", the eldritch
@.*, has the same military veteran's status as former President Clinton?

Ever notice that most of these poor things which refer to themselves as
"patriots" and/or claim to be "militia" are, basically, anonymous, abusive,
very uneducated and obsessed with homosexuality?

As well as - as you put it - "gutless".

Being a "gentleperson", I would have referred to these pathetic losers
("loosers" to them) as suffering from back problems and abdominal problems
(no backbone and no guts). But then I'm such a nice guy.

Let's see if I have got this straight. You are accusing me of being a communist even though I have been a strident opponent of communists all my life. Perhaps. if you had a better grasp of history you might begin to understand who the various Communist dictators were. Of course, the names Brezhnev, Mao, Castro, Idi Amin, Ho Chi Minh, Deng Xiaoping, Sukarno, Ceaucescu, and others would be incomprehensible to a droning idiot of your caliber. I must add that by your accusations that you have proven yourself worthy of being known as a fool. Of course, I challenge you to list your educational accomplishments and family background. Neither of which you would have the intestinal fortitude to accomplish. Please give us your educational accomplishments so that we can see what a shining bastion of intelligence you possibly may be. Doubtful, but I will at least give you a chance. Oh, and by the way, I have a mother and father who planned to have me. Can you say the same or were you the effects of a family tree that resembled a totem pole?

How many hams out there (including the ARRL BOD) have ever stopped to think just *why* less that 25% of the hams licensed by the FCC belong to the ARRL? The Aircraft Owners and Pilots Assocation (AOPA) is in many ways a similar organization. It's members tend to be older, male, and have a certain amount of technical savvy; both groups face regulatory, legal, and economic pressures to regulate or eliminate their activities. It can be argued that it is in fact harder to become a pilot than a ham because the FAA actually requires people to demonstrate that they can fly while the FCC doesn't require any demonstration that you know how to operate! Certainly learning how to fly and being an active pilot (unless Uncle picks up the tab) can easily cost more than being a ham (though some hams do spend more on radios, towers, etc., than some pilots do for airplanes).

Despite the fact that becoming and remaining an active pilot takes more money and effort than becoming a ham, AOPA boasts a membership of *over 50%* of the active pilots in the US.

Why? I wish the heck I knew. Since I belong to both organizations my feeling is that AOPA really *listens* to its members and what they want. My experiece with the ARRL over the last 24 years has been that the Board decides what's good for ham radio and the rest of us had better let them run things. Good grief, the Amateur's Code makes it quite plain that disagreeing with the League constitutes disloyalty to ham radio!

Why is the average age of hams going up? Well, the population as a whole is getting older. We Baby Boomers are the largest population co-hort in the history of the planet and we're getting older. The average age of pilots is going up, too, but AOPA isn't advocating that standards be lowered as a means of bringing in the younger crowd.

The president of the AOPA, Phil Boyer, has dozens of "town meetings"all over the country every year with AOPA members. He always has other members of the top staff along that people can talk to. The AOPA open house in Maryland draws thousands of people and over a thousand airplanes for a *one day event*. Yes, there are vendors with goodies and airplanes to look at, but there's also the chance to meet the people who run the show. The New England Division director didn't even make it to the AMSAT Symposium in Portland, Maine this year.

AOPA *gives away an airplane every year*! We're not talking junk, either. Every plane is either new or refurbished down to the last rivet and loaded with goodies. The latest one is going to be worth over $200,000. Just pay your dues and you have a chance. If you bring more people into aviation, you get more chances. How many hams might pay dues to the ARRL just to have the chance of winning a dream station? Even a *really* fancy ham station is going to cost a lot less than two hundred grand! Oh, and AOPA dues are only $35/year.

Maybe aviators are more passionate about flying than hams are about radio. Maybe they still feel that there's something special about what they do. Maybe the organization is more responsive to the membership. On this last point, AOPA has a *much* broader range of "certified services" than does the ARRL. Credit card rebates, aircraft loans, other banking products, some niche insurance products, car rental discounts, etc. But honestly I feel the biggest difference is that the management doesn't believe they are the font of all aviation wisdom and they *listen* to the people who pay the bills.

Very well said, Gray. *@* just has problems with his identity, it stems from his childhood, where he was abused sexually by his parents. That must also be
the reason for JPerry's autistic posts.

AIDS INFECTED ABORTION AFTERBIRTH "JPERRY" <japerry99@hotmail.com> whined just
like a little girl:

>Let's see if I have got this straight. You are accusing me of being a
>communist even though I have been a strident opponent of communists all my
>life.

Suuuure every opponent of Communism has that picture of Lenin prominently
displayed in their room.... in your parents' basement, where they can hide you
away from those rare visits from outsiders without too much embarrasment.

> Perhaps. if you had a better grasp of history you might begin to
>understand who the various Communist dictators were. Of course, the names
>Brezhnev, Mao, Castro, Idi Amin, Ho Chi Minh, Deng Xiaoping, Sukarno,
>Ceaucescu, and others would be incomprehensible to a droning idiot of your
>caliber.

Shit, boy, all you had to do is put in that Encyclopedia CD and pull up some
names so you can save what face you have left in this newsgroup. A 2.0 gpa
student such as you wouldn't know anything about history anyway. That's the
ONLY way you'd even know those names you babbled off.

> I must add that by your accusations that you have proven yourself
>worthy of being known as a fool.

What do you think your fucking whining and pompous statements make YOU look
like Perry the AIDS-carrying FAIRY?

> Of course, I challenge you to list your

Whooooooooooo, the GEEK is really getting tough
now.......BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Look, you ignorant, bleating foal, nobody gives a rat's ass about what YOU
demand or challenge. You're just a simple-minded little boy who's hiding
behind that computer keyboard. IF you are a fucking smart as you *claim,* then
why didn't you get a fucking higher class ham liscence than a no-code TECH?

<space reserved for Perry the FAIRY's backpedaling>

I apologize to the group for posting this here. Because the writer doesn't have the balls to show an email address I can't respond directly. At least I won't spam all of the groupsas he did.

What the hell you mean, "These people are not convicted of anything?"

Of course many of them are. Misdemeanor sentences of less than one year require jail time not prison time. These convicted criminals are doing jail time. And your wonderfully "accurate" source (is that you?) says, "These women have not yet been charged with a crime" which of course is total bull shit. If they were not charged and/or convicted of a crime, they would not be there.

While I don't live in Maricopa County and I don't especially care for Arpaio, the conditions there aren't any worse that thousands of GIs (or even Boy Scouts) have endured and they certainly weren't guilt of anything.

I don't see any children in the photos, so that's another figment of a not so fertile mind.

If you live outside of the USA, which I suspicion, please answer this: Why if our "human rights" are so bad, is much of the world's population trying to sneak across our borders?

Why do pregnant Mexican women sneak in so that their children can be born US citizens?

Why do Canadians come across to get medical care when you have such wonderful socialized medicine up there?

Why do a hundred Chinese cram themselves into a shipping container (with many dying before they get here) and spend a month in it so they can enter the US illegally?

And if Arizona is so bad, why is much of the US population moving here? Unfortunately, this is one of the fastest growing populations in the country. If you are so fearful of being incarcerated in Arpaio's jail, please stay home. We have too many lunatics moving here already.

Thank you.

5617. Re: Can we sue the ARRL? Yes we can.

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-11 01:57:13 UTC

Then again, if you sue and lose, the ARRL could file a countersuit because you filed a frivolous lawsuit. I wonder how much that would cost the individual filing the original suit and I wonder how much money they would have to pony up. One reaps what one sows.

Who cares he is a true loser. He has been crying the header thing emailing me and calling me not to nice things. Just like a loser. All that cb trash are losers I say lets annex 11 meters and put them some where on UHF or VHF where they can't steel good propagation.

Aloha Guys (and Gals)

There's too many newsgroups out there to find the exact one to answer this one particular question, which just happens to be about computers.

So I'm going to rely on my fellow hams, who are also experts in many other fields. Enough stroking? Here's the question:

How can I get rid of the Microsoft Networking logon prompt that pops up every time Windows starts? I know all you have to do is click Cancel, or ESC, to continue loading Windows, but why do I have to keep doing this every single time? Is there a way to get rid of the prompt altogether?

I already did a search on my browser engine and also on the microsoft.com site, but couldn't seem to find the answer.

Thanks for any help and 73s

Jim Titcomb

Naah, he is an illiterate dumbass. What else is to be expected of a guy who has facts about me? He claims that I am thirty years old but I am much younger than that. Of course, it just shows what kind of idiot he is. He is excellent proof that there is still White Trash in America. Of course, we all know who his masters are and who's ass he kisses for favor.

Poor, poor, Woger, the 45 year old loser with his $5.15 an hour job eating the garbage at the city dump. Actually, the city dump is in much better condition than the filthy hovel he lives in. Of course, we all know that poor Woger has no morals or sense of right or wrong and that is why he spends an eternity in here blowing his crap. It is no wonder why the guy is 45 and lives with his mommy. He doesn't have one true friend except for his few imaginary radio friends. You would think that he would focus on finding a decent woman but with his trailer trash demeanor he would be hard pressed to find someone to take his sorry ass. Actually, a lot of people who live in trailers are decent people who are either poor or down on their luck. Not Woger though, he is lucky to keep the windows and doors on after his drunken rages.

Of course, we all know what kind of politically correct ass kisser you are. If you are so much more intelligent than I am, then please do something to impress me or prove your intelligence. Of course, to an illiterate boob of your ilk, everyone who doesn't fall lock step into your agenda like a good little Nazi is obviously wrong. Henceforth, this shows what kind of a politically correct ass kisser you really are. Of course, it doesn't surprise me from a bunch of feminine acting males who promote their degenerate agenda. Those who expose your agendas of left wing liberalism are immediately derided and quashed. Of course, like most politically correct morons, you have never had a thought that was not approved by the PC establishment.

As far as whining, you should look into the mirror at that sorry face of yours. Actually, it might be quite difficult considering that your ass and face match. I guess that is why you have to wear a hat to take a crap so that you know which end to wipe. Of course, what else is to be expected of someone who is the effects of crossbreeding humans and non-human partners. It just shows the ultimate degeneracy of your character. Of course, an illiterate bastard doesn't care about character. Look at your hero Bubba the ex prez. Actually, I know the histories of the various nations much better than you ever will. Not to mention, that with two more courses, I will have a minor in in history through Indiana University. In all of my courses, of which I have a had several, my final semester grade was an "A" plus having the opportunity to teach class on occasion. Something that no one else in my class was able to do. Plus, I have been self educated about a variety of disciplines and fields. What is your expertise in? So lets hear about your educational acheivements, even if you have any. You won't list your alleged educational achievements because they don't exist. Why won't you list your degrees if you are such a brain scientist. Of course, in your inflated ego you must be a rocket scientist with NASA. Doubtful that you could ever achieve that lofty status due to your white trash background. You don't have the fortitude to list your education because it doesn't exist. Actually, I know exactly who my mother and father are. Got the records too and fully claimed and paid for too. Can you say the same? Or were your hatched? As far as me only having a tech license, I haven't even had the time up until next week to start studying my code. Of course, you probably had to take your technician written several times just to barely pass. Actually, I smoked my Technician test with ease. Very easy test! Shortwave and ham radio isn't even my whole life, unlike yourself. If you had to turn off your computer and radio, it would kill you and you probably would commit suicide. I could turn the radio off and not even listen it and not even miss anything. I doubt if you could do the same because you crave for attention that you cannot get from a decent woman. Perhaps someday you will achieve something worthwhile so that can actually have some pride rather than an overinflated ego that you currently posess.

Gray, you've stated eloquently that which I struggled to put into words.
Back and intestinal problems? I've filed that one for future use.

No response from Snit yet, sadly.

Peace,

Steve

I am looking for a Panasonic RF-2200 MW/SW Radio. If you have
one or can direct me to the right place to get one (not ebay), I would
really appreciate it.

Joest73@notsoHotmail.com (take out "notso" for correct e-mail)

Thanks

Joe E.

So long as they stay within the rules! When a freebander, newly
licensed as a ham, reverts back to his old ways - or a licensed ham
decides to "talk to those buys" with his ham rig, according to you he's
legal. Not so.
```

If he is freebanding in the ham bands and gets a license, he is
no longer freebanding. If he is freebanding outside the ham bands,
he has little incentive to continue to do so after he gets a ham
license. Just as getting married makes an honest woman, getting a
ham license tends to mellow out freebanders. Otherwise, they wouldn't
spend the time and energy to get a ham license.

Did you hear that a bill has been introduced into the Texas Legislature
that will allow illegal aliens to obtain driver's licenses? The theory
is the same. If one drives a car, it is better for one to possess a
driver's license.

> - or a licensed ham
> decides to "talk to those buys" with his ham rig, according to you he's
> legal. Not so.

"Those guys" quoted from a posting long ago, referred to me talking to
CBers using my legal Radio Shack CB radio. Nothing illegal about that.
And emergency communications are legal using almost any equipment on
almost any frequency. I'm surprised an Extra class licensee is ignorant
of such things.

If the FCC had not been so strick on experimentation of various communications
methosd, modes, etc., just think of how much new stuff we could invent.

Tom Frenaye recently told me that I am among a handful of people that regularly gives him my input on various Amateur Radio matters. Without input, it is not even a question of rationalization; the Board does the best it can with less data than it wishes it has.

The BOD publish their names, addresses, telephone numbers and email address in QST and on the ARRL Web. They go to conventions, hamfests and club meetings and ask for input. That is the "official" philosophy that I see.

The ARRL Board is virtually a closed society. The current New England Division director is on his "second time around" on the board. The first time he was elected was a number of years ago. He was the young go-getter who wanted to shake up the establishment and try to change things. His efforts were in vain. The "Old Boy" network of the BOD would have none of it. It would take a massive turn-over to have any effect on the BOD and the votes will never be there. Why? I happen to believe it's because many hams (me included) are tired of beating their heads against the castle wall.

In case you haven't noticed, the vast majority of hams don't even belong to the ARRL (and there will be one less this summer: me). Have you ever stopped to think about why? I opted out ot the League in the early seventies over the incentive licensing issue. I joined up again during the last solar cycle because I was working lots of DX and needed to use the outgoing QSL Buro...and that was the *only* reason. I'm not a "lurker", either. I've held offices in local radio clubs, done disaster work, handled traffic, run a major packet node, done contesting, DX'ing and OSCAR. But I don't like what ham radio has turned into and I place a large share of the blame squarely on the League's doorstep.

I've long felt that the League needs to have a professional public opinion firm do a major study of *all* hams, not just members, and one of the objectives should be to find out *why* more hams don't join the ARRL. I think the results would be interesting, to say the least.

Will somebody please point out to me one instance where experience has proven the BOD's vision of ham radio's future to be accurate? In that same vein, one of the things that bugs me no end about the League and it's leadership is that they will *never* admit a mistake. The incentive licensing program was a huge blow to ham radio at the time but I've never heard anybody say it was a bad idea.

Thats true Cecil. While their by-laws and constitution say they will do certain things to help ham radio. They didn't promise anyone they would do them. That would probably be their defense.

This is true. In all the years I was a League member I never imagined they would do such a thing. I would faithfully read my QST every month as a good member should and never seen anything that said they were changing their position on licensing requirements. In fact, every QST seemed to indicate that the membership didn't want change.
Then one day, they hit us with the restructuring proposal. That was a sucker-punch if I ever felt one.

You seem to know an awful lot about homosexuals. In fact, you must be an expert regarding homosexuality. You have such an base of knowledge about being a sexual pervert. Actually, your expertise might indicate that you have skeletons in your closet. Obviously, you have a perverted obsession with the act of homosexuality. I never have been and never will be homosexual. I don't like faggots and their agenda. But you obviously know a lot about faggots and what they do. Actually too much for general knowledge. The big question is. Have you practiced that and now are a reformed one?

No, you are doing an excellent job of being a fuckwit with your constant accusations and smears of others. Is it because you are a sorry old man? Is it because you are a loser and jealous of what others have achieved in life? Is it because you are from West Virginia, which happens to be an ass backward state? Or is it because you can't get attnention from a good woman other than your mommy? Please pontificate for us and explain why you are one messed up individual.

Awww, poor, poor Woger. Still pissing and moaning with his sorry assed life being a reprobate. Actually the best part of you ran down your daddies leg, whoever he may be. Actually I wash my own bedsheets every week. However, you must still have those wet dreams and that is why your 60 plus year old mommy has to wash your bedsheets. One would think that after 45 years, you would learn a little bit of hygiene and actually wash. But then again, when people like you act like animals it indicates that you live with animals as well. Oh, and by the way, how is that job cleaning toilets at the city dump sustaining you?

Exactly what percentage of the membership lets the ARRL know that they
feel that they have been screwed? You and three others? How would you
feel if you found out that 99% of the ARRL membership agrees with the
ARRL positions?

How do you know the ARRL proposal wasn't the majority opinion
of the ARRL membership? You are about 0.0005% of the ARRL membership.

Actually my male cousins are all grown up and in their twenties or older. So I don't have any little male cousins, ignoramous. Of course, you are focusing on your obsession with sucking others off. What else should be expected from Jizz Blowing Orfice? Actually, I woke up at three in order to go to work a little early and make some extra money. Something that a lazy ass of your ilk couldn't do. Actually, you probably have fun with pictures of Elton John, Ru Paul, both in drag . It wouldn't surprise me with your reprobatish mind. What is your so called major in? Mine is in business administration and will be a bachelor's degree after a few more classes. All which I expect to get an "A" in. Actually this year, I have 2 A's and one B while working more than full time. Actually,one course is good in dealing with blithering idiots of your type. It was actually a class in Human Resource Management which will be an excellent resource for problem employees of your type. Actually, I have paid for my college the old fashioned way by earning it. Something that many people do not have the balls to do. No, they just sponge off the system and the taxpayers who pay the bills for the losers who refuse taking care of themselves and their families. Actually, wouldn't that statement describe some people in your neck of the woods? As far as my attendance at a 10th rate university, Indiana University is one of the most well-regarded institutions in all of America. Of course, the little Hokie college in West Virginia where you got your five dollar degree could hardly be considered a university or even a high school. The school of business where I attend has students take an exam to compare to other schools. Of course, that explains why our students finish consistently in the 98th percentile and obviously far above many schools. Actually, I have never been a gofer for anyone. By the way moron, I have never even received any financial aid but paid for it out of my own pocket. Of course, West Virginia is known for many of its citizens living on the dole. Furthermore, idiot, please learn how to spell and use the work "eke." Its not spelled eak like you spelled it. Of course, there is another instance of your West Virginia ebonics. Is that what you folks say because you lack teeth in your mouth? Actually, I have a great future unlike yourself. No one gave me anything because I worked my ass off and performed consistent work for my employer. They know that and I know that. I have also been promoted from one job to another and had a great deal of responsibility.

No, I don't get picked on by anybody. Actually, I have a lot of friends and colleagues who I have the utmost respect for. That respect transcends different jobs, professions, factory workers, military vets, etc. So I pretty much get along with everyone expect for morons like you. Of course, an a@@hole of your type doesn't have any respect for anyone, even your own mommy. Actually, I haven't even had much time for 2 meters much less anything else. I will be studying for my general and the code in about a week or so. About that time, I will have the time on my hands to not only pass but to ace things. Then onto the Extra Class license. See I have much more to my life than just ham radio, something that you cannot claim, eternal burger flipper.

Actually, the fact is that I have an IQ that was measured at 130 in 1994 and has only gotten stronger in recent years. Actually, I have achieved the respect of my college instructors as well and have received many compliments from them for my course work in the business field. Actually, you are far too lazy to work in a farm or factory or anything else. So you shouldn't be bad mouthing productive people. By the way, I bet they are paying for your government subsidized housing and other benefits.

The ARRL defense would be to play a tape of Big Al or some of the other radio thugs who have been on for decades. This would prove that Amateur Radio has been on a downslide for years and that the restructuring had nothing to do with it. All one would have to do is listen to a tape of Dumbass Donnie, ND8V, or ex WB2OTK and the case would be closed.

As a former flyer and AOPA member I agree with your basic sentiments.
But there are some very basic differences between the membership of
AOPA and the U.S. ham population and it's inclination to join the
ARRL. Right off the top a large percenatage of members of AOPA are
professional aviators of one flavor or another which is a no-counter
wrt the League. Why would a ham join ARRL to glom the AOPA car rental
discounts?? (the League does have a Visa card "deal". Zzzz.)

Nor can some pimply noclue nitwit truck on down to his local Radio
Slack and pick up a Skyhawk for $149.95 and put it "on the air" and
become an instant "ham bands pilot" after only checking a few boxes in
a lame multiple guess written ham exams. We should live long enough to
see one of them pass a "checkride" on the ham bands with an FCC
"examiner" like pilots do with the FAA counterparts in their spheres
of operations.

You know. This thread reminds me of the early days of computers. QST was adamit about not featuring any articles about computers because they don't have anything to do with amateur radio. Guess what? It seems that every other article is about or has something to do with computers. The same situation exhists with restructuring. So what...

You think that was bad...you shuda seen it when 'incentive licensing' was dumped on us...back around 68 or so.

Right on Alice! Arpaio puts criminals in tents too. These tents were
good enough for American GIs but the wackos get their collective
panties in a bunch because living in tents is "cruel and unusual."
Boo Hoo.

This is the best damn thing that could happen for Arizona if it keeps
any more fruitcakes from moving here.

Excuse me, I *am* a member. The point I and many other hams are trying to make is that we feel alienated by the League and have decided to not support it. Personally, I'm so upset about ham radio in general that I've given serious consideration to selling all my gear and getting out of the hobby all together. The one thing that's been keeping me from doing that is AMSAT, not the ARRL. I could have bought some nice gear with the money that went to AMSAT over the last few years for the P3D/AO-40 campaign. The ARRL hasn't gotten a dime other than my dues. I believe in AMSAT's goals. I don't believe in the ARRL's.

Up all night from cumgargling his mommy's sperm autistic "JPERRY"
<japerry99@hotmail.com> gibbered like the little monkey he is:

>As far as whining,<BITCHSLAP!>

Yes, you're doing a MOST excellent job, with makeing EXCUSES and IKYABWAI>
Your doing YOUR hero, Pee Wee Herman, the sincere form of flattery in your
Peww Wee Herman imitation. Or is it YOU he modeled HIS character after?

. Look at your hero Bubba the
>ex prez.

Another former lover of yours, nahhh, he's probably waiting for you to do
another Monica on him and Hillary.

> Actually, I know the histories of the various nations much better
>than you ever will.

Actually, you're a STUPID YOUNG KID who thinks he knows it all, but knows
exactly NOTHING. Actually, you're quite humorous in your shrill, defensive
whines and excuses you make up as you go along. Actually, you know more
about
being a homosexual than Truman Capote.
Actually, you look more STUIPID with each and every post, Paerry the
aids-carrying Fairy.

>Not to mention, that with two more courses, I will have
>a minor in in history through Indiana University.

JUST a MINOR, DOODLEFUCK???? Typical lazy asshole... I MAJORED in Social
Sciences, the only reason you're taking that as a MINOR is because you lack
the fucking intelligence to minor in anything but an EASY Major. Typical
lazy
bastard, just like your good for nothing father.

>In all of my courses, of
>which I have a had several, my final semester grade was an "A" plus

Suuuuuuure it was.....more like D-, according to your counselor.

> having
>the opportunity to teach class on occasion.

So they let a RETARD teach another class of retards, so fucking what.
You're no mental giant, and you fucking prove it every time you open your
herpes-infected mouth.

> Something that no one else in my
>class was able to do. Plus, I have been self educated about a variety of
>disciplines and fields.

Fuckwit, self-education in beastiality, fucking the dead and fellating
little
boys is not anything to brag about. You're lucky to be able to read and
understand Dr. Seuess.

>What is your expertise in? So lets hear about your
>educational acheivements, even if you have any. You won't list your alleged
>educational achievements because they don't exist. Why won't you list your
>degrees if you are such a brain scientist.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!! You think because a little
PUNK TWERP stamps his malformed feet and whines and cries and demands
something form an adult, you think they're just going to comply? Go fuck
yourself, fuckwit. Do your own fucking research and find out, if you can.
It's
doubtful, since mommy and daddy BRIBED those teachers to pass you in high
school.

>Of course, in your inflated ego
>you must be a rocket scientist with NASA. Doubtful that you could ever
>achieve that lofty status due to your white trash background. You don't have
>the fortitude to list your education because it doesn't exist. Actually, I
>know exactly who my mother and father are. Got the records too and fully
>claimed and paid for too.

My, you're a DEFENSIVE little fuckwit, aren't you? You DON'T know who your
parents are, since they don't label stool samples that were thrown away.

> Can you say the same? Or were your hatched? As far
>as me only having a tech license, I haven't even had the time up until next
>week to start studying my code.

Excuses excuses, each one more LAME than the next. Face it, IDIOT, you
couldn't pass the General test if your life depended upon it.

> Of course, you probably had to take your
>technician written several times just to barely pass.

Yeah, and you probably will extract your head out of your ass SOMEDAY.

> Actually, I smoked my
>Technician test with ease.

Actuallly, you "smoked the bones" of the VE team to get you to pass. I
scored
100% on MY technician test. I know YOU had to take it several times, from
the
VE session records.

>Very easy test! Shortwave and ham radio isn't
>even my whole life, unlike yourself.

No, you perfer fondling your little boy cousins, don't you???? You like
sucking them off.

> If you had to turn off your computer
>and radio, it would kill you and you probably would commit suicide. I could
>turn the radio off and not even listen it and not even miss anything.

There isn't much happening on 2 meters, no-code GEEK!
BWHAHAHAHAHAHAHAHAHA!!!!

> I
>doubt if you could do the same because you crave for attention that you
>cannot get from a decent woman.

Says the guy who's still a VIRGIN.....BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!
What's the matter, Perry the Fairy, don't you LIKE girls???? Is that why
you're still a virgin, at least as far as heterosexual relations go.
Homosexual and perverse sex is a totally different story for you, isn't it?

> Perhaps someday you will achieve something
>worthwhile so that can actually have some pride rather than an overinflated
>ego that you currently posess.

IRONY ALERT

PKB alert.....Perry the aids carrying Fairy is projecting again.
<space reserved for Cumgargling Perry's backpedal and let's give him time to
look up "projection.>

Doing his best Pee Wee Herman impression, the aids-carrying "JPERRY"
<japerry99@hotmail.com> incoherently babbled:

>With your lack of intelligence, you would be hard pressed to be considered a
>homosapien.

"Homosapiens," you snot-nosed illiterate Homosexual PUNK. You need to look
up
the proper spelling of those "big words" if you intend to use them to cover
up
your inadequacies, Fuckwit.
You seemed obsessed with intelligence, is that because all of your teachers
and guidance counselors have told you that you lack any? I guess you want
most
what you can't have.

Taking a break from dressing in his hunchbacked mommy's clothes, "JPERRY"
<japerry99@hotmail.com> inanely gibbered:

>You seem to know an awful lot about homosexuals.

IKYABWAI .....This boy is such a lame assed piece of shit.

I get my information from you in those e-mails you send me, Perry the Fairy.
You ARE a fucking HOMOSEXUAL, why else would you still be a VIRGIN and don't
even have a girlfriend, hang out with older men in an internet newsgroup at
3
in the morning? Now, run along, Strichjunge, your street-urchin cousins want
you to blow them again.

5667. John Fairy Perry's sexual adventures

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-12 01:49:51 UTC
From: "Public <Anonymous_Account>" <remailer@xganon.com>
Message-ID: <5ef5f4c4b9b8ed0cdbde1742368ac1df@anon.xg.nu>
Source record: 90853
Cross-posted to: rec.radio.amateur.misc,alt.radio.scanner.flame_fest

A certain zoo had acquired a very rare species of gorilla. Within a few weeks the gorilla, a female, became very ornery, and difficult to handle. Upon examination, the zoo veterinarian determined the problem: she was in heat. What to do? There was no male of this species available.
While reflecting on their problem, the zoo administrators noticed John Faggot Perry, an employee responsible for cleaning the animals' cages. Now John Faggot Perry, it was rumored, possessed ample ability to satisfy any female, and he wasn't very bright. So the zoo administrators thought they might have a solution. Perhaps they could entice John Faggot Perry to satisfy the female gorilla. So he was approached with a proposition: would he be willing to screw the gorilla--for five hundred bucks? John Faggot Perry replied that he might be interested, but would have to think the matter over.
The following day, John Faggot Perry announced that he would accept their offer, but only under three conditions:

MY OWNED EXCUSE-MAKING BITCH "JPERRY" <japerry99@hotmail.com> lamely mewled:

>No, You are doing an excellent job of being a fuckwit with your constant
>accusations and smears of others.

IKYABWAI, try harder, STUPID. You sure are one whiny, mewling shitbag, Perry the Fairy. No wonder your parents keep you down in their basement. With your simian-mutant looks one can understand why you're still a VIRGIN. Not that your parents didn't try to get rid of you by trying to leave you at other people's homes.

>Is it because you are a sorry old man?

This so-called "sorry old man" has been roasing your ass in here while all you
come up with are Pee Wee Herman impressions.

> Is
>it because you are a loser and jealous of what others have achieved in life?

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Jealous of YOU??? BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!! Shit, BOY, what have you done to be jealous of? You haven't traveled in Europe, You haven't served in the military, you sure as hell haven't been to any college, besides
clown college. So what the fuck have you done except dress up in your skanky mommy's underwear and been a sexual release for your drunken father, whoever he is.

>Is it because you are from West Virginia, which happens to be an ass
>backward state?

But not as ass backward as Indiana, which has inbred mutants like John A Perry
the Fairy.

Or is it because you can't get attnention from a good woman
>other than your mommy?

Shit, BOY, I have had and still have more women than you'd ever dream about. Not that you DO dream about women, you dream about little boys and sheep.

> Please pontificate for us and explain why you are one
>messed up individual.

Please fuck yourself, maybe you'll break your virginity one way or another. Or not.

AIDS INFECTED HOMOSEXUAL "JPERRY" <japerry99@hotmail.com> who molested his cousins babbled:

>Awww, poor, poor Woger.

Aww, poor baby-raper John A Perry the Fairy. He has that cocksucker's lisp. that's why he sounds like Elmer Fudd on the air, according to those that use the KA9SHM repeater. That's how they can tell when W9SUN is qrming the repeater.

> Still pissing and moaning

I can see that.. So what else is new from you?

>being a reprobate.

> Actually the best part of me ran down my daddies leg,
>whoever he may be.

Actually, you finally admitted you are an adopted child.

>Actually I wash my own bedsheets every week.

Actually, you still wet the bed and shit your pants, don't you Perry the Fairy?
That's what the VE team that administered you test you fialed three times said to me. And you wash them every fucking night, so quit lying about it.

After fellating his male cousins, "JPERRY" <japerry99@hotmail.com> whined the
latest excuses:

>Actually my male cousins are all grown up and in their twenties or older.
<Shrill denials of his gay lifestyle and lack of education flushed>

Damn, you ACTUALLY suck off your cousins even if there in their twenties, what
a perverted family the Pr=erry family is. That's what the local law
enforcement in Salem says.

If you are as "educated" as you claim, you wouldn't need to tell people about
it over and over. But that is more of your inmaturity, and just plain
ignorance showing again, as always. You sure are defensive, little fuckwit.
You need to write a bunch of lame excuses and unsubstantiated bullshit to
cover your ass with each and every post you cheerfully respond to like one of
Pavlov's rabid dogs. You are one dumb motherfucker, Perry the Fairy. No wonder
you're a born again christian.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA. Faggot.

<space reserved for Perry the goatcumswallowing Fairy's shrill whines, he's
just a little girl in a so-called boy's body. And an grotesquely OBESE one at
that.>

Little girl AIDS CARRYING FAGGOT"JPERRY" <japerry99@hotmail.com>
wheezed out the following lameassed excuses:

>No, I don't get picked on by anybody. Actually, I have a lot of friends and
>colleagues who I have the utmost respect for

Actually, your LIES are getting bigger and bigger, unlike your penis which
is
why you don't have a fucking girlfriend....BWHAHAHAHAHAHAHA!!! And that's
wht
you mommy told me in bed last night. She still washes you off in the
bathtub,
she said, and said you regularly shit your pants.

>an a@@hole of your type doesn't have any respect for anyone, even your own
>mommy.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!
<sarcasm tags for MORONS like Faggot Perry>
Oh, such self-righeous indignation!!!
Whatever shall I do????? BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!

> Actually, I haven't even had much time for 2 meters much less
>anything else.

Fellating little boys in the playgrounds and public restrooms keep you busy
does it? Plus sucking off your accountant boss to "get ahead" wiles away
your
time as that flunky gofer.

>I will be studying for my general and the code in about a
>week or so.

Liar. You couldn't pass either one if your life depended upon it. You sure
as
hell couldn't pass the code.

>About that time, I will have the time on my hands to not only
>pass but to ace things.

Yeah, like you've aced that flunky gofer job for life..no advancement, no
pension, no nothing. Justr Johnny boy emptying trash baskets and getting
coffee for the boss.

>Then onto the Extra Class license. See I have much
>more to my life than just ham radio,

Yes, but being Michael Jackson's sex slave just doesn't beat out ham radio.

Little girl lost "JPERRY" <japerry99@hotmail.com> prevaricated:

>Actually, the fact is that I have an IQ that was measured at 130 in 1994 and
>has only gotten stronger in recent years.

Actually, your IQ is about room temperature in Siberia in the winter.

> Actually, I have achieved the
>respect of my college instructors as well and have received many compliments
>from them for my course work in the business field.

Actually, they're just trying to not hurt your little feelings,
know-nothing.

Actually, nobody believes your bullshit unsubstantiated statements about
your
miserable life, your so-called education or obviuous lack of it, or the fact
that you are nothing but a low self-esteemed, little whiny, snot nosed
homosexual PUNK.

So easily arsed, the homosexual "JPERRY" <japerry99@hotmail.com> whined:

>Not as boring as your dead assed mom

Oh, the so-called, unsubstantiated "170 IQ" Perry the HOMOSEXUAL Fairy
resorts
to a "yo' momma."

Here's how it's done, FUCKWIT:

Perry, yo mommaa's so stupid, she got fired from her job at the sperm bank
for
drinking on the job.

Perry, yo momma's so skank, the tautness of his face sours ripe grapes.

Perry the FAG, yo momma's so ugly she could make a mule back away from an
oat
bin.

Perry the aids faggot, yo momma's so ugly she resembles the Venus de Milo:
she
is very old, has no teeth, and has white spots on her yellow skin.

5674. John FAGGOT Perry's sexual adventures

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-12 02:37:55 UTC
From: KC8JBO <rmccall@MailAndNews.com>
Message-ID: <3AD9F56F@MailAndNews.com>
Source record: 90851

A certain zoo had acquired a very rare species of gorilla. Within a few
weeks
the gorilla, a female, became very ornery, and difficult to handle. Upon
examination, the zoo veterinarian determined the problem: she was in heat.
What to do? There was no male of this species available.
While reflecting on their problem, the zoo administrators noticed Mike, an
employee responsible for cleaning the animals' cages. Now John A. Perry, it
was rumored, possessed ample ability to satisfy any female beast, and he
wasn't very bright. So the zoo administrators thought they might have a
solution. Perhaps they could entice John to satisfy the female gorilla. So
he
was approached with a proposition: would he be willing to screw the
gorilla--for five hundred bucks? John replied that he might be interested,
but
would have to think the matter over.
The following day, John Faggot Perry announced that he would accept their
offer, but only under three conditions:
"First," he said, "I don't want to have to kiss her," and "Second, I want
nothing to do with any offspring that may result from this union."
The zoo administration quickly acceded to these conditions, but what could
be
the third?
"Well," said John FAGGOT Perry, "You've gotta give me another week to come
up
with the five hundred bucks."

Now now Roger, You shouldn't be illustrating your life story here. We all know that you have limited mental ability therefore you have to work at a job as a fry boy. As far as screwing gorillas go, is that how the family tree works in Glen Dale, WV. Were you the effects of cross pollination between your mother and a chimpanzee? Or are you the effects of your mother and father being from the same exact family? You know how you can circumcise a bucktoothed bubba from Glendale? By kicking his sister in the teeth.

Of course, you can't help the fact that you are the bastard child of a bitch. Put a couple of quarters in your mommas ears and her teeth would fold back. Of course, you are just the effects of being created from a polluted gene pool with a mixture between inbreeding on one side of the family along with crossbreeding with animals. Moron. Go back to your shitty job in social sciences making 10 bucks an hour. Not to much there huh. Of course, you probably instruct the other miscreants in how to make an ass of yourself. Dumpster boy.

Of course we all know that your IQ is on the same level as your shoe size. If you were so smart you would making more than 10 bucks an hour. Of course, thats the income threshold for you because you lack the potential to do any better. Low self esteem seems to be more of your though considering that you are an unemployable loser who lacks even basic rudimentary common sense. That is why you have a piss poor education in the social sciences from a second rate college somewhere in Bubbaland. Actually, no one hurts my feelings bubba. You show your white trash mentality every time you open your mouth just like the true loser that you are. Personally, I don't give a damn what an illiterate bastard like you thinks of me. I have more than enough friends and people who I am very close with. What happened to your wife? Did she leave you because you are such an asshole? Is that why you are 45 and back living with mommy? Or did you escape from corrections? Is that how you got the social sciences degree, by being on work release? Actually, on IQ, general education, and other factors, I can upstage you on every occasion. Where did you get that second rate degree at? Was it from one of those diploma mills which print fraudulent degrees? Tell us Mr. Wannabe. Actually, my instructors would laugh their asses off at your attempts to smear me. They would see that you are nothing more than a backwoods hick who is incapable of rational thought. Actually I am quite pleased with my life, however you must be quite obsessed with me. I am beginnning to wonder if you have certain proclivities. Actually, I can prove what I have to say which is far and above the dumpster diver lifestyle you lead.

Have you seen this with your OWN eyes? I am in and out of the
Maricopa County jails regularly and can dispute some of your
allegations. As to others, I am not sure.

e.g., to say these people are guilty of nothing supposes trials have
been held. Is that a fact? If so, why are they in there at all?

The 5 foot 3 midget spewed his fecal matter all over the newsgroup again in typical fashion.
I hear that it is quite common for the Wideman clan to defecate in their own front yard in ultimate hillbilly fashion. Of course, that does not surprise one considering that one of the clan constant speaks of sucking off cousins. You would know all about that sort of act, just like your constant talk of perversions and homosexual acts. Where did you learn all of that at? Did you learn it by using a lot of practice? Please tell us more of your background so that we can give you an accurate psychological evaluation. I don't even have a record with any law enforcement agency. Of course, in your bullcrap lifestyle you would always have to smear and attack others unjustly. But that is not a surprise with a character such as yours. You don't have much credibility to start with but that is not a surprise coming from a white trash reprobate of your ilk. You show your white trash lifestyle with your constant defecation on this newsgroup for almost a year. You are pretty much like a little kid craving for attention. Of course, you are this mental midget in a 45 year old body. Please tell us what happened to your so called wife? Did she leave your ass because you are such a loser? Actually, I can prove what I have to say, unlike a blabbering blowhard of your low class ways. Actually, if I am as obese as you claim then why can't you prove it. Why don't you show us a picture? Or would that picture indicate the buckteeth and crossed eyes indicative of an inbreed? You know, the face you see every morning with the eyes very close together and more gaps in your teeth. As far as perverts go, you should look into the mirror. After seeing that, you might decide to do yourself in. Screwball.

Actually, I hardly use that repeater. I have used other repeaters but never involved in any sort of QRM. However, you certainly have a track record to exhibit with your malicious interference and lack of respect for the rules. However, that is in exhibit here as well for the past year with your constant filthy denunications. I passed my technician's license test with flying colors unlike you. Actually, KA9SHM is not even a local repeater so I guess you are screwed up again. Not a suprise though considering that your birth was a questionable event. You have never even heard me on the air, so you are screwed again. Of course, like most flunk outs you never can get your facts straight. You must have an obsession with sexual perversion considering your constant blathering about sexual misconduct. Do you have skeletons in your closet that are coming out? Of course, you probably came out years ago. For the record, I do not have AIDS and have no desire for homosexuality. Actually, I have a great many women friends unlike you. Whatever happened to your wife? Did she leave your sorry ass? Now you on the other hand have a filthy obsession with the lifestyle. Of course, you exhibit your filthiness every time you open your goober mouth. Never been adopted, but I suspect that your dad is in a list of suspects. What happened to your daddy? Did he have some problems? Or do you even know his whereabouts? Lets talk, we need to give you serious psychological assistance so that you can get past your manic depressive state.

What women Roger? Are they all jail bait? How many times have you had to pay for it? The only thing you have ever accomplished as a 45 year old loser is to defecate on this newsgroup much to the chagrin of most participants. Its time for you to hit the road. 95 percent of the people in this newsgroup would like for it to return to a normal amateur radio group rather than read your sycophantic postings. That or they have killfiled you. Actually, I am about ready to killfile you because you bore me. Same old tripe coming out of your bastardized mouth, course you never worked at anything successful. That is why you make 10 bucks an hour with a college degree. Actually, anyone can make 10 bucks an hour without a college degree. Does your 10 bucks an hour include the welfare check or other assistance. Tell us all about West Virginia. We all know that West Virginia has a culture which supports throwing garbage out the back door and down the hill. Not to mention rusted out cars without wheels. Also, the old appliances sitting along the road. That sort of garbage is rare in Indiana however seems pretty commonplace in WV. Actually, I have a lot of friends who have been there and even related many stores. Kind of laziness isn't it? Of course, you must love that lifestyle! Why don't we see a picture of you? Is it because you look like an ass? Show us a picture Roger. Did the only picture you have say property of Glendale PD. Tell us about your college speciality of social sciences. That degree must be pretty valuable with your lack of earning power.

Actually, I do have a girlfriend. Of course, your girlfriend may have 5
teeth and be a midget. She would be improvement over taking your mother out
on a date? Perhaps something you can be proud of. So what are you doing
sitting home with Mommy? If you can get so many women, then why are you
single and in this newsgroup every night for 1 year.
Is it because women don't find you reasonably attractive.
Is it because you have more grease from KFC on your tanktop than in the
chicken? Tell us Woger! Buckteeth bubba

The Pink Triangle

You should see what I just did! I found one of those cute little pink triangles that the Gays put on their automobiles and I decided to "show" it off.
I procured an empty one-quart mayonnaise jar, filled it with urine, and dropped the Pink Triangle into the jar. I did this of my own volition and the urine was all mine.
The Pink Triangle sunk to the bottom of the urine. I thought it would have floated, but I was only exercising my artistic creativity with this project.
I plan to "show" this work of art at a local museum along with an AZT tablet that is embedded upon a soft chunk of cow manure.
I will not have to avail myself of any publicly supported monies to do so.
I feel that this is only freedom of artistic expression.

5690. Roger Wiseman

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-12 11:31:54 UTC
From: Rick Smith <ricksmith105@MailAndNews.com>
Message-ID: <3AE0A8AE@MailAndNews.com>
Source record: 90869

Could someone explain to me what the hell this Roger Wiseman's deal is? Is
he
one fucked up character or what? Its a damn shame that he don't get his ass
kicked off of the newsgroups permanently. Basically from what I have read,
this guy is a certifiable kook who needs to get a rubber room. From reading
his posts, one would think he is a sexual pervert with a lot of practice
with
cousins and little boys. Perhaps he is a repressed buthole molestor who
likes
little boys? He needs to get a life and get the f!@k off this newsgroup
though. I find John Perry's posts to be interesting and damn funny. He kicks
this guys ass all over the newsgroup time and time again. This moron Wiseman
is too stupid to realize when he has been beaten. I might even have to take
a
trip down to Glendale from my home in Pittsburgh so that I can check out
more
about that weirdo. He needs to get some serious f@@@ing help though because
its obvious that he has no other life than to start shit in here. What a
world
class Sodomite screwball. He should get some serious psychological help or
blow his brains out.

Perhaps they should all be made to cross their hearts and promise to be good and then get released. Face it, they are there for a reason, and it is not because they are particularly fine citizens I would guess. If you watch the video, you will see that the rooms are cleared frequently (like every hour or so) and thoroughly cleaned. Not having a chair or bed is not inhumane in my opinion. Neither I or anyone I have ever known has been put in one of those cells. Surely it is not just pure chance or bad luck that those who have, have been. I bet there is a good reason. The court system is there to figure out when, or if, someone has gotten themselves there in error. It works pretty well.

Hi! This is a longshot, but is anyone aware of a Pocket PC (WinCE 3.0) program for controlling an Icom PCR-1000 receiver? That capability is about the only thing precluding me from losing my laptop forever in favor of the E-125. There are several good programs available under Win9X, but I would love to be able to run it from the Casio.

Thanks!

Paul WD8DKY

Excuse me, but you stated that you are fixing to drop the membership.

You remind me of the American voting public. You know the ones that spew they hate the system, or they dislike the two party system, etc. etc. They you find they didn't even vote.

See my point? If you want to change things GET INVOLVED.

If it didn't work the way you tried it before, try again and again. Thats what I do. Im a lifer pig of the league, but I dang sure don't support it all the time.

>Point out one instance.

Last time I dropped my membership (for a couple years) was a number of years ago when *the BOD sued the FCC in Federal court* over something so trivial that today I can't recall what the reason was. Now, talk about alienating your supervisors.. how can ya beat that? No wonder the FCC holds them at arms length these days.

Do you think they 'followed the will of the membership' in that move? I sure don't. Of course, it's not possible to prove it, as they almost never poll the membership about anything, or on the very rare occasions they do, such as the "Do you use CW?" poll, they design a poll that is so screwed up it confuses far more than it reveals. Makes it easy to interpret it any way anyone wishes.

A couple years ago the BOD floated the silly idea to let all licensees "self-test" for CW, with the fact that an operator was on the air attempting to operate CW would stand as evidence of his ability to send and receive, as required under the Treaty. For a while it looked like that was a serious proposal, but finally it died. I'm as much aware as anyone that CW no longer hods the importance it did but it is still a basic primary mode and should be supported better than that.

Mind you, now, I'm an active League member, and just re-upped for two years last month, after a long personal review of the overall situation following the Restructuring. Long ago I declined the cheap Life membership because I decided it was important to be able to leave when they got too far out of line-which they sometimes have. But it might as well be understood, I'm gonna keep a CLOSE eye on them and their proceedings. I perceive that there is considerable improvement in more recent years as compared to some years ago. The staff is mostly quite competant if a little arrogant in places.

I have been a active ham continuously for 44 years, monitoring ARRL the entire time, mostly as a member, and have seen a lot of garbage eminate from Newington, right along with all the good.
I am not a critic of Incentive Licensing, we needed that, and I met the challenge as did so many others.
I don't like the idea that the League needs to have critics, but it is

clear to me that it is necessary to closely monitor their actions, just as it is with government.

Dick

No change of story. The time I used my IC706 running 3 watts AM on CB
CH19 was for an emergency which is perfectly legal. I'm surprised an
Extra class licensee is ignorant of such things.

When Chrysler/Dodge/Plymouth first cam out with the Concord series and V-6
they would wipe out a local repeater (4 miles away) for up to half a block.
I was going to purchase one, but it was impossible to operate on 147.00.
That appeared to be the only frequency they bothered.

The dealer was very helpful and traced the problem to the computer.
The car didn't have to be running, just go open a door. The problem would
continue for a few minutes after you left the car. AS it was the computer
and Chrysler was not interested in fixing it, I bought something else.
Actually there was probably little Chrysler could have done without
redesigning the computer.

I thought of this yesterday when driving along and something swamped the
repeater out. As it uses PL the radio went quiet, but showed a strong
signal. I looked up and sure enough it was one of those older Chrysler
Concords passing me.

I understand that newer ones do not have that problem, but I've not
personally checked
>

> Wonder is anyone has tried operating a ham radio in a VW
> Passat and knows how to deal with all the noise!

Not the Passat, but with all the computers and controllers in cars now days
it can be a real can of worms. Even once you locate the offending device,
it may not be something that can be fixed.

BTW, some car climate controls can be a real bear when it comes to RFI.

> No change of story. The time I used my IC706 running 3 watts AM on CB
> CH19 was for an emergency which is perfectly legal. I'm surprised an
> Extra class licensee is ignorant of such things.

Absolutely wrong. Read below:

[Code of Federal Regulations]
[Title 47, Volume 5, Parts 80 to End]
[Revised as of October 1, 2000]
From the U.S. Government Printing Office via GPO Access
[CITE: 47CFR95.409]

[Page 536]

TITLE 47--TELECOMMUNICATION

COMMISSION (CONTINUED)

PART 95--PERSONAL RADIO SERVICES--Table of Contents

Subpart D--Citizens Band (CB) Radio Service

Sec. 95.409 (CB Rule 9) What equipment may I use at my CB station?

(a) You must use an FCC certificated CB transmitter at your CB
station. You can identify an FCC certificated transmitter by the
certification label placed on it by the manufacturer. You may examine a
list of certificated equipment at any FCC Field Office or at FCC
Headquarters. Use of a transmitter which is not FCC certificated voids
your authority to operate the station.
(b) You must not make, or have made, any internal modification to a
certificated CB transmitter. (See CB Rule 25, Sec. 95.425). Any internal
modification to a certificated CB transmitter cancels the certification,
and use of such a transmitter voids your authority to operate the
station.

[48 FR 24894, June 3, 1983, as amended at 63 FR 36610, July 7, 1998]

Absolutely wrong. What is it about emergency communications that you
do not understand? Read below.

ï¿½97.403 Safety of life and protection of property.

No provision of these rules prevents the use by an amateur station of any
means of radiocommunication at its disposal to provide essential communication
needs in connection with the immediate safety of human life and immediate
protection of property when normal communication systems are not available.

Well,

Since I don't live in Galveston, I had to opt out of Socialistic Insecurity another way. I went to work for a railroad--so my retirement taxes didn't go into that crap! LOL~!

As I have posted on many occasions, the pizzing contest starts
on whether it was (a) a real safety-of-life-or-property
emergency and (b) whether other communication methods and
channels were available.

Poor John <such an apt monkier, oh, sorry I didn't mean to bring your family
geneology into this> he still thinks people use outhouses because he's
forced
to.
His parents were the subjects of IRS investigation some time back, and they
almost lost that ramshackle, tarpapered, dirt-floored shack on the dirt
road.
Poor Johnny has that third-rate, stolen ham equipment he's running.

Working at ten dollars an hour with that so-called degree must really hurt your oversized ego. I know many high school dropouts who make as much or more than you. Actually, many of them make anywhere from the mid thirties to much more. Just depends on their skill and attempts to make an honest living. So much for that second class degree. Actually, I expect to make in the 40s this year and probably a lot more as time goes along.
I guess that you are showing your racist colors again just like your hero Senator Byrd, the former KKK member who claimed not to know what he was joining. Simply amazing! The old fool didn't know what he was joining or was it an attempt at covering his ass. At least his latest asinine statement was quite correct in telling of the whites from his native homeland. More specifically he was talking about Glendale, the town that would remind one of Soweto, South Africa or perhaps KwaZulu Natal. Perhaps Matabeleland of Zimbabwe would be a more accurate description. I would suspect that the shanties in SA are in better shape than those of some Glendale residents. Obviously, you have a fascination with boys and Michael. Did Michael give you some advice at one time?

At least we all know that Lloyd actually earns a great deal of income. The same cannot be said for you considering that you create very little income. I suspect that Lloyd will be quite well off sometime in the future. Working with computers actually is a pretty lucrative business. I have a couple of friends who are quite well of as result of owning their own computer businesses. Doesn't really matter what market Lloyd goes to as long as he makes the sale. I wish him the best of luck with the Christian home based business.The only job you can have would be working for the West Virginia Trailer Services Department or perhaps being an enviromental sanitary assistant.

Hey, fuckwit. You are dealing with the new vice-chairman of the West Virginia NAMBLA organization here. I had to troll a whole lot of grade schools to get this position. It pays a whole lot more than ten bucks an hour, too. If you were a high honors degenerate like me you could make what I am making.

Expect more of these incidents in the near future. Race riots will be commonplace in most U.S. cities within the next 5-10 years. All the evidence points to it.

This is precisely why I moved FAR AWAY from crime-infested jungles and resettled in a quiet, safe, rural area. An area which just happens to be 99+% white, English-speaking.

I would strongly advise you to do the same, before it's too late.

Posting at 12:36 AM ....bwhahahahahahaha! Queer Johnny, must've just got
away from his sodomizing father.

Bestiality participant "JPERRY" <japerry99@hotmail.com> rimjobbed Lardass
Llllloyd in message news:9b60e2$7rs$1@dagobah.blueriver.net...

> At least we all know that Lloyd actually earns a great deal of income.

BWHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!!! Like YOU do????
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
A couple of wannabes......two fags in a pod.
BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!

>The same cannot be said for you considering that you create very little
income.

BWHAHAHAHAHAHAHAHAHAHHAHAHAHAHAHAHAHAHAHAHAHA!!!
Doodlefuck, how little you know....... BWHAHAHAHAHAHAHAHAHAHAHA!!!!!
John Perry the Fairy living that life of quiet desperation.

> I suspect that Lloyd will be quite well off sometime in the future.

I suspect Lllllooyd will have some explaining to do to the IRS for all that
unreported income.

> Working with computers actually is a pretty lucrative business. I have a
couple of
> friends who are quite well of as result of owning their own computer
> businesses.

Suuuuure you have friends. Mainly you have "customers," like your whore
mommy.

> Doesn't really matter what market Lloyd goes to as long as he
> makes the sale. I wish him the best of luck with the Christian home based
> business.

BWHAHAHAHAHAHAHAHAHA.. Some "Christian" you are....fucking hypocrite.
I've seen *your* picture, apparently, you are a bucktoothed choadsmoker.
Your parents couldn't afford an orthodontist, so they just spent their

welfare money on beer and drugs.

>The only job you can have would be working for the West Virginia
> Trailer Services Department or perhaps being an enviromental sanitary
> assistant.

IKYWBWAI, Pee Wee. But, you're backpedaling as fast as you can, poor thing.

BWHAHAHAHAHAHA....No Sex action Perry posting at 12:39 AM......!!!!

AIDS INFECTED FAGGOT AND BABY RAPER "JPERRY" <japerry99@hotmail.com>
gibbered in message news:9b60k6$7s6$1@dagobah.blueriver.net...

> Hmm,

Soliciting to give me a humjob are you?

>I wouldn't be so sure of that Roger.

Oh, that's right Firdays you head out to the various farms for your sex
sessions with the livestock.

> I make much more than minimum wage

I'll bet you do, being that sperm depository for the local Farm Cooperative.

> and even more than you.
> You
<IKYABWAI>

My, my.....is your pathertic little life so empty that you have to hang onto
the monitor in sheer deaperation, waiting eagerly for what little attention
I give you? I sit back and laugh at your pathetic attempts to flame me. But
nice dodge, though. That's about all you're good for, flunky gofer boy.

GOATFUCKER "JPERRY" <japerry99@hotmail.com> babbled in message
news:9b605h$7rm$1@dagobah.blueriver.net...

> Working at ten dollars an hour

Oh, did I mention that's what I STARTED out at.....I didn't say that was my
current salary rate, fuckwit. I only give you PART of the right information,
then I pull your rope and let you spin, babbling like a little kid on a
sugar high.

> with that so-called degree

A "so-called degree" would be one in Business. It sounds like you're a
little jealous of somebody who didn't pick an easy major.

>must really hurt your oversized ego.

> I know many high school dropouts

I'll just BET you DO.......BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!
> Actually,

There he goes with that "Actually," again. When FAGGOT Perry starts a
sentence with "Actually, " you KNOW he's lying.

> living. So much for that second class degree.

> Actually, I expect to make in
> the 40s this year and probably a lot more as time goes along.

Shit, BOY, you'll be LUCKY to clear $ 20,000 at that flunk gofer job that IS
your career.
Actually, you're just a simple minded, pimply-faced fuckwit who most likely
works at McDonalds.
Who's main way of communicating with others is "Would You like fries with
that?"

> I guess that you are showing your racist colors again just like your hero
> Senator Byrd, the former KKK member who claimed not to know what he was
> joining.

That sounds more like you're projecting your IDIOT father's reasons for not
realizing what he was joining, Perry the FAIRY.

> Simply amazing! The old fool didn't know what he was joining or was
> it an attempt at covering his ass. At least his latest asinine statement
was
> quite correct in telling of the whites from his native homeland.

It sounds like you're more familiar with the KKK, being a member of it an
all.

>More specifically he was talking about <IKYABWAI>

Translation: "Please stop savaging me! I can't understand half of what
you're saying, Mr. KC8JBO, Sir!"

If I were to mail anyone, it would be to point out that kc8jbo@ovis.net
is a Usenet abuser. I'd email abuse@ovis.net. But that's not my
style. Outing you is enough.

HGO appears to be under contract to ovis.net to provide them with Usenet
news.

That wasn't even me that responded to you in that case. But you have asked for it again. Showing your West Virginia level of intelligence again Mr. Deliverance. Actually, everyone has seen a picture of your mom. The only problem is that she was showing the top of her head. Poor, poor, white trash from Glendale, WV. Is that why you have an outhouse in your front yard? Probably because you can see where you were born at? Or were you the effects of cross pollination between monkeys and humans who happened to be inbred?

I have never been in alt.2600 posting or reading anything. Another time that you can't get your facts straight. Then again, what else is to be expected from a graduate in a shitty discipline like social sciences from a second-rate college.

Actually, the cut your rate because they realized that they weren't getting a bargain. I guess that is the way things work in WV, obviously the THIRD WORLD STATE IN THE UNITED STATES. Hahahha, I will be able to buy and sell you several times over in a few years. Actually, Business is one of the highest degrees that one can achieve. Much more preferrable and financially rewarding than some career in being a worker for the WV Department of Outhouse Construction and Demolition. There are a few higher degrees such as medical, law, engineer, and others. But certainly business is much more financially rewarding than being a outhouse inspector for Department of Social Services. So were you able to get some new doors for your hovel from that cousin's outhouse? You know, the one that they condemmed because it reminded one of a run down shanty in Soweto. Actually, a lot of high school dropouts are much more reasonable and capable of making a living than you will ever be. So much for that second rate flunky degree from Buckteeth State High School.

Just jealous of getting outed again, huh Woger. Show us your picture if you are so much to brag about. I sincerely doubt it, but rather you have the typical inbred look of eyes close together and maybe 5 teeth in your mouth. Weren't you a lead character in the Deliverance? Actually, many of my friends could buy and sell you several times over. Lloyd someday will be owning your sorry ass. Looks like Mr. Davies has been getting his act together and I commend him for it. Of course, you lack even the basic skills to add 2 plus 2 or even spell your name. However, I hear that is quite common in a state with a literacy level of about 50 percent.

I caught tail end of that, truly a piece of stupidity, point conceded.
I was out of ham radio from the mid-70s until about three years ago,
I'm still catching up with what went down during my hiatus.
>
> Do you think they 'followed the will of the membership' in that move?
>I sure don't. Of course, it's not possible to prove it, as they almost
>never poll the membership about anything,
>
I disagree with that to a large extent. The Directors make the
decisions, certainly the Directors from these parts put a lot of
effort into gathering up their constituent's thinking. My take is that
they do a helluva lot better job in this respect then do our
representaives in the layers of legislatures we have to put up with.
>
>or on the very rare occasions

The point is that it did die. Check some of the idiotic proposals that
show up in the U.S. House of Representatives. There isn't a
representative organizatiion out there which doesn't have a nutcase
who will dream up something wifty once in awhile.

When I came back in outta the cold and read my first QST after a
quarter century or so I couldn't believe the huge improvements in all
respects. Really drove home the point that the League old-timers were
a bunch of hyper-conservative patriarchal stiffs. This is much better.

As I have posted on many occasions, the pizzing contest starts on whether it was (a) a real safety-of-life-or-property emergency and (b) whether other communication methods and channels were available.

The point is that while the NRA represents all gun owners only NRA members get to vote for their BOD. Everyone else may comment on the NRA and it's policies and procedures but that is all. The NRA BOD like the ARRL BOD can pretty much ignore the nonmemberes.(and members to at their reelection risk)...

Bet that Woger changes his email address this Monday. That only gives us
about 56 hours to send him our heartfelt love. Over and over and over and
over and over.....
Of course we could always send copies of his filthy posts to the provider,
but who wants to do that? It's fun to read the posts from this bi-racial
clown.

5774. Roger's Goal For Marriage

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-14 07:48:11 UTC
From: Homophobe <NoQueers@nutcases.comm>
Message-ID: <9b8v6b$o8p$0@dosa.alt.net>
Source record: 90755

Roger told his neighbors that he wants to marry a gal who already has a kid. He says that when the kid asks him a question he cannot answer, he can say to the kid, "Go ask your dad, you little bastard."
Roger also stated that he wants the gal of his dreams to have a dripping yeast infection. Since Roger likes to bake bread, he will have plenty of yeast cultures literally at the tip of his fingers. This will save him uncountable trips to the grocery store.
In the interim, Roger continues to procure his yeast from his Ham buddy's wife in Hiram, Georgia. With her help, Woger still makes the best anchovie-flavored bread in all of West Virginia and one can always see a few seals perched upon Roger's doorstep.
Woger has even printed labels for his bread. He calls it, "Wogers Wousy Bwed".

Now, now Roger, you shouldn't be telling all of your secrets in here. We all know what kind of a degenerate you really are. Has your Tourettes been flaring up? Or is that a bad case herpes that you have around your mouth? Do those herpes sores explain what you like to do with your mouth?

Didn't I see that guy as one of the lead characters in the Deliverance? I think he was the one being spoken to by the hillbilly when the old bubba said "You have a pirty mouth" Isn't that same guy a worker in the West Virginia Department of Outhouse Maintainance? He had that job because the outhouse resembles the same place where he was born.

Tell us all about your second-rate degree from a Bubba State High School.
Your degree in social sciences is hardly worth mentioning and obviously you
received it by default. Must have been one of those payoffs to the
professors. Actually, every job and grade that I have received in my career
has been the effects of hard work, credentials, and many other factors.
Please inform us about your certificate from Hamburger U. You must have been
on the welfare to work program.

Roger is the only guy I know who uses his head as an enema. I have never had any sort of visits to any sort of professional in psychology or psychiatry. However, in Rogers fantasy land he would like to think so. Figure out how to spell "multiple" you freaking dumbass. Your spelling abilities leave a lot to be desired Mr. English Major. Are you showing us yet again the second rate education you received at the state high school remediation courses? I don't have any obsession with jizz or anything of the sort. However, you must have a lot of fantasies dealing with open sexual perversion involving other guys. I think that I have already pointed out to you that I do have a lot of women friends. Take that how you want to, but I can prove that I don't have any sexually transmitted diseases. Can you prove the same? As far as being a psycho, I am certainly far from that problem. I think that you have attained that lofty status of being the newsgroup psycho for the past year. I have never seen you post anything in regards to any form of amateur radio or even ask questions? Isn't that the purpose of this newsgroup? Or are you too stupid and demented to realize that? We probably could pass the plate around here and find you a good psychology professional to help you out. That way you can get the ideas of perverted sex out of your mind. That has been a recurring theme of your posts for the past year or so. As far as my religion and morals go, mine are far superior than yours ever will be. Someday you might decide to change your mind and adopt Christianity rather than rail and smear it in the mud. However, with your hatred of those who do have morals it doesn't appear to be very likely. Could you please explain to us how rational it is for someone to be Christian and also homosexual. It does not work that way. There are many parts of the Scripture that show opposition to homosexuality. However, with your sycophantic postings, one might begin to wonder about your sexual legitimacy considering that you constantly talk about sexual perversion as if your life depends on it. Actually, I never would came back to this newsgroup if I hadn't seen your bulls@@@ denunciations and accusations against my character. Not only those accusations, but your attempts to link me with other people in this newsgroup. I have no ties with any of them for that matter. So for your information, I have no ties with any of the anonymous posters. But in your demented mind, everyone who posts here must be John. Well, you are damn wrong and can't figure out where that head of yours is. You are the only guy I know who uses his head as an enema. By the way, tell us what that herpes spot is from.

I have the 242. Had the same problem. Going by memory what I did was
listen in a seperate rx. Key up and touch the pots on the TOP of the board
till I heard it scratch. I think it was R4 or something.

Sorry I couldnt be more specific.

5796. Boot Roger Wiseman Project, ALL TOGETHER

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-14 19:03:43 UTC
From: Rick Smith <ricksmith105@MailAndNews.com>
Message-ID: <3B089F7D@MailAndNews.com>
Source record: 90774

Hello everyone. Its time to get your keyboards ready and fingers typing out emails to abuse@ovis.net It is time to sweep the trash of Glendale, WV from the newsgroup for good. Mr. Wiseman has been defecating on this newsgroup for
the past year or so. It is time for the decent people of this newsgroup to unite and throw him out. Before his entrance to the scene, rec.radio.amateur.misc was a relatively peaceful newsgroup with many interesting discussions and on topic postings. Mr. Wiseman has proceeded to dirty the reputation of the newsgroup with his incoherent ramblings and character asassination attempts. However, we shouldn't stand for this behavior
trashing up everyones newsgroup. This group is meant for everyone as long as everyone behaves themselves and exhibits civility. Mr. Wiseman has furthered the decline of this newsgroup more than any other group or persons. Below is the contact information for ovis.net. You should write them to show your displeasure with Mr. Wiseman being able to spam for so long. Please send your
comments to abuse@ovis.net. Thank you for your time and assistance. Also, listed below is the contact info for hgo.net. Also, ask for assistance at abuse@mailandnews.com or postmaster@mailandnews.com in order to continue the process of cleaning this newsgroup up. Also, raising heck with COTSE might help. We need a contact name, snail mail address, and full telephone numbers for that outfit. They certainly don't support the act of using responsible free speech. Really they are being used as a clearinghouse for all of the attacks.

Sincerely,

Rick Smith

W1WCR got so darn long-winded with his right leaning Liberty Net rants that all the participants left! The guy sure runs his mouth, eh? He must be using super glue or some other commercial type of adhesive to keep his false teeth in place while he flaps his gums.
Why do they call it "Great", anyway? And who is that other Ham with the monotone voice? He drones on and on and sounds like he is reading from right wing articles he finds. I guess it gives the doddering old fart something to do. No wonder all the other participants left. They were probably falling asleep from boredom.

Don't ya just love it how these pompous ham operators are
so convinced that their (obsolete) technology is on the
cutting edge of communications? Listening to the average
ham at one of their dying flea markets you'd think that
ham radio holds the cure to high gasoline prices, inflation,
social ills and the ever rising cost of tobacco. All this with
their 1950's style HF-SSB and their 1981 era 1200 baud
packet radio racket. Good post TH. If you ever saw some
of em walkin around hamfests with their bloated bellies hanging
ove the front of their pants even with suspenders, their chain
smoking and mcdonalds burger chomping maws and bad
body odor & old clothes, you'd be ill 2 your stomache...

I don't think that handling emergancy traffic with your ham gear on 11 meters was such a legal transmission. Your Icom 706 isn't type accepted equipment to be transmitting on 27.185MHz. I really don't think you will get into trouble for handling emergency traffic on CB with your ham rig as long as you don't make a habit of it. I would sujest setting up a type accepted CB station (they are very inexpensive) if you are going to handle emergency traffic on the CB band.
All though, I honestly don't think that the FCC is not going to do anything about freebanders and the technicians that set their radios up for them. Freebanders are all over the place here in Madison County GA. The hams that are in this area aren't much help. They use their ham equipment on 11 meters too. All this does is sets a bad example for future possible hams. Just like you they think or just don't care about what is legal and what is not. Why should somebody get their ham ticket? I mean if they can get on CB radio and "shoot skip"(work DX) without worry of repercussions. Why work to get the ticket? That is why it is important to follow those pain in the rear part 95 rules and regulations. That example we must set is just to important to let go of.
In my honest opinion I think that the FCC and ARRL should form a ticket for those 4 million CBers and allow true hams General and above run 1500 watts pep on 11 meters. tech. and novices 250 watts and the no license CB ticket 4 watts just like it is now. You can bet that this would get more people involved in ham radio. I think that it was a mistake for the FCC to take that band from us in the first place. Thats just my opinion!

If you ever saw some
of em walk-in around hamfests with their bloated bellies hanging
over the front of their pants even with suspenders, their chain
smoking and mcdonalds burger chomping maws and bad
body odor & old clothes, you'd be ill 2 your stomach...

Damn that description sounds just like that guy at the local travel center
buying a cobra cb radio. That sounds like a description of the CB radio tech
in down town Danielsville GA. HAHAHA HA!
The last BIG hamfest I went to was in Shelby North Carolina and there
was so much CB equipment there it was funny. Could it be that people where
trading in their go nowhere cb radios for real radio? HMMM it is a whole lot
easier to get a ham ticket now days.

Message-ID: <$opdx.507.2001@ampr.org>
Source record: 90722
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.info

SB DX @ WW < KB8NW $OPDX.507
Ohio/Penn DX Bulletin No. 507

The Ohio/Penn DX PacketCluster
DX Bulletin No. 507
BID: $OPDX.507
April 16, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1NU, K1VV, N3SL, W3UR & The Daily DX, N4AA & QRZ DX, K8AV, K8YSE, KC8FS, 4X4NJ, DL1EK & DX News Letter, F5NQL, F9IE, IZ8AJQ, I2YSB, JR3TVH, LA5HE, MM0BQI, SM7AED, UZ8RR, VA3RJ and ZK1CG for the following DX information.

OPDX CELEBRATES ITS 10TH ANNIVERSARY! I can't believe that almost every Sunday morning for the last 10 years I have sat in front of my computer writing the OPDX bulletin. Even my wife Linda (OPDX's chief proof reader) can't believe she has been reading "all this stuff" (as she puts it) for 10 years. When I first started the bulletin, it used to take a few hours to write, but it has grown, and now it takes several hours.
Actually, I am a week late in celebrating. With all the confusion last week in losing my link to the InterNet for BARF-80 BBS, I forgot that April 7th, 1991, was the first issue of the OPDX. Many ask, why do you write the OPDX for free?" (including my wife, she says, "If you get one USD from everyone you could buy a new radio"). The reason that I write the OPDX and my involvement in the DX community is to help others achieve the pleasure and challenge of working DX as I have. I really enjoy the hobby. However, I also must not forget the many friends I have gained over the years writing the bulletin. Without their help and contributions of information, there would not be a bulletin. Lastly, I would like to thank my wife. Without her there would not be an OPDX. She is a non-ham (which one day I hope to change), but a LD teacher and proof reads the bulletin every week (usually telling me she is not sure what she is reading), plus she puts up with the many hours I spend at the keyboard and with club activities.
Thanks for reading the OPDX and I hope to continue to provided information each week that will let you work a "NEW ONE".... Remember, DX IS ..
73 de Tedd KB8NW (Editor of OPDX)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8/April, through Sunday, 15/April there were 230 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S0, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T30, T7, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XX9, XZ, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,15,21,22,23,24,25,26, 31,34,35,43,58,59,68,69,70,71,72,74,75,90
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3A, MONACO. Fabrizio/IK5GQK, Giuseppe/IK5YOJ, Stefano/IW5BZQ and Virginio/ IW5EDQ will be active for 3 days from 3A-land (JN33RR) between June 1-3th. They will CONCENTRATE their activity on 6 meters, but they will also be active on 2 meters and HF. Their callsigns will be 3A/IK5GQK, 3A/IK5YOJ, 3A/IW5BZQ and 3A/IW5EDQ. Their activity is as follows:
6 meters - (50.210 SSB, 50.600 RTTY, 50.620 PSK31) using an Icom IC-706MKIIG with 6 element yagi and HQ50 Halo Loop.
2 meters - (144.290 SSB) Icom IC-706 with 9 element yagi.
HF bands - (SSB, RTTY, PSK31, SSTV) two Yaesu FT-100 and vertical antennas.
You can make skeds before and during their operation by sending E-mail to: 3a@mannelli.com
They will check their E-mail at the top of every hour during their operation. For the latest news and log, please check their Web page at http://www.mannelli.com/3a
QSL VHF QSOs (6/2 meters) direct to: Stefano Mannelli, P.O.BOX 569, 50123, Firenze Centro, ITALY. QSL HF QSOs direct to: Fabrizio Vannini, via Forlanini 68, 50127 Firenze, ITALY.

3B6, AGALEGA (Update). Steve, N3SL, informs OPDX of the following and states that there will probably be one last press release bulletin from the "official sources" before the team hits the air. The advance team leaves in little over one week with the rest of the team on April 28th from Zurich to Mauritius. It is NOT absolutely certain, but it is looking like the team is flying to and from 3B6, which would give them an extra 3 days on the air (that should probably come from the official news

release). Steve, N3SL, states that his daughter, Kim, is now going to handle the QSLs for North America (not just the USA). So, Canada and Mexico are to be sent via Kim Larson, 22 N. Hidden Acres Dr., Sioux City, IA 51108 (which is N3SL's CBA). Reportedly, Kim is handicapped and is getting a real thrill in doing this job. It occupies her time, and she loves seeing all the cards. She did probably 75% of the AH1A QSL cards, so she is not a novice. The 3B6RF team is planning a photo card, so that will undoubtedly take a bit of time after the DXpedition to get printed. Steve states that he will see to it that all the U.S. DX newsletters are kept informed on their status. Steve will be doing mostly CW, but he has been asked to do RTTY (or possibly SSB) whenever they're trying to work the U.S.
Riki, 4X4NJ, reports that he will be joining the 3B6RF team as part of a 21 amateur group. He states, "We'll have 8 stations on the air during the first 3 weeks of May. All of the equipment and antennas are "World Class" - examples: 4square arrays on 80m & 40M, Titanex vertical and Beverages for 160M, beams for HF, Yaesu FT1000MP transceivers with 1KW amplifiers, etc..... Naturally, I will devote myself to 160M as much as possible!" For more details, check online at: http://www.agalega2000.ch

3C, EQUATORIAL GUINEA. Martin, 3C5J, was active last week on 20/17/10 meters. The sad part is that his operation will not count for DXCC because he is operating from an oil platform. He is expected to be there for 6 months. The good news is that "The Daily DX" is reporting Martin may have a chance to go to Malabo to operate which will count for DXCC.

3XY, GUINEA. A couple of new stations have been on the air signing the prefix 3XY. Station 3XY6A was active during last week, mainly on 12 meters (24955 kHz between 1730-1930z) with little activity on 20 meters (14203 kHz after 2230z). QSL via VE2XO. Station 3XY2S showed up over the weekend on 10 meters (28447 kHz around 0915z). QSL via P.O. Box 1484, Konakry.

4U, UNITED NATIONS HQ. This one has to be the most interesting report of the week. Reports on the Cluster Network indicate that 4U1UN was active on PSK31 on 20 meters and SSTV on 15 meters.

A2, BOTSWANA. Charles, A25/KY4P, was heard active over the past weekend on 10 meters CW/SSB. Check around 28002 kHz or 28452 kHz between 1200 and 1500z. QSL via SV0LM.

C6, BAHAMAS. By the time you read this, Tom, WB8N, should be in Nassau (IOTA NA-001) beginning Easter Sunday, for 6 days. He intend to operate a portable HF station from the resort he is staying at, beginning Monday April 16th. He will receive his callsign upon arrival. His operating times will be approximatly from 2000-2200z (possibly longer). His suggested frequencies are:
10 meters - 28495 kHz +/- 10 kHz (main)
28450 kHz +/- 5 kHz (secondary)
28520 kHz +/- 5 KHz
If conditions are poor on 10 meters, look for him on 20 meters (14195 kHz +/- 10 kHz). He will also give 12 meters a try, on: 24950 kHz (SSB) and 24890 kHz (CW) both +/- 5 kHz.

E4, PALESTINE. Gunter, OE1GZA, is now active from here as E4/OE1GZA. He was heard this past weekend on 15/10 meters between 1100 and 1600z. Check around 28460 and 21270 kHz.

HK0, MALPELO ISLAND. Pedro, HK3JJH, is now active as HK3JJH/HK0M. Reports show he has been on 40/20/15/10 meters SSB.

INTERNATIONAL MARCONI DAY (Special Event). Over 30 Special Event Stations representing Historic Marconi station locations worldwide will participate on April 21st, from 0000-2359z, on CW/SSB/Digital. The list of participating stations is on the Web page:
http://www.users.globalnet.co.uk/~straff/particip.htm
Award Certificate rules are available at:
http://www.users.globalnet.co.uk/~straff/
The Marconi Radio Club W1AA/IMD wll represent the 1903 Marconi Transatlantic Station on Cape Cod, Massachusetts. W/K QSL to CBA with an S.A.S.E., DX via the W1 Bureau. Their Web page is: http://personal.tmlp.com/k1vv/w1aa/

IOTA NEWS.....
EU-048. Francois, F2GL, will be active from Houat Island (French Brittany - DIFM AT-016), April 30th through May 6th. Check the HF bands from 80 to 10 meters, including the WARC bands, both on CW and SSB. QSL direct via F2GL's CBA or via the French REF Bureau.

EU-051. Look for Erminio/IZ8AJQ and Mario/IZ8DBJ to be active from Ustica on April 26-29th, sign IE9/homecall. Activity will be on 80-10 meters including the WARC bands on CW/SSB/RTTY and possibly PSK31. QSL IE9/IZ8AJQ to: Erminio Cioffi di Michele, Piazza Umberto I 16, 84036 Sala Consilina - SA, Italy. QSL IE9/IZ8DBJ to: Mario Pesce, Via Privata Falci 2, 80070 Bacoli - NA, Italy. QSL either direct or through the bureau.

EU-065. Look for stations F6BFH/p, F6EGG/p and F9IE/p to be active from Molene Island (DIFM AT-002), May 2-8th. Activity will be on the HF IOTA frequencies on CW and SSB. QSL via home callsigns.

EU-092. Jim, MM0BQI, will be active from the Island of Tanera Mor in the Summer Isles from April 20-23rd. The various references numbers are; Islands of Scotland Award SC10, WAB NB90 and QRA IO78. Activity will be on all bands 80-10 meters SSB/CW/RTTY and PSK31. He states, "Hopefully this year conditions will be better, and I am looking forward to working lots of DX stations who require the Summer Isles for IOTA or IOSA. I will be using my own call MM0BQI/P for some contest activity and also special callsign GB5SI (Summer Isles)." QSL is 100% via RSGB or direct to MM0BQI: Jim Martin, 3 Lismore Avenue, Edinburgh, EH8 7DW, SCOTLAND - UK.

EU-094. Look for TM5N to be active from Saint Nicolas Island (Glenan Archipelago), from April 27th to May 1st. Other reference numbers are: DIFM AT-010 and Loc Grid IN77XR. Check the usual IOTA frequencies on 160-23cm on CW and SSB. There will be

14 operators and 2 YLs at the logs. QSL via F6KOP.

EU-094. Look for F6KOP/p to be active on Cigogne Island, April 28-29th (depending on WX conditions). Other reference numbers are: DIFM AT-061, Loc Grid IN87AR and DFCF29004. Activity will be mainly around 7055 kHz SSB. QSL via F6KOP.

EU-171. On April 17th, Jakob, OZ7AEI, plans to activate the Danish Islands, Venoe (NO IOTA, DIA NJ-005) around 1200z for about an hour before going to Jegingoe (IOTA EU-171 and DIA NJ-006). Activity will be on 14260 +/- QRM. QSL via bureau or direct: Jakob Pedersen, Hvamvej 47, DK-7500 Holstebro, Denmark.

NA-137. Scott/K1OA and Len/K1NU will be activating Peaks Island, ME, on Saturday, April 28th using the special event call W1N. This island represents a new counter for the U.S. Island awards and will be issued a number after this activation. Look for them on 14260 and 21260 kHz +/-. QSL via K1OA, bureau or CBA.

JW, SVALBARD. Rag, LA5HE, will once again be active as JW5HE from April 26th through May 1st. He states low band contacts are very unlikely as there is the "midnightsun" now.

KH4, MIDWAY. Hiro, JF1OCQ, is now active as W1VX/KH4 now through April 22nd. Look for his activity on 80-6 meters, mostly on CW with some RTTY. As this bulletin was being prepared he was active on 7007 kHz around 1345z. QSL via JF1OCQ either JARL QSL bureau or direct to: Hiroyuki Miyake, 1-3-6 Asakura, Maebashi, 371-0811 Japan.

KH0, MARIANA ISLAND. Members of the ODXLG will be active from Saipan Island, Northern Mariana Island (IOTA OC-086) April 28th through May 1st. Look for Taka to sign KH0/JR3TVH and Natsu to sign KH0/JJ3NAW. Activity will be mainly on 40-6 meters CW/SSB/SSTV/RTTY/PSK31 (will take any request). Antennas used are: C4 (Force12 JA dealer,EDC) and a 6 element yagi (Radix). Also, they will use a Zepp like wire (Saga) and a HB9CV (Minimulti) housed in the shack. QSL via the Bureau or direct w/SASE to JR3TVH home QTH listed on QRZ.com.

KP4, PUERTO RICO (QRP Op). Hal, KC8FS, reports that his 18-year old daughter Holly, N8VUQ, is now there with several of her high school classmates and a local college biology class. She will be in San Juan and the north coast of KP4 until April 21st for an ecological research trip that will net her some pre-college biology credit. She took along a borrowed AEA 10 meter DX Handy and will try to work her father if conditions are right. This would be a great demo of amateur radio for the other students if it works. She will be calling him near 28375 kHz (+/- 5 kHz) at the top of the hour beginning at 1700z and depending upon her scheduled activities. Her operating time will be limited because her itinerary is pretty full with snorkeling, exploring mangrove swamps and hiking in a tropical rain forest. Hal asks that if any DXers hear her, please spot her on the DX PacketCluster. Also, he can be reached via E-mail (kc8fs@aol.com) or via the phone (304) 744-5949 (H) and

(304) 767-6202 (W).

LIGHTHOUSE OPERATION. Leon, ON4ZD, will be signing F/ON4ZD/P between May 5-7th from Fort Boyard. There are three lighthouses on that Fort, FRA 287, FRA 288 and FRA290. Leon will attempt to find a place that will have all lights in the line of sight on at the same moment. QSL via home call, bureau (UBA) or direct with sase.

LLDXT 2001 CARIBBEAN TOUR. The Low Land DX-pedition Team (LLDXT) is pleased to announce the 6th Caribbean Tour. This year's tour will bring them to the "Island of Carriacou" (Grenada - IOTA NA-147) from August 2-15th and the Island of Bequia (St. Vincent - IOTA NA-025) from August 16-27th. The team members will be Bouke/PA0ZH, Ronald/PA3EWP, Rob/PA5ET and Dennis/PA7FM. The callsigns will be J3/homecall and J8/homecall. They will use two FT1000MPs with amplifiers and will be active around the clock on 160-10 meters on the modes CW, SSB, RTTY and PSK31. Titanex has sponsored a V160E vertical to give them a good low-band signal. As is in past years, they will have a Tour Web site which will be updated daily with the latest information, on-line logs, tour diary, digital photo's and digital pile-up recordings. The Guestbook can already be signed. The LLDXT home page can be found at: http://www.qsl.net/lldxt/
All QSLs will be managed again by PA5ET, Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands. He is a QSL Manager for many other stations; look under "QSL INFO AND NEWS".

QRP-PEDITION FROM A UR-QRP CLUB. The Ukrainian QRP Club will hold its first (what they call a) "QRP-pedition" to the Ai-Petri mountain in Crimea, from May 4-11th. The main aim of this expedition are:
1) To publicize low power activity on the air.
2) To attract the attention of hams to the QRP movement and to show the boundless possibilities for low power operations.
3) To test home-made QRP transceivers, as well as, to meet friends and associate with them.
A special callsign will be used during the QRP-pedition: EM5QRP. The members of the QRP-pedition are: RK3ZK, UR6IRL, UR7IRL, US1RCH, US1REO, UU4JCQ, UY1AW and UZ8RR. The QRP-pedition members output power of their transmitters will be: 5 watts (CW) and 10 watts (SSB). Look for them to be active mainly on the international QRP frequencies. Operations on RTTY and SSTV are being planned too. Prizes (A book, published by Igor Grigorov, RK3ZK) will be given out to three stations who have the largest number of the QSOs with the QRP-pedition members on various bands. All other contacts will get a special QSL card confirming their QSOs. Those who wish to get the QRP-pedition pennant must send their QSL and 4 IRC to the expedition QSL Manager UR7IRL: Vladimir Tretyakov, Post Box 41, Konstantinovka-10, Donetsk Region, 85110, Ukraine.

QSL INFO AND NEWS.....
The final and complete logs for 5U2K, 5U3T, and 5U5A are now available on Sil's, I2YSB, Web site at: http://digilander.iol.it/i2ysb

Rob, PA5ET, is the QSL Manager for the following stations:
1994 - HB0/PA3ERC/p

1995 - VP5C (August 95), VP5/PA3BBP, VP5/PA3ERC, VP5/PA3EWP, VP5/PA3FQA
1996 - FG/PA3BBP, FG/PA3ERC, FG/PA3EWP, FG/PA3FQA, TO5C (Guadeloupe
August96), J79BP, J79RC, J79WP, J79QA, J77C (August 96),
FM/PA3BBP, FM/PA3ERC, FM/PA3EWP, FM/PA3FQA
1997 - J6/PA3BBP, J6/PA3ERC, J6/PA3EWP, 9Y4/PA3BBP, 9Y4/PA3ERC,
9Y4/PA3EWP
1998 - 6Y5/PA3ERC, 6Y5/PA3EWP, ZF2RC/ZF9, ZF2WP/ZF9
1999 - PJ7/PA3EWP, PJ7/PA3GCV, PJ7/PA4EA, PJ7/PA4WM, PJ7/PA5ET,
PJ7/PA7FM, FS/PA3EWP, FS/PA3GCV, FS/PA4EA, FS/PA4WM, FS/PA5ET,
FS/PA7FM, V47WP, V47CV, V47EA, V47WM, V47ET, V47FM, VP2EWP,
VP2ECV, VP2EEA, VP2EWM, VP2EET, VP2EFM
2000 - 8Q7ET (January 00), 8Q7WP (January 00), V26EA, V26ET, V26WP,
V26FM, VP2MPA , 8P9JR, 8P9JS, 8P9JT, 8P9JU

S0, WESTERN SAHARA. By the time you read this, the short operation by
S07BT will probably be over. QSL via EA1BT.

V7, MARSHALL ISLANDS. Just a quick reminder that Tom/K7ZZ, Dave/WW2AVG,
George/AH8H and Jim/W7UG will be active from Enewetak Atoll (IOTA OC-087)
in the Marshall islands from April 19-26th. They plan to use the callsign
V73E, some operators have their own individual callsigns. Activity will
be 80-6 meters with operation on CW/SSB/RTTY. Check the usual IOTA
frequencies. QSL via WF5T.

VK9M, MELLISH REEF (Refer to OPDX.500). Look for David/VK4ZEK, Alan/VK4BKM,
Peter/VK4APG and Harris/VK4CWT to be active later in the week from here.
They will be on the reef signing VK9ML between April 21-24th. This activity
is in preparation for a much larger operation planned in late 2001 or early
2002. Their activity will be on the following suggested frequencies:
CW - 3504, 7025, 14025, 21025, 28025 and 50105 kHz
SSB - 3799, 7085, 14195, 21295, 28480 and 50145 kHz.
Check the web site for more details at: http://www.qsl.net/vk9ml
QSL via VK4APG.

ZK1, SOUTH COOK ISLANDS (Update/Help Answered). OPDX received another
message from a very excited Victor, ZK1CG, and he stated that thanks to
the call for help for his KT43A antenna situation in last week's bulletin,
someone has offerred to send him a complete/operational KT43A. Details
have to be worked out on sending it, but Victor will keep us informed.
He will use the antenna at his Rarotonga location, and on his vacation
in October to Manihiki, North Cook Islands for the CQWW SSB Contest
with five operators from the Western Washington DX Club. They will be
in Manihiki for one week, and possibly Victor will be there for 2 weeks.
If you are planning a trip to the Cooks and would like to help in getting
some antennas down to Rarotonga (so they can be shipped to Manihiki before
October), contact Victor. He states, "..... coming to the Cooks for a
vacation or DXing..... I'm sure we will make your stay in the Cook
Islands a most pleasant and enjoyable one, plus you will be helping many
make a new contact from North and South Cooks." Keep looking for Victor
on 10 meters between 28480 and 28490 kHz after 0000z. ADDED NOTE: Victor
is looking for the extension kit to make the KT43A into a six element beam.

One of Roger's fellow citizens in Glen Dale has an updated photo of Roger.
As soon as the film is developed and scanned and sent to me, I will post it
here for all to see!
You're all just gonna love it, too!!

The emergency was mine personally and I had exhausted all ham radio
possibilities. CB was a last resort to keep from freezing.

There was no cell phone in my disabled truck. Saying that cell phones
are "everywhere" is a pretty lame statement.

Don't worry about it. ARNewsline is comprised of weasels anyway. Why?

1) When it came to a [local - at least to me] story about the infamous 145.460 repeater in Los Angeles and interference issues with a Mexican repeater on the same frequency pair, Newsline omitted the fact that the Mexicans were the ones who initiated the jamming war, including having a 1,200 watt amplifier tied to one of their auxiliary inputs (not 144.860) which was outputting its signal on 144.860 via a beam pointed directly at the Los Angeles repeater's location. Frequency coordination does not entitle any repeater to a "clear channel" but merely a "usable channel" (considering the FM capture effect) over a geographic area - something that the Mexicans also fail to understand and something that AR-NEwsline completely ignored. Many of their other stories have similar distortions.

2) AR-Newsline says that their monthly costs are about $1,000.00/month. On the east coast, there's "This Week in Amateur Radio," where the producers average only aout $100.00/month in costs. I don't have figures for "The RAIN Report" from Chicago. So, where is this extra $900/mo. going? At most, $100/mo. is going to cover expenses that can be accounted for: ISP fees for their web site (they have a pay site, as opposed to the others which found free hosting), their flagship phone number which they pay for (phone numbers in other areas are supported by those areas, not AR Newsline), and some reimbursement for some costs to the news gatherers (long distance phone calls). The remaining $800.00/mo is basically SALARY. So much for amateur radio being non-profit. The point is: Will AR Newsline TELL US that it's salary to its staff (i.e. toys for Pasternak) - or will they continue to be weasels?

5848. Roger's Favorite Sport

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-15 19:49:37 UTC
From: Nuisance <NoSpam@WogersHouse.comm>
Message-ID: <9bctqt$u9j$0@pita.alt.net>
Source record: 90728

Roger and two other gays were discussing what they thought their favourite sport would be.
The first guy sighs, "American Football, because of all those gorgeous guys bending over in their tight pants."
The second guy sighs, "Wrestling, because of those skimpy little costumes."
Then Roger sighs, "Baseball, because I'd be pitching with the bases loaded."
"And...?" asked the other two.
Roger continues, "The batter would hit a ground ball right to me, I'd catch it, and I'd just stand there while the other guys rounded the bases. Meanwhile, the crowd would be going crazy, and screaming, 'Throw the ball, you cocksucker!'
And, that's what I like -- the recognition."

5849. Re: BOOTLICKER JR Must've heard from Prodigy Abuse Department Today

I've noticed that Bohnhoff is using arnewsline.com and arnewsline's logo graphics on their website. However, ARNewsline specifically mentions that arnewsline.org is the only official website.

I also noticed that Bohnhoff's is very protective of it's other streaming audio such as the rainreport. If Bohnhoff applied it's restrictions to ARNewsline, then Bohnoff would be able to link ARnewsline nor use it's graphics.

Obvious there is some relationship here and probably some past history. Being new to amateur radio, can some one fill me in? Email is fine and can be found on qrz.com within my call sign lookup.

Space Weather news for April 15, 2001

http://www.spaceweather.com

One of the most powerful solar flares ever recorded (an X14-class explosion) erupted near sunspot group 9415 today, climaxing a two-week spate of X-class flares from that active region. The source of the explosion is near the Sun's western limb, so the blast was directed mostly away from Earth. That's a good thing because today's flare was nearly as powerful as one in 1989 that triggered the collapse of a power grid in Canada -- no such calamities are expected this time. A moderate radiation storm is in progress. For details and updates, please visit SpaceWeather.com.

5852. Re: BOOTLICKER JR Must've heard from Prodigy Abuse Department Today

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-16 00:17:29 UTC
From: JPERRY <japerry99@hotmail.com>
Message-ID: <9bdeco$n9i$1@dagobah.blueriver.net>
Source record: 90733

Why don't you call up Craig and ask him about it? Call him up, chickencrap. He has never sent me a letter regarding anything of the sort .Call him up. I have never had a problem with Craig or his service. Not even one. Of course, you are lying again but the truth certainly is foreign to you. You know its a big lie what you are saying. But in your lying state, you attempt to make as if it is true. Secondly, I am not the same person as JR. Not only that but the headers are not even the same. Hmmm, is it quite possible that you are wrong again and looking for a scapegoat. As far as being a liar goes, you should look into the mirror considering your cheap personal attacks on those who oppose your spamming of this newsgroup. Obviously, you have very little else to do with your time except for spewing lies about people on this newsgroup. Of course, that shows the true intent of your demeanor and how you like to spread bullshit about everyone. For the record, I am not a faggot. However, you would wish to make me appear to be so in order to justify your bullshit. Actually, I was going to give you a break on things, but obviously you are such an asshole that you can't give it a rest. Is that why you have no friends? You have never contributed much to this newsgroup or anything else for that matter. Your only comments are to falsely accuse others of being child molesters, perverts, faggots, and other things. Your record speaks for itself. Keep on making false accusations because they only discredit who you are for a person. And thats not much. No one really gives a damn who you think you are other than the fact that they want your ass off these newsgroups. It will happen one way or the other according to what others here are saying. So get over it. Obviously you have no other life than to sit here making phony accusations about others.

Furthermore, call up the people at Prodigy and ask an official from Prodigy to prove that I have an account with them. I NEVER HAVE HAD AN ACCOUNT WITH PRODIGY. I have had an account with Blueriver for a good three years or so. Never been involved with anyone else nor do I see a good reason to change. Another one of your accusations and smear attempts. Kind of like the lying comments you have made about everyone in this newsgroup including Francis Elliott, myself, Lloyd Davies, and many others. None of which you have ever proven to be true.
If you know so much about my record and others then prove it. Why don't you get all of the legal records and post them? Find out who we really are and see if we have a criminal record. I guarantee that you can't find squat about me. You can't find anything that is true. That is why you have to make up things about many people. I have never been arrested on any infraction. Never been arrested Have you ever been arrested? Actually, you are getting on the borderline of having a lot of pissed off people after you.

Check out my auction here:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1230459252&r=0&t=0&showTutorial=0&ed=988232759&indexURL=0&rd=1
Starting price: $88

NO RESERVE!!!!

Yaesu FT-470

Compact Dual Band 2m/70cm FM Transceiver

a.. Four VFOs & 42 Memories

b.. High Performance Scanner

c.. Built In 10 Memory DTMF Autodialer

d.. CTCSS Features

This equipment was used by my son and now is mine. I am a ham but don't know much about it. It is about 1990-91 vintage I think. Included is the following: I have the MANUAL, a BRAND NEW FNB-11 12v 600mAh battery bought on 3/11/2001 from Batteries America ($30 alone!) and MADE for this radio. The radio is cosmetically in good condition. I have a MODIFICATION sheet I will ship with it but the MODS have NOT been made! (MARS mod, extended reception etc) A schematic diagram is INCLUDED with the manual!

Interesting. Rain Report has strongly worded that Riley's audio of enforcement logs belong exclusively to themselves. I find this odd because Riley is a public servant paid by tax payers. His remarks when he acts in an official capacity for the FCC cannot be copyrighted.

I believe that Rain Report tries to state that Riley's enforcement letters are their copyright to and that nobody has the right to post these on their webpages or link directly to these. Again, very wrong on Rain's part.

One thing I've noticed is that amateur radio is slowly losing it's "amateur status". If you think about it, amateur radio preceeded Linus and GNU as the founders of open standards. It's just that openess was taken for granted and informally done. There appears to me too many amateurs trying to make a buck and thus closing our community. I have nothing with trying people earning a living, but some of this stuff people people should be opened. I will guess that the PC software for the DSP-10 will never be released as open software thus nullifying a greater community of contributors to advance it and our hobby further. This is just one example that you can see if you start at tapr.org and look at the projects.

It's sad to see the software profession far eclipse the amateur radio community and get all the credit for open community.

5860. FS 4 el 20 Meter beam in DENVER

Dick was only pointing out the truth that you fail to accept because you prefer to live with your head stuck in a hole in the ground... or up your ass.

I just found out the league is going to push to remove all code requirements at the next international meeting. It's just the next step in their continuing efforts to dumb things down.

Soon, the only difference between a ham and a CB'er will be a piece of paper. Our bands sound more like 11 meters everyday.

Don't buy a League membership people if you value this radio service, that's possibly a better idea than sueing them.

73 & Happy Easter

5863. WHY DOESN'T EVERYONE GROW UP?

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-16 06:18:57 UTC
From: Robert Williams <robertwilliams@MailAndNews.com>
Message-ID: <3B2133A6@MailAndNews.com>

It has gotten pretty ridiculous in this newsgroup anymore. Personally, everyone can do very well without THE foul language and constant personal attacks. It obviously shows little regard for others and is quite disrespectful. This newsgroup needs a lot more courtesy and less harshness towards others. It is too bad that people can't get along better here and have
some sort of civil conversation. Maybe if everyone would just tone it down for
awhile, things might return to some sort of decent behavior. I would be ashamed if my 10 year old accidentally came to this newsgroup wondering about
amatuer radio and seen the filth posted here. I know that people say that kids
hear it all the time. But this group gets downright disgusting and raunchy. Its not as if this group is even a sexually oriented group. This is a ham radio group and should be considered as such. Not a place to leave your anti-social rantings and general hatred for others. I mean, you all need to grow up and act like mature adults here. For the record, I am not for any side
but just tired of the constant garbage that is spewed in here. I do know that
Roger Wiseman is a constant purveyor of hatred in this newsgroup. He doesn't have any manners or regard for his fellow users except to attack people. I personally am tired of his smear attacks and then all of the fighting that goes about. THE PROBLEM IS NOT JUST ROGER THOUGH. Personally, he would do things a lot of good if he would leave for a while. We could all benefit for some peace in this group. Of course, he is probably going to attack he as a racist or some other smear. What he doesn't know is that I am a black man tired of all the bickering and bitching here. So he can call me racist but it
will just show his gibberish. Besides, if you want to report him please contact the following people regarding his behavior.

Don't you all thing its about time to stop the cheap personel attacks? Its gotten pretty bad here with all sides calling each other every other name in the book. Not to mention the facts that none of these comments can be proven or disproven. Unless someone has the cojones to step up and prove what they have to say. I laugh my ass off reading this stuff because its so childish. Really uncalled fo. I guarantee what you hear in this group makes us amatuers
look liek assses when the casual observer reads the postings. I mean, nothing
here has ever been proven to be true. All that has been done is a lot of childish libel to others. We all need to stop it and act like mature adults. Just my opinion. Robert Williams, Charleston

Problem is, that's playing into the hands of the down-dumbers since
then only they will be in control of the League..

I prefer to hold their toes to the fire and sharp objects to their
rears, and make Ed uncomfortable that he can't counter my facts and that
his are lame- no one ever tries to memorize 1000 questions and answers,
they do it in very managable increments. But his assertions sure sound
logical, don't they?

73 and happy day after Easter

Does learning the morse code make one more considerate of others? Does it teach one how to limit his or her bandwidth? Does it impress the proper procedure for voice identification or how to handle emergency procedures?

I have had an extra class license since about 1970 and been a ham since 1958. I checked one day and all of the trash talking, rude and obnoxious guys on 20 and 75 meters had general class or higher licenses - that was before the FCC "dumbed" down.

Many of the biggest jerks had extra class licenses and assumed they were better than everyone else.

Many of the codeless tech's I talk to on 2 meters are caring, considerate, thirsting for knowledge and participate in public service events - which is the justification for our existence.

Seems like the biggest threat to ham radio are not the newcomers - but the old guys who still know morse code - which I am.

Actually the least considerate individuals in all of ham radio are
the rabid pro-code testing folk who worship the Morse Code Creedï¿½.
Dropping Morse code testing from the ARS is like dropping the Virgin
Birth from the Christian religion.

A couple of weeks back when the Aurora was visible in Northern Mexico the
band was open from around 7:30 PM on Friday to about 5:30 PM on Saturday.
Most of the US was heard.

Last week there was an opening (they tell me) to Argentina from Northen Ind and Ill.
As there was a great opening, but not nearly as long lived. Unfortunately we were in a Tornado watch area and the weak ones just above the noise were getting clobbered by static crashes at least 60 db stronger.

Lots of Auroral activity from the last two major sunspot groups, but other than the really big flare yesterday (pointed away from us) it appears activity is declining.

Maybe we'll get some more big groups developing.
It'll be interesting to see what group 9393 looks like when it comes back into view.
It's expected to be far less active than it was the last time it was visible.

As usual, another fact that is inaccurate.
The league vote was to NOT oppose an effort to remove all
code requirements. The league did NOT vote to proactively
seek (i.e. push) such a change.

OK, I'll bring up the subject.
Who is this Dennis Tito that will make a visit to the ISS? I see the ARRL in it's ARRL Letter, Vol 20, No 15 referred to him as a "wealthy American businessman". He probably made some important scientific contribution to the international space program to merit his selection, but I just can't seem to find any data. Anyone know who he is or what he did? Doesn't sound like the Russians were to happy about his selection.
That is all.

It's not traded for anything. As an entrance requirement, it is simply
outdated and therefore is in the act of being dropped.

Mr. Muckel has the right idea. Keep " off topic " nonsense outta here and his way of saying it is "write HAM, not crap." If you hams want to flame and carry on, go to alt.radio.scanner.flame_fest/ If on the other hand you are of Muckel's mindset and want to share ham related info, then stay put. By the way, I received an e-mail from a friend saying that he or she was reading my posts on rec.radio. Since moving to flame_fest, I don't remember posting more than a few times on this NG so if anybody's using my "pen name, " STOP. Forgeries will get you tossed off here for good.

Also there seems to be heard Herbie's bones rattling once again. Word has it he passed the Extra on Puerto Rico. My reply, "SO WHAT?" With his G.O.P pals controlling Washington, perhaps he has a "Scarlet Pimpernel" in a high place?

Even if the FCC rescinds his banishment which is unlikely although possible, it's supposed to impact ham radio? Guaranteed if he ever gets back on again, he'll be watched by hawks. He's not dumb enough to start bothering Intercon all over again; FZ's stubborn but not stupid. And besides, his queenified troublemaking kissups won't stick their necks out for him either, so why even broach the subject? Hell, the guy's already paid a very high price for screwing with CALLS and the Fuzz. Maybe he's been rehabilitated?

Radio has always been his life anyway so why keep it away from him for good? To hell with cruelty. There's too much damn suffering in this world anyway so Hoibie, go get your ticket and enjoy life through hamming. Enough's enough.

5885. Watts vs. volt-amps

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-17 11:59:10 UTC
From: Mike <mcrain@pkfccpa.com>
Message-ID: <ieWC6.22379$Gi5.206265@typhoon.jacksonville.mediaone.net>
Source record: 90615

In looking at the rear of some computer equipment, I notice that power consumption (or power limits) is measured in "volt-amps" instead of "watts."

When did the term "volt-amps" replace "watts?" And it is the term generally limited to certain areas (e.g., computer equipment)?

Just curious.

No replacement is necessary to delete a regulation that is
unnecessary, not in the public interest,and not in conformity
with 5 USC 706. The Morse code test rule is invalid, but exist
only because of ITU rule S25.5 and government inertia.

you can't have watts with out volts volts you can have with no amps but
it will not work but if you have 160 volt and 200 amps you got a good show
and your puter will work just fine so look for the Volt amps and you in
shape to go

Hi Mike -- In a DC circuit Volts x Amperes is Watts or I squared x R
But in an AC circuit there are three different powers to consider --
1. true power (I squared x R) (Watts)
2. apparent power (V times A)
3. reactive power (VAR) due to capacitance or inductance
Reactive power is not dissapted as heat, light, etc but is returned to the source.
True power is dissapted as heat, light, etc
Apparent power is the vector sum of true power and reactive power.
Power factor is the real power divided by the apparent power and power companies strive for a 100% power factor

For a good explanation see URL:
http://www.traceengineering.com/technical/tech_notes/tn11.html

In a highly inductive or (capacitance) circuit, VA can be much higher than Watts, due to the current that must be supplied for the reactive component, so many AC devices are specified in VA rather than Watts.

Mike,

Only when the AC current is in phase with the AC voltage does VxA=W

If you put an ammeter in the line and measure, say, one amp and a voltmeter on the line reads 120 volts, you would think there is 120 Watts being drawn from the power company. If it is a nice resistive load this is true. The current is a sine wave in phase with the voltage.
The first problem is that an ammeter only reads the average current. One way to think of it is that average current isn't what dissipates power, it is the RMS current; or the "equivalent" current. It is "equivalent" in terms of dissipating power. You can have a very high peak current with a low average current and the peaks can be so high as to cause a high power to be dissipated, or drawn from the source. Typically, power supplies do not draw sine wave current. A linear supply draws spikes of current. This is caused by the rectifier charging the filter capacitors at the peak of the AC voltage cycle.

The other factor (pun intended) is the phase relation of the current waveform relative to the voltage waveform. This is where the term "power factor" comes from. It is an indication of how much 'in-phase' the current is and therefore how 'true' the apparent power really is. _IF_ the load/devise DOES draw a sine wave current (like a motor) it may not necessarily be in phase or in step with the voltage sine wave. In this case, it is the instananeous (did I spell that correctly?) voltage and instananeous current which are what you look at.
Think of each spot on the sine waveform. In this case, if the voltage is low when the current is high, this is a low power (small V times Big I); as is the case when the voltage it high and the current is low (Big V times small I). When they are in phase it would be Big I times Big V and therefore Big P. Motors are nortorious for having lots of out-of-phase current. They can draw high current, but not be pulling much power from good ole' ComEd.

In reality the "volt-amps" is NOT a power rating at all, but simply an indication that the average current times the voltage will not, or should not exceed that value. If I remember correctly this is "apparent power".

When it comes to wires and contacts, there is a current limit which can be safely handled. So it is the current, without regard to the phase relationship to the voltage, which can limit what you can pull from ComEd.

In modern switching power supplies, manufacturers are putting special circuitry to make the current waveform more like a sine wave and keep it close to in-phase with the voltage. The power grid is, to some extent, overloaded by so many peak current power supplies. Lots of current is drawn causing voltage drop in the wires, but the power being draws isn't as much as it could be. Therefore, the system is less efficient. More power is wasted.

Hope that helps
Steve K9DCI

Could it be that too many people were plugging in computers rated only in watts but set for 110/120 volts into 220/240 volt outlets that exist in some European countries and elsewhere and getting their power supplies fried in the process?

Expressing it as volt-amps is better because it indicates at what voltage the power supply is expecting. Is the consumption also shown as two numbers hyphenated? This helps the mathematically challenged; either that, or are you seeing this only on Asian-manufactured equipment, where perhaps someone mistranslated (e.g. "works goodly" instead of "works well")?

5895. Need article from April 84' issue of QST

Newsgroup: rec.radio.amateur.misc

No, it couldn't. Please read my previous or go to the link in
a previous post for an explanation.

> Expressing it as volt-amps is better because it indicates at what voltage

No it doesn't. It gives a single Volt-Amp number like 200 VA.

> Asian-manufactured equipment, where perhaps someone
> mistranslated (e.g. "works goodly" instead of "works well")?

Believe me, 'they' understand volt-amp ratings goodly.

Thats ok Roger, I haven't been in here for a few days. Actually spending time communicating with a great lady friend. I could care less what a classless asshole like you thinks. Once I leave this NG, you don't even exist. Must be a hell of a life you have when the only thing you have to live for is this newsgroup. Of course, that is the one thing you are very good at. Its ok though because you aren't even worth my time. Never been in trouble with blueriver.net. Craig still hasn't said one damn word to me. Obviously I don't give a rats ass about things either. I don't even have a church in this county that I go to. People know about me and know how I really am as a person. So they won't give a damn about your libel. So I could simply care less. Perhaps they will send your mails to me so that I can pass them on. Its too bad that you have nothing better to do than live in this newsgroup. Oh well, its your life. Obviously you have an obsession with bastards. I am not a bastard child and know it with all my heart. Can you say the same about yourself?

Thats ok Roger, I haven't been in here for a few days. Actually spending time communicating with a great lady friend. I could care less what a classless asshole like you thinks. Once I leave this NG, you don't even exist. Must be a hell of a life you have when the only thing you have to live for is this newsgroup. Of course, that is the one thing you are very good at. Its ok though because you aren't even worth my time. Never been in trouble with blueriver.net. Craig still hasn't said one damn word to me. . Even if Craig did boot me, I could get another ISP. But considering that Craig has never stated one problem with me nor have I recieved a letter, I don't expect to get booted. Craig hasn't even said one word to me nor have I recieved any correspondence despite your repeated harassment of their company. Personally don't care because there are a hell of a lot more important things that what goes on in this newsgroup. I would hope that you would realize that fact. I think that a lot of people here realize that and are tired of the same old crap. Obviously I don't give a rats ass about things either. I don't even have a church in this county that I go to. People know about me and know how I really am as a person. So they won't give a damn about your libelous comments. So I could simply care less. Perhaps they will send your mails to me so that I can pass them on. I will send those mails onward once I get my hands on them. Its too bad that you have nothing better to do than live in this newsgroup. Oh well, its your life. Obviously you have an obsession with bastards. I am not a bastard child and know it with all my heart. Can you say the same about yourself? So I simply don't give a crap what you think.

Well here is the APRIL TRW Swapmeet list of sales items.....

TRW Swap meet will meet on SATURDAY April 28, 2001 at 7:00 - 11:00 AM
at TRW
parking lot on the corner of Aviation Blvd. & Marine Blvd. in the town
of
Redondo Beach.

DIRECTIONS..... Exit on Rosecrans Blvd off the (405) San Diego
Freeway.
GO West 3 signals to Aviation TURN LEFT, you are now going south. Go
two
signal lights to Marine TURN LEFT, and then turn RIGHT immmediately
into the
parking lot.

MY SPOT at TRW Swapmeet is E-1 (its a corner spot)

Lots, & Lots, & Lots of GOODIES "4 SALE"

1. COLLINS 51S-1 "BIG Round Emblem" Receiver. It looks and works
great. It
is in a Collins 30L-1 case, and its in nice condition. The case has
been
repainted (with Collins color) , also looks great. New power cable
included, the radio was aligned by my Collins technican Wayne Spring
W6IRD.
$1600.00

2. Collins 651S-1 Receiver "Round Emblem" works and looks fine, it
has a
liitle bit of wear. Original Collins manual included
(its 3 inches thick!!!) also checked out by Wayne Spring
W6IRD...$1300.00

3. Collins 75S-1 receiver, and Collins 32S-1 transmitter (matching
set),
with instruction manuals, NO power supply, also checked out by Wayne
Spring
W6IRD.....$800.00

4. Yaesu FT-101E transceiver, Yaesu FV-101B external VFO, both items
in
"nice" condition, and operational
(comes with both manuals, and Yaesu hand microhphone)
.....$295.00

5. Heathkit SB-221 Amplifier 10-80 meters in very good condition.
Wired for
110 volts, and putting out about 950 watts with 90
watts of drive.....$525.00 (comes with manual)

6. Icom IC 701 HF transceiver, and matching Icom PS-701 power supply,
also
nice condition.....$285.00

7. Drake R-4A receiver $150.00

8. Drake MS-4 speaker $50.00

9. Drake SW-4A Receiver, with Drake AL-4 antenna $195.00

10. EICO tube tester $85.00

11. Ameco PLF-2 preamplifier $30.00

12. MFJ-941C tuner $40.00

13. Knight C-577 compressor/preamp $15.00

14. Swan SWR-3 swr/meter $5.00

15. Icom 756 HF transceiver, excellent condition TWO SSB filters, and
original box, manual, microphone...$1195.00

Thanks for looking at my Sales Goodies......

73,

Leo Fahmie KJ6HI

5904. Double sideband instead of AM ?

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-18 02:41:21 UTC
From: Scott McClements <yetbbwa@grove.iup.edu>
Message-ID: <3ADCFED1.22FD8390@grove.iup.edu>
Source record: 90633
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.homebrew

I just picked up a used Yaesu FT-890. When I went to try out AM while listening on another receiver it sounded like it was on sideband. Looking at the wattmeter, there wasn't a carrier I flipped the other receiver to upper sideband then lower sideband hearing the signal just fine on either mode. Being a new comer, I think this is referred to as double sideband mode?

If so, is this normal? Or is this some kind of modification an owner would / could have made? Or is the radio just plain broke? If it is a modification, why would somebody want double sideband (assuming I'm right) on a HF radio?.

Any thoughts???

Scott.

The radio is in need of adjustment. Double sideband is not a
featured mode of the Yaesu FT-890.

Before I shipped it off, I would check with a station some
distance away.

Good comments. Hope that the computer business is rolling along well. I am getting ready to roll out some business stuff here in the next few months. I agree with you that he doesn't have a clue. That is why he has been in here for over a year badmouthing and libeling everyone he has come in contact with. If you ever notice, most of them have politely asked Roger to cut the filthy language and show some civility. In response, he verbally attacks them and calls them all sorts of filthy names. I really hate to be this way towards people but classless assholes like Roger deserve it. You can make an excellent living working with computers. I have several acquaintances doing it in my area. Good to hear that things are rolling along and church life is fine. I do a lot of Bible Study on my own time so that is pretty much my church time. He would find a good church to be refreshing but the problem is that he would go about making such an ass of himself, they would boot him out on the street. I do know quite a few pastors and they wouldn't tolerate his type. Its a shame that some people have nothing better to do than pollute this newsgroup with their reprobate minds and constant sexual perversions. I can just see old John Lewis of nearby Campbellsburg telling Roger how it is. I have listened to him from time to time and he minces no words.

No big loss. He was nothing but a face anyway.

"Although he was on the advisory board, Spielberg did not currently have an active, direct role with the Scouts, Levy said. Spielberg, who earned a Scout badge for photography in his youth, previously convinced the organization to adopt a badge for cinematography"

Interesting why he waited all this time since the Supreme Court decision to finally make his move. Obviously it was more a publicity move than true convictions. Interesting that all these nay sayers have been silent for the past 90 years. Seems the BSA has maintained these standards since their inception and only since it became politically correct did anyone express their righteous indignation.

I wonder of the NAACP should sue the KKK discrimination against its members being allowed to join the Klan. Or perhaps the B'nai B'rith should sue the Knights of Columbus for the right to become members.

All it does is increase the $$$ being donated directly to the BSA. Ross Perot, wacko that he might be, has donated over $50 million to BSA HQ to cover the shortfalls that the national councils may experience.

Way to go Ross.

Why concern yourself with it. I just sent up a block list and filter with message rules and the group looks good and normal again. All that garbage is gone. I suggest everyone else do the same and stop reponding to these people (that is if it is still going on, I don't really know).

I agree, Roger is clueless Roger just wants to keep it stirred up. Roger has never met me. I am not a "lardass" at 215lbs, I would hardly call myself that. And as far a being a bigot, some of the things I've posted have were posted in outrage at some of the things I read about.

That is why he has been in here

UPDATE!!!

USA: KSMR Disappears
By Hans Johnson, Cumbre DX, and Nick Grace C., Clandestine Radio Watch
Clandestine Radio Watch 65 Extra, March 24, 2001

[Mar 24] After weeks of broadcasting, KSMR - Kentucky State Militia (KSM) Radio - disappeared on March 21st.

Although the reason for the disappearance cannot be confirmed, CDX- CRW received a report that the KSM ordered an immediate end to the station`s transmissions earlier this week. The KSM, however, did not respond to a inquiry asking them to confirm or deny this report.

CDX-CRW have also learned that the operator of KSMR, 'Major' Steve Anderson, may possibly return to the air with a new station. This operation may be a militia-supported station, but may have a different callsign and fewer, if any, ties to the KSM.

Perfect example of abusive and mean-spirited commentary,
Thank you for sharing your opinions with us as an
example of how not to behave.

>I just found out the league is going to push to remove all code requirements
>at the next international meeting. It's just the next step in their continuing
>efforts to dumb things down.

Your understanding of the league position is flawed.
The vote the league directors took was simply to
not oppose the removal of code as a requirement.
It is only the spin that you and others now state that
is recasting the league position to be one of pushing, rather
than simply not opposing.

>Soon, the only difference between a ham and a CB'er will be a piece of paper.
>Our bands sound more like 11 meters everyday.

Your opinion only. You are entitled to your opinion,
but stating it des not make it fact.

Cheers,
Bill K2UNK

5926. Re: Double sideband instead of AM ?

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-18 20:14:03 UTC
From: Skipp <skipp@pilot.ucdavis.edu>
Message-ID: <9bksiakda1@woodrow.ucdavis.edu>
Source record: 90655
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.homebrew

Hi there,

Although double sideband wasn't supplied as a normal function of your radio, there are simple mods which allow it.

I installed the same mod on my TS-430 to allow double sideband, of which I use on 40 meters. Conversations within the West Coast "War Zone" are often jammed. We use double sideband when the bandwidth allows to ensure a valid signal can be heard in most cases. Listening is done on which ever sideband is the most clear at the time.

So, check your radio out to see if there is in fact, a mod in place to enable double sideband. Searching through the common and available modification web sites might turn up the actual mod.

cheers

What? Using twice the necessary bandwidth just to communicate? Why not
just move 3 KHz to a clear spot? Sounds like you would be adding to
the "jamming" or just irritating the other guys causing them to jam you
in retaliation. Sounds like 75M at night. Please don't spread these
ideas to the midwest where we co-exist in peace on 40M.

Exactly. I don't think 210 is a fatass at all. Of course, the chicken Roger won't post a picture of himself. As for myself, I am 6 foot 3 and about 250 and quite happy with myself. I could lose a little weight but not going to be a chronic obsessive about it either. As far as the Glendale juvenile, we all have to remember that he has not gotten out of the juvenile stage yet. He will be a 45 year old mommas boy for the rest of his sorry life. Never be married either. Its no wonder he doesn't have a good woman with that filthy perversion infested mouth of his. Obviously, his mother didn't teach him to be civil. We never hear about his father though. He wouldn't even answer my questions. Ive killfiled him because hes not worth the wasted time. Besides, I would rather talk to my terrific lady friend. I will laugh my butt off when Roger libels the wrong person and gets his ass sued off. Of course, they probably won't get much other than the FT 920 and maybe the computer.It will be so very funny because he has asked for it on several occasions. Too bad that some people never learn.

Scott,
You need to dial in a little carrier. The CW carrier controls
that.

Nothing. Some idiot start posting multiple newsgroups
and we forget to delete the other groups. Sorry.

The newsgroups software can stop this by only
returning one newsgroup to the readers.

Sounds like you are the real phobic, Bruce.

Every time there is anything about the Scouts, you are in here drooling
and growling. Have you had your distemper shots?

Oh, you just QUIT IT, big silly.

I could care LESS about the damned "story".

Queers have a screw (or two) loose. Queer-wide homosapiens = humans go
the way of dinosaurs. THAT's what you want?

Get a life. And, get help.

Darn, there goes the neighborhood! ;) I guess I just don't see the
wisdom of modifying the transmitter and transmitting DSB, supressed
carrier when a flip of the switch can put the rig into AM mode and keep
the carrier, for 2 interfering signals instead of just one.

Just when I was getting used to that "new" math stuff ;)

Actually, that's not quite true, according to what I read.

Spielberg did not quit.

He just did not renew. Or actually indicated he would not
renew.

And he did not say it was because of the BSA stand on
gays. What he DID say was that he felt that his renewing
and remaining a member of the board he was on was
construed by some people as his taking sides in the
issue with the BSA.

So... He did NOT quit. He did NOT say the BSA was
wrong or right. He's staying out of it.

Mike

If he has renounced the Boy Scouts (which is exactly what it appears he has done), he is a "former" Eagle Scout. You cannot renounce an organization and then turn around to claim a title in that organization. The world doesn't work that way, Darryl.

Nope, rotating the carrier control to any position doesn't produce any carrier. Only when I speak into the mic does it put out power (swings up to a full 100 watts just like SSB mode does). The received audio (AM) sounds just like a SSB signal.

Stop the incorrect reference. Men that choose men instead of women are not gay, they are homosexuals. There is nothing gay about being a homosexual.

It wouldn't be the first time.

Or haven't you seen them make references to ham radio when they meant
CB, and vice versa? Or the time that they declared that "the gunman was
carrying a .380 magnum semi-automatic revolver."

The AP only passes along stories from members.

From "Webster's New Universal Unabridged Dictionary":

In addition to its original and continuing senses of "merry, lively" and
"bright or showy", GAY has had various senses dealing with sexual conduct
since the 17th century. ... and GAY as an adjective meaning "homosexual"
goes back at least to the early 1900's. ... The word (GAY) has ceased to
be slang and is not used disparagingly."

Not to mention the effect of the mixing of the audio with the carrier and having all sorts of products. Well the quality of the QRMer has certainly gone downhill since Riley showed up. HI.

If you all want to know how to really trash up a good radio check with K4OKA and KA8WAM, they win handsdown.

Ed
I would look at the manual to see where the carrier control is. I think in that rig there is a control either on the rear of the rig or on the inside to controll the carrier. Most Yaesu rigs sound pretty good on AM.

73 and good luck
Oris

Do you realize how silly that sounds, Cecil? You sound like a five year old saying "pee pee" instead of penis. The word is "nigger" - a word that has been in the dictionary just as long as the word "gay" to describe homosexuals. Sadly, if the thought police are successful at getting people to use "the "n" word," instead of saying the real word, then it will not exist in dictionaries of the future (several dictionaries have already caved in to the thought police and dropped it).

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1231379398&r=0&t=0&showTutorial=0&ed=988511542&indexURL=0&rd=1

2 RADIOS
Yaesu FT-811

Compact 70cm FM Transceivers
(420Mhz-470Mhz)

a.. This auction is for TWO Radios-excellent for TWO people to use to travel and talk!

b.. 49 Tunable Memories

c.. High Performance Scanners

d.. Memories store repeater offsets

e.. Auto Power Off to save batteries

f.. Uses the Yaesu FNB series Batteries

g.. Includes CSC-35 Soft Case (NEW)

h.. MMB-32A Mobile Hanger Bracket Included (for window or dash)

i.. BRAND NEW 12vdc Battery! (3/1/01)

j.. TECHNICAL MANUAL included!

This equipment was used by myself and son when he was young and lived near me. I bought TWO so we could talk privately on the ham bands. They are in excellent shape.
Included is the following: I have two MANUALS, A separate TECHNICAL MANUAL (ONE), a BRAND NEW BATTERY - FNB-11 12v 600mAh bought on 3/11/2001 from Batteries America ($30 alone!)

They BOTH are in good WORKING order.

5972. HELP for FT-530 needed

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-20 11:59:24 UTC
From: Michele IZ2EAS <iz2eas@libero.it>
Message-ID: <9bp8bv$4n$2@newsserver.cilea.it>
Source record: 90550

Dear Friends,

I need some information for my Yaesu FT-530:
1) how can I cancel a memory without rewriting something into it
?
2) how can I reset the radio ??
3) is there a place where I can find an electronic version of the
original user's manual ?
My user manual is in Italian, and it is very poorly written...
(lots of info missing...)
Thanks in advance

There's a huge trash underway at very high levels in the BSA heirarchy
over this bullshit. Individual troops have cut their ties with the
organization and continuing on their own. There are rumblings at the
council levels about pulling out of the national organization.
>
The problem is not morality or depravity or righteousness, the problem
is that there is no excuse or rationale for the Boy Scouts to get
involved in matters involving sex one way or another. National is a
bunch of Bible-pounding old farts in Dallas who have done a loverly
job of screwing up the whole movement by injecting issues into
scouting which have nothing to do with scouting. .

Look Scott and you other goofs...

Since you all blew writen hot air out in a followup before you thought it through, I'm only going to review the facts one time.

Go back and read my follow up post where I explained how DSB is used as an effective means to thwart jamming. Moving solves nothing as jammers will often follow. It's a practical solution that works well and costs little.

Your irritation comment is way out of line and shows you don't understand or have much experience in the real East/West Coast 40 meter experience. A day band by nature, 40 meters doesn't cover out of the regional State(s) of your "compared to - less populated area." So forget trying to make any type of informed comment when you don't have the information or experience of what happens in our areas. You never addressed the original authors information request, just blew a lot of trash onto the news group here.

I seriously doubt you or your other blow-hard friends would be able to provide the original Author any useful topic information.

Using Double sideband in legal bands makes much sense over AM, a trip through any Communications or Radio Handbook will explain why. An ARRL Handbook would be a great place for you to review the basics.

So go find some other post to comment upon where you have a better understanding of what's actually going on, both hardware wise and out in the real world where it's applied.

To All Cybercitizens,

The official launching date for our global broadcast: 1 November, 2000 is supposed to be a celebration marking the completion of Global Media Network. But as you're well aware, the reported break and enter, theft and other crimes committed by the Vancouver police which, if unchecked, have the potential to destroy human civilization. We offer our service as an impartial, fair, unbiased media. Our media network possess the power to illuminate the far corners of the globe, not for higher profits, but for higher understanding between the people of this great planet. We are proud that our media network, as its name implies, has the ability to reach every corner of the earth. We offer our declaration of principles to the men and the women, to our every brothers and sisters in the planet whom we humbly serve. We promise to report the news without fear or favor, to be a force for good in this world, fighting injustice, crushing intolerance, battling inhumanity, striking a blow for freedom at every turn. These are the goals of Global Media Network. Join us and visit our official web site at http://globalmedianetwork.org

Global Media Network proudly presents REVIEW OF ONE OF THE TOP NEWS OF THIS MILLENNIUM:- BURGLAR WATCH-A STATE OF WIDESPREAD STINK, OPPORTUNISTIC & RAMPANT THIEVERY, PLAQUE, CHAOS, BARBARISM AND LAWLESS-A GLOBAL REPORT OF BREAK & ENTER, THEFT, TREPASS, FRAUD, FABRICATION AND COLLUSION CONSPIRED BY VANCOUVER POLICE

ENACTMENT OF THE INCIDENTS [DETAILS PROVIDED BY THE VICTIM]:

On 6 June, 94. the victim went out at 2:30 p.m. from his apartment. When he gone back at 2:37 p.m. he discovered that both his apartment and his bedroom were broken and entered. He discovered that his newly bought hi-fi components (bought at A & B Sound) and forty CDs (costed CAD$2,000) were stolen from his bedroom. When he reported the crimes to the police woman badge # 9082, who admitted the fact of surveillance two years afterwards in 1996, she behaved very arrogant. She purposely hanged up the phone several times in order to aggravate him.

Being alerted of constant harassment, out of suspicion, in 21 September, 96, at 6:00 p.m., the victim confirmed with the same police woman badge # 9082 via 911 that the Vancouver police had

placed the audio and video surveillance devices inside his apartment. She refused to remove them and asked him to remove them. The Vancouver police were very familiar with the environment inside the apartment. In other words, the Vancouver police specificially targeted at the victim's properties that were located at his bedroom and knew exactly when the residents inside left the apartment. When the residents left the apartment on 6 June 1994, at 2:30 p.m., the Vancouver police sneaked into his apartment, stolen his properties and left within a minutes.

In July, 96, he called the Vancouver police in 320 Main Street, Vancouver, a male police who had sneaky remarks (about twenty something years old, caucasian) lied that the former chief constable Ray Canuel was in Atlanta, Georgia so that he could not handle the complaint. Afterwards, he sent a letter to Ray Canuel (deceased of cancer) in the same month without hearing any response. He then presented the complaint in person directly to the assistant to Ray Canuel. The assistant deceived him that the Vancouver police wouldl respond to his complaint three weeks later. The complaint aroused the police's revenge. Two polices without search and arrest warrant trespassed his apartment in Feb., 97. One caucasian police opened his complaint letter which was originally sealed without his consent and he was falsely arrested by the two polices. One of the police were a Chinese who were about 5"6, 160 lb., black and short hair. Another police were a caucasian who were about 6"2, gray and long hair whir covered his trim, gray-blue eyes, about 220 lb.. Both polices were thirty something years old. The latter one misrepresented and called himself as former Chief Constable Ray Canuel (deceased). The two polices committed trespass and false arrest.

The fact that Vancouver police are morally corruptive makes no difference to his efforts. When the victim filed the complaint through other formal channels three years afterward, i.e. 1999, he received a fabricated letter from Sergeant Mike Bernard, Office of the Chief Constable, Internal Investigation Section, Vancouver Police Department dated 20 May, 99, falsifyinging that police badge #581 Dave Turpin, Tony Zanatta had conducted the investigations. Indeed, they never contacted him nor take any report.

On the other hand, given the Vancouver police are coercive that they collude with every party the victim seeks help from or affiliates with. When the victim booked an appointment with a security company, APC Security in Burnaby, B.C., to do a further sweep on his apartment, the Vancouver police colluded with the company not to show up at the appointment on 26 July, 99. The same circumstances happened for Brian Brown & Associates INC, owner: Brian; operator: Laurie. Ph. (604) 2912121 and Interglobe Investigation Services Inc.. On 6 Aug., 99, the Vancouver police called the property manager of Crosby Property Management Ltd. to

follow him when he walked to the garden. The property manager purposely aggravated him and tried to fight with him. The property manager asked him to complain to the management (instead of the police complaint authorities) so that they can cover up the conspiracies....

Please join our global action together with ALL media and ALL political leaders ALL over the world that have received our attention.

Skipp,
First off, give me your call sign so I can see how long YOU'VE been
licensed. You can tell me until you're blue in the face that using DSB
"to ensure
a valid signal can be heard in most cases" is the right thing to do.
So, are you listening to one of the sidebands or both in the RECEIVE
mode? It sounds as if you listen to one of the sidebands, whichever is
interferred with the least. If so, you are sending out at least twice
the bandwidth as what you are listening to. That doesn't seem to be
"good amateur practice." In the midwest, this would almost be called
malicious interferance on your part. I don't see how you conclude that
"DSB is used as an
> effective means to thwart jamming. Moving solves nothing as jammers
> will often follow. " What if the jammer just moves his signal up or down a couple KHz and
starts interferring with the sideband you're listening to?

Scott,

As you, and many others, have already surmised Skipp is a raving idiot.

Anyone that advocates using DSB to avoid jammers is a jerk.

All going to DSB proves is that he could care less about interfering with others, as long as he gets through.

Dan/W4NTI

Wrong.

Adolescents must be protected from those who would exploit their
interest in sexuality. I have no problem with the idea of homosexual
males being on GIRL Scout overnights, I have a real problem with
heterosexual males being there.

If you don't see the risk of having homosexuals leading troops on
campouts, then you are broken.

5982. Need clean wav recording of WWVB

Newsgroup: rec.radio.amateur.misc

Source record: 90560

Hey all!

I'm a college student in upstate NY. Want to do a signal processing project using the BCD data stream from WWVB (broadcast on 60KHz) out of Ft. Collins Col., problem is that my rig blew up during a lightning strike, and now I have no way to receive the signal. I was wondering if I could talk any of you guys in or near Colorado into recording a few minutes (3 to 5) of clean WWVB signal and emailing it to me at tannerpa@clarkson.edu or p_a_tanner@hotmail.com . WWVB has no vocal announcement, it's only AM DSB-SC modulation carrying a PWM BCD data stream. You'll know you got it if you hear a pulse every second. I've tried contacting WWV by telephone, as it broadcasts both vocal announcement and BCD data, however the telephone signal is the vocal announcement only. Best results probably at night. I'll send $20 to the first person who sends me a useable wav file, for their time and effort, and to express my appreciation!

73,

Pat Tanner

Thanks Dan,
That was all I was suggesting in my first reply to his original post. I assumed he was fairly new and didn't realize what he was, in fact, doing. Moving up or down the band is the best approach...at least others won't consider you a lid by being polite and giving up the frequency in search of a clear spot. Chances are that someone else may have had a QSO in progress when the band conditions changed and made the other station audible to the other. Many times I get amazed while listening to a QSO in progress when all of a sudden I hear a new QSO on frequency, obviously not just starting out and one group will jump on the other that the frequency is in use although the other QSO was probably in progress as well at the same time, then the skip distance changed and "voila" interference.

"Why can't we all just get along?"

It's not a risk, Keith, it is a certainty. Homosexuals, depending on definition and politics, range from about 3 to 10 percent of the male population so the odds of avoiding the problem by some Great Loyalty Oath Crusade are slim and none. Scout executives, as Lincoln said of Hooker, can't tell their headquarters from their hindquarters. One simply cannot protect children from perverts all the time everywhere. Like embezzlement, all one can do is to raise both the number of people who must be involved and make damned sure all provable incidents are prosecuted.

A sane program does, of course, check the background to whatever extent is possible. In Nebraska where I live, the State Patrol maintains an internet-available list of known sex offenders. A sane program avoids situations where one-on-one encounters are possible; probably more to comfort the non-pervert leaders than to catch any loonies but still effective. Finally, one faces the issue squarely with some clear instructions to the kids about what is an improper sexual advance and more importantly what one does about it. Unloading the problem on gays is right up there with blaming the bogeyman.

The numbers we get here are one girl in four and one boy in seven is molested so a Scout program is no match for relatives or regrettably church leaders. I got to explain the whole homosexual schtick to my 11 year-old son courtesy of a church basketball coach, not the easiest experience for either of us. It starts with parents, parents who are

willing to sign a police report even if the perp is Uncle Ralph, Father Emil, or Pastor John -- not to mention Scouter Bill -- and kids with someone, hopefully their parents, to talk to.

The underlying assumptions of the Dallas Bible-pounders is that all perverts are gay and that somehow they can be rooted out. Both assumptions of course are simply stupid, some of many stupid assumptions the BSA is guilty of lately. If anything, they have raised the danger level to Scouts.

Where is Major DeCoverly when you need him?

And, if the Boy Scouts didn't have this policy, and one of the boys
were molested, there would be multi-million dollar lawsuits involved.
Look at the pile of lawsuits directed at the Catholic Church after
several "gay" church leaders molested some boys. What other choice
does the Boy Scouts have? In my opinion, this policy is an absolute necessity.

I was given a life membership in the BSA as noted, since I am a
choadswallower. I cumgargle on one side of my mouth and recite poetry with
the other. If I slur my poetry, it is because I have not swallowed the choad
yet. I like to swish it from one side to the other and savor the texture. A
good choad load is like a fine wine...I swish it to and fro and enjoy,
enjoy, enjoy!

I was wondering about my preferences toward 12 year olds.. I mean, take a
look at this
photo of my 12 year old neighbor boy. Heck, even my mommy approves. She even
washes his underwear when he visits me on the overnighters. We share hot
chocolate and wish that Michael Jackson would invite us for a weekend visit.
I have wet dreams about Michael one day sweeping me off my feet and swishing
me away to Never, Never Land where we can have beautiful sex with his
chimpanzees and bleach our skin.
My mommy just does not understand. She says I am ill.

I just installed a yaesu ft90 in my b5.5 (2001.5) VW passat.
So far no one has complained about me on 2M. I will tune the AM air bands
on my way home and let you know how reception goes.

The annoying part with the install is that I didn't see an easy way to
run wires from the battery. I didn't try very hard either. So I did
the dubious step of getting a 10A rated cigarette lighter plug with
banana posts from Rat-Shack and hooked my rig up mounted in the trunk
with the trunk's power-plug. Supposedly my rig won't draw more than 9.5
on maximum transmit, not that I plan to ever do the maximum...

Roger, the 46 year old bachelor, obviously has no women in his life save for his mommy with whom he lives. What does it say about a man of that age who still lives with his mommy in his mommy's house?

1. Roger is insecure.
2. Roger owns no property.
3. Roger is:

a. Divorced
b. Gay
c. Both of the above.

4. Normal women don't like Roger.
5. Roger doesn't like heterosexual women.
6. Roger is extremely immature.
7. Roger spends much too much time reading dirty novels as evidenced by his vocabulary.
8. Roger has temper tantrums.
9. Roger earns mimimum wage.
10. Roger accuses others of the very shortcomings he is guilty of.
11. Roger is miserable.
12. Roger has an identity crisis.
13. Roger admits he knows who his mother is, his father is yet unresolved.
14. Roger is a virgin, not counting his right-handed fantasies.

If that is Roger in that photo we would like to get his autograph. Will Roger be posting more photos of himself any time soon? He is quite the Hunk. He has masculinity written all over himself! He should post that photo on the LAMBDA site.
He would look just a little better if he'd use one of those penis enlargement devices though. Every little bit helps.

Based on available historical evidence, approximately the same percentage
of the general population has been homosexual as has been left-handed.

The US have been sending spy planes to China and they got caught out.
The people on the aircraft are just pawns so it was right for China to release
them. It's also right for China to retain the aircraft and find out what they can
about the technology. You gotta admit, it is good to see the US government
getting it up the arse for their meddling.

The US should apologise for the spy missions and make sure they do not
occur in the future.

Overt/Covert espionage as been happening since countries/governments have been in existence. Funny you don't mention the surveillance flights that occur off OUR borders, or the "fishing" trawlers that seem to have great catches off Florida when we are launching space shuttles or communications satellites. You don't have a problem with the Soviet "Bear" recon flights that we had to routinely shoo away with jet fighters. Yeah, we are the only villain in the world, the big, bad, evil United States. WROOOOOOOONG! Pity people have their enemies all mixed up--especially the leftist variety. Everytime you bash us, just remember: That big, bad, United States is usually the first to rush to aid those in need whether it be earthquake, flood, fire, or famine--or a foreign power about to overrun some less powerful country. We have fires, drought, earthquakes and floods, just like everybody else--Davenport, Iowa is expecting the Mississippi river to crest at 23 feet as I write this, and I don't seem to remember ANYbody else coming to help US. We have poured BILLIONS of dollars into aid to other countries,including debts incurred during WWII, very few of which were EVER repaid! And for that we get criticized, double-crossed, ridiculed, and mocked. In return, by rights, we could just tell those people who come to us with their hands out, to eat sh**. But, no. That big, bad, evil US of A just keeps turning the other cheek and passing out the checks, food, and military aid.

The real truth is, that if we turned our backs on those who are our enemies, such as China, closed our borders, didn't keep track of the war-making capabilities of said enemies, there would be WWIII. Without the ability to assess the enemy's military and current intentions, we would be unable to preserve the freedoms we have today. So.. we spy on them, they spy on us. Funny, you don't mention that, either. There are enemy agents inside the US right now--we just haven't ferreted them out. So, faced with the realities of a dangerous world, this activity is a necessity for us.

Finally, now that you are so amused at this China/US incident, just what would YOU do differently? You so obviously are so much better at telling nations how to run their foreign policies, you must be gifted to the extent of advising us how to face our enemies and prevent a hostile power from gaining a nuclear, tactical, and numerical advantage. Otherwise, KMA, MATE! And keep yer damn snakes, too!

Thanks, Jerry. I'd like to see the day that they could send pilotless drones out to collect the data. You're 100% right - anyone thinking other countries are not doing the same is kidding himself/herself. Frankly, when North Korea took the Pueble, I'd have loved to have that followed up in 24 hours by a surfacing nukie sub with flags up stating North Korea had half an hour to release the crew - they had a couple of 'birds' for them. Oh, and the whole 6th fleet was on its' way for any necessary mop up operations.

Certainly, most of us have. And I don't care about the "rights" of queers--they have same rights as the rest of us.

When I was in college, I worked part-time at a well-known automotive parts manufacturer as a forklift driver. Most of the guys in that department were college kids. I noticed that whenever I visited the mens' room, the boss would usually come in as well. At first, I just thought he was checking to see I didn't tarry too long. But it happened enough that I mentioned it to one of my co-workers. He told me he was doing the same thing when ANY young male went to the john. So I started to use the private stalls even when just taking a wizz. So did all the other guys, now believing this guy was one of them "funny boys" that liked to peep. I eventually left this temporary job in favor of one more suitable to my school schedule. I never knew for "sure" this boss was queer, but I learned later that he was FIRED after being caught on the roof of the plant groping a kid he hemmed in a corner. He had made the boy go up there on the pretense of helping him repair a loose vent. I also learned that he had given EVERY college male that "hid" from him in the stalls, a bad work record so that none of us could get another job with the company.

....and I'm supposed to be "TOLERANT" of these people?

Jerry

Hitler was a heterosexual. Does that make you hate heterosexuals?
Using terms like "these people" because of the actions of one
person is collectivism, akin to sexism and racism. Why can't we
just judge individuals for their good or bad actions?

NOTE FROM THE EDITOR: Linda and I would like to thank the many who sent congratulation messages on OPDX's celebrating its 10th anniversary in publication. We hope to continue to provide you with a possible new...
Best 73 de Tedd/KB8NW and Linda/XYL.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15/April, through Sunday, 22/April there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/A, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9M, VK9N, VP2E, VP2V, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XX9, XZ, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 53 ITU Zones available during the past week. ITU Zones

that were not active are: 3,4,15,21,22,23,24,25,26,31,34,35,43,
58,59,68,69,70,71,72,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

2000 DXCC YEARBOOK IS OUT. Many have began receiving the "2000 DXCC Yearbook" and the ARRL has put out another excellent publication for members involved on the DXCC program. The yearbook not only has the top "100 Most Need DXCC Entities" and the DXCC Annual List, but great articles by Wayne/N7NG, Martti/OH2BH and Carl/N4AA. There is also, an article and interview with Bob Eshleman, W4DR, the 2000 DeSoto Cup's winner. The Top 10 Most Wanted Entities are:
1 - P5 North Korea 6 - H40 Temotu Province
2 - BS7H Scarborough Reef 7 - BV9P Pratas Island
3 - E4 Palestine 8 - VU4 Andaman & Nicobar Islands
4 - FO/A Austral Islands 9 - 7O Yemen
5 - FO/M Marquesas Islands 10 - A5 Bhutan

3W, VIETNAM (Possible New IOTA). Look for Alan/BA1DU, Jin/BA4TA, Liao/BA7QT to team up with Bac Ai/3W6AR and Hau/3W6LI to activate Tam Island (new IOTA) from Vietnam. Tam Island is located in the South China Sea, about 12''10'N and 109''15'E. The team will use the callsign 3W7D and plans to operate from April 26th April to May 1st. They will set up two stations and work on CW and SSB on the normal IOTA frequencies from 40-10 meters. Their equipment will include FT-990 and TS-50 transceivers, GO-2KW linear amplifier, Cushcraft R5 vertical and multiband dipole antennas. The 3W7D team is supported by The Beijing DX Club, Chinese Radio Sports Association, The Vietnam Amateur Radio Club and sponsored by Island Radio Expedition Foundation Inc. QSL via BA1DU (E-mail: ba1du@arrl.net). Send directly to: P.O.Box 8091, Beijing 100088, CHINA, or Chinese QSL bureau.

4U, UNTIED NATIONS HQ (Update). Henry, KT1J, informed OPDX that:
"Yes, we had 4U1UN on the air in PSK and SSTV for a short time again last Friday (April 13th). (We initially ran some tests back in February). It is anticipated that 4U1UN will be on in the digital modes fairly regularly in the near future, once a few computer issues have been resolved, and antenna improvements have been made."

6Y1, JAMAICA (Attention Prefix Hunters!). The rare prefix of 6Y1A will be activated by Tom/N6BT, Fred/KE7X, Walter/N6XG and Ken/K2KW in the CQ WPX CW Contest, May 26-27th, 2001. Outside the contest, look for operations using their homecall/6Y5 from May 20-29th. They will use KW amplifiers on 40-6 meters, and vertical arrays will be provided by Force 12. Special emphasis will be given on the WARC bands and 6m outside the contest. QSL 6Y1A and K2KW/6Y5 via WA4WTG, others via their home callsigns. Questions go to Kenny, K2KW at: k2kw@prodigy.net
For information, visit the Web page: http://www.k2kw.com

AP, PAKISTAN. Robert, S53R, informs OPDX that he wil be starting a new assignment with the U.N. beginning in May and will start in Pakistan. He will try to sign AP2ARS as much as possible again. Operation will be on 40-10 meters, including the WARC bands, almost exclusively on CW. Robert told us that other operations from the region are also possible, and he will keep us posted.

BEACON CALLSIGN CHANGE. Yacov, 4Z5AY, informs use that the 4Z5AY 6 meter beacon located in Tel-Aviv has a new callsign. Look for 4X4SIX to be active on 50.080.20 MHz. More details are available at the Web site: http://www.iarc.org/~4z5ay/htmls/bea_tec.htm

DAYTON DX DINNER BANQUET (Update). Steve Bolia, N8BJQ, informs OPDX that at the moment, all tickets for the DX dinner have been sold. All orders on hand have been filled and due to space constraints, no more can be sold. It is possible that some may become available just prior to the dinner. Also, Chuck Brady, N4BQW (3Y0C), will be the featured speaker and will talk about his 3Y expedition. For those that want to know more about Chuck's real job they can find it at: http://www.jsc.nasa.gov/Bios/htmlbios/brady.html

FH, MAYOTTE. According to Ted, JJ1LIB, who operated as S07U, 5T5U and 8Q7JY, he will be active as FH/JJ1LIB from April 29th through May 4th. Ted will use a TS-570 plus an IC2KL(500W), a 2 element HB9CV yagi for 20-10 meters, and a 6 element yagi for 6 meters. For the lower bands, he will use wire antennas. Operations will be on CW, SSB, and RTTY. The QSL for FH/JJ1LIB should be sent to JN1HOW.

H40RW WRAP-UP. Ron, ZL1AMO, informs OPDX that he is back home slowy recovering, and he has completed his H40RW DXpedition to Temotu on April 6th. He made about 11500 QSOs which includes about 300 on 6 meters (this was a suprise for Ron). Ron states that the weather there was really really hot and also extremely wet with constant electrical storms with deafening thunder. He also mentioned things have really changed in Honiara since his last visit in 1990. He also thanked OPDX for the write up on his DXpedition and congratulated OPDX on its ten years of dedication.

HK0, MALPELO ISLAND. Pedro, HK3JJH/HK0M, continues to be very active on 75-10 meters, usually not working split. He will be there until May 7th. QSL via N4AA.

HR, HONDURAS. Wolf, HR1BY, is active from Valle de Angeles on 6 meters. He is working QRP, only 8 watts. Check around 1830z and 2330z. QSL via EA7FTR.

HS, THAILAND. Charly, K4VUD, will be active from Bangkok as HS0ZCW from April 26-28th. He states to look for him on the higher bands.

IOTA NEWS.....
AS-079. Take, JI3DST, will be active from Miyako Island (Miyakojima Hirara-City Okinawa-ken) as JI3DST/6 from April 27th through May 6th. Activity will be on 80/40/17/15/12/10/6/2 meters on SSB (he is planning SSTV/RTTY). QSL via the Bureau.

EU-030. Klaus, DL7UXG, will be active from Bornholm Island as OZ/DL7UXG/p from August 5-18th. Activity will be on 80/40/30/20/17/15/12/10 meters, using CW and SSB. QSL via DL7UXG.

EU-047. Karl, DJ9IN, reports that DA0IMD was active from Borkum Riff Lightvessel during the "International Marcoi Day" this past weekend. Look for more activity from here using the callsigns DL0KBM and DL0BRF.

EU-094. (Update) Team TM5N will be operators F2FZ, F4AJQ, F4BUX, F4BTP, F4TTR, F5FG, F5AGB, F5IKO, F6DOP, F6EGG, F8BUI, F8CTY, F8UHU and F9IE. Activity will be from St. Nicolas Island (Glenan Islands/DIFM AT-10) from April 26th through May 1st. They then will be active as F6KOP/P from Cigogne Island (DIFM AT-61) on April 28th or 29th. Operations will be on 160m-23cm. QSL via F6KOP.

EU-127. Felix, DL5XL, will be active and signing DL5XL/p from Helgoland Island, July 28-29th. Activity will be on 80/40/20/15/10 meters, using CW only. He plans to participate in the RSGB IOTA Contest as a Single OP/24hr/CW/Island Class entry. QSL cards are "OK" via the bureau. Further information is available at:
http://www.dl5xl.de/
QSL via DL5XL, P.O. Box 1253, D-30984 Gehrden, Germany.

EU-148. The "Castres DX Gang", consisting of operators F5AUB, F5OSN, F5XX, F5RVI, F5DBX, F5UOE, F5BJW, F5BKB, F4CLO, F5JBR and F5VV, will be active from Fort Brescou Island, May 24-28th. Activity will be on CW/SSB, all bands 80-10 meters including the WARC bands. The will use the callsign F5XX/P, however, there will be a special entry in CQ WPX CW Contest CW using the callsign TM5B. QSL via F5XX direct CBA or via French REF Bureau.
Other reference numbers for this operation are:
French Metropolitan Islands Award - DIFM ME001
World Light Houses Award - 0500
International Light Houses Society - FRA 015
French Forts and Castles award - DFCF 34001

EU-174. Will, N2DH, will operate as SV8/N2DH from Thassos, from April 27th through May 4th. Operation will be on 20-10 meters SSB with some possible 75 meters operation. QSL direct to home callsign N2DH.

OC-171/OC-172/OC-187.
Bill, VK4FW, reported this past week that he had to change his planned Queensland operation from OC-138, OC-171 and OC-172 slightly. Due to problems associated with OC-138, he has made the following arrangements. By the time you read this, he should be active from North Coast Centre Group (OC-172) on Monday, April 22nd, for 3 days. From there, he will then go to North Coast (North) Group (OC-187) for 3 days. From there he will head south to activate the North Coast (South) Group (OC-171) for 3 days. As this trip is not funded, Bill would appreciate if you

could help a little when QSLing. He will spend most of his time
on CW on all bands 80-6 meters.

JW, SVALBARD (Rare IOTA). Terje, JW3OHA, reports that he and others are
planning/arranging a DXpedition to a rare Arctic island and are looking
for operators. The operation is planned to take place this year from
May 31st to June 9th from Prins Karls Forland (IOTA EU-063). If interested,
check out the Web page: http://www.dxpedition.org

PY0F, FERNANDO DE NORONHA. Dennis, K7BV, < k7bv@aol.com > will operate
from Fernando de Noronha, May 24th through June 1st. He will sign with a
special callsign throughout the DXpedition. Dennis will be active in the
CQ WPX CW Contest, most likely entering as a SOABHP category. After the
contest he will be very active on all bands 160-6 meters, generally on
CW. Rod, WC7N, < wc7n@gb.wave.net > will serve as Pilot Station, assisting
Dennis, helping 9BDXCC chasers fill empty bands. Logs will be posted on
web site: http://www.qth.com/k7bv/PY0F
This web site is expected to be launched sometime this week with details
of the DXpedition. Steve, KU9C, will handle QSL chores.

QSL INFO AND NEWS.................
Carl, N4AA, editor of "QRZ DX" reports that there has been some confusion
on the callsign for the QSL Manager for 3V8SM and 3V8SQ. John, K1XN,
of the GoList, tells Carl that the information he received was 3V8SM
via DL1DBF: Manfred Wiedemann, Am Feldberg 43, D-57334 Bad Laasphe,
GERMANY.

The correct address for 3W2KF (operated by F5PBL) is: Claude Terrier,
18 allee du Mail, 92360 Meudon la Foret, France.

Robert, S53R, informs OPDX that all direct requests for E4/S53R have
been answered. All contacts made will also be confirmed via bureau
when he is back home for a holiday in July 2001. Many requests for
his recent operations as AP2ARS, EY8/S53R and UK8AXA were received.
QSLs are being printed and will also be answered during the next
holiday. Do not send duplicate requests.

Fran, EA7FTR, reports that he is the QSL Manager for the following
stations: CE3HKF, HR1BY, HR1RGA, HR1RQF and ZP6EM.

It is reported that Ken, N8KR, is having printer problems on his
QSL cards for his October 2000 operation from FP land. He states
to please stand by and QSLs will be out as soon as he receives them.
Also, his XYL wants the dining room table back!

RAC CORRECT ADDRESS. Fred, PY7ZZ/PY0FZ, informs OPDX that there is
a bad listing of his RAC address. The correct address is:
Fred Souto Major, Rua Almedia Belo 241/302 - Bairro Novo, Olinda,
PE 53030-030, Brazil.

Leif, SM5BFJ, informs OPDX that he is QSL Manager for 5X1D, 9Q5TE,
9U5D and 9X/SM5DIC. The QSL information has been "via SM0BFJ", but
from now on the QSL information is "via SM5BFJ". His address is:

Leif Hammarstrom, PL 1053, SE-730 91 Riddarhyttan, SWEDEN.

SPECIAL EVENT. Look for the Mongolian special event station JU1O to be active from Ulaanbaatar between May 5-13th. We contacted Khos, JT1CD, explained what the special event is for and he stated that JU1O will be active during the "National Technical Olympiad". The children of the High Schools of the Mongolia will compete in these championships (which are Amateur radio direction finding, aeromodelling, Ship modelling and Car modelling... etc). QSL via JR0CGJ: Takashi Shimizu, P. O. Box5, Tateshina Kitasaku, Nagano 384-2305 JAPAN.

TT8, CHAD. Look for Eric, F5JKK, to be active starting the 2nd or 3rd week of May. He has asked for the callsign TT8JE again. Eric prefers 6 meters using and FT 847 w/100 watts (maybe more!) into a 5 element Yagi antenna. He states to listen for his CQ on 50.110 kHz and will begin listening on 50.200 kHz (5 to 10 up). His operations will be mainly CW, but there will be some SSB if conditions are good. Eric will be running a beacon using 25 watts on 50.096 kHz. The beacon will send: VVVVV DE TT8JE JK72MC -- (5'') and break (5''). IMPORTANT! Eric reports that he worked many stations in 1998, however, in 2001, he states, "NO dupe or I'll cancel old QSO. Listening carefully on my frequency, don't loose time for you and all others (Sample: When I say Alpha Bravo NO others like Alpha Kilo...). Education and courtesy, no need to say more." Eric will be on HF using the same radio but with a R7000, dipoles and loop antennas. His modes of operation will be RTTY/PSK31 and will try SSTV and CW. He suggests to look for him on the WARC bands and especially on 10 meters. QSL via F6FNU.

TX0, CHESTERFIELD ISLAND (Update). Andy, YS1AG, informs/reports to OPDX that he has received the following information from Kan, JA1BK, about the upcoming TX0 operation. Kan states that rumors of the upcoming TX0C DXpedition being cancelled is FALSE. Only Jacky/F2CW, and Akinori/JA4EKO have dropped out of the DXpedition. There will be only four operators now, Georges/FK8FS, Daniel/FK8FU, Dany/FK8VHY and Philippe/FO3BM. Activity is scheduled to take place April 27th through May 2nd, on HF and the 6 meters band. Pilippe will be the only operator that will listen to 6 meters using a 7 element beam and a FT-100D plus a small amp. All QSLs via JA1BK.

VK9C, COCOS-KEELING ISLAND. Dennis/G3MXJ, Roger/G3SXW and Nigel/G3TXF plan to be active from here as VK9CXJ, VK9CXW and VK9CXF, respectively, from April 28th through May 5th. Activity will be on all nine bands, CW only. As many other DXpeditions will be active during that week, there are two suggested frequencies for each HF band. They will try to always be on one or the other of them: 10108/118, 14008/018, 18078/088, 21008/018, 24898/908 and 28008/018. On the lower frequencies, try 7008, 3508 and 1825 kHz. For their propagation and other details, check the web site: http://www.G3TXF.com/dxtrip/vk9cxf/vk9c.html QSL via home callsign.

VK9M, MELLISH REEF. After three days of sailing, the VK9ML team landed on the Mellish Reef Thursday, April 19th at 2321z. According to a press

release by Adam, VK4CP: "There was some concern that Mellish Reef may not exist as such anymore as it has been a few years since the last DXpedition and there have been several cyclones in that area in recent years. Mellish Reef is only 1 metre above high tide, as was the case when the team arrived." The team is expected to be active until April 24th. Look for them on various bands. For more details on the Mellish Reef Site Survey DXpedition have a look at the web site: http://www.qsl.net/vk9ml

VP8, FALKLAND ISLANDS. By the time you read this, the Scottish team of Gav/GM0GAV, Rob/GM3YTS, Tom/GM4FDM and Jack/GM4COX should be active as VP8SDX until May 8th. Activity will be on all bands 160-10 meters. Their suggested frequencies are:
CW - 1823.5*, 3503, 7003, 10103, 14023, 18073, 21023, 24893, 28023
SSB - 1843*, 3793, 7053, 14193, 18123, 21263, 24923, 28493
RTTY - 14083, 21083, 28083
PSK31 - 14069
* Other frequencies will also be used to accommodate specific country sub-bands (e.g for Japan).
Their goal is to make 30,000 QSOs with two stations on the air. There will be lots of low band activity besides the HF. They plan to keep the WARC bands busy. There will be (as they state) "gallons of CW, a few pints of SSB, a glass or two of RTTY, and maybe a 'wee dram' of PSK31. Their pilot station will be Chris, GM3WOJ. You will be able to send your feedbacks, comments and suggestions to them via E-mail at: vp8sdx@talk21.com
QSLs can be sent via the bureau, E-mail or direct to GM4FDM: Thomas Wylie, 3 Kings Crescent, Elderslie, Renfrewshire, PA5 9AD, Scotland. Check out their interesting Web page at: http://www.hfdx.co.uk/vp8sdx

VQ9, CHAGOS ISLANDS. VQ9IO has been active on 24904 kHz at 1445z and 21017 kHz between 1430-1530z.

Z3, MACEDONIA. Venco informs OPDX that since April 1st, he has changed his callsign from Z31JA to Z36W. He can usually be found on 40/20/17 meters CW after 2230z or on 10 meters after 1400z. QSL via NN6C, or the QRZ.com and CBA (using his old callsign). Venco states any contacts with him for skeds, info... etc, can be made via his E-mail address at: z31ja@mt.net.mk

ZK1, NORTH COOK ISLAND. Victor, ZK1CG, reports to OPDX that Tuatai, ZK1MA, is back in Manihiki, North Cook Island after his long stay in Rarotonga, South Cook as ZK1CY. Tuatai is mainly a CW operator using FT-747GX and dipoles for antennas. His home and radio gear/antennas were completely wipe off the Atoll a few years ago during a hurricane that destroyed 85% of the Atoll. He is slowly recovering from this, Victor/ZK1CG sent Tuatai the FT 747GX to use with battery power. Victor is now operational from South Cook thanks to W7VV (Roger and Sue) who so kindly sent him a rig that he had as a spare. Victor states that they will be donating some antennas to Tuatai after their October CQWW SSB Contest operation. What Tuatai needs now is new a mike for his rig. If you have an old (not too

used) mike for his FT-747GX laying around, please let Victor know and he will make arrangements to send it to Tuatai. Victor's E-mail address is: sales@computers.co.ck

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

As if we could care about this whole thing.
Why don't you guys take your childish radio
feud back to 75 meters or 14.313 where it
obviously started and rightly belongs.

Dummy.

I just joined this list and that was the first thing that I did. Ham radio doesn't need junk like this. The only thing that I regret is that I wrote a note asking him to NOT post stuff like that on Misc 'cause folks like me don't want to read it. So now I'll probably get harassed off list. I should have read more messages and realized that he was hopeless before writing him.

No one is suggesting I hope that tolerance means ignoring sexual assault
committed by anyone on anyone else. You just found out what your wife
already knew. If your HR people were dumb enough (unfortunately most are)
to take his word on any evaluation then just whose loss was it?

I suspect this was a few years ago. You will find that procedures have
changed a lot in recent years.

Check this out on EBAY. TWO RADIOS...modified for Commercial use too! Great deals! REserve met already!

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1231379398&r=0&t=0&showTutorial=0&ed=988511542&indexURL=0&rd=1

2 RADIOS
Yaesu FT-811

Compact 70cm FM Transceivers
(420Mhz-470Mhz)

a.. This auction is for TWO Radios-excellent for TWO people to use to travel and talk!

b.. 49 Tunable Memories

c.. High Performance Scanners

d.. Memories store repeater offsets

e.. Auto Power Off to save batteries

f.. Uses the Yaesu FNB series Batteries

g.. Includes CSC-35 Soft Case (NEW)

h.. MMB-32A Mobile Hanger Bracket Included (for window or dash)

i.. BRAND NEW 12vdc Battery! (3/1/01)

j.. TECHNICAL MANUAL included!

This equipment was used by myself and son when he was young and lived near me. I bought TWO so we could talk privately on the ham bands. They are in excellent shape.
Included is the following: I have two MANUALS, A separate TECHNICAL MANUAL (ONE), a BRAND NEW BATTERY - FNB-11 12v 600mAh bought on 3/11/2001 from Batteries America ($30 alone!)

They BOTH are in good WORKING order.

6035. FA: Ebay Dual Band HT: Yaesu FT-470

Actually, there are many who are suggesting that Hitler was a homosexual.
It is widely known that he did not have sex with women. So, yeah, you could
say that is another reason to hate Hitler and why people who had made that
choice, should not be in the scouts.

I am not convinced it is a choice and morality I will leave to God.

But sexual assault is a crime of violence more than it is a sex crime.
The sex or sexual preferences of either party makes it no more or less
felonious.

6042. FS: Rapid Charger for Yaesu FT-50, FT-40, FT-10 batteries

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-23 03:33:17 UTC
From: jcsarp@aol.com
Message-ID: <20010422233317.08305.00000500@ng-cl1.aol.com>
Source record: 90516

This is a MAHA model MH-101-Y3 Rapid Battery Charger. This model is specifically designed to charge Nickel Metal Hydride (NiMH) AND Nickel Cadmium (NiCad) battery packs that are used on the Yaesu FT-50, FT-40, and FT-10 radios. You simply drop in the radio with the battery pack attached OR just drop in the battery without the radio. The charger does the rest and switches to trickle charge at the end of the charging cycle. It will handle ALL of the various size and voltage battery packs. ANY brand battery pack ... Yaesu ... MAHA ... whatever. Here is a partial list of battery packs: FNB-40, FNB-41, FNB-42, FNB-47, FNB-49, MH-FNB-40H, MH-FNB-41, MH-FNB-V47. Remember ... it does BOTH NiMH and NiCad batteries safely and correctly. A full charging cycle takes from 60 minutes to 120 minutes depending on the battery pack being charged. This unit is in MINT condition. It could pass for brand new. I've only used it about 6 times and there is not a mark on it. It comes with the following: MAHA MH-101-Y3 Charger, Power Supply, Operating Instructions, Original Box and packing material.

Check it out at:

How do you know? There is a school of thought that says otherwise.

Generalizations are dangerous. So is ignoring a large body of experience which shows trends that are dangerous. Many homosexual men are known to prey specifically on young boys. Should parents just ignore that fact since they are a minority of homosexual men?

How much bonus money is the ARRL Board paying you for you to imply something to the readers by making a statement like that? For the Board to say they are not going to propose eliminating code, but they won't oppose a change, is the same thing.
That's like saying: we're not going to set the building on fire, but if one starts, we'll let it burn.

It's either the sin of commission or the sin of omission. I guess the ARRL will get what it wants, to dumb down amateur radio further. This time it won't have to lift a finger to do it. They can come out looking like the good-guy. Thank Ed, checks in the mail.

Ringo

Don't you love these guys that sign their artwork? Can't fault a guy for voicing his opinion, that's how we all learn, but Jeez, have the balls to admit who you are!

I wonder what suggestion or implementation all the folks that love to bash the new rules came up with as a solution to the problem of declining participants. I don't think I've ever read any on the groups. I guess they're too busy protecting their turf. Maybe a ham boot camp that includes PT, engineering, 25 wpm code, demerits, cigarette smoking, etc., all on the prospect's nickel.

I propose a new class of license, the "LORD" Class. Just be able to have a closed mind, no solutions, pass the old advanced test, be able to work at a minimum of 25 wpm and you will have "Lord" privileges. You can do what you please, say what you please, buy what you please, go as fast as you please and not be required to help anyone or anything - ever! Your word will be treated as scripture and all will bow at your presence! Having any ticket less that Lord Class will tag you as incompetent (with a Good Buddy armband requirement), give restaurant owners the right to not serve you and dogs permission to bite you.

I'm not saying that the rule changes were good or bad, we'll all admit the overall abilities of the older hams are far above many of the new folks, but did any of you good ol boys ever think that by relaxing the code requirements, interest in the hobby would increase? How many folks have gotten their tickets under the new rules and advanced themselves because of a greater desire to participate? Come on, raise your hands! I don't feel anyone thinks less of you because of the new rules, but I can tell you that I fully respect the knowledge and talent you have, which is far above mine. At this point I can't keep up with your conversations, but you know what? One day I will. How about that? the "new" rules may have given birth to "fans"!

==========
Listening to a local AM medium wave BC station with a Ten Tec ,Paragon on USB and LSB , provides very clear reception , although the sound quality on LSB is the best (must have something to do with the settings of the side band filter). I often do that on other AM (full carrier)BC stations ,also on the short wave bands.

For home brew projects DSB is ideal ,since with a balanced modulator the carrier can be easily suppressed ,whereas no (costly)sideband suppression circuitry is required .
I agree that in crowded bands DSB is considered anti-social ,but the bands are not always crowded.

My conclusion : DSB is an excellent 'home brew' option especially for QRP operation.
Thought I should post this on the Home Brew NG.

In article <3ae186b7.2807856@news.compuserve.com>, vwbob59@cs.deletethis.com says...

> Hey Guys - any help on this subject would be greatly appriciated by me
> as well. I do OK on 2 meter (noisy though) but AM is a mess in my 99
> New Beetle 1.8T. Also being an aviation buff I like to listen to 118 -
> 132 mhz AM when I go over to trhe airport (Unicom, Atis, Air Traffic
> Control, etc) This particulat frequency is unuseable in the car...
> sounds to me like Ignition noise.....

The first thing you need to do is determine if the noise is coming from the power source, or is being radiated into the antenna. Unhook the antenna, tune to AM and turn on the rig with the engine running. Vary engine speed and listen. If you still have the noise, and it varies with the engine speed, then you will want to filter your power (which is coming directly from the battery, yes?) This is the easy problem.

If there is no noise when you unplug the antenna, then the real fun starts. Something is radiating RF into your antenna system, so you will have to track down what it is. There are any number of things that might cause it, including fuel pump, spark plug wires, alternator, engine computer, etc. You will just have to isolate and eliminate each one as a possible cause, and go on to the next.
Some of the possible remedies include filters (isolation caps, notch, etc.), wrapping aluminum foil around an offending part, braided mesh over wires, and so on.
The first and best solution, though, is to make absolutely sure your whole system is well bonded to the car. Run a braided strap from the radio to a structural connection (mine goes to a bolt that secures the passenger seat). If necessary, run bonding jumpers from the body panels to other panels, and the frame. Make sure that you are getting your DC direct from the battery through heavy gauge wire. Keep connections short.

If you can find it, the January / February 2000 issue of QEX had a good article about eliminating mobile noise. Let me know if you need it, I can provide you a copy of the article.

>w3rv

That's right.

First the ARRL goes ahead and takes away space because they wanted incentive licensing. That's OK, we should have some goals for advancement! Everyone got used to that.

Second, the FCC changes testing. Now the same tests are easier to pass. That's OK, it's the trend of the world. But clearly the Extra class is not really "extra" any longer.

Finally, the FCC takes space and effort away by allowing everone to have what amounts to an automatic upgrade. Holders of ALL classes of tickets with more than a "crude test" of 13 wpm are cheated by allowing people to have the same privledges with less effort.

Of course they did that mostly as a result of Kenwood and the no-work people.

Now the ARRL, in spite of overwhelming response that says keep CW, decides they just won't say anything if someone wants to remove CW requirements.

What a bunch of money grabbing fools. Radio isn't dying because of CW, or testing. Radio is dying because no one has the time or wants to make the effort to learn anything. It is no longer magic to sit in a room and talk to people half-way around the world. There is little time or incentive to build things, and anyone who does like to build things can learn more on internet than they ever can on the ham bands.

Ham radio is dying because the world has changed, not because of CW. It will not live no matter what is done, because people aren't all that interested.

All this no-code stuff does is screw up the time we have left, by moving amateur radio towards CB. Hell, CB even died way off. Why would anyone thing Ham radio should be any better at surviving the changes in society?

Yup,

Dick and I exchanged a couple emails about this very thing. The trouble is that when you mix in a group of "dominant" personalities, this case gay scoutmasters or older scouts who are gay, the young ones are vulnerable due tho the fact that at the ages of 11-13, they are awakening to a whole new set of changes in their bodies and minds. They are curious, eager for information, and even confused about the things that are happening to them. So if a "gay" person (still like the original terms like queer, fag, fairy, etc, because they fit better) kinda brings up the subject of sex to the younger ones, it is possible to lead them into something they are not equipped to deal with--which is why there are age of consent laws. The older Scouts are more settled and not as impressionable--and they are bigger so they can whup hell outta someone that tries that! LOL!

It has always made me wonder why the queers are so all-fired bent on getting into Scouts by and while rubbing their lifestyle in our faces. They already CAN participate in Scouts! All they gotta do is join, do the activities, keep quiet about their sexual prefs., and keep their hands to themselves. But can they DO that? I would rather deny the privilege to one group in order to protect our most precious resource: our kids. Better safe than sorry sounds about right.

Hi Frank,
I won't dispute that DSB would be fairly easy to implement in homebrew.
As you picked up, I was just commenting on the fact that modifying a
commercial rig to run DSB, and I assume the original poster was using it
in crowded bands, that it was anti-social as you describe.

There was a special on Hitler's sex life on the History Channel a
few weeks ago. He drove his female cousin crazy with his perversions.

> Generalizations are dangerous. So is ignoring a large body of
> experience which shows trends that are dangerous. Many homosexual men
> are known to prey specifically on young boys. Should parents just ignore
> that fact since they are a minority of homosexual men?

A minority of men are murderers. Do you ignore them? Do you consider
every man a murderer until proven otherwise? There is an extreme
danger in collectivism. That has been proven over and over down
through history. When are we ever going to learn to protect ourselves
and our loved ones in general and judge each individual in particular?

Little girls are twice as likely to be molested by a heterosexual male
as little boys are likely to be molested by a homosexual male. Should
we not protect our little girls? A strange male is twice as likely to
be a molester of little girls as he is to be a molester of little boys.

Condemning all members of any group for the actions of some members of the
group is simply an evil thing to do. That is the basis for collectivisms
like racism and sexism.

However, private organizations should have the right to admit or reject
anyone they choose. If the Boy Scouts don't accept any public money,
they have the logical right to reject men with brown eyes if they so
choose. I know that's politically incorrect, but that's the way things
should be. It broadly comes under the heading of property rights.

No doubt a lot of them do just that.

> I would rather deny the

Thus are the seeds of collectivism. If only one child's life is saved,
guns should be outlawed. It's a slippery slope.

The solution is to allow private organizations to select their members
and reject *anyone* for *any* reason. It falls under the heading of property
rights. IMO, if the Boy Scouts don't accept any public money, then they
have a logical right to bar gays or even anyone with brown eyes.

Your logic is really amazing.

Pedophiles, adult males who prey sexually on juvenile males, are a presumably small subset of homosexual males, who comprise a small percentage of all males. How the duece can you equate that to "murderers are a minority of men" and act as though it was in some way equivalent? Are you really that far out of touch?

The Boy Scouts should not allow homosexuals to be scout leaders for the simple reason that it is well known that pedophiles naturally gyrate toward group settings where vulnerable juvenile males are concentrated, and those settings where they are most likely to be able to have close isolated personal contact with the youths.
That alone is sufficient reason to eliminate homosexuals as scout leaders or officials in any capacity.

Your statement says exactly the same thing, Dick. If you are going to
condemn all homosexual males for the actions of a few, then to be
consistent, you must condemn all males for the actions of a few or
all blacks for the actions of the few or all whites for the actions
of a few or all Jews for the actions of a few or all Germans for
the actions of a few. It is a never-ending slippery slope.

> The Boy Scouts should not allow homosexuals to be scout leaders for

Then using exactly the same logic, heterosexual males should not be
involved in the Girl Scouts where all those juvenile females are
concentrated. After all, there are twice as many pedophiles among
heterosexual males as there are among homosexual males.

But you missed my Libertarian point. If the Boy Scouts do not accept any
public funding then they should have a right to bar anyone for any reason.

You can if you wish, I don't and didn't. I said that it is simply
prudent to keep homosexual males from young boys based on a considerable
body of experience. If you don't agree that's your problem.

Don't you know, these guys don't care what happens to amateur radio. They want it to stay exactly the same as it was for the next 20 years, they're too rigid to adapt to any changes. Then in twenty years they'll be dead, and they could care less what happens after that. It's the infantile "I want what I want, and I want it NOW!" syndrome in a 50+ body. Too bad they're too big to spank.

So what do you think of LA's recent decision to limit the boy scout's use of public facilities in that city, Cecil? A large number of groups, like the boy scouts, use those facilities each year and I'm sure the city has not checked membership rules of those other groups. In other words, the boy scouts were singled out solely because gay groups decided to target that specific organization. Of course, this leaves the boy scouts in a no-win situation - the best way to fight this rule is to find other organizations with similar rules (showing the rule was unfairly applied to them alone), however to do so would mean those other organizations might face the same harassment the scouts are now facing (something that nobody would wish on their worst enemy). I'm ashamed the city of Los Angeles, one of the largest cities in this country, would choose gay groups over the BSA (and I'm sure those gay groups still get to use the public facilities in LA).

It may or may not be prudent but I question whether it is possible.
Depending on safety devices that don't work is at best futile and at worst
fatal.

I still can't believe people who keep wanting to hold the code so near and dear. If you want to use this form of communication, great. It is outdated. Keeping it does not attract new hams. Kids with computers are just not excited by the prospect of morse code. People have to get used to change and quit clinging on to the past.

Second, the ARRL can't win. If they support all hams passing a 30 WPM code test, the coders are happy and everyone else gets pissed. If they support no-code, all the old timers that cling to the past get pissed. They can't win.

If little boys are twice as likely to molest little girls, then we keep
little boys away from the Girl Scouts.

If homosexual mean are more likely to molest boys, we keep homosexual men
away from Boy Scouts.

So yes, does that answer the question?

Well that's where we differ. I think it is a choice brought on by some mentally damaging event that occured in the homosexual's life while growing up.

Kids are not excited by radio....PERIOD.

It is old, it has no mystique, it is nothing special. It like getting
excited about a telephone., or a cell phone.

The problem is not CW, or a lack of CW. CW is meaningless, except to
those who use it.

>Second, the ARRL can't win. If they support all hams passing a 30 WPM code
>test, the coders are happy and everyone else gets pissed. If they support
>no-code, all the old timers that cling to the past get pissed. They can't
>win.

Getting new activity has nothing to do with old-timers or new timers.
Radio used to be cutting edge, and now it isn't. People used to like
to fuss around with stuff and build stuff, now they don't.

The world changes, and the current trend is away from working for
anything..or learning how stuff actually works.

The effect of eliminating code is simply to piss off the people who
enjoy CW, and it will certainly NOT rekindle interest is old stale
technology like radio.

It isn't old timers against "new age" radio operators. It is people
who grew up loving radio and who were thrilled by the concept of
talking to people all over the world trying to understand how people
view it as something no more magic than a telephone.

Hell, look at CB. It peaked and died way off. The only real activity
that is increasing is pirates without tickets of any kind. They are on
160, 80, 30,20,15, and ten meters...and there are more every month.
That's where the future of radio is...in not having ANY license. And
nothing we can do will change that, all we can do is make it more
uncomfortable for people who used to enjoy it.

Unfortunately that's the way most things work. You do what you can to
prevent known dangers and work with what results as best you can.
You can be sure that keeping known adult homosexuals from leading Boy
Scouts will prevent some cases of abuse, if not all.
Homosexuals have the right to be different. They DON'T have the right
to force it on the rest.

A lot of US citizens hate their government for meddling in everybodies lives
and for starting wars. It's not just other countries that hate the US government.
Your government is spying on you! Your government tried for years to start
a war with Russia. Your president thought that Russia was the antichrist.
Your country is badly infested with the Christian disease. Basically the US
should be nuked.

> prudent to keep homosexual males from young boys based on a considerable
> body of experience. If you don't agree that's your problem.

Then you must admit that it is also prudent to keep heterosexual males
from young girls based on a considerable body of experience. You wouldn't
be a hypocrite would you? Has anyone kept you away from young girls
lately, Dick?

You can be sure that keeping known adult heterosexual (males) from leading
Girl Scouts will prevent some cases of abuse. You can be sure that staying
home in bed will prevent auto accidents. Where does it all end?

I never knew how ignorant the VK boys are. Must be that liberal news media down under. We don't hate the US government for meddling in everybodies lives and for starting wars. Just meddle with us and you will find out.

How is it 'our government tried for years to start a war with Russia'? Are you refering to the Regan years? Where you been stupid? Reagan bluffed them in Iceland and ENDED the SOVIET UNION. As you should recall, Russia was just a part of that union.

I must agree that we have allowed Christianity to block out some of our senses, but I wouldn't say we are 'badly infested'. Perhaps badly confused would be more accurate.. hi.

As for the US being in need of being nuked...Perhaps so, but you better hope they get us all at one time. If not....remember WW2 and Japan? We are the ONLY COUNTRY TO EVER USE NUCLEAR WEAPONS AGAINST CIVILIANS IN THE TIME OF WAR.
Keep that in mind goofball. And guess what Barry? We STILL have that mindset.

So forget your stupid propaganda there and talk to some real Americans. Not those liberal goofs you are obviously a part of.

Dan/W4NTI

Well I will put the US nuclear arsenal against the Australian nuclear
arsenal any day.

Now do I have 10,000 nukes or 1 nuke left? Do you fell lucky, Aussie punk?

What we appear to be seeing is the effect of allowing the government to
own public facilities. That is akin to the devine right of kings and
Libertarians are against such.

Don't know the details, Dwight, but I can state the Libertarian position
in general. The individual who owns the property gets to make the rules
concerning the use of the property. "Public facilities" as they exist
today, would be phased out under Libertarianism.

Pardon me if I don't view an accidental event as a punishable choice.

While I know of no definitive proof all the evidence points to genetic
origin. If an accident in the process that produces males (as well as
autism, left-handedness, and a few other things) is what you have in mind,
then we agree on accidental origin.

Great post! The few kids that have an interest in radio usually have a parent
or other older relative that's a ham. Most of the technogeeks today are
interested in computers.

Burt Fisher, who is a bane of this newsgroup because of *how* he says things, has essentially been saying the same thing for years. Ham radio is predominately a hobby for white, overweight, retirees who need something to keep them away from their wives. Younger people who a avid hams are usually social outcasts in their peer group. One only needs to attend a large hamfest to confirm this. Dayton draws quite a few characters. (I usually get a laugh from the ones who plaster antennas all over themselves)

Wayne Green amuses me when he gets on his high horse about ham radio's dwindling ranks. The interest isn't there. Even if it is, kids will grow bored with ham radio when they hear a bunch od old men on the HF frequencies talking about the weather, health problems, or "rig hr is...". As for contests, I'm tired of those after about 15 minutes. The same goes for DX and other "wallpaper" collecting.

...and if you dare to trash morse code testing - in particular, the now-defunct high-speed code testing - you're a liberal, communist, pinko (or to quote Rush Limbo, a "long-haired, dope-smoking, FM type".)

That's not going to last either. Once the "computer" becomes just another appliance that controls data transfer from fiber optic cables to various digital video and data home gizmos, that'll be the end of it. Who the hell's gonna waste time with an appliance that downloads the latest bread recipes to your digital toaster? Maybe ham radio gets rediscovered.

Give it a few more years and the Internet as we know it today will be as boring as "rig hr is". Hell, I am already bored with it. You can only absorb so much Usenet crap, e-Bay hype, idiotic personal web pages, chat rooms for morons and porn. In the words of Homer Simpson: "Internet?! Is that thing still around?"

With all due respect, this opinion is subjective. Fly fishing is still around but one would hardly call it obsolete just because there are commercial fishing boats out there. When the conditions get marginal and SSB signals fade into the noise, CW is a reliable form of communication. Therefore, people will still be able to dx around the world while those without CW knowledge are restricted by sunspots to talking to their neighbors.

> Keeping it does not attract new hams. Kids with computers are
> just not excited by the prospect of morse code. People have to get used to
> change and quit clinging on to the past.

Discarding it doesn't seem to be attracting new hams either. People who view ham radio as a substitute for cellphones are not hams in my dictionary.

> Second, the ARRL can't win. If they support all hams passing a 30 WPM code
> test, the coders are happy and everyone else gets pissed. If they support

I somehow fail to see a ten mile lineup of people who can't wait for Morse code to be discontinued so they can jump into 160 m dxing, contesting and building radios. Would eliminating any and all testing increase the number of ham radio operators? Sure it would. Do we want to increase our numbers in such a way? No, we don't.

All the hams to whom DXing around the world during the low of the sunspot
cycle is important, will be forced by reality to learn Morse code. Being
forced by reality to learn Morse code is magnitudes superior to being forced
by the FCC to learn Morse code.

> Discarding it doesn't seem to be attracting new hams either.

What????? Subtract out the nocode techs and what have you got?

I have played with both and went with the TS. I had the 746 and the 847. The DSP on the 756 sounds so crummy to me. I didnt like it at all. The scope is neat but i wont use it its called turn the vfo for me. And I like the versitility of the 2000 the upgrades for it will be via Firmware / uploads via computer. Why do I need to buy a new rig just buy the upgraded firmware. Why hasnt the big 3 come up with this 10 years ago? Who knows. Ten Tec does it the with the Jupiter. For me the choice is hands down the TS for its many options and for not having to buy filters. Its a good rig. And I can assure you I will get my DXCC with this one.

While the following is not *exactly* directly following the line of thought in the thread, I think it is relevant in the light of changes on societal thinking in its pursuit of "enlightenment" and the discarding of past mores.

Historically, homosexual activity has been regarded as deviant, abnormal and, indeed, disgusting. I can agree that to mistreat ANY human being just because that person is known to be "gay" is wrong, however. As long as that person conducts him/herself in a manner that is proper, dignified, and circumspect in public, then I should treat that person the same as anyone else I might deal with in the public arena. Heterosexual persons may be uncomfortable in that person's presence, but the obligation to treat that person kindly is there nonetheless. And I, as well as others not of their persuasion, DO feel ill at ease with those who appear to be "effeminate" or a little too "friendly".

There is another "group" of people called Pedophiles who have an unnatural attraction to children and, indeed, cannot relate to adults of either sex. Their attraction may be to boys or girls, but the majority of pedophiles *seem* to be men for whatever reason.

Everybody has an agenda these days. Remember, I stated earlier that the idea of "gay-ness" was something that was not accepted, or, rather, the attending ACTIVITIES of gays was not accepted. In, say, 1965, the idea of having known gay Scouts, or Scout Masters would not have even been brought up. Today, the issues has taken on the cloak of "rights", and in a more liberal, humanistic society, the gays have seized upon this liberalism to bring forth, not the fact that they are gay, but that they should be allowed to openly practice same, and even teach this "lifestyle" as an equal alternative to the hetrosexual lifestyle to our children.

It has been argued that pedophiles are not necessarily gay, but even using the slide rule of ratios (so many non gay pedos to so many gay ones, etc), it would follow that there ARE some pedophiles that are gay. A certain number of those gay pedos WOULD prey on young children. It is not possible to tell who, how many, where, or when one of those would molest a Scout. In years past, the BSA did have some kids molested by other (gay?) Scouts and they were sued. Farther back, a defined policy to protect Scouts was not in place simply because the mores of the time were *usually* sufficient to deter most molestations. Sure, they did occur, I am sure, but not on a scale that appears to have increased in lockstep and in proportion to the relaxing mores of our society. Thus, a policy to exclude sex offenders, felons, and known gays from scouting was put into place. And that galls the gay/lesbian "rights" crowd.

Back to the pedophiles. There is another movement behind the scenes that hasn't achieved any acceptance-----yet. And they are counting on the lessening of standards, the cheapening of morality to bring forth yet another form of perversion to "normality" under the guise of "rights". Yes, these are the pedophiles, the sex offenders, the "boy lovers" who want laws against adult/child sex lifted so they can engage in sex with our underaged sons and daughters! And if you think it is NOT true, then do what I did. Search on the internet for "Pedophile", NAMBLA (North American Man/Boy Love Association), and "boylover". Find a website---www.boylinks.net. If you haven't been aware of this before, you will be shocked, dismayed, and angered. If you are a parent, as I am, you should be alarmed upon viewing the agenda, the goals of these people, photos of kids, AND stories that will/should infuriate you. Some of it is quite harmless--pictures of kids playing sports and kids just being kids. BUT there are others of NUDE boys that shouldn't even be on the 'net. They are there to appeal to the deviant, sick minds of perverts--perverts that would LOVE to be Scout Masters!

NOW! Those that say, "WHY, society would NEVER accept or legalize what now is considered abhorent, sick, deviant and illegal molestation of our children". And I ask WHY NOT? Again, in 1965 or even later, society would not accept an open, legal "marriage" of gays. It was abhorent, sick, deviant and illegal behavior. Yet today, there are alleged "clergy" that will "marry" queers. Society has become so "enlightened", so sensitive to the issue of "civil rights", that we are blinded to what is RIGHT. So is it, therefore, a surprise that any group with an agenda brings forth said agenda, no matter how deviant and wrong,

by cloaking it in a righteous robe of "CIVIL" rights? Yes, they know that this is the only path to their goals--the path that takes a route thru the briars and brambles, the underbrush of liberalism where we cannot see the adversary, and, ultimately blindsides us into conceding THEM their "rights".

Therefore, in order to protect even ONE Scout, one Church youth group, one child from being placed in a position that he/she neither expects or understands, the battle line MUST be drawn and the only way to do that, even at the expense of one homosexual who might NOT molest a child, is to exclude the entire group. The rights of children must be given priority because an adult should be old and mature enough for his wants not to hurt him--especially if he "wants" to molest MY kid!!

In conclusion, two things come to mind. The first is, referring to a comment Dick made earlier; "body of experience". I ask WHOSE body do you want a pervert to have EXPERIENCE with? Your son? Your daughter? Your 12 year old? Is it OK with you if it happens to be MY 13 year old and not yours? Again, the line must be drawn in the sand somewhere.

The second item is something I have heard and never forgot: "You MUST stand for something, or you'll fall for anything"!

Thanks and 73

Jerry

Like I said before, you seem to "know" so much about how to run other Nations' foreign policies. NOT! Your country this, your country that. The Soviet Union was brought down without a shot. President Reagan looked across the ocean and the bargaining table and never blinked. What we DID do was to simply outspend and out-technology the USSR. START ING wars? Your liberal drivel more than adequately reveals your politi- cal and historical (histerical?) ignorance. Who, for example, invaded Poland in 1939? Who made pacts with the Soviet Union and invaded same? Who charmed Chamberlain into chirping, Peace in our time"? Who bombed and burned London during the blitz of 1940? Germany, of course. Who was DESPERATE for the USA to declare war on Deutchland? England. It took a sneak attack on Pearl Harbor to achieve that by Japan. Even Admiral Yamamoto, after the only partially successful attack, left the celebrating, jubilant officers in the ward room and walked to the bow, uttering this very fitting and premonitive quote: "I fear we have only awakened a sleeping giant and filled him with a terrible resolve". Never was there ever a more cognitive and fulfilled statement made about the United States.

So do YOU feel LUCKY, punk? (Clint Eastwood) Would YOU like to have to learn Chinese? Are you really so stupid as to think that if the USA weren't around, the world would live in everlasting peace and prosper- ity? YOU are closer to them than WE are. Australia almost got invaded by Japan, kid. Who do you think STOPPED them? And if you think Aus- tralia could tackle the USA, remember during THAT war. we fought on TWO fronts AT THE SAME TIME! And when the war was over, we went HOME from the Pacific Theatre save the occupation AND rehabilitation of Ja- pan.

Most Australians are reasonable, sane people. But you are only an exam- ple of the fringe, the stupid, the ignorant, the far leftist, and the idiot. I'll make you a deal, little boy. You stay in Australia, and I will stay in the USA--in spite of all the telly ads from Quantas trying to get my tourist dollar. We will both be very happy, and I won't get bitten by a Taipan, or a Brown Snake, or a Tiger. You can keep your funnel web freakin' spiders, too.......MATE! G'day.

Following exactly the same reasoning and given that the majority of
child molesters are heterosexual, would you say the battle line MUST
be drawn and the only way to do that, even at the expense of one
heterosexual who might NOT molest a child, is to exclude the entire
group?

So I suppose then that you sent your daughters out under the
supervision of known child molesters?

We are not talking about known child molesters, Dick. We are talking
about unknown child molesters. There are twice as many heterosexual
child molesters as there are homosexual child molesters.

So...if we eliminate the homosexuals, we have eliminated one third right off
the bat. Of course your figures are most probably wrong. There is no such
thing as "known child molesters" that usurp such a large group. Your numbers
are wrong and self-serving, especially when dealing with what you admit to
be "unknown" child molesters.
Drop back to square one. In all actuality, you have no numbers, no real
facts to back up your claims. Your claims are nebulous at the very best,
shameful at the worst.

The argument runs hot and cold both ways. To be honest, if my kids are involved in the Boy Scouts, I would feel better if a Queer was not involved. This is MY right! These kids are mine...and yours.
We should and must have the right to determine our kids' destiny to the best of our ability. No Queers need apply.
Oh, sorry! Was I Politically Incorrect? Forgive me...I forgot that the minorities seem to drive our way of thinking these past few years. Our Politicians are afraid to call a Queer a queer, and our teachers pass our kids on from grade to grade even though they cannot read. Of course this is to be expected from teachers who themselves cannot spell and could not pass the very tests they administer to their own students.
We have dummies teaching dummies. So long as this continues, the fast food industry will not lack for inductees.

Check them out yourself. Records indicate that twice as many little
girls as little boys are molested.

Since I have daughters, I am sensitive to this issue. Why is most
of the energy focused on molested boys when there are twice as many
molested girls? Is it somehow OK for little girls to be molested?
Is molestation of little girls more "natural" thus more understandable
and acceptable?

So it's OK to send your kids out with the homosexual kind because there's only half as many of them. I think we understand where you're coming from.

Tell ya what Cecil.... You support me in keeping the homosexual predators away from my grandsons in the Boy Scouts and for darn sure I'll support whatever method you deem appropriate in kkeeping the heterosexual predators from your girls in their scouting activities.

But somehow your drift here is toward letting them all have at all kids in every instance. WHy is that?

Actually the no-code techs had only a slight impact in active
amateurs. Most of them are never active.

For example, at MFJ Enterprises dozens of employees became no-code
techs. Within a year, only ONE remained active.

Among the people I know, most of the no-code techs are wives of
amateurs who got a license to avoid cellular phone charges, or couples
who did the same. Now that cell rates have dropped, so have the
antennas.

No-code numbers look good on paper, but I'm sure most of them are
actually not active. We ran into that here in my county, when we tried
to get people interested in Skywarn and emergency communication.
Virtually all no-code techs who replied d said they were no longer
interested.

6118. FS: Rapid Charger for Yaesu FT-50, FT-40, FT-10 batteries

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-25 15:03:50 UTC
From: jcsarp@aol.com
Message-ID: <20010425110350.13590.00001047@ng-cp1.aol.com>
Source record: 90396

This is a MAHA model MH-101-Y3 Rapid Battery Charger. This model is specifically designed to charge Nickel Metal Hydride (NiMH) AND Nickel Cadmium (NiCad) battery packs that are used on the Yaesu FT-50, FT-40, and FT-10 radios. You simply drop in the radio with the battery pack attached OR just drop in the battery without the radio. The charger does the rest and switches to trickle charge at the end of the charging cycle. It will handle ALL of the various size and voltage battery packs. ANY brand battery pack ... Yaesu ... MAHA ... whatever. Here is a partial list of battery packs: FNB-40, FNB-41, FNB-42, FNB-47, FNB-49, MH-FNB-40H, MH-FNB-41, MH-FNB-V47. Remember ... it does BOTH NiMH and NiCad batteries safely and correctly. A full charging cycle takes from 60 minutes to 120 minutes depending on the battery pack being charged. This unit is in MINT condition. It could pass for brand new. I've only used it about 6 times and there is not a mark on it. It comes with the following: MAHA MH-101-Y3 Charger, Power Supply, Operating Instructions, Original Box and packing material.

Check it out at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1232450675

> Regards,
>
> Howard. M0HAD

Hi Howard,

IMD does NOT cause TVI, it causes splatter on adjacent frequencies.
Since splatter is masked by stronger signals or noise, it is best
tested in a controlled environement. That's why the tests are so
important.

We have gradually been accepting poorer and poorer rigs for use.
Keyclicks and splatter are on the way UP, that is definite.

The TS-2000 is a large step towards more deterioration in spectral
purity of our rigs. Personally, I hope they never become popular or
they are corrected and at least brought back to the same specs as most
other radios.

We may never return to the spectral purity of something like a Collins
KWM-2 (we are now about 15-20 dB worse than that in the typical rig),
but there is no reason to accept constantly declining transmitter
close-spaced performance. The TS-2000 is another 15 dB in the wrong
direction.

I can get better IMD performance from a class C amplifier, so I have
to wonder what engineering mistakes they made.

Since I live in a quiet rural location, and work weak signals, this
problem is very evident to me. It may not be evident in other
situations, that's why testing is important. The numbers don't lie,

and the TS-2000 is the worse radio to hit the market in a long time.

Shame on them for ignoring IMD performace.

That's good to hear, Dick. Why did you wait so long to say it? I was
always suspicious of males around my girls. Have you heard about the
rash of statutory rapes by high school coaches? Is that no big deal
to you?

> But somehow your drift here is toward letting them all have at all kids
> in every instance. WHy is that?

You're wrong about that, Dick. I advocate being suspicious of everyone,
not just homosexuals. You, OTOH, seem to advocate suspicion only of
homosexuals. Why is that, Dick? Do you have some hidden agenda?

You got it backwards, Dick. It is not OK to send your kids out with
anyone without checking the person out. Your little girls are in
twice as much danger as your little boys, or don't you care?

Really, Jerry? If we bar the homosexuals and also the heterosexuals, I guess
that leaves only the bi-sexuals and trans-sexuals (who have not yet arrived at
their new gender-orientation) in charge of youth groups.

Kinda makes you say hmmmmmmmmmmmmm!

As another noteworthy example, look at the statistics since code was
reduced.

We gain ONLY 6600 new amateurs (1%) in the last year since the code
was reduced. We UPGRADED 30% of the amateur population.

Clearly, there were no massive lines of people waiting to get in but
hampered by testing. Just as clearly, we gave a "free upgrade" to
somewhat less than 1/3 of the amateurs we already had.

Face it folks, the problem isn't testing or anything else. It is
social. The cure isn't going to be giving something away that no one
wants.

Dick,

Without debating the concept of choice per se, I will say this much. One of the words that liberal advocates quietly tiptoe around is "responsibility". Often part of the defense of many deviant and/or violent behaviors is to blame the actions of a perp on his "environment" or his family background--blame the behavior on anything but the individual so that he doesn't have to take responsibility for his own actions. I *could* be angry to kill someone and *think* about murder. Yet, as long as I don't carry out the deed, no crime has been committed. If I am to be held responsible for my actions towards other people, then, rather than say a queer was *born* that way, or his "environment" caused him/her to engage in homosexual activity, a queer must be held to the same standard.

All of us have likely known someone that was/is "gay". As long as that person conducts him/herself in a way that is acceptable to those around him, then, no problem. Sure, I am uncomfortable around "gays", and, yes, if I can, I will avoid dealing with them when I can. That is a natural reaction to those of us who find the things they do to be unthinkable--even vile. In a society that is overwhelmingly hetero, then just because a person *may* have been "born" gay (I don't think so) doesn't mean that that lifestyle must be accepted, nor does it mean that they have the right to rub my nose in their perversion, or force me to have them march down my street in front of my kids with a "QUEER NATION" banner. So, what I am saying is, even if "gays" don't have a choice in the way they were at birth, they DO have a choice as to how they conduct themselves in public and a responsibility to keep that conduct in public in line with community mores. I ain't gonna ask, and I don't want to be told.

Liberals have rights, real and imagined. They want government to pass laws that guarantee that no one will violate any of their rights. They have no responsibilities, it is up to government to take responsibility for everything.

Libertarians have rights, real and imagined. They want government to pass no laws that would violate their right to do what they feel is right, which is up to their own individual interpretation. Responsibilities? They take responsibility for only those things that would not hinder the exercising of their rights.

Conservatives have rights, real and imagined as well as responsibilities. They want government to pass laws to remind us the difference between our rights and responsibilities. There can be no freedom without responsibilities.

Power comes not from the freedom to do what you want but from the freedom to do what you ought.

And, Cecil, people paralyzed from the neck down are suffering from an affliction, either from birth or accident, right? They are not able to fly airplanes and cannot pass the requirements to get a an ATR rating, or get a job as a pilot. So using the theory of not excluding a group, then we must allowed paralyzed men and women to fly airliners? Out of that group of people, we may find a 'few' that could overcome the obstacles, maybe using special control devices. Yet, finding a way to accomodate those few would be prohibitively expensive, so, in a sense, we are "discriminating" against handicapped people. Still, people who have disabilities, or limiting factors in their lives, learn to accept these limitations, and go on with life. That is what the "gays" should do in this case--realize why such restrictions are in place, realize that the risks are too high not to do our best to keep even one abuser away from the kids, and find other adults of *like* (shudder) propensities instead of insisting on access to Scouts. But they are NOT going to do that. I still wonder why it is just SO important to allow "gays" to be Scout leaders. Yet, knowing that assaults HAVE occurred, organizations have been sued, STILL people want to open the doors to the kids to queer leaders. Come on, fellas, we KNOW why they want in. Organizations that have been sued by parents have put into place youth protection policies and background checks which ferreted out a surprising number of undesirables. Civil Air Patrol's Cadet Protection program is modeled on that of the Scouts--almost word for word. Adult members are required to be fingerprinted and submit to a full FBI background check. If there is ANYTHING to indicate homosexuality, child abuse, felonies, or other brushes with the law, that person doesn't get in. When these things began to be put in place, the fags and perverts screamed, "AAAAACK"! "NO FAIR"! "DISCRIMINATION"! "CIVIL RIGHTS"! Simple and plain: they want access to our "cute" little boys! And I say NEVER, NEVER, NEVER, NOT ONLY NO, BUT HELL NEVER!!!!!!!!!!

Unfortunately, there is no way to protect ALL every minute of the day. The never-ending (I'm afraid) slippery slope is the liberalism, the slacking and tearing down of morality, the things that were once considered wrong are now considered right (divorce, excess drinking, headlong pursuit of money, sex outside of marriage, and, of course, being queer). I often wish it were 1946 instead of 2001. All those things went on then, but it wasn't "approved" of. Now it's just BAU (business as usual.)

Interesting, but incorrect, to say the least. I haven't read the article, but I can't imagine what the author thought was going to replace code crunching. While the Internet certainly changed a lot in the everyday life and technology, that is nothing compared to what's coming when the fiber optics gets into our homes and replaces telephone wires and coax cable. All will be video and video will be all. In order to process that enormous amount of digital video, someone will have to write the code. Unless the author imagined that computers will write the code themselves, but this is more of an A.C.Clarke novel.

I don't think ham radio is going anywhere. We may witness a dramatic drop in numbers and activity when the older generations begin to die off, but I have a feeling the developing countries may keep it alive and well. Who knows - maybe there will be a huge pile up of BY and ZA ops trying to work a rare WA7 call.

Go to ARRL website and they have links on how to get a Mexican
Recip License. Costs about $60 US however, need to apply at a
RFC (Mexican FCC Office).

DO NOT RECOMMEND operation without the official docs, the local
gendarmerie will try to shake you down, GET THE LICENSE with the
purple seal, it will keep you legal, operate low key, and keep
your handhelds OOS (OUT OF SIGHT), the local gendarmarie will
be curious. License will be good for upto six months.

Hey Scott,

<more seriously this time>

I reviewed some double sideband material. To summarize:

*It is cheaper to build (for budget homebrewers)
*It does consume and transmit a bit less power (No Carrier)
*The signal to noise numbers are a compromise between Am and Single
Sideband.

Modifying a ssb transmitter to transmit dsb does seem kinda silly. Receivers
that can detect dsb can detect ssb. Its not like we have to transmit dsb to
work the those HB dsb rigs. Like you... I'd just as soon go all the way and
get rid of that extra sideband. Better performance and better manners, too.

Never mind about Nobel... there ain't any new math.

And when the Red Army paves a freeway through Burma and Thailand down the Malay Peninsula into what was left of Indonesia, the Invasion forces will
gathering on Irian Jaya to batter the Northern Coast of Australia. The Invasion
Forces will quickly push across the interior to Alice Springs and on to Melbourne and Perth, after only 3 days, the Aussie Prime Minister will capitulate since the unarmed population can only run in fright.
Australia then becomes the biggest Overseas Province of the PRC and all westerners are forced deported back to Britain. All because Barry O,
the Gadfly PM decided to take away the Guns, badmouth America and declare
that peace is at hand.

6141. converting rf signals to audio range

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-26 03:02:22 UTC

Hi.

First, I'm sorry if I offend anyone with this post being off-topic, or if I am incredibly ignorant.

I'm wondering if there exists any way to convert rf signals into the audible range. This includes realtime and non-realtime conversion.

Is there a device to record an rf signal? Sort of like a tape recorder w/ a _very_ high frequency response range? What about a receiver hooked up to a pc? Are there any interfaces to do this?

In realtime, is there a way to do sample dropping, to create a very rough audio range signal from an rf signal? What I mean by this is sampling the signal at a rate lower that what it would take to reproduce it accurately. If you only took every tenth sample from a signal that was sampled accurately, you would end up with a file that needed only 1/10th the sample rate. However, I am guessing that when the sample rate is decreased signifigantly enough to make this practical, the resutlting signal would be virtually white noise??

Finally, what about remodulating a signal virtually in the computer? Ie: taking an audio signal, and modulating the digital file to create a much much larger digital file of an rf signal, with appropriate sample rate. Then one could play that file much slower so the modulated signal would be in the audio range. Feasible? Any software existing already along these lines?

I am a computer science student, so it is not a problem to write code to do digital manipulations of files in non-realtime.

Finally, I would really appreciate any info on this subject. I've had a number of people tell me this is impossible, which I don't believe. Thanks for you time and your bandwidth, and special thanks to anyone taking the precious time to respond.
I really do appreciate it.

Greetings :

I am in need of the following items for working on Motorola HT-220's :

Qty	Part #	Description
1	NLN6689A	Motorola Tuning Tool Kit
1	NKD6001A	Motorola VHF Tune-up Kit
1	NKD6001B	Motorola VHF Tune-up Cable
1	NKE6003A	Motorola UHF Tune-up Kit
1	NKE6007B	Motorola UHF Tune-up Cable

Please advise via an e-mail to ocp_dba@worldnet.att.net, if you

have any of the above items you would like to sell at a fair price.

Thanks and Regards,

David J. Bennett, N4PFN
ocp_dba@worldnet.att.net

Go to the U of Cincinatti library and pick up a book on basic radio signal theory. Read up on the basics of amplitude modulation and frequency modulation (and subsequent demodulation) of an RF carrier, then re-ask your question more specifically to your application. What you are asking doesn't exactly make sense, unless I am just not understanding the question. Most people are interested in the baseband signal rather than the carrier (RF) signal itself, and the techniques for modulating and demodulating are fairly straightforward to the technically-minded. Maybe your question will be answered better that way than to subject yourself to the newsgroups.

And, incidentally, the answer to your question, "if there exists any way to convert RF signals into the audible range" is simply, "yes...it's called a radio receiver." (this is what every AM/FM radio, TV and scanner ever made is for).

Why are you so dense between the ears, Cecil???? At no time did I ever
intimate any such thing in any way. The original subject was Boy Scouts
and homosexuals being banned from them. You introduced all sorts of
oddball side subjects and then 'create' all sorts of attitudes in others
which do not exist. Why is that?

No one ever suggested that hetero predator males should be given a
pass, except you. Why is that?

Tom your nuts that thing has TX bandwidths of 2.4 to 3.0khz. Seems to me you
are just one of many that like to rip ass on new rigs out. But whatever. I
am happy with my rig and thats all that counts. See you on the DXCC list.
And as for collins i dont want the over priced drifting equipment in my
shack. I will stick with my crummy IMD rigs any day and guess what I will
stay or beat you any day on what I have here next to the collins. I have to
admit the audio is nice sounding on those tanks.

So exactly how does it feel to be subjected to false innuendo? I'm
simply using your own techniques against you, Dick. Why is it OK for
you to accuse me of something I didn't say but not OK for me to do
the same thing to you?

> No one ever suggested that hetero predator males should be given a
> pass, except you. Why is that?

There you go subjecting me to a false innuendo again, Dick. Please
quote my posting where I said predator males should be given a pass.
If you cannot, you will have proven that you are just a liar.

You should try reading what I said, Dick, instead of pulling meanings
out of your posterior. What I have said is to check out and judge people
as individuals whether they be homosexual, heterosexual, or whatever.
Your best heterosexual drinking buddy may have his sights set on your
young daughter.

Incorrect, Kevin. Libertarians believe that the use of force and the threat
of force in human interactions should be illegal, i.e. when there is a real
victim of a crime, e.g. an armed robbery. We believe that victimless crimes
should be repealed. Victimless crimes are the path toward fascism.

Your seemingly don't-care attitude toward the possible molestation of
little girls is very troubling. How about keeping "even one abuser"
away from little girls?

Yes, it is done directly by what is called a 'DC' receiver. Commonly
used by low-power enthusiasts for simplicity. The RF signal is
heterodyned with another RF carrier of the same frequency. The
modulation then appears directly at the output of the mixer and is
pushed through a conventional audio amplifier.

Feel free to be ignorant and off-topic; this is usenet.

1. Converting rf signals to audio range is a bit tough but getting them to some other and generally lower frequency is how receivers work since Armstrong invented the superhet sometime in the 20s. The FM tuner you own takes the 88-108 MHz signal and converts it to what is called an 'intermediate frequency' normally 10.7 MHz before it does anything with it. Your scanner takes this to 455 kHz to get some selectivity and recover lower deviation audio. At various times in the past common i.f.'s have been at 50, 80, and 262 Khz. All of these except 10.7 are within the range of a VCR for recording. Just do not ask me to do the gruntwork.

2. I think you may need a short course in how information is carried on an r.f. signal to do much with it. Incidentally Heathkit attacked an FM broadcast signal digitally in the 60s to take advantage of the absence of noise. The hardware catches up with the ideas often, as it did in fact in the case of FM itself. Were you to sample an FM signal, you would find that the audio is 'pre-emphasized' i.e. higher audio frequencies are stressed. This is reversed in your tuner.

3. Sampling and all that good stuff is done today in everything from cell phones to Amateur transceivers. It is called Digital Signal Processing.

4. Ever think of becoming an EE major? At the very least, you might want to wander into their shop. One of the minor joys of being at an educational institution.

In testing the TS-2000 has the higest transmitter IMD of any radio on
the market today, by a large margin.

Anyone who understands IMD would know that it doesn't mean the audio
"sounds bad". All it means in this case is the spurious garbage
outside the required bandwidth of the transmitter is maybe 40 times
higher than that from other rigs.

We need cleaner radios, not dirtier ones.

With attitudes like yours it's no wonder radios click and splatter
more than they used to. The manufacturers don't need to worry because
people will accept deteriorating performance with question.

It isn't MY fault they have a poor design. Don't blame it on me!

Possibly more proof that Kenwood is courting the CB crowd? (They could care
less about IMD - even if they knew what it was)

>73 de W6DKN

I suspect it is more proof that engineers know less or care less about what acceptable performance is, rather than intentional.

You can see examples of this creeping into the CW sections of rigs, where they call the ratio control "weight" and provide no means of adjusting the weight...which people commonly want to adjust....and instead change the ratio of dot-to-dash which no one in their right mind wants to change.

Same think with keying waveforms... and more important bandwidth of CW transmitters.

They must have customers who buy a radio without knowing or caring if it really doesn't work as well as it should, or doesn't have needed features. I'm sure the manufacturers don't get enough constructive feedback demanding they clean up transmitters and receivers and add useful features like a weight control for CW.

When I told a certain manufacturer their top-of-the-line radio had leading edge overshoot to 300 watts on key closure (even when power was set to 50 watts!) and had no weight control their marketing guy responded "no one cares, no one works CW anyway..and all radios have power overshoot".

Personally, I want to buy the cleanest radio I can. I worry about blocking and IMD performance, and how it might bother other people, more than I worry about 10,000 stacked memories or extended double DSP.

Yes. The process is called heterodyning, and is accomplished with a device
called a "radio receiver".

But Jerry, you have missed the point entirely. Lesbians and the Girl
Scouts may not be the problem. The greatest threat to the Girl Scouts
is the perverted *HETEROSEXUAL* male. What do you propose to do about
them? Molestation of little girls by heterosexual males is twice as
big a problem as molestation of little boys by homosexual males.

You can beat (mix) two rf signals of different frequency together and
get a third frequency. If the two rf signals are different in frequency
by 1 KHz, then you get a 1 KHz tone. But then you have an audio
frequency not a radio frequency. The reason rf signals are called rf
signals is because they are at radio frequencies and not at audio
frequencies. When you convert it into the audible range it is now an
audio frequency. Your VCR records rf signals.

This is the first public release of the Ham quiz software. I think
this is the best amateur radio testing program going because it
doesn't randomly give you questions. It remembers which questions you
have problems with and those are the ones that are given most often.
The end result is if you can pass this test after taken a dozen times
or more, then you won't have any problem passing the real test.

License info:

This source is licensed under GNU Public Licenses and does come
with source.

Let me know if have any problems.

I would also like to know what your test score was on both the
program and on the real test.

thanks & 73

I think I see what you are saying, but factually CW is still the most
efficient form of exchanging information available to amateurs when
conditions are marginal.

I certainly have no objection to people who never use CW not taking a
fast CW test, but it is stupid to allow 5 WPM people access to
high-speed CW segments. It actually causes problems.

No matter how we look at it, CW isn't the problem. It isn't a barrier,
and hasn't been for a long time except to a very few lazy people. The
problem is people aren't interested in radio.

The recent results of lowering speed to 5 WPM (along with the much
more simple test we have had for the past ten years or whatever)
clearly show very few (if any) people are attracted by the reduction
in speed.

So it is really a useless issue....it's mostly people who want to get
a "free upgrade" that are doing all the bitching. 1% increase in new
amateurs and 30% increase in upgrades shows we are whipping a dead
horse.

It's a social problem. People are lazy and want the best of everything
for no effort or work. They won't fish for a living anyway, it's too
much effort when we have welfare.

6169. FS - YAESU FT-50 - Mint - Mods - Extras

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-27 00:35:12 UTC
From: jcsarp@aol.com
Message-ID: <20010426203512.23773.00001122@ng-bg1.aol.com>
Source record: 90298

FOR SALE:

Yaesu FT-50RD Dual Band 2 Meter / 70 CM Handheld with extended Receive and Transmit Capabilities. ï¿½It is in MINT condition and works PERFECTLY. It is being sold as a "package deal" that includes a long list of accessories mentioned below.

I am the original owner of this well cared for Yaesu FT-50RD. ï¿½There is not a mark on it and it could pass for brand new. ï¿½The "freeband" modification has been performed on this unit to allow expanded receive AND transmit capabilities (see below). ï¿½This FT-50RD also has complete "no gaps" coverage of the 800 MHz band INCLUDING cellular. ï¿½This FT-50RD was built in one of the last production runs from Yaesu that would allow full 800 MHz coverage. ï¿½The current version FT-50RD is NOT capable of receiving the 800 MHz cellular band.

RECEIVE Frequency Range:
71 MHz - 540 MHz (no gaps)
590 MHz - 999 MHz (including cellular) (no gaps)

TRANSMIT Frequency Range:
120 MHz - 231 MHz (no gaps)
311 MHz - 500 MHz (no gaps)

The Yaesu FT-50RD has MANY features. ï¿½For more information you can visit the Yaesu web site for the FT-50 at:

http://www.yaesu.com/amateur/ft50r.html

http://www.yaesu.com/amateur/ft50rtx.html

FEATURES:

ï¿½ FT-50R Super Wide Band Receive
ï¿½ Military Standard 810 Rating
ï¿½ Digital Code Squelch
ï¿½ 112 Memory Channel and 2 Home Memory channels
ï¿½ 12V DC Direct Input with car adapter
ï¿½ High Speed Scanning
ï¿½ Alphanumeric Display
ï¿½ CTCSS Encode AND Decode
ï¿½ Auto Range Transponder System (ARTS)
ï¿½ Direct FM
ï¿½ High Audio Output
ï¿½ Dual Watch
ï¿½ Digital Voice Recording System
ï¿½ Auto Power Off
ï¿½ Receive Battery Saver

ï¿½ Selectable Power Output
ï¿½ Transmit Battery Saver
ï¿½ Time Out Timer

THIS IS A PACKAGE DEAL THAT INCLUDES THE FOLLOWING:

* Yaesu FT-50RD Dual Band VHF / UHF HT Transceiver
* Owners Manual
* Yaesu NC-60B Charger
* Yaesu YHA-54 Dual Band Antenna
* TWO (2) MAHA MH-FNB-40H NiMH Battery Packs
* Premier SPM-102 Speaker Mic (new)
* TWO (2) Yaesu CSC-69 Carry Cases (1 new, 1 used)
* Yaesu CA-15 Drop in Charging Stand
* Yaesu FBA-15 Dry Cell AA Battery Case (new)
* Yaesu FT-50 "SERVICE" Manual (new)
* Yaesu RH-1 Rubber Case Protector (new)

I have the ORIGINAL factory boxes and packaging for ALL of the above. ï¿½ Everything is in MINT CONDITION. ï¿½Some of the accessories are actually NEW (never used). ï¿½SERIOUS buyers can e-mail me for photo(s). ï¿½Let me know if you can open a zip file containing several photos or if you prefer to view just one group photo of the FT-50RD with the accessories. ï¿½Payment accepted via PayPal or a money order. ï¿½Buyer pays shipping and insurance.

Price - $300 (not negotiable)

Thanks,
John

Hi Bill,

This whole thread has probably gotten a bit out of hand...maybe I over-reacted initially, but it seemed like the original poster was condoning "TRANSMITTING" DSB to provide 2 signals at the other end, with the other station listening to whichever ONE sideband was least interferred with. Just sounded like "I don't care how wide my signal is, as long as my buddy at the other end can hear me" syndrome...the hell with anybody else trying to use the band.

I, like you, prefer to narrow up my signal as much as possible to be a good neighbor. With today's rigs with things such as narrow IF filters, IF Shift, etc., there seems to be a better way than modifying a radio to transmit DSB.

No new math??? Darn, I just learned it the other day ;) Guess I have to forget about that!!!

Cecil:
What ARE you having such a probem with here? You don't routinely permit
males to be in charge of little girls and their activities, and
screening those who are is mandatory.
What is it that so complex about all this? If you do whatever you can
to protect kids of whatever sex by protecting them from predators to the
maximjum extent possible, the liklihood of a problem decreases.

You wouldn't have made it as a rocket scientist.

Hi all. I have a VERY nice Yaesu VX-5R for sale. I'm the original owner, the unit has only been used very lightly, and never abused. I have ALL the original packing and manual, plus I have the nice pocket reference that VE3AYR produced. I'll even throw in the Yaesu leatherette case that they made for this unit.

The unit looks and acts just like the day I bought it brand new. I've installed the handy spring-clip style belt-clip (Motorola brand) but you can easily put the original clip back on, it's included. The reason for selling is that my old eyes just can't read the tiny print any more (sigh).

When bought new (February of 2000) with the above accessories it cost me over $400. My selling price is $295 plus S/H. Price is FIRM.

I'm sure you'll like this tiny little powerhouse, don't miss out. First money buys it.

Where are those "high-speed" segments. I have never
seen anything in Part 97 that designates any band
segment as requiring a Minimum code speed during
any QSO.

Cheers,

By saying "high speed segments" I was alluding to the areas outside the novice and tech bands where 5 WPM testing gains access only to a specific CW segment.

I wanted to say that without referring to the novice or tech holders as "lower skilled CW ops" or as "novices", since that might have other implicatiuons than simply being a lower speed area operating area.

But if you prefer, in plainer language, the lower CW-skill areas (such as 7100-7150 on 40 meters) as a general rule used to contain all of the slow struggling CW work.

Now it has moved into other areas of the bands, and is causing problems. On a nightly basis, I am called by several people who obviously haven't a clue what I am sending, or who I am working. They call me on top of the people I am working, and are really having a struggle. In most cases, not matter how I send "QRL" or ".-...", they are lost! They simply don't understand I am working someone else. Some of them continue for a few transmissions before grasping it isn't them that I am working.

Not that I don't want to work them, or appreciate they are trying to work or learn CW, but having the band sorted out so less skilled CW ops are in one area was a lot better idea than letting people who only barely make 5WPM have access to the entire CW area.

I hope this is clearer, although I prefer to think of it as high-speed and low-speed areas instead of thinking of CW skill levels.

Maybe 10 or 20 years ago, but not today. For better or worse amateur
radio is no longer the primary or secondary backup to normal means.
For example high speed (200 kbits or faster) internet connection
can be set up anywhere in North America in a few hours for less than
$1000.00. Sat phones work anywhere in the world and will give point
to point connections and they cost less than learning CW.

If you or anyone else thinks that at some point there will be a need
for CW, you should think again. You are just wasting your time and
skills. On the other hand if you enjoy CW and get a kick out making
CW contacts then go for it. That is great. Just don't try to ram
it down everyone else throat. They may not wish to spend their time
learning CW, except for fun it has a very poor return on investment.
If they don't enjoy it, it is a waste of time.

>I certainly have no objection to people who never use CW not taking a
>fast CW test, but it is stupid to allow 5 WPM people access to
>high-speed CW segments. It actually causes problems.

It would seem like it is time for a new CW band plan. Since class
of license no longer split the CW subband why not adopt a CW band
plan to the different speeds of CW and for data.

>No matter how we look at it, CW isn't the problem. It isn't a barrier,
>and hasn't been for a long time except to a very few lazy people. The

You know you are not winning any points by name calling. Just because
a person has choosen not to learn high speed CW doesn't make them
lazy. I have known a lot of people who have elected either not
learn the code or learn the just enough to pass the test, who
are anything but lazy.

>So it is really a useless issue....it's mostly people who want to get
>a "free upgrade" that are doing all the bitching. 1% increase in new

>horse.

The only thing the test is for is to make sure you know the rules
and you have a clue how not to kill yourself. It also serves to
reduce the number of low class CBer's types. There isn't any point
in testing skills anymore because there is so much to the hobby.
The amateur license is a license to learn by doing.

Valid and great point. As a community this should be loudly brought to
the attention of those that can make a difference. Remember, the
squeakiest wheel gets the most oil (as long as the wheel can still turn!).

Ah, right! Now the theme is "there are no high sped segments". Is this
a surprise? Don't think so. Next, "why have CW/Data segments" which we
see is already out there.

True enough. There is a big phone band for those people to enjoy. They should be happy working phone, and not ask for extra class CW frequencies.

But you are incorrect if t you think CW is not an efficient mode when conditions are poor, power is limited, and you don't have a rack full of other support gear to process signals.

Gosh, we had one. The FCC turned it over when they listened to Kenwood and W5YI.

OK, lazy or unmotivated.

My point is CW is not a barrier UNLESS the person chooses to NOT learn CW. It is a barrier by choice of the person, not by the fact it is there.

I don't ever plan on doing may things in life, and I still have to learn things I think I don't need. That is MY choice, not a "barrier". If I am too lazy or unmotivated to learn something, it's really my problem. I quit whining about such stuff when I was a teenager, I quit saying "that's unfair" because usually the whining takes more work than the effort.

For example, when I was 16 I whined about having to pass a parallel parking test to be able to get a driver's license. "Unfair", no one parallel parks! Hey, now I think it is a good idea.

>>So it is really a useless issue....it's mostly people who want to get

>The amateur license is a license to learn by doing.

No problem, that's why we need steps!!! We should have logical steps that encourage progress, and keep people from operating outside the limits of their experience or skills.

Why should a person who can't handle CW gain full CW access? Why should a person who can't understand SSB gain full SSB access? Why should a person who can't understand how to operate a station operate HF, where he has a dozen things he can screw up and bother other people with?

I'm not for or against CW testing, I just think the test should fit the end use. I think CW has become a scapegoat for people who are unwilling to admit as a society we are getting lazy and want everything for nothing, and as a socienty radio is boring. It is not cutting edge technology at all....so why pick on CW?? Why not ban AM radio?

The fact is we all like different things, and there is room for ALL of us. Let's just not turn the thing open like a free-band, which is how it is headed. That's the next step, now that 5WPM testing did not turn things around like all the whiners thought.

A small modem box is not "a rack full of other support gear". I can
establish reliable contact with Germany using 50 watts on PACTOR II
when 100 watt CW is virtually impossible because of fading. CW is
certainly one efficient way of exchanging information but, IMO, it
is not as efficient as PACTOR II.

I agree!

>But you are incorrect if t you think CW is not an efficient mode when
>conditions are poor, power is limited, and you don't have a rack full
>of other support gear to process signals.

Again it is a cool mode, but just a mode. It is efficient with a
skilled op.

>>It would seem like it is time for a new CW band plan. Since class

>>plan to the different speeds of CW and for data.
>
>Gosh, we had one. The FCC turned it over when they listened to Kenwood
>and W5YI.

What does the FCC have to do with it? There is a lot in the ARRL
band plan that isn't law. It is just a gentlemen agree that these
freqs will be used for a given purpose. I think this is far better
than having the FCC set the rules. They are away too slow in
changing.

>OK, lazy or unmotivated.

Is there a differents? It is still name calling.

>I don't ever plan on doing many things in life, and I still have to
>learn things I think I don't need. That is MY choice, not a "barrier".
>If I am too lazy or unmotivated to learn something, it's really my

Why is it a problem? It isn't a matter of being lazy, but priorities.
We have a budget of X heartbeats, we must invest them wisely. For
some learning CW is a good investment, for others it isn't.

>No problem, that's why we need steps!!! We should have logical steps
>that encourage progress, and keep people from operating outside the

I would like to see the CW requirement removed completely. I would
also like to see the CW subband preserve as long as there is amateurs
that are using it.

>The fact is we all like different things, and there is room for ALL of
>us. Let's just not turn the thing open like a free-band, which is how

I think we are very much in agreement on this one. I don't see any
signs of it going to freeband, but I am new enough that I may not
see the pattern. If it is going in that direction then we shouldn't
lose sight of the brass ring with unimportant issues like CW testing.

Any system that sends error correcting information and uses a narrow
bandwidth would be better, I agree with that. But there is nothing
worng with CW.

It is better than any other non-error correcting mode we have.

I have no agenda against any mode, or anyone else's pleasure. The fact
is that CW is not a problem with amateur radio, it is not the reason
there isn't more interest. It is a whipping-boy for those hell-bent on
changing amateur radio into an expanded personal radio sevice, and it
is in the way of Kenwood dishing out radios to anyone who wants one.

Consider the difference in your two statements, Tom, from "most
efficient" to "better than any other non-error correcting mode".

Most amateur gear nowadays merely unbalance the balanced modulator
and bypass the filtering to produce lowlevel AM (DSB with carrier)..
sounds like your radio is NOT doing what is it supposed to be..
actually if you could run SSB-RC (singlesideband with Reduced carrier)
you could be still copied by AM stations with no problem..

Hi all. I have a VERY nice Yaesu VX-5R for sale. I'm the original owner, the unit has only been used very lightly, and never abused. I have ALL the original packing and manual, plus I have the nice pocket reference that VE3AYR produced. I'll even throw in the Yaesu leatherette case that they made for this unit.

The unit looks and acts just like the day I bought it brand new. I've installed the handy spring-clip style belt-clip (Motorola brand) but you can easily put the original clip back on, it's included. The reason for selling is that my old eyes just can't read the tiny print any more (sigh).

When bought new (February of 2000) with the above accessories it cost me over $400. My selling price is NOW $245 plus shipping. Price is FIRM.

I'm sure you'll like this tiny little powerhouse, don't miss out. First money buys it.

Neil, K1VY

Well, when I think of Pactor and the rest I think of a computer and a
big HF rig.

When I think of CW, I think of a key and a small radio and very low
power drain...something you can tote around in the field.

I guess if you consider a laptop and a SSB rig readily available, then
there are better modes (although they consume more energy).

He's an admitted killer, he commited a crime and deserves to be punished according to the laws of the land he is in. He should have done his bombing somewhere without the death penalty. Then he could spend his days getting raped in a penn on the gov't tip.

Better yet, put his family to death and make him push the plungers. Let
him feel what the families of his victims did. Boy, that would be great

6196. FS - YAESU FT-50 - Mint - Mods - Extras

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-28 01:37:23 UTC
From: jcsarp@aol.com
Message-ID: <20010427213723.03795.00001257@ng-ms1.aol.com>
Source record: 90325

FOR SALE:

Yaesu FT-50RD Dual Band 2 Meter / 70 CM Handheld with extended Receive and Transmit Capabilities. ï¿½It is in MINT condition and works PERFECTLY. It is being sold as a "package deal" that includes a long list of accessories mentioned below.

I am the original owner of this well cared for Yaesu FT-50RD. ï¿½There is not a mark on it and it could pass for brand new. ï¿½The "freeband" modification has been performed on this unit to allow expanded receive AND transmit capabilities (see below). ï¿½This FT-50RD also has complete "no gaps" coverage of the 800 MHz band INCLUDING cellular. ï¿½This FT-50RD was built in one of the last production runs from Yaesu that would allow full 800 MHz coverage. ï¿½The current version FT-50RD is NOT capable of receiving the 800 MHz cellular band.

RECEIVE Frequency Range:
71 MHz - 540 MHz (no gaps)
590 MHz - 999 MHz (including cellular) (no gaps)

TRANSMIT Frequency Range:
120 MHz - 231 MHz (no gaps)
311 MHz - 500 MHz (no gaps)

The Yaesu FT-50RD has MANY features. ï¿½For more information you can visit the Yaesu web site for the FT-50 at:

http://www.yaesu.com/amateur/ft50r.html

http://www.yaesu.com/amateur/ft50rtx.html

FEATURES:

ï¿½ FT-50R Super Wide Band Receive
ï¿½ Military Standard 810 Rating
ï¿½ Digital Code Squelch
ï¿½ 112 Memory Channel and 2 Home Memory channels
ï¿½ 12V DC Direct Input with car adapter
ï¿½ High Speed Scanning
ï¿½ Alphanumeric Display
ï¿½ CTCSS Encode AND Decode
ï¿½ Auto Range Transponder System (ARTS)
ï¿½ Direct FM
ï¿½ High Audio Output
ï¿½ Dual Watch
ï¿½ Digital Voice Recording System
ï¿½ Auto Power Off
ï¿½ Receive Battery Saver

ï¿½ Selectable Power Output
ï¿½ Transmit Battery Saver
ï¿½ Time Out Timer

THIS IS A PACKAGE DEAL THAT INCLUDES THE FOLLOWING:

* Yaesu FT-50RD Dual Band VHF / UHF HT Transceiver
* Owners Manual
* Yaesu NC-60B Charger
* Yaesu YHA-54 Dual Band Antenna
* TWO (2) MAHA MH-FNB-40H NiMH Battery Packs
* Premier SPM-102 Speaker Mic (new)
* TWO (2) Yaesu CSC-69 Carry Cases (1 new, 1 used)
* Yaesu CA-15 Drop in Charging Stand
* Yaesu FBA-15 Dry Cell AA Battery Case (new)
* Yaesu FT-50 "SERVICE" Manual (new)
* Yaesu RH-1 Rubber Case Protector (new)

I have the ORIGINAL factory boxes and packaging for ALL of the above. ï¿½ Everything is in MINT CONDITION. ï¿½Some of the accessories are actually NEW (never used). ï¿½SERIOUS buyers can e-mail me for photo(s). ï¿½Let me know if you can open a zip file containing several photos or if you prefer to view just one group photo of the FT-50RD with the accessories. ï¿½Payment accepted via PayPal or a money order. ï¿½Buyer pays shipping and insurance.

Price - $300 (not negotiable)

Thanks,
John

Don't you DARE come in here with that "murdered" crap! Funny thing, the only thing the anti-capital punishment people do is whine over the criminal and NEVER do they say a thing about the VICTIMS of their crimes. He should have to suffer in death and not just go to "sleep" after an injection. I would LOVE to witness him swing at the end of a rope or squirm in a gas chamber, or dance to the tune of 20,000 volts! GRRRRRR!

I'm at a bit confused here.

1. Why in the radio news group?
2. "Crucified"?
3. "Murdered by injection"?

The 100 + people "killed" by him were what? MURDERED! They didn't choose to be "put to sleep - permanently". They had no warning. No chance to say good bye. Why is it all the sudden we are supposed to feel sorry for the murderers? I don't get it. What about the VICTIMS? What about their rights?

I don't like to see anyone die either. Putting him to death will not bring the others back. But Death is the law of the land in most cases. He knew it before he planted the bomb. He rolled the dice and lost. Let him face the Angel of Death like all before him, especially at his hands.

I can't hold remorse for anyone who kills in cold blood. Self Defense is one thing, but this was not in self defense. As to his motive of what happened in Texas, two wrongs again, do not make a right. WE as a nation need to put a stop to all the violence if we don't want to see ANYONE else die in cold blood, be it by a murderer, law enforcement or other wise (i.e. Death Sentence). Death in this country anymore, is a game. It has to stop.
I don't know all the answers, if any, but it definitely has to stop.

One last point..... He had a chance to ask for Clemency. He refused. Now they are asking a President, who by the way, comes from a state that has had a lot of, if not the most Death Sentences carried out in recent history, to stop it. I doubt that even if he could stop it, he would.

If all who are begging for his life to be spared, were to have had a loved one killed, especially one of the children who did nothing to anyone, I doubt they would be begging for his life to be saved. They would most likely be begging for a chance to stick the injection in personally. If God wants him spared, he will be spared. Nothing will cut that short.

Now, can we get back to what this forum is supposed to be for.....
Radios.
Seems funny, all the forums anymore are being corrupted with everything BUT their intended topic!

My "personal" opinion only.....does not reflect the opinion of the ISP or anyone else affiliated with the transfer of this message.

What part of "Thou shalt not kill" don't you understand?
>>>>>>

The part which you, and the usual group of liberal whiners from which you may exclude yourself if you wish, interpret as meaning that I and others, as a society, cannot protect ourselves from the perversity of mankind with requisite means, including capital punishment, when individual guilt has been established beyond reasonable doubt.

A few general remarks about 'crucifixion': it seems to me that McVeigh of late sounds not like Dismas, but like Gesmas. McVeigh can be glad his passage from time into eternity will be effected not with having his body subjected to the unexpected and large-scale movement of the physical world surrounding him, or by the reality of Roman-style crucifixion (those goodfellas knew their biz), but by OD. How poetically perverse.

Last evening, Col. Steve of 3.260 Radio said that they would start
using 6.900 during daylight hours soon, with a tenative schedule
of 9:00 AM Eastern (US) time up thru to 9:00 PM eastern when a
switchover to 3.260 would be made. Programming is expected
to be (militia related) re-broadcasts of Genesis Networks or other
patriot programming via tape/cart. Transmissions will be in USB.

This is the first genuine Clandestine station to fire up in the United
States in quite a long time. Log it now while you can. No info heard
as to QSL or verifications. Anyone have this info?

Hello W6DHK: Yes good point, this could make a lot of money if produced correctly.

They could also auction off the "Throw the Switch Job" on E-Bay, and free closed circuit TV to the victims.

Then this brings up the possibility, of all the others on death row.....

Jay in the Great Mojave Desert, ... just down the road ah ways from the fillin station.

Just as easy to switch to the opposite sideband, or simply QSY two kHz...
Rather convoluted means to
solve an otherwise simple problem.

How do you explain the fact that the majority of Americans hate and fear their own government? It is mostly not the American people who are the problem, it is the government, and the people who go along with the government while they spy on you.
You failed in Vietnam. You failed with all your fancy spy equipment and tax dollars to notice that India was building an atomic bomb.
Sure, America has power, but not wisdom.

Source record: 90355
Cross-posted to: comp.os.cpm,sci.electronics.equipment,rec.radio.amateur.misc

For sale: Tektronix 575 Transistor Curve Tracer.

Wonderful machine, displays loads of curves for pretty much any transistor you care to test on it. Can even test two transistors at once, ideal for selecting matched pairs.

Buyer collects or arranges shipping. Surrey, UK

Email me at john at wash dot demon dot co dot uk.

Would also be ideal as a boat anchor. Money? Yes, I'd like some, so get your accountant to figure out the new price (thousands), add inflation, and then take off a lot for depreciation, add even more for rare collectable status, and take off another few zillion 'cos I'm such a warm-hearted generous idiot. Or just make an offer.

Any suggestions where else I might find a good home for this useful piece of gear? I'd be heart-broken to take it down the tip, but it occupies space I can ill afford.

P.S. The spare CP/M computers are still available.

Barry OGrady wrote:
>
> How do you explain the fact that the majority of Americans hate and fear their own
> government?

Man, you don't know what you are talking about. What do *YOU* know about "most" Americans? The simple truth is, you DON'T!!! The difference is that, if there is something I disagree with, I can SAY so without fear of reprisal. And that is just what happens. We don't HIDE our differences. We are very OPEN about our likes and dislikes, and even "dirty laundry" such as the Clinton debacle is aired right out in the open.

Yes, Vietnam was a failure. The French failed there as well. I will point out that it is the politics of the far Left that gets us into such messes. We weren't out to conquer Vietnam. Our objective was to prevent the spread of Communism, but we (hopefully) found out that wars of "containment" do not work. A war has to be fought with resolve to the ultimate victory. "Limited" warfare hamstrings the military and masks any definitive objective.

Our "spy" equipment is the best in the world. It is what enabled the allies to paralyze Saddam Hussein's radar and run him out of Kuwait in a matter months, not years, with a minimum loss of life and equipment. Bud, you have no idea what we have or don't have. I saw the pictures of our aircraft putting missiles thru the front DOORs of bunkers, so don't presume to tell us what we have or don't have.

So what if we "noticed" India's nuclear program or not. If we did, or did NOT know about it (betcha we knew more that people THINK), what did you expect us to do about it? Invade?

Finally, Mr smart-ass, in the 230+ years of our existence, IF we had not the wisdom to know when to apply our massive power and when not to, we, like tyrannies and despots, might, perhaps, have attempted to "conquer" the world. Yet we have NOT. In WWII, it took the Japanese sneak attack on Pearl Harbor to get us to declare war. When Japan was defeated, we occupied it, re-established its structure and government, and then waved bye bye, except for certain bases which we felt necessary to keep Russia and China at bay. Like it or not, we are the only reason you have the freedom to criticize us. It is within the minds of the fringe, the ultra-lefts, the sheep who have not the capacity to think for themselves that fall for the idea of the "evil" USA. It is this group that galls under the existence of the USA, for we stand between them and the accomplishment of their failed ideals (socialism, communism, government doing everything for and by them) You, obviously, fall within that group of

sheep who have fallen for the leftist ideas and ideals. FEAR my
government? Nope. I am quite proud to be a native born American, and I
will fight to protect this Land and the freedoms I enjoy--including the
right to bear arms. I can STILL holster a gun and walk down the street.
I have to have the gun registered, but as long as it is in plain sight,
I can STILL carry it in a holster in my state. Can YOU do that in Aus-
tralia? I can still criticize the government and not get a knock in the
middle of the night.

Ah, hell, WHY DON'T YOU JUST SHUT UP!!!

J Oxendine

I don't know if this is liberal, conservative, or BIG BUSINESS. Lately, all I read about is how this large corporation or that large corporation is building in China. Don't kid yourself, big business is running the country. I hope you don't think they only contribute to the Republican party. They want whoever ends up in office to be indebted to them. I look at the huge tax breaks given to big business and want to cry. Spend hundreds of thousands of dollars in tax exemptions, forgiven loans, whatever - just to create a job or two (divide the number of buck$ spent by the jobs created). This leaves small businesses and individuals to pick up the tab. Even natural gas and electricity - now there is a charge just to be connected. Oh, then the storage charge. This means the utility (Rochester Gas & Electric in my case) can charge only 8.5 cents per kilowatt hour - by adding the $17.00 monthly charge for electric, it averages over 12.5 cents per kilowatt hour to me - but the charge disappears, in essence, with the large usages of big users. Same with natural gas. Can you imagine, with the average price of gasoline at say $1.70 per gallon, a station charging a fee of $5.00 to use their pump (storage fee?) and then sell it for $1.50 per gallon? As long as you fill up to the tune of over 25 gallons, you make out. Said gas station would be out of business very quickly, but the utilities are still monopolies and that isn't about to change.

"Thou shalt not kill" lost something in the translation. It should
have been "Thou shalt not commit murder". Consider all the people
who were killed, at the command of God Himself, at the Battle of
Jericho and elsewhere. God Himself, killed all the first born of
the Egyptians and drowned their fathers.

Yea, it's real easy to memorize some simple sayings, laws, slogans...
Catholics are good for that.

It's harder to actually THINK about the God who commanded that command,
and then told the same people to go into the land an UTTERLY destroy all the
inhabitants.
Obviously, there is a problem with simple interpretations.

6237. Kenwood TM-261A named channel feature

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-28 22:51:29 UTC
From: "Michael A. Covington" <see.www.covingtoninnovations.com.for.address@x>
Message-ID: <TPHG6.2505$R2.2110434@newsrump.sjc.telocity.net>
Source record: 90366

The manual says that on my TM-261A, I can reach the channel naming feature by going to MR mode, selecting a channel, powering off, and then holding down MN while powering on again.

Holding down MN, however, has no effect; all the transceiver does is power up normally.

Is it a mistake in the instructions -- did they intend for me to hold down some other key?

It is not MR + Power On; that accesses the memory-clear function.

> presumably knows it's location?

OK on the QSL, if there ever was one to come out of KSM in this
case, that QSL would be true collector's card indeed! Oh well.

The accepted definition of a Clandestine Radio Station is one which is on
the air for purely a political or sectarian reason or purpose.

Clandestines have been very common in Countries other than the USA.
As an example, there are no less than 3 Clan's operating in the disputed areas of the
West Bank and Gaza, broadcasting instructions to the Palestinans directly
in arabic. (there were 5, but 2 stations are now off the air, these 2 were openly affilated
with Hamas and rcvd funding from Iran, until they went "off the air" after
being bombed by the Israeli Air Force!) The United States Govt has also operated
Clandestine stations in various countries. There are 2 stations just over the
border from Columbia (allegedly operated by the CIA) to broadcast programming
of the type and in an attempt to curtail the historic flow of illegal drugs from the
country.
Another example was during the Bay of Pigs Invasion in Cuba when airtime was
actually leased from a VOA transmitter in Fla to broadcast information and codes to
commandos
taking
part in the failed invasion. Stations were also operated by the US Govt during the Vietnam
War, beaming programming into North Vietnam in an attempt to de-stablize the Ho-Chi-Minh
Govt in Hanoi. Again these are just historic examples of what has been done in the
past, to give the reader a frame of reference.

It is VERY unusual however for a Clandestine
station to operate *within the borders* of the United States, owing to the historic
political stability of the USA as being the (our) generally accepted status of affairs in
the
World.
Clandestines as a rule will only appear in regions/places where an actual war is taking
place, or political instability is actually occuring. As neither of these type of
conditions
has been present in the USA since the days of the Civil War, it is again very unusual

that this station on 6.900 mHz / 3.260 mHz has begun operations. Only time will tell what, who, where and why this station's reason for being is.

I have a further question this time about resistances in series.
If electricity is being driven by a voltage, say, 1 volt, and
comes across a resistance of 1 ohm. it disappears entirely
giving a current of 1 amp.

But suppose it comes across a resistance of 1 ohm, but doesn't
yet "know" that there is another 1 ohm resistance in series. How
does the electricity actually "know" at this point that it doesn't
have to expend itself fully on the first resistance but has to keep
one half of itself back in order to expend on the second?

Also, and perhaps I'm a little ahead of myself here, how do
AC volts pass across a capacitance giving capacitive reactance?
Is this an example of the spark gap used in radios?

Please, if you don't know the answer, don't waste time by replying.
A number of you seem to be insincere in your responses,
particularly those who accuse me of trolling, but looking at
the way in which you are responding, I think it is you who
are trolling. (Yes, my nephew has explained to me what
a troll is)

I have found what appears to be an american news group, and
so I am also posting the question there. Perhaps american
radio hams are more welcoming to beginners than the
hostile reactions I've got from British radio hams?

Got news for you, we are in a state of political unrest, conservative views vs. liberal views
and we feel strong enough about it for race riots and constant strife between both extremes to happen
on a daily occurrence. Active extremism is becoming more frequent and fashionable again.

GRIMBLE GRUMBLE wrote:

>Please, if you don't know the answer, don't waste time by replying.

With all sincerity, you don't appear to know what the question is or why you need to know it. For example, why introduce the concept of electricity "knowing" about what it has not yet encountered when flowing around a circuit? What led you to believe that this is a valid concept? Why do you need to know about this for a Radio Amateur's Exam? As you will probably see, questions lead to more questions - not in itself a bad thing - but if your goal is, for example, success in the RAE, then find out what questions you need to ask, ask them, and then assemble the answers into a mental picture that will enable you to deal successfully with that exam.

Slagging others off for not giving you the answer you think you need, when you might have been given the answer that will enable you to gain your target or objective, will not advance you towards that goal, or gain you support in obtaining it.

HTH

You seem to object to me wanting to understand what is going
on. Unfortunately I find it impossible to move on until I can resolve
things which are causing difficulties. You say, for example, "assemble
the answers into a mental picture that will enable you to deal
successfully with that exam". What is it that you think I am
doing? Exactly what you suggest. I am trying to understand
so that I can move on. I am sorry, but from your response you
appear to be another troller who is seeking attention but without
actually helping in the thread. Do you know the answer, or not?
Would it be fair to assume that you are replying from the british
news group and not the american one?

I am not "Slagging others off for not giving you the answer
you think you need". I am criticising those who, like yourself,
seem to be seeking some form of attention by hijacking a
beginner's thread. I have seen some of your contributions

to other threads and I have to say that you seem to be a
particularly nasty individual. Are you yourself a radio
ham? Didn't you start somewhere? Did you work everything
out for yourself without benefit of tutors or friends in the know?

No I don't. You've misunderstood my reply.

>Unfortunately I find it impossible to move on until I can resolve
>things which are causing difficulties.

That's why I advised you to find out what it is you need to know,
before starting to assemble the questions the answers to which will
help you towards your goal.

>You say, for example, "assemble
>the answers into a mental picture that will enable you to deal
>successfully with that exam". What is it that you think I am
>doing? Exactly what you suggest. I am trying to understand
>so that I can move on.

But you appear to missed the vital first step of finding out what you
need to know. You are, in essence, trying to move on from an unknown
and indeterminate position. So you give the impression of not knowing
where you want to go, or where you are, and yet expect others to tell
you what signposts to look out for on this journey.

>I am sorry, but from your response you
>appear to be another troller who is seeking attention but without
>actually helping in the thread. Do you know the answer, or not?
>Would it be fair to assume that you are replying from the british
>news group and not the american one?

It doesn't matter where I am writing from; it is completely
irrelevant.

If you find my previous answer to be a troll, then I suspect your
knowledge-gaining journey to be longer and more difficult than you
appear to imagine.

>I am not "Slagging others off for not giving you the answer
>you think you need". I am criticising those who, like yourself,
>seem to be seeking some form of attention by hijacking a
>beginner's thread. I have seen some of your contributions
>to other threads and I have to say that you seem to be a
>particularly nasty individual. Are you yourself a radio
>ham? Didn't you start somewhere? Did you work everything

>out for yourself without benefit of tutors or friends in the know?

Try to find out the difference between "hijacking a
beginner's thread", and a reasoned and reasonable answer to your
query, before offering such criticism.

The "algorithm" you have chosen to enable you to travel to your goal
appears flawed, as I said earlier. Staring with such a handicap will
increase the difficulty of your journey. If you resent being told
that, then that's your problem. At least it was pointed out to you, as
a help towards getting on the right path. Criticising others for not
providing the answer you think you want will not help you either.
Knowing how to deal with problems is a general skill, one doesn't need
to be a "radio ham" to learn or use it.

Your style of writing is similar to that of a long-time "contributor"
to this ng (who has not appeared in his usual (dis)guise for some time
now). He saw replies to his postings as being personal insults or
attacks, even when correcting the factual inaccuracies in his -
usually off-topic - postings. You have used many of the emotive words
he used to use, with the exception so far of "childish".

I await developments with interest.

All this debate begs one question.......

What are you all doing to help PROMOTE amateur radio?? (all that may read this)

Pretty soon, I will be posting a list of ideas and suggestions to help promote our hobby to youth, (in this hobby that would be most anyone with the aptitude that is under 30 years of age) that I have collected from hams from postings on QRZ.COM and here in the newsgroups....

Its interesting, but I AM the youngest ham in my county.... and I am going to be 31 in July. Hopefully my efforts of promoting amateur radio to youth (ages 30 and under) will provide to have been useful.

73's to all!

I find your post a little perplexing, you ask some very strange questions. I too am going to take the RAE soon and I have devised my own plan to succeed (hopefully!). The fundamental basis of this plan is to learn *only* what I need to learn to get me through the RAE. Juggling job, family and work in the house is not easy and is a major constraint for me, hence the basis of my plan. I would suggest that you concentrate on what you are required to know and then seek education on advanced matters after the RAE.

As I understand matters;

Electron flow is a process that requires no knowledge, it is either allowed to happen or it is not (by path resistance and continuity).

Capacitors change the vectors of AC voltage (current leads voltage by 90 degrees, which will be changed with a capacitor in circuit). It has nothing to do with spark gap transmitters, this is another entirely different thing.

Like new TS450/SAT with YK-88C filter (500 Hz CW, $130 new) installed. All functions are perfect and cosmetics are 9.5 out of 10. Includes factory packing, mike, power cord, manual. Never been "tampered with". Also includes mobile bracket (but rig has never gone mobile).

Asking $650 plus shipping to ConUS by way of your choice.

Also have matching Kenwood MC-60A desk mike ($140 new), $95.

$725 for both radio and desk mike.

I need a smaller rig for the dash of the RV.

I'll consider a trade for a "like new" 706MkIIG.

Will ship on receipt of US Postal Money Order, or when your personal check clears. Will "double box" the original packing to keep it safe.

Email me if you have questions.

73s.....Rudi - WA6RW

And indeed that is correct. The procedure is:

(1) Press MR and choose the desired channel.

(2) Power off.

(3) While holding down MN, power on.

(4) Within a few seconds, press REV.

From there, the manual has it right.

Dear Grimble Grumble,

I'm sorry but your questions have given people the impression you are trolling. Best thing to do is go back to square one.

Brush up your arithmetic. Decibels cannot be added to volts. They are not the same things.

But long before you can be familiar with decibels it will be necessary to understand Ohms Law for DC (direct current) circuits. You will need a pocket calculator, ball-point and writing paper. Get to know the symbols for wire, switch, battery and resistor.

OHM'S LAW STATES THAT - The current (amps) which flows in a circuit is the voltage (volts) across it divided by the total resistance (ohms) of the circuit.

So Amps = Volts / Ohms.

This can be re-arranged to -

Ohms = Volts / Amps.

So if you measure the volts across a resistor with a voltmeter, and then measure the current flowing through it with an ammeter, the resistance of the resistor can be calculated.

The remaining re-arrangement is -

Volts = Amps * Ohms.

That's not too difficult is it ?

Get yourself a school book on elementary electricity. When you can answer the questions at the end of each chapter you can then think about AC (alternating current), inductances and capacitors.

After all that undertake some mathematical studies. Get yourself familiar with exponential functions and logarithms. THEN and only then you will begin to understand decibels.

But as someone else has already pointed out - sit the Radio Amateur Examination (RAE) anyway. You just put a cross against a list of possibly correct answers to questions. Its much easier than you think. You are allowed to make many mistakes. You never know your luck. Sometimes even the examiners don't know the correct answer.

Why not get some morse practice in. Join a radio club. Get some
evening classes. Get a teach-yourself RSGB book on how to become a
radio amateur.

By the way, are decibels ever mentioned in the RAE these days ?

Figures some snot nosed kid would come in and try to tell all the old pros (timers) how to improve! Ryan, don't you know that if they can't come up with it themselves, it can't be done? Besides, if any of your whipper snapper tactics work, they'll all have a touch time trying to agree on what's next on the bitch list! Hey, maybe increase the code requirements!

One of the BEST ways to generate interest is involvement.
We need to expose people to what we do and somehow engage
tjem into our activities.

I've suggested to the ARRL that the Field Day novice/tech
bonus station should be replaced with a third-party station
(operated under similar rules). Intended or not, club focus
upon "points" would encourage more pro-active recruitment
of new people.

Instead of just handing out brochures to our visitors, we
can give them a taste of the fun by getting them involved.

Field day could become even more family oriented by giving
more people a more direct role in the activity.

News coverage would probably be better. I can imagine
getting a newscaster behind one of our microphones for a
longer human interest piece.

We could invite the people we've worked with and helped
throughout the year (law enforcement, Red Cross, Salvation
Army, YMCA, etc...) to come join us in our premiere activity.
What better way to encourage comradiere?

Of course, no single change will generate the total effect
we want, but I feel that this is a step in the right
direction.

What I need to know, is this.... How does the electricity "know" in advance
that there are two 1 ohm resistances in series and that it must save
half of itself for the second one? This question has come to my mind
as the result of studying some notes I was given.

I am sorry, but you are wrong, there. I am working from some old
printed notes for the RAE. The doubt and uncertainty has arisen
directly from reading these notes. I need to know the answer to
the question above. Do you know the answer, or are you just
going to carry on side-tracking in some irrelevance of your own
making?

Not if my supposition that unhelpfulness is to be expected from
the british is correct.

Well, your previous answer is not an answer to the question, is it?
Neither is it any help to anybody.

Well, there hasn't been a "reasoned and reasonable answer to your
query", has there?

I don't know, I've only been on the InterNet a few weeks. I've not taken
anything you said as a personal insult, I've only pointed out how you
are wasting time. If you're not going to answer the questions, then
I won't deal with you further.

So, are you a radio ham? Did you have anybody to help you
when you started out? Friends? Tutors?

One of the difficulties I had with physics a school was that I wanted to
understand why things were happening. If I couldn't find this out, I fell
behind trying to resolve my difficulties. I want to be a radio ham, and if
I don't understand what is going on, how will I be able to make and
mend my radios?

What's a vector?

news:9chagkgbk1@plutonium.btinternet.com...
Why should questions from a beginner come across as trolling?
I know about ohms law, but that doesn't answer my question -
how does the electricity "know" it has to behave differently
when there are two resistances coming up?

I've got my old GCSE physics text-book, but it doesn't go into
electrical matters much beyond static electricity.
I've got some logarithm tables, but I don't see how that helps me.
I've heard a lot of morse code in my listening, but it is just
a jangle to me. If I try and listen to anything, sometimes I can
recognise O and S (because of SOS) but by the time that I've
recognised them, lots more have passed me by.

I've picked up a book, the Radio Amateurs Question and Answer
Reference Manual and it talks about dB in there, so I assume that
I need to understand them.

Please, give me an example of a "victimless crime."

You can't use "drugs" because they are not victimless crimes. Someone almost always has to pick up the slack or suffer as a result of someone using and abusing both legal and illegal drugs. Who suffers? Friends, family, co-workers, tax-payers -- the list is pretty long. Friends and family suffer emotionally and/or financially. Co-workers have to take up the slack and tax-payers pay for the so-called "free clinics" where these people generally end up. No I am not for socialized medicine but I think that if someone TRULY can't afford treatment that the government (you, me and the doctors) should pick up the tab.

Given your thinking below I can sneak up behind someone and pick his pocket. No use of force in that interaction so it should be legal right? I do agree with certain aspects of libertarian philosophy. You can't legislate away stupidity for one. But certain laws are to protect the "innocent", for lack of a better term, from the stupidity of others. For instance, in Texas it is illegal for a person under the age of 18 to ride in the back of a pickup truck at speeds in excess of 30MPH. I think it should be illegal period but many disagree. I have witnessed for myself a child cartwheel out of the back of a pickup at 60MPH. The result wasn't pretty. The parents got a slap on the wrist, "child endangerment." A $2000 fine and suspended sentence. What was their crime? They just killed their kid, that's all.

That's for you to decide, the answer was for your benefit.

>I don't know, I've only been on the InterNet a few weeks. I've not taken
>anything you said as a personal insult, I've only pointed out how you
>are wasting time. If you're not going to answer the questions, then
>I won't deal with you further.

I have tried to help you. Because the answer to your question was not
apparently what you expected, you don't regard it as an answer. I (and
others) have tried to show you where we believe you are making a
fundamental error, if you don't want to go forward from there, then
that's your choice.

>So, are you a radio ham? Did you have anybody to help you
>when you started out? Friends? Tutors?

As I said before, the ability to recognise and successfully deal with situations (including the processing of information) is a general skill; one doesn't have to be a "radio ham" to be able to recognise the useful contained in the otherwise useless or irrelevant. You should have gleaned from the answers given by others that you were trying the equivalent of counting apples with oranges. As this is a fundamental error, *you* need to go back and examine the basis from which you asked your question. You will learn from it, and go forward from a better base of knowledge.

Good idea Ken....it really don't matter much. He won't be 'on the air'
long. Steve is one stupid fool to take on the FCC like this.

It's kinda like putting a bulleye on your back then turning your back and
saying 'shoot me, I dare you'.

If he was interested in anything but self grandizing himself he would NOT be
so open and public. I put him in the goofball fringe element if you want my
opinion.

"SO MUCH ACTIVITY NO - ROOM TO REPORT ALL OF IT!..... de Tedd KB8NW"

TIP OF THE WEEK: When sending regular messages, turn OFF your "HTML" format in your mail programs and use plain text. This will save a lot of bandwidth. Using "HTML" usually makes the message twice as big and copies itself twice in one message!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22/April, through Sunday, 29/April there were 231 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TX0, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9M, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, XZ, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2

There were 55 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,9,15,21,22,23,24,25,
26,31,34,35,43,58,59,69,70,71,72,74

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6RF THE AGALEGA DXPEDITION (Update). As this was being written, the 3B6RF team is heading to Agalega and plans to arrive around May 2nd or 3rd. The team will start operating 10 or 12 hours after landing and stay active until the 16th or 17th of May. From a press release by Steve, N3SL, the advance team for 3B6RF had been on 3B8 for a week where they obtained the license and landing permit, and purchased the perishable supplies and arranged final transportation. The remaining crew should have been in 3B8-land by Saturday, April 28th. Their flight arrangements now calls for travel to 3B6 via S7, and they expect to be on the air by May 3rd, and to begin the tear down process on May 16th. They will not begin operations until all 6 stations are assembled, which includes the massive array of antennas. Once they start, they will be on all bands, 160-6 plus satellite, and all modes (CW, SSB, RTTY/PSK, FM, and SSTV). Their team of 21 members, many of whom gave you 3B7, is giving concentrated effort to North America, with extra attention to the low bands. Unfortunately, they do not share common darkness past the Midwest, so pray hard to the 160 gods! There may be times they have 2 or even 3 stations on 160 simultaneously if conditions warrant. They fully expect to finish with 100,000+ QSOs, approximately 65,000 on CW and at least 2,500 on RTTY/PSK. The digital modes will commence on day 1, but with times limited to 1 hour/continent until the CW pile-ups are worked down a bit. Then more effort will be placed on digital. PSK31 will be a bit unique, as they are using software capable of decoding multiple signals simultaneously. They will listen both up and down 1+ kHz, allowing them to work someone "up 1" while already decoding the next station "down 1" and vice versa, keeping the rates as high as possible. Standard DX frequencies will be used, and they will always work split. The entire band plan is spelled out on their web page. A color QSL is planned, so QSLing will not begin for some time after the expedition is over. North American (Canada, U.S., and Mexico) QSLs go via Kimberly Larson, the daughter of N3SL, at N3SL's CBA: 22 N Hidden Acres Drive, Sioux City, IA, 51108. All other QSLs via HB9AGH. As usual, the bureau will be used for cards received via the bureau or without sufficient return postage. Their web page gratefully acknowledges all of their sponsors and contributors to date. Each team member has put forth a minimum of 6000 USD toward this effort, but with the change in travel plans via S7, significant, unexpected expenses have been incurred, and further assistance/donations will be greatly appreciated. Information and feedback during the expedition should be sent via their American pilot station: Bill Avery, K6GNX, at " bavery@telemetry.com ". They especially want feedback from the western half of the U.S., where 3B6 is needed most. Online logs will be updated daily during the expedition. For more info and daily news, check out the 3B6RF Web page at: http://www.agalega2000.ch

3D2/R, ROTUMA. Katsumi, JA1NVF, is now active as 3D2NV/R. His length of stay is unknown at this time. He has been very active on 20/17/15/12/10 meters SSB and FM 10 meters. QSL via home callsign.

4N8, KOSOVO, YUGOSLAVIA. Boyan, LZ1BJ, was signing 4N8/LZ1BJ from Pristina this past week. Activity seems to be on 40-10 meters CW/SSB. QSL via his home callsign.

8Q, MALDIVES. Only a few more days to work Peter, HA2SX, as 8Q7KK. He will go QRT on May 4th. His activity has been mainly on CW. Check 3504, 7005, 10107, 14003, 18080 and 21005 kHz. QSL via HA2SX.

9A, CROATIA (Lighthouse Operation). Franjo, 9A2MF, has started operation from the Croatian lighthouse Savudrija. Franjo is a lighthouse keeper who has been in service for the past 20 years, and stationed on many Croatian lighthouses. Currently, he is stationed on the SAVUDRIJA, where he will be for the next several years. He has already erected an antenna on the lighthouse building. The "Lighthouse Savudrija" is valid for Croatian Light House Award. Savudrija is a CLH-73. Hams interested in the Croatian Light House Award can get all the details on the following Web page at: http://www.qsl.net/9a7k

C6A, BAHAMAS. Bill, W4WX, will be operating from the Treasure Cay, Bahamas, May 7-14th, as W4WX/C6A. He will be active on RTTY and some SSB on the WARC bands. QSL via home call.

CS, PORTUGAL. Operators CT1EPS, CT1ETX, CT1END, CT1AHU, EA7KW and EA7AH will be active from "Point of Sagres" (locator IM56MX) as CS0RCL/p, June 2-3rd. This operation is valid for the "Castles and Forts Portuguese Award", reference numbers: DCFP (F-054), DMP (815) and DFP (FAL-02). Their activity will be on HF, 6 meters, 2 meters and 23cm. Skeds can be made for 6/2 meters and 23cm via E-mail through CT1EPS at: ct1eps@netc.pt QSL via bureau or direct to CT1EPS.

CW, URUGUAY. Jorge, CX6VM, reports that he will be active in the next CQ WPX CW Contest as CW6V. He will be operating as a Single Operator/ All Bands/ Tribander / Single elements category (SOAB TS). Jorge will be mostly on 10/15/20/40 meters due to the difficultly of getting 6 point QSOs on the others low bands. QSL to his QSL Manager W3HNK: Joseph Arcure Jr., P.O.Box 73, Edgemont PA 19028, USA

EAST TIMOR VIDEO. Dennis/K7BV and Dick/N6FF have announced that a 32 minute video titled, 4W/K7BV 4W/N6FF Timor Lorosae DXpedition - "Memories Beyond the Pileups", is now available in VHS 1/2" tape format (standard USA) or on a CD for 15USD + 5USD handling (USA via Priority Mail). They will also make the video available in PAL format if there is sufficient interest. If interested, contact K7BV, and he will forward all inquires on to the proper people. Please send inquiries via E-mail to: k7bv@aol.com
Or by (snail) mail to: Dennis Motschenbacher, K7BV, 4357 Appollonio Way, Washoe Valley, NV 89704.

FP, ST. PIERRE & MIQUELON ISLANDS. Wendell, K4JZ, has announced what he calls "The Poor Boy DX-Pedition". From June 14-18th, Wendell will be operating from FP-land using the callsign FP/K4JZ. His operations will

be on 40-10 meters SSB. QSL To K4JZ with SASE. This is a one man operation, and any donations will be appreciated.

HC8, GALAPAGOS ISLAND. Operators Robert/N5KO, Charles/W6OAT, Ken/K6TA, Kay/K6KO, Jon/N0JK and George/K5PI will activate HC8N in the CQ WPX CW Contest as a Multi-Multi catagory. QSL via AA5BT.

HK0, MALPELO. Pedro, HK3JJH/HK0, continues to be active. This will be the last week to work him. Activity will end May 7th. QSL Manager Carl, N4AA, reports he will NOT have cards/logs until mid-May after Pedro returns home. He estimates that it will be at least June before everything is in place to start answering the hundreds of requests pouring in. PLEASE READ SPECIAL NOTE under "QSL INFO AND NEWS...."

HV, VATICAN. Look for HV5PUK to be active from the Vatican City on May 3rd, as usual during the "V Lateran Journey". Operations will be on HF, 6 and 2 meters starting around 0800z. QSL to Luca, IW0DJB, the QSL Manager of HV5PUL.

IOTA NEWS.....
AS-NEW. Lee, HL1IWD, informs OPDX that the Korea DX Club regrets to say that their scheduled (May 5-6th) operation for the Kangwondo Province has been cancelled. They could not get the landing permission from government's Ministry of Defence. He states that a few years ago, a North Korean submarine was wrecked and captured near where they were going to operate. After that, the military's HQ has been sensitive to island landing, especially overnight stays. Also, they do not understand about ham radio and IOTAs! They will try to find another way.

AS-056. Joe, JA4PXE/6, will be active from Danjo Island starting around 2200z on May 4th, ending May 6th at 2200z. He will be operating on 14260 and 21260 kHz +/- QRM, and 50.145 MHz. QSL via JA4PXE.

AS-096. Chetan, VU3DMP, from Mangalore (West coast of Southern India) and Srikanth, VU2SBJ from Manipal, informs OPDX that a team of Indian operators will be activating St. Mary's Island from May 5-7th. The un-inhabited, bare and very small St. Mary's Island is located in the Udupi district in the state of Karnataka. The permission from the government, WPC (Wireless Planning & Coordination) has already been granted for this operation. WX permitting, they intend to run 3 stations active on most bands most of the time with about 12 operators. The stations will be active on CW and Phone. The 12 operators that were mentioned are: VU2MHC (Manipal Club Callsign), VU2SBJ, VU3DMP, VU2MTT, VU2RDQ, VU2PAI, VU2NJN VU2RDJ (YL), VU2HEG, VU2RCT, VU2JIX, VU2GPH and VU2JRO. Their activity will be on 80-10 meters with Yagis, Verticals etc..., on CW and SSB with three station active continuously. There is a web page with more information about the operations on: http://www.vuiota.com QSLing will be handled individually for each callsigns, direct (S.A.S.E) (Qrz.com, vuiota.com) or via Bureau is OK. Bureau

requests can be sent to: qsl@vuiota.com

EU-048. Francois, F2GL, will be active from Houat Island now through May 6th. Operations will be on CW/SSB, 80-10 meters (including the WARC bands). QSL to F2GL, direct or via bureau.

EU-130. Andy/IV3SKB and Mauro/IV3HAX will be active from Martignano Island (IIA-UD-005), May 1-7th. Activity will be 40-10 meters, including the WARC bands, on CW/SSB. QSL via IV3HAX.

EU-136. Dusan, S52DG, will be active as 9A/S52DG/P from Krk Island (CI-046 - Croatian Island Award), now through May 1st. His activity will be 80-10 meters. QSL via CBA or bureau.

J5, GUINEA-BISSAU. Baldur, DJ6SI, and others have activated the callsign J5X now through May 11th. Their activity will be on 160-6 meters on SSB, CW, RTTY, FSK, SSTV. QSL CW/SSB to DJ6SI. QSL RTTY, FSK, SSTV to DL1QW.

JW, SVALBARD (Update/Rare IOTA). "DXpedition Artic 2001" will take place during June 1-9th, from Prins Karls Forland Island (Polpynten Area) which has the rare IOTA EU-063 (Spitsbergen's Coastal Islands). The callsign will be JW0PK. The team operators are as follows: DL5NAM/Christoph, ES1CH/ Aleksei, F5PBL/Claude, I2ADN/Angelo, IK2XDE/Andrea, IK2XDF/Giampaoalo, IK4MED/Dario, LA3OHA/JW3OHA/Terje, LA8AV/JW8AV/Egil, ON4AMX/Marc, S57FYL/ Aleksandra, S53AC/Atila, SP5DRH/Jacek, SP5LCC/Witold, US0VA/Igor (Doctor of the team), XE1BEF/Hector and others (members of logistic & security). They plan to operate on all bands and modes on the following suggested frequencies:
SSB - 1840, 3790, 7060, 14195, 18145, 21295, 24950, 28460, 50145, 144250
CW - 1822, 3505, 7005, 10105, 14020, 18080, 21020, 24895, 28020, 50095, 144025
RTTY - 14080, 21080, 28080 | JW7SIX Beacon Frq. 50.047 Mhz.
PSK31- 14071, 21071, 28071 | WW Locator JQ68TB
FM - 29200 |
There will be activity on the satellites/RTTY/PSK31. They will try 6 meters 24 hours a day. They will try the lower bands, but they will have daylight during the operation, so low bands QSO will be difficult. They are looking for sponsors or support, so if you want send them a contribu-tions, you can use this address: DXPEDITION ORG., P.O. Box 584, 9171 Longyearbyen, Svalbard Islands, (Norway). QSL Manager is SP5DRH, QSL via the bureau is ok. If you prefer a direct QSL from SP5DRH, send it to: Mr. Jacek Kubiak, P.O.Box 4, 00-957 Warszawa - Poland. For more info, please send E-mail to them at: dxpedition2000@dxpedition.org
Their Web Page is at: http://www.dxpedition.org

KH1, BAKER AND HOWLAND ISLANDS. Raymundo, YS1RR, announced this past weekend that the same team which was active from Conway Reef 2001, is planning a DXpedition to Baker and Howland Islands at the end of the year. The expect it to take place during the months of September/October 2001, with alternative schedule for the months of February/March 2002. The leader of DXpedition will be Hrane, YT1AD. More datails and plans are forthcoming soon.

LU, SOUTH ORKNEY ISLAND. A station signing LU1ZA from here was active for about an hour on April 21st on 28325 kHz on SSB. His activity started about 1830z, and the operator could not speak English. It is unknown how long he will be there. If anyone knows more information about this operator/station, please pass it on to OPDX. There are many who need this station as a new one.

NEW DXER IN THE FAMILY? The DX team of Holger/DL7IO and Birgit/DL7IQ added an addition to the family on Sunday, April 22nd. NODXA's friend Holger informs OPDX that the mother Birgit and new daughter Xenia are fine. Xenia weighted in at 3590g and her length was 51 cm. She has long black hair (like her sister Saskia had). Congratulations to both Birgit and Holger! By the way, the first pictures of the new arrival are available at the following Web link: http://www.ea8.de/xenia.html

QSL INFO AND NEWS.....
IMPORTANT NOTICE. Carl, N4AA, editor of QRZ DX and QSL Manager for Pedro, HK3JJH/HK0, reports that he has just learned that the FCC made an error in his zip code when they processed a change of address several months ago and he never noticed their mistake. The post office brought this to his attention when all the mail started coming in for HK3JJH/HK0. Please help and spread the word that the correct address for N4AA is: Carl Smith, PO Box 249, Leicester, NC 28748-0249

Mac, W3HC, has informed OPDX that he is now the QSL Manager for EP3SP.

Gil, F5NOD, reports that Eric, F5SIH (ex-FO0BOG), states that the QSL cards are printed, and the first package of QSL should be in the mail as of this past weekend.

FR/T QSL STATUS. Gil, F5NOD, reports that 1000 QSLs are still in the hands of Larry F5PYI, (QSL receieved in August/September). Larry is back at home and they will mail them very soon. They have sent about 8000 QSLs out, but they are still working on the QSLing and there is about 1000 QSL cards yet to go. Gil states the following:
- "PLEASE, Do not resend QSL request !! (save your green stamps)
- I WILL INFORM YOU WHEN ALL QSL WILL BE SENT !! AFTER THAT YOU CAN RESEND REQUESTS .. FOR LOST MAIL etc... ...
- We will start Bureau QSLing after all direct QSLs are sent
- DO NOT SEND ME (or to Erwann F6JJX) E-mail "Did you received my QSL ?" >> We really don't know!
- DON'T FORGET to put with your request , postage contribution and SAE (SELF ADRESSED Envelop) many of you forgot the SAE!!! ... Also don't forget to write your country on the SAE!! Many of you forgot it too ... That's the major reason for lost mail."

QSL K5K STATUS. The 425 DX News reports that Tom, N4XP, is processing and mailing QSLs daily. He started six weeks ago, but the queue was over 30,000, so it will take a while.

R2/DK8LV STATUS. Stephan, DK8LV, reports that all cards received have not been answered yet. The reason for this is that after his stay in

Kaliningrad last year, friends in UA2-land ordered the QSL cards by UA3AA in Moscow. He received the package with the cards last December, but they were all printed with the wrong callsign (R2/DL8LV!). So, Stephan had to order new cards again, but they have not arrived yet - shipment date was February 22nd (!!). He states that he will wait until the end of April, and if the cards are not received by then, he will look for a new printer. Stephan will answer all cards as soon as they are ready from the printer.

QSLs for TA0/IT9YRE/p and TA0/IT9WDY/p go to IT9YRE either direct (Ferdinando Rubino, P.O. Box 30, 96012 Avola - SR, Italy) or through the ARI bureau.

The team of operators that were active from Enewetak as V73E are back on Kwajalein as this bulletin was being prepared. They made about 18,000 QSOs. QSL via WF5T. A Web site has been set up for this operation at: http://www.sixmeters.com/v73e

Bill, K6KM, reports that all direct QSLs for VK9NOO and VK9NNN have been answered. No bureau cards have been received yet. He mentions that about 5% of the cards had the wrong date. NONE had time off by more than five minutes. Bill states, "Apparently many ops don't know that U. S. postage to almost anywhere is now 80 cents. Many cards had 60 cent stamps. Correct U. S. postage is best, 1 USD is almost as good, IRCs are a pain but they work (only 1 required). Envelopes with peel-off stickies are GREAT! Thanks to those who sent them!"

Bob Schenck, N2OO/9M6OO/V85OO, announced the formation of "The QSL Manager's Society". This will be a web based "organization" that will act as a "point of contact" for quality QSL managers, and for DXpeditions or DX stations looking for one. It will also provide a central source of information useful to any QSL manager. Please visit the web page at: http://www.qsl.net/qslmanagers

SAD NOTE. Bob Schenck, N2OO/9M6OO/V85OO, sadly reported this week the passing of H.G. Hassan, V85HG (aka V8HG). Hassan was always a strong and steady voice for Ham Radio in Brunei. He will be sorely missed. Bob mentions that a nice photo of Hassan can be found on the Buckmaster callsign server at the web site: http://buck.com/cgi-bin/do_hamcallexe (enter V85HG). OPDX and the DX community send out our deepest sympathy to the family and friends.

SPECIAL EVENT. During the celebration of the 56th Anniversary of the end World War II, the members of the "Michurinsk Contest Groupe" will activate the special event stations RP3RST, RP3RTG, RP3RTK and RP3RZK between May 5-9th and May 12-13th (including the "ARI DX" and "CQ-M" contests). If you make contacts with these stations (CIS stations - 15 QSOs, EU stations - 10 QSOs, DX stations - 5 QSOs; dupes are valid on different bands or modes) you will receive a "MCG-medal" trophy free of charge (please, send only 2 IRCs for postal expenses). QSLs for all these stations are via RN3RQ (direct, bureau or E-mail requests for bureau cards is OK): Jack Yatskiv, P.O.Box 30, Michurinsk 393760, Russia. His E-mail address

is: mcg@pub.tmb.ru
All QSL requests for the 2000 year activity were sent via the bureau.

"THE MOBILE DXER" (New Book). Dave, AC6WO, has informed OPDX that he has written a new book for "The Mobile DXer". This book is the "First and Only" book devoted entirely to Mobile Dxing. "The Mobile DXer" will be introduced to the Amateur Radio community by CQ Publications next month at Dayton. If you are interested in Mobile DXing and are going to Dayton, stop by the CQ Booth and take a peek at "The Mobile DXer".

TK, CORSICA (IOTA Activity). Pierre/F5MOG and Jean-Pierre/F1AHO, will be active from North Corsica (EU-014, DIFM TK001) near cap Corse now through May 6th, as TK/F5MOG and TK/F1AHO. Activity will be on the HF bands, both CW and SSB, every day after 4:00 PM (their local time). On April 29th or May 1st (according to boat possibilities), check for them to be active from Giraglia Island (EU 164, DIFM TK 007, WLH 0511). On May 5 and 6th, Jean Pierre, F1AHO, will be active on hyper (5.7, 10 and 24 Ghz). QSL via F5MOG, direct CBA or via French REF Bureau.

TX0, CHESTERFIELD ISLAND. The TX0C team is now active until about May 2nd or 3rd. Activity will be on 160-6 meters CW/SSB. QSL via JA1BK.

VK9C, COCOS-KEELING ISLAND. The English team of three operators is very active on 30-10 meters CW/SSB (frequencies listed in OPDX.508). Activity by VK9CXF, VK9CXJ and VK9CXW will last until May 5th.

VP8, FALKLAND ISLANDS. The Scottish team of 4 four operators is making it easy for anyone who needs this on CW. VP8SDX is on ALL bands 160-10 meters (frequencies listed in OPDX.508). Activity will last until May 8th.

XX9, MACAO. Arto, OH2KW, will be on the air again from here. He will be active between May 18-20th and during the CQ WPX CW Contest (May 26-27th). His callsign will again be XX9TKW. QSL via his home callsign, via the bureau or CBA.

ZK1, NORTH & SOUTH COOK ISLANDS. Remember to look for Uwe/DL9NDS and Klaus/DL7NFK to be active as ZK1NDS and ZK1NFK (refer to OPDX.500). By the time you read this, they should be active. Activity will last until May 18th. They will activate a few IOTAs during their stay: Rarotonga (OC-013), Mangaja Island (OC-159), Aitutaki Island (OC-083) and Manihiki (OC-014). Their emphasis will be on the modes RTTY/PSK31/MFSK16. QSL via their home callsigns. They will have an online log available at:
http://www.dl9nds.de/Cook/cook.html

ZL7, CHATHAM ISLANDS. Ed, K8VIR/ZL4IR, is expected to be here on business during the next few weeks. He will operate as ZL7IR during his spare time. Suggested frequencies are: 14260, 18130 and 21260 kHz. QSL direct via W8WC.

I thought all the vanity callsign gates had already opened.

Oh, wait, this is the gate that lets you trade in your ham radio
callsign for a bootleg 'handle'. Ah, yes!

Go back and read the rest of the bible, Oy Boy. Especially the parts where god actually condoned killing, and the murder of innocents. Every one of you seem to want to ignore this, and continue to only quote Exodus 20:13

6278. QRP batteries / cycle holiday !

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-29 19:38:47 UTC
From: Carl Ratcliffe <carl_ratcliffe@hotmail.com>
Message-ID: <9chqp5mur04$1@news.t-online.com>
Source record: 90256

I am considering using a 12v / 12 Ah sealed motorcycle battery to supply power for an FT-817 for portable(transportable by bicylce) / field use.

Such batteries seem to weigh about 3 Kg. I intend to fit the 817 into one pannier and the battery in to the other and then erect a field dipole (from trees) as I go on a cycling / camping holiday this summer. I may even erect more exotic antennas if time (and XYL) permits.

I hope to be able to charge the battery most evenings using a light weight charger.

Can anyone offer any (sensible) advice. Is this practical ? Has anyone else tried it ? Where will I get a battery from at a good price.

Is there such a thing as a 12v hand generator available ?

I'm retired and living alone, Kevin. Please explain how me having a
joint alone in the privacy of my own home causes anyone to suffer. When
I was married and living in CA, my wife and I smoked pot regularly. It
enhanced our sex life and contributed to our marital bliss. We were
responsible adults and only smoked it at night after the kids had gone
to bed. Drugs can be used responsibly or irresponsibly, just like guns.

> Given your thinking below I can sneak up behind someone and pick his pocket.
> No use of force in that interaction so it should be legal right?

Of course, that's using force, Kevin. That victim is being forced to
give up his wallet against his will even if he doesn't realize it
until later.

> For instance, in Texas it
> is illegal for a person under the age of 18 to ride in the back of a pickup

> many disagree.

It should be illegal for kids. It should not be illegal for adults. Kids
should be protected from stupid parents. Adults should not be protected
from themselves. Otherwise, someone may force you to get a facelift to
save you from being so ugly.

When the circuit is first switched on, the current builds up slowly
because of inductance and capacitative effects. The potential at the
first resistor rises (as it does with the second), eventually the sum of
the volts across the two resistors equals the battery voltage and the
current stabilises. You are trying to think of two effects one after the
other whereas they both happen together.

Congratulations on the best Troll I have seen since I started using this
mode. You have them all going :-)

However, once a joke is heard often enough it gets boring. :-((

Bye Bye

"Reg Edwards" <g4fgq.regp@btinternet.com> wrote in message
news:9chagkgbk1@plutonium.btinternet.com...
: Dear Grimble Grumble,
:
: I'm sorry but your questions have given people the impression you
: are trolling. Best thing to do is go back to square one.
:
: Brush up your arithmetic. Decibels cannot be added to volts. They
: are not the same things.
:
: But long before you can be familiar with decibels it will be
: necessary to understand Ohms Law for DC (direct current) circuits.
: You will need a pocket calculator, ball-point and writing paper.
: Get to know the symbols for wire, switch, battery and resistor.
:
: OHM'S LAW STATES THAT - The current (amps) which flows in a
: circuit is the voltage (volts) across it divided by the total
: resistance (ohms) of the circuit.
:
: So Amps = Volts / Ohms.
:
: This can be re-arranged to -
:
: Ohms = Volts / Amps.
:
: So if you measure the volts across a resistor with a voltmeter, and
: then measure the current flowing through it with an ammeter, the
: resistance of the resistor can be calculated.
:
: The remaining re-arrangement is -
:
: Volts = Amps * Ohms.
:
: That's not too difficult is it ?
:
: Get yourself a school book on elementary electricity. When you can
: answer the questions at the end of each chapter you can then think
: about AC (alternating current), inductances and capacitors.
:
: After all that undertake some mathematical studies. Get yourself
: familiar with exponential functions and logarithms. THEN and only
: then you will begin to understand decibels.
:

: But as someone else has already pointed out - sit the Radio
: Amateur Examination (RAE) anyway. You just put a cross against a
: list of possibly correct answers to questions. Its much easier
: than you think. You are allowed to make many mistakes. You never
: know your luck. Sometimes even the examiners don't know the correct
: answer.
:
: Why not get some morse practice in. Join a radio club. Get some
: evening classes. Get a teach-yourself RSGB book on how to become a
: radio amateur.
:
: By the way, are decibels ever mentioned in the RAE these days ?

Reg

Yes, dB (v,W and i) are mentioned very much so. In fact that's how power is related all the time.

Regards,
Gary

:
: One of the difficulties I had with physics a school was that I wanted to
: understand why things were happening. If I couldn't find this out, I fell
: behind trying to resolve my difficulties. I want to be a radio ham, and if
: I don't understand what is going on, how will I be able to make and
: mend my radios?

GG

First off, I'm not saying lose the quest for knowledge. All I am saying is
learn what you need to, go back to what you want to learn afterwards. You
don't need to understand how reactance works in a circuit to make or repair
it. First things First.
:
: What's a vector?
:
When you measure reactance and resistance and have to add them when there is
a phase shift (introduced by inductance/capacitance) you can't add them
ordinarily, you must add them vectorially. A vector addition is taking the
square root of the sum of the squares of the two items you are interested in
(in the formula below, this is R and X);

Impedance (Z)= Sq. root of:(Rsquared+Xsquared)

If you then want to apply the results to Ohms Law then Resistance can be
replaced by the answer of the above equation, Impedance, which is Z,
therefore I=V/Z.

6285. What is safe input power to SB-201 when running continous output PSK31 or RTTY

Just purchased an SB-201 and was wondering how to make sure I don't damage the tubes when using some of the continous digital modes such as PSK31 or RTTY. I have a Kenwood TS-820S which can drive ~150 watts into the SB-201 - what is a safe input power for the Heathkit amp for continous output? The manual doesn't give any suggestions. Thanks.

Safe 'rule of thumb' would be 50%. Take a key down plate reading, or wattmeter reading in SSB mode. Cut it in half by reducing he DRIVE from the EXCITER.

BTW the 820 will be a world class pain in ur butt for PSK31 work. Not stable enough.

But try it anyway, have fun.

Electron movement is on the order of micrometers and being charged, its
movement has an effect on other electrons, repulsion. So the way you
frame the question - some wandering minstrel of an electron blundering
thru the Universe - is unrealistic and more than likely the source of the
confusion. It is more a case of pushing a chain of freight wagons thru a
sorting yard. If the train has to go over two hills, the second one will
make its presence known long before the locomotive gets to it. The local
polytech would probably employ Kirchoff's law which says simply that the s
um of currents entering and leaving a given point must sum to zero.

Back in the vacuum tube (valve) days it always disturbed me that the positive voltage in a power supply was derived from the cathode, a distinctly negative point. And indeed within the power supply, electrons did come from the cathode to the plate or anode thru the transformer to earth. Took a while to realize that the load's drain was the PS source. No question is silly.

AC takes a bit more visualization but let us take a good stiff battery, 90 volts or so, and attach two wires to it and connect them to two pie tins whose bottoms are separated by an eighth of an inch or 3mm depending on when you were in school. Right at the instant you connect the wires the negative side gets some electrons pushed into the pie tins and the positive side has a few yanked out. This process starts like a cavalry charge and declines to nothing as the electrons already in the pie tin repel the newbies and the positively-charged plate starts to attract them back. So if you put an ammeter in one wire and a voltmeter across the pie tins, the current meter leaps and declines to zero while the voltmeter climbs to 90 as the whole process comes to a grinding halt. (It would be instantaneous except there is some resistance in the wire).

So you see that the one thing that has happened for sure is that voltage and current flow are not together anymore, the current precedes the voltage. This is capacitive reactance. No heat is generated but things are not the same.

Now put a 1000 Hz tone on the cap. And read current and voltage on a scope so that you can see them together. You would notice that the current trace reaches its peak when the voltage is zero and vice-versa as this process is repeated 1000 times a second. No current actually passes thru the capacitor but there is a measurable voltage across it. In a practical circuit, a cap can be used in a 'blocking' mode to voltage-couple two circuits. What is really happening is that the activity in one circuit -- and only the changing activity not the DC voltages to make the devices work -- can be coupled to the next stage thru a cap so long as the cap is large enough to store the entire half-cycle. You cite a case where reactance is not really the issue.

To get ahead of the story, an inductance works exactly backwards -- you get a voltage reading then get the current. At some frequency, the reactances are equal (by convention, caps have negative reactance). Put the two in series and they cancel making for maximum power passage, put them in parallel and they make the voltage/current relationship a half-cycle out of phase (insert 'time' and it makes more sense) and no current flows thru the combination.

Have I made ten pence worth of sense???

Did your "god" tell you to spell that way ? So a bunch of people are crazy
enough to believe that there is a god ... doesn't make him exist any more
than he ever did.

If one person believes in an invisible being who's all powerful and such he
is crazy ... if a few people do it it's a cult ... if a population does it
its a religion ... why isn't it a population of crazy people ?

It seemed to me, even as a teenager in the early 70's, that ARRL thrived on selling books, magazines, tapes and other items. Every time I turned around, they were trying to sell me something.

I feel ARRL helps me on a regulatory level with spectrum protection and similar matters. They also helped me earn my license by providing well-written study materials. I trust that they are doing more for me on a continuing basis. I am a member, and plan to remain one, even though I don't see benefits on a daily basis.

6293. FS - YAESU FT-50 - Mint - Mods - Extras

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-30 00:46:53 UTC
From: jcsarp@aol.com
Message-ID: <20010429204653.00136.00001471@ng-cq1.aol.com>
Source record: 90271

FOR SALE:

Yaesu FT-50RD Dual Band 2 Meter / 70 CM Handheld with extended Receive and Transmit Capabilities. ï¿½It is in MINT condition and works PERFECTLY. It is being sold as a "package deal" that includes a long list of accessories mentioned below.

I am the original owner of this well cared for Yaesu FT-50RD. ï¿½There is not a mark on it and it could pass for brand new. ï¿½The "freeband" modification has been performed on this unit to allow expanded receive AND transmit capabilities (see below). ï¿½This FT-50RD also has complete "no gaps" coverage of the 800 MHz band INCLUDING cellular. ï¿½This FT-50RD was built in one of the last production runs from Yaesu that would allow full 800 MHz coverage. ï¿½The current version FT-50RD is NOT capable of receiving the 800 MHz cellular band.

RECEIVE Frequency Range:
71 MHz - 540 MHz (no gaps)
590 MHz - 999 MHz (including cellular) (no gaps)

TRANSMIT Frequency Range:
120 MHz - 231 MHz (no gaps)
311 MHz - 500 MHz (no gaps)

The Yaesu FT-50RD has MANY features. ï¿½For more information you can visit the Yaesu web site for the FT-50 at:

http://www.yaesu.com/amateur/ft50r.html

http://www.yaesu.com/amateur/ft50rtx.html

FEATURES:

ï¿½ FT-50R Super Wide Band Receive
ï¿½ Military Standard 810 Rating
ï¿½ Digital Code Squelch
ï¿½ 112 Memory Channel and 2 Home Memory channels
ï¿½ 12V DC Direct Input with car adapter
ï¿½ High Speed Scanning
ï¿½ Alphanumeric Display
ï¿½ CTCSS Encode AND Decode
ï¿½ Auto Range Transponder System (ARTS)
ï¿½ Direct FM
ï¿½ High Audio Output
ï¿½ Dual Watch
ï¿½ Digital Voice Recording System
ï¿½ Auto Power Off
ï¿½ Receive Battery Saver

ï¿½ Selectable Power Output
ï¿½ Transmit Battery Saver
ï¿½ Time Out Timer

THIS IS A PACKAGE DEAL THAT INCLUDES THE FOLLOWING:

* Yaesu FT-50RD Dual Band VHF / UHF HT Transceiver
* Owners Manual
* Yaesu NC-60B Charger
* Yaesu YHA-54 Dual Band Antenna
* TWO (2) MAHA MH-FNB-40H NiMH Battery Packs
* Premier SPM-102 Speaker Mic (new)
* TWO (2) Yaesu CSC-69 Carry Cases (1 new, 1 used)
* Yaesu CA-15 Drop in Charging Stand
* Yaesu FBA-15 Dry Cell AA Battery Case (new)
* Yaesu FT-50 "SERVICE" Manual (new)
* Yaesu RH-1 Rubber Case Protector (new)

I have the ORIGINAL factory boxes and packaging for ALL of the above. ï¿½ Everything is in MINT CONDITION. ï¿½Some of the accessories are actually NEW (never used). ï¿½SERIOUS buyers can e-mail me for photo(s). ï¿½Let me know if you can open a zip file containing several photos or if you prefer to view just one group photo of the FT-50RD with the accessories. ï¿½Payment accepted via PayPal or a money order. ï¿½Buyer pays shipping and insurance.

Price - $300 (not negotiable)

Thanks,
John

I rate Tim McVeigh on the same level as Lee Harvey Oswell. He is no more than a government scape goat. I don't believe for one minute that a truck bomb cause that much damage to that building. Why were all the other government employees in the building and not one FBI agent or ATF terriost in the building at the time of the explosion? How come there was no other devastation to surrounding buildings. Mighty big explosion to take down a whole building and just that one. There where reports of other charges in the building then nothing else heard about them (one way or another). I do believe that there was a truck bomb and the government terrorists new it was coming. I don't think that that truck bomb could of caused that much damage. What about the rumors about the the no longer need for the ATF? Could this be the way to save a no longer needed government terrorist agency? Why was the building so quickly removed? I would of liked to see more investagation of the way the building came down.
Yes people died I wonder how many lives where saved by this dastardly deed. In standoffs with the United States terrorists (FBI, ATF, DEA) since the building was blown up the government has been less likely to use deadly force like Ruby ridge and WACO! Its funny how people don't remember the stand off in Montana weeks after the bombing. Nobody was killed. Thus the press doesn't have a field day with and thus we the American (sheep) public don't remember or even know about it. To the people in OK I'm sorry that you have lost loved ones and I'm sorry that April 14 is such a bad day for that part of the nation but the death of Tim McVeigh isn't the end of this and isn't true justice. To put it in a nutshell I don't beleive for one minute that his bomb did that much damage (it was a inside job)!
This is my opinion.

Thanks for the reply - hadn't considered that it would not be stable
enough - no loss if it doesn't work well for PSK31 - I've had the radio for
22+ years. To make sure I understand, I should back the exciter down to 50%
of its full output power - yes?

Are you nut bags magnetically attracted or something? You certainly come out of the wood work when one of your fellow mentally deficient somewhat humans say something stupid.

Think of it this way, they LEVEL buildings with far less explosive than what he was believed to have in the truck.

There was video proof of him driving the truck that was known to be the point of the blast.

He had receipts for the deisel and fertiliser, not to mention he was in possesion of other bomb making materials when he was picked up.

Did you think that perhaps there wasn't an ATF or FBI office in the building?

And all that aside, he admitted to the bombing!

1. Collins 51S-1 F S/N 9420
Comes with a 2.4 SSB Filter, and 800 CW filter
"BIG Round Emblem" Receiver. It looks and works great. It
is in a Collins 30L-1 case, and its in nice condition. The case has
been
repainted (with Collins color) , also looks great. New power cable,
and copy of the manual
included, the radio was aligned by my Collins technican Wayne Spring
W6IRD.
$1600.00

2. Collins 651S-1 Receiver "Round Emblem" works and looks fine, it
has a
liitle bit of wear. Original Collins manual included
(its 3 inches thick!!!) also checked out by Wayne Spring
W6IRD...$1200.00

3. Collins winged emblem 75S-3 Receiver, all original $500.00

4. Collins winged emblem 32S-3 Transmitter, all original $500.00

5. Collins winged emblem 312B-4 Console , all orginal $300.00

6. Collins winged emblem "RARE & Very Nice 399C-1 External VFO for the
KWM-2, or KWM-2A $1299.00

7. Collins 270G-2 external Speaker $350.00

8. Collins 270G-2 external Speaker $350.00

9.. Heathkit SB-221 10-80 meters linear amplfiier "NICE" condtion.
Wired for 110 volts
90 watts drive is putting out 950 watts $495.00

10. Icom IC 701 HF transceiver, and matching Icom PS-701 power supply,
also
nice condition.......$275.00

11. Dentron MT-3000A 3KW antenna tuner looks great $195.00

12. Alpha ETO 76A (3 tube's 8874's) amplifier Nice condition
$1200.00

PH/FAX (310) 670-6969

Thanks & 73,

Leo KJ6HI

Do NOT consider using an amplifier for PSK31!!!!!!!
Most signals NOW are over driven at 100 watts!
It's aQRP mode!

And when was the last time the police kicked in your door and busted you for smoking a "joint," Cecil? If that were the end of the story, I don't think a soul in the world would care. However, the drug problem doesn't end with just that "joint" in the home. For example, somebody had to transport that drug for you to smoke - and we all know the problems associated with the illegal drug trade. Likewise, for every person you can show who uses drugs as responsibly as you claim, I can show ten others who have not - our jails are full of them (so your example of responsible drug use is certainly not at all the norm).

By the way, when your said that "drugs [plural] can be used responsibly," are you saying that all drugs can be used responsibly, or just the one drug used in your example? I've noticed in previous discussions that you like to offer only one example (marijuana) when advocating the legalization of plural drugs. If your intent is to advocate the legalization of plural drugs, lets get off this marijuana smoke-screen and talk about the more serious drugs. For example, I'd really love to see you explain how crack, cocaine, or heroin, can be used responsibly.

Anyway, back to your comments. Why would one want to use marijuana to enhance sex life for marital bliss? Almost any man should be able to keep a wife happy without first using drugs to mess up her mind. And how can you say that you used marijuana responsibly when you used that illegal drug with children in your home - children who would have lost their mother and father if that illegal activity resulted in a

jail sentence? Doesn't sound even remotely responsible to me.

Just tune it up normal. Assuming your using AFSK for the RTTY...just turn down the microphone till you see half power.

I normally run about 20 watts of exciter to the Ameritron 811H. That gets me basically half power out of the Amp.

On TTY you will need a amp some times. On PSK no need at all. But stability is required.

I wouldn't call it a 'QRP' mode Tom. It works well with QRP, but it all started running around 50 watts. And that is where most of it still is.

That's a Catch-22, Dwight. "Bad things might happen because it is
illegal." Sounds like "1984" to me. You could argue that the alcohol
problem doesn't end with just that drink in the home.

Just because someone may use a gun irresponsibly is not a good reason
to take away my guns.

Just because someone may use marijuana irresponsibly is not a good
reason to take away my marijuana.

Those two arguments are conceptually identical.

> By the way, when your said that "drugs [plural] can be used
> responsibly," are you saying that all drugs can be used responsibly,
> or just the one drug used in your example? I've noticed in previous
> discussions that you like to offer only one example (marijuana) when

> advocate the legalization of plural drugs, lets get off this marijuana
> smoke-screen and talk about the more serious drugs. For example, I'd
> really love to see you explain how crack, cocaine, or heroin, can be
> used responsibly.

I talk about my experiences, Dwight. I've never used crack or heroin.
But, when I was younger, half of Silicon Valley used cocaine. I used
it responsibly. I knew it was addictive so I didn't use it often enough
to become addicted. What do you think the world did before cocaine was
made illegal? Coca Cola once contained cocaine. Education, knowledge,
and treatment are the keys to the drug problem, not the war on drugs
which has turned out to be a war on private citizens.

> And how can you say that you used marijuana responsibly when you used
> that illegal drug with children in your home - children who would have
> lost their mother and father if that illegal activity resulted in a
> jail sentence? Doesn't sound even remotely responsible to me.

Again, just because unfair laws exist doesn't make it right. There is
wholesale violation of the drug laws and citizens are losing respect
for the government that is enforcing them. Most of my friends at all the
CA companies I worked for used illegal drugs. Do you avoid oral sex
with your wife just because it is illegal? Do you teach your kids

that missionary style is the only proper position for sex?

The purpose of the drug laws is not to keep people from using drugs.
Their purpose is power, control, and confiscation of private property.
If we don't stand up for our rights, we are going to lose them.

I've received some help from an unexpected source - I
was taken out to lunch by a rep and he had this radio thing
in his car. Upon my querying it, yes, he was a radio ham, or
amateur that he said is more modern. He had some choice
comments about this group - to do with ageing Victor Meldrews
who have no friends and so spend all their time carping. Oddly
enough he had seen my questions.

I've had my questions explained in "words of one syllable". If
there's anyone out there who has also had difficulties in these
areas, I'd gladly share the explanations with you.

However, I suspect that most in this NG, rather than admit
their own ignorance will try to save face by their endless and
pointless blustering.

But a problem shared is a problem halved - despite the hostile
reception that I as a newcomer have had recently, I'd willingly
help anyone in a similar position.

We've all got to start somewhere, and those who've got
professional qualifications were helped in no small measure
by the tutors paid for out of my taxes.

Um ... modes are not QRP ... just some hams like to run QRP.

Try running PSK31 across a weak ionoscatter link, and you
will need all the ERP you can muster.

Sometimes you need a lot of ERP to get the S/N you require.

Give us a hint?

6323. TM-721a Help! 410MHz tuning..

Newsgroup: rec.radio.amateur.misc
Date: 2001-04-30 18:53:01 UTC
From: Annick <annick_100@hotmail.com>
Message-ID: <PsiH6.6153$ZH.545212@weber.videotron.net>
Source record: 90199

Hello,

I need to know how to change de "tunable" range from 420-4XX to 410-4XX.
Here's a cut from the mod I made. Thanks!

annick_100@hotmail.com

First of all, this mod will allow the UHF digital display to traverse from
400.000 to 499.995. The radio will not, however, tune this entire range due
to a combination of a limited synthesizer lock range and the input RF
amplifier bandwidth. The apparent useful tuning range is about 420-460, with
sensitivity dropping off sharply at either end. Naturally, the best
performance is in the middle (the Ham Band :-).

To be fair I think ARRL or any other group needs to promote the
resources that they have. Sometimes this promotion can be seen
as a "hard sell". I don't think ARRL has lost sight of their
goals. I think between the ARRL being a lobby to protect our
bands, QST, email reflector, Propagation Forecast Bulletin,
DX Bulletin, Incomimg/outgoing QSL buro, the ARRL sponsored
contest/awards, etc make ARRL a very good value for me.
Your mileage may differ.

Think of "circuits".
That means a closed loop somewhere.
In your case consider electricity leaving a battery, passing through a resistance (unknown) and returning to the opposite battery terminal. Because we now have a complete circuit, the electricity flows. The amount of flow is determined by the voltage (think "pressure") and the resistance (think of obstructions in a pipe).

Also now think of parallel resistors - the electricity can (and does) take two paths - one through each resistance. The pressure (voltage) is the same across each resistor, and the overall current is merely the sum of the two individual currents.

Is that any help?

73
Andy.

How's this for conspiracies? Some of these kooks claim that at the time of his arrest, McVeigh shouted out to reporters that the government put a chip in his butt. That's why he planted the bomb.

My sides hurt for a week from laughing at that one.

And what the government did in Waco was right? Why didn't they nail him in
town? Then like cats in the kitty litter they tried to cover it up. For the
information of this group that federal building housed the headquarters for the
terrorists that set that fire in Waco Tex. Was what happened in Ruby Ridge
right too? Before that there was that thing in Missouri? It seems to me that
the FBI and the ATF where growing out of control until the bombing in OK. So as
I said in the previous post I wonder how many lives the bombing saved.
Just my opinion

I'm shocked that no one has come up with any mods for the HTX-212. Looking
at schematic, it seems to have close to the same setup of the newer HTX-242
which does have mods.
Someone tell me, what the difference is that prevents one from modifying for
open Tx on the 150Mhz.

W6RCecilA wrote:
>
> That's a Catch-22, Dwight. "Bad things might
> happen because it is illegal."

Actually, I don't think that is exactly what I said, Cecil.
However, I'll accept a variation of that - bad things have happened,
do happen, and will happen, because of drugs - both from their use and
from the illegal trade.

> You could argue that the alcohol
> problem doesn't end with just
> that drink in the home.

A very common argument for drug legalization. Yes, alcohol does
cause problems. However, why would we want to add to those problems
by legalizing drugs? It seems to me that if we want to solve a
problem, the most obvious step is to not make the situation worse by
adding to it. In other words, alcohol is not a good argument for
legalizing drugs.

> Just because someone may use a gun irresponsibly
> is not a good reason to take away my guns.
>
> Just because someone may use marijuana
> irresponsibly is not a good reason to take away
> my marijuana.

A gun can be used responsibly. However I have yet to see a
situation where marijuana, or any other illegal drug, can be used
responsibly. Even the example you gave in the previous message (using
drugs after your kids were asleep) failed to show a responsible use
(it was more an example of irresponsible use - keeping and using
illegal drugs in a home with kids).

> I talk about my experiences, Dwight. I've
> never used crack or heroin. But, when I was
> younger, half of Silicon Valley used cocaine.
> I used it responsibly.

Cecil, you cannot possibly use something that is illegal
responsibly. That is like saying that you can use a stolen car
responsibly. Or you can use stolen money responsibly. Yes, you can
use drugs in a prudent manner, but it is still a crime (and there is
absolutely nothing responsible about criminal behavior).

> Education, knowledge, and treatment are the
> keys to the drug problem, not the war on
> drugs which has turned out to be a war on
> private citizens.

Cecil, you sound like a fairly well educated and knowledgeable person (certainly knowledgeable enough to seek your own treatment), yet none of that has prevented you from using drugs. If none of that has stopped you, why should we assume for a moment that any of that will stop anyone else? In the end, if a criminal is not willing to change his behavior, the only option left is the laws. By the way, to be more accurate (and honest), the war on drugs is a war on private citizens who commit crimes (very few law-abiding citizens are even bothered by it).

> Again, just because unfair laws exist doesn't
> make it right. There is wholesale violation
> of the drug laws and citizens are losing
> respect for the government that is enforcing
> them.

Blaming the government is the game used by malcontents - like the government is some evil, big brother-like, entity that is always wrong, therefore has to be wrong about whatever issue the person who invokes that is promoting. Sorry, but I'm smart enough to know that just because the government occasionally does something wrong, not everything the government does is wrong. And, in the case of drugs, the government is not wrong - it is doing exactly what millions of Americans expect it to do.

> Most of my friends at all the CA companies I
> worked for used illegal drugs.

What is your point? So you had friends who used drugs at those companies. It is certainly not uncommon for drug users to have friends who use drugs. Most of my friends who work, or have worked, at California companies do not, and did not, use drugs. All any of this proves is that we choose different types of people to have as friends.

> The purpose of the drug laws is not to keep
> people from using drugs. Their purpose is power,
> control, and confiscation of private property.
> If we don't stand up for our rights, we are
> going to lose them.

If confiscation of private property was the goal of the drug laws, why did it take decades after the war on drugs started to enact the forfeiture laws? And, I am standing up for my rights, Cecil. I'm standing up for my right, and my family's right, to live in this country without the many problems associated with drugs.

In the year following the date code was dropped to 5 WPM, there was no
significant change in the age or number of new Hams. We only gained
about 1% increase.

The only major change was about 30% of those who were already Ham's
upgraded.

If code is such a barrier, where are the lines of people? All reducing
code does is give existing people free upgrades.

Face it folks, young kids (and other people) aren't interested because
this is old boring stuff. It isn't a video game. It is work and
learning, not recreational.

Bad things have happened, do happen, and will happen, because of the
obsolete sodomy laws which prohibit oral sex between married people.
Just because a law exists doesn't mean it is a good law.

> In other words, alcohol is not a good argument for legalizing drugs.

Alcohol is a perfect argument for legalizing drugs. Alcohol *IS* a
legal drug. For your argument to be consistent, you must also
advocate making alcohol illegal.

> A gun can be used responsibly. However I have yet to see a
> situation where marijuana, or any other illegal drug, can be used
> responsibly.

Are you ignorant of medical marijuana? It is being prescribed right
now in CA for nausea and other ailments. For certain conditions, it
is a wonder drug. People who can't take their medicine or keep food
down because of nausea, can do so after smoking a joint.

> Even the example you gave in the previous message (using
> drugs after your kids were asleep) failed to show a responsible use
> (it was more an example of irresponsible use - keeping and using
> illegal drugs in a home with kids).

Adults have a perfect right to be irresponsible. Are you going to
outlaw food because fat people are irresponsible?

> Cecil, you cannot possibly use something that is illegal responsibly.

Then you cannot use free speech responsibly in Cuba. Then you cannot
use oral sex with your wife responsibly. There are things that are
illegal that shouldn't be illegal, Dwight. Not all laws are good laws.

> Cecil, you sound like a fairly well educated and knowledgeable
> person (certainly knowledgeable enough to seek your own treatment),
> yet none of that has prevented you from using drugs.

If I had consumed alcohol during prohibition, would that have been
such a bad thing? The difference between you and me, Dwight, is that
I believe an individual's life belongs to that individual. You, OTOH,
believe an individual's life belongs to the state. Happy socialism!

> Blaming the government is the game used by malcontents - like the

Neither is the government always right as you seem to believe. Some
laws are just bad laws. The present set of US drug laws needs to
be overhauled. According to the History Channel, the purpose of
making marijuana illegal was to be able to discriminate against
Mexican nationals. NY mayor La Guardia commissioned a study of
marijuana and found it to be no worse than alcohol, and better
in a some ways, i.e. less addictive, easier on the liver, etc.

> If confiscation of private property was the goal of the drug laws,
> why did it take decades after the war on drugs started to enact the
> forfeiture laws?

It takes awhile to take away the freedoms from a once-free people,
Dwight, but it is certainly happening. It's hard believe that you
support murdering citizens so the state can acquire their property
which is exactly what happened in CA.

You are myopic Cecil. How many had to suffer to get you that one joint? How many people were killed to get you the dope for that one joint? What was the total cost in dollars and human lives to get you that one little joint? It is not a victimless crime. You will probably say "none," but you don't know that. How many people were killed or injured to protect the crop of marajuana from which your little joint was made? Those like you like to seperate yourselves from this information. You don't like to think about what goes on from planting to joint making. It makes what you do seem harmless and it helps to keep your conscience clear doesn't it.

One thing I notice about libertarians is that they are experts at justification. "I'm retired and living alone...." Again, how many people were hurt or killed so that you could have that one little joint? One is too many. There is no responsible way to use an illegal drug.
>

Explain the use of force here. He wasn't forced to do anything. It was there and I took the opertunity. No force involved. Involuntary doesn't equate with force.

> from themselves.

If kids should be protected from stupid parents then why shouldn't I be protected from stupid adults? That's why it is illegal to fire a gun within the city limits of most cities. That's why the speed limit is 30MPH on most city streets. You can't legislate away stupidity but you can make stupidity very costly.

> Otherwise, someone may force you to get a facelift to

If being ugly was against the law there would be lots of us in jail! Just ask Rodney Dangerfield, his first date was a two-bagger. He wore a bag on his head just in case the bag on her head fell off!

Kevin, you are like the kid who murdered his parents and then threw
himself on the mercy of the courts because he was an orphan. The
immoral, illogical drug laws are the cause of all that misery you
list. It's certainly not my fault. All that occurs whether I smoke
a joint or not.

But Tom! ED Hare insists that people only get into ham radio because they WANT to learn this old hard technical stuff! They NEVER just memorize nor word associate their way through the tests (the few who are actually taking tests).

There is a pecking order even in a prison. A child molester often has to be placed in a more secured section to keep the other prisoners from killing them. Remember that many prisoners have kids too, and they don't like child molesters. I remember a while back here in Michigan a guy was found guilty of molesting some kids and went to prison. It was in the news for a few weeks. Shortly after getting there somebody, in the prison, put a contract on his life. I found this all out because my ex-wife worked at the county jail for a while, and she spoke to the officers in charge of running the prisoners between the jail and the prison. In Timothy McVeigh's case I think he would find himself in the same position as the child molester so I doubt he would live all that long in prison before somebody killed him.

Sorry, but your explanation was almost a direct match for the notes
and books that I have, so it didn't answer my puzzlement.

I'll go for the resistance question first, as I'm still unsure about the dB
answer, (but "my man" said he'd help again of he saw my query in the

NG again)

You have to go back to the water model, and this time, imagine a dry canal just before the gate (a lock gate?) is opened. At the point the gate is opened, there is a bubbly cascade, followed by a smooth flow. The first part of the cascade will splatter down and use itself up, and then be swept on from behind. This carries on until the canal is completely filed up, when smooth flow is taking place. Now the same goes for the resistances in series. When the switch is first closed, there is a random rush, and some of the electricity/electrons get used up in the first resistance, until the current has flushed through the whole circuit and set up back pressure. Now, this all happens in the first split-second at the speed of light, so we don't see it, all we see are the fixed formulas of ohm's law. Perhaps you weren't bothered by the question, but it did bother me, and now that it is answered, I can move on.

The deciBel one I'm not sure about yet, so this explanation may not come across too well. (I've done a silly thing - I've relabelled the thread as DiceBels, when I meant to put deciBels!) When someone is shouting at you, if they double the amount of shout, you won't perceive it as doubled, only increased by a little bit. If they double yet again (must be a town crier!) you only perceive a little bit more. Everytime they double (multiply by two) you only see a little bit added on. This is why dB are used. I can't say anymore than that at the moment. I am sure that "my man" will get back to me.

Am I? Again, libertarian justification, "I'm not REALLY contributing with my occasional one joint." If there was no market then none of those things would happen. You clear your conscience by the miniscule amount of joints you smoke compared to the total market. Yes, you are myopic. It may not be your fault that people are dying so that you can have a moment of pleasure but you share in the responsibility for their death whether you choose to or not.

Kevin, WB5RUE

Thats my point ... regardless of why he did it ... he did it ... and should
be punished accordingly.

Child pornography distributor "va3urs" <va3urs@sympatico.ca> gibbered in
message news:zhzH6.676137$f36.19098678@news20.bellglobal.com...

> see what i mean , he speaks for hmself what others are thinking!!!
1. No Capitalization at beginning of sentence.
2. "I" should be capitalized.
3. Misspelling of "himself."
4. Sentence really is an incomplete one, obviously, Ritchie baby needs to
lay
off the Moosehead BEFORE he posts....even though he was charged with a DUI
from the RCMP.

Poor ill-educated, pervert Ritchie Spenser Blowjobs for Hire, . He can't
think
for "himself," much less form a sentence correctly. He had to bribe somebody
at Industry Canada to get his ham ticket.

The punishment he would have got would not have been one handed out by a
court, but by his fellow prisoners.

I doubt he would even have lasted a year so the cost would have been less.
By the way do you know what it costs the state to "properly" conduct an
execution?

Well, if you have a unit... Do you SEE the configuration
resistors on the uP?? If not, then there probably isn't
a mod.

If you DO decide to 'try your own' to see what happens,
you should realize that on the HTX-242 you take off ONE
of the configuration resistor to default for MARS
coverage. You take off a different one for FULL coverage.
However, you NEVER take off BOTH!

Even if it were 1 WPM it'd be still a waste of time to have to learn it and
not to use it at all once licensed. In my opinion code is the single most
significant factor that HAM loses ground as a popular hobby.

>
> The only major change was about 30% of those who were already Ham's

Naturally.

>
> If code is such a barrier, where are the lines of people? All reducing
> code does is give existing people free upgrades.

The code is still there so there is no people on the line, simple as that.

>
> Face it folks, young kids (and other people) aren't interested because
> this is old boring stuff. It isn't a video game. It is work and
> learning, not recreational.

Believe me, I am MSEE major and I can be as, if not more, qualified to be
licensed but when I started to learn code in order to be licensed I cooled
down. I am still hanging in there but I am not going to be on the line
any time soon. I am just that close to begin transmitting. A license would
tip me to get a microphone to get me started.

That's a bit exaggerated of course. I have transmitting equipment but I don't
have any receiver yet. The code requirement has kept me in the mode of being
a frequent HRO visitor but not customer for a long time. I am afraid HRO
won't get my business any time soon except I kept on picking up free catalog
from them each time I visit..

HEY JM! You wouldn't happen to be a devotee of Canada's most
famous village idiot and resident nazi, the one and only Ernst Zundel
would you? He has for years promoted his goofy theory that
the earth is indeed hollow and shelters an advanced subterrenain society of
blonde-haired, blue-eyed aryan UFO supermen. An remake of the insane
"World Ice Theory" of Dietrick Eckert with some Star Wars tossed in for
good measure! You can see a link about this lunacy at:

http://www.nizkor.org/hweb/people/z/zundel-ernst/flying-saucers/expedition.html

and

http://www.unmuseum.org/germufo.htm

You know... Art Bell should really have this screwball Zundel on some night
for an interview. Then again, mabey not. Zundel is a true nazi scumbag who
was obviously born too late else he'd have been fitted for a Waffen SS uniform in the
1930's.

Statistically, there was virtually no difference in lowering CW from
13 WPM to 5 WPM. This is a repeat of earlier test reductions. The big
sales pitch we all heard was we were going to get an influx of new
Hams.

That's why Kenwood pushed the FCC so hard. $$$$$

Didn't work.

We created a no-code tech because it was going to be "the answer",
yet many of them turned out to not have the faintest interest in the
hobby. Of those I know first hand, some never actually took the tests
they were supposed to take. Few of them are active or interested. I
know about 30 people who received no-codes...only two remain active.
One is a 13 WPM General, and the other is a wife who uses the radio to
talk to her husband.

At MFJ, where the people work with radios, over a dozen people became
no-code hams. Of those, only one is active.

I would think if CW was a barrier, there would have been a steady
stream of no-coders entering the door. Not a big shot that tapered to
nothing. It would seem logical that a reduction from 13 WPM to 5 WPM
for HF operation would have a large impact on newcomers...yet it
didn't.

I wopuld think the no-code class would be a hit, didn't happen.

>> If code is such a barrier, where are the lines of people? All reducing

Umm, no code has been available for a long time. It hasn't worked so
far. Should we wait longer?

There are all sorts of people in the world. Virtually all people get interested by listening and so have receiving equipment or experience. That is the general rule.

CB radio has no code test, activity there has dropped like a rock from the years when it peaked.

I'm not discrediting you, but there is nothing that has happened so far that indicates what you predict is true. Suppose we drop CW, and nothing happens except problems. Do you suppose we can put it back later?

Have you know anything that was deregulated or opened-up that became more orderly?

Well Leo.......it seems to me you have 3 options.

#1. You can quit your crying, suck it up, and learn the code.

#2. You can sell all your equipment and spend your time doing something you can handle

#3. You can hold your breath and wait for the code requirement to go away.

I recommend number 3

Don't think I said otherwise, Cecil. However, the existing drug
laws are just fine by me.

> Alcohol is a perfect argument for
> legalizing drugs. Alcohol *IS* a
> legal drug. For your argument to
> be consistent, you must also
> advocate making alcohol illegal.

Sorry, but I disagree - alcohol is not a good argument for
legalizing drugs. The fact that alcohol is legal does not even
suggest that we have to, or should, legalize drugs. As I said before,
alcohol already causes enough problems, so we certainly should not add
to those problems by legalizing drugs.

And, there is absolutely nothing that requires us to treat drugs in
a consistent manner - we don't treat prescription pain killers and
aspirin the same, for example. Illegal drugs and alcohol are two
different things, so there should be different laws for each.

> Are you ignorant of medical marijuana?

Stop trying to demean anyone who disagrees with you, Cecil. Yes,
I'm aware of so-called "medical" marijuana. However, I agree with
those doctors who think it is a bunch of nonsense - promoted primarily
by those who want drugs legalized.

> Adults have a perfect right to be
> irresponsible. Are you going to outlaw
> food because fat people are irresponsible?

You brought up the "responsibility" junk, Cecil. As far as I'm
concerned, it has absolutely nothing to do with a conversation about
drug legalization - it is not the reason certain drugs are illegal.

> Then you cannot use free speech responsibly
> in Cuba. Then you cannot use oral sex with
> your wife responsibly.

Stick to the subject. Sex and Cuba have absolutely nothing to do
with drug legalization. For that matter, as far as I'm concerned,

alcohol has nothing to do with drug legalization either.

> The difference between you and me, Dwight, is
> that I believe an individual's life belongs
> to that individual. You, OTOH, believe an
> individual's life belongs to the state. Happy
> socialism!

Cecil, we've already talked about this. The effects of illegal drugs goes far beyond your life or your living room. Therefore, this is not solely a matter of your personal freedom or your personal life.

> Neither is the government always right as you
> seem to believe.

Now you're flat twisting what I've said. In the part you cut off, I said, "I'm smart enough to know that just because the government occasionally does something wrong, not everything the government does is wrong." Now, since I specifically said that "the government occasionally does something wrong," how can you possibly support your statement above that I seem to believe that the government is always right.

> According to the History Channel, the purpose
> of making marijuana illegal was to be able to
> discriminate against Mexican nationals.

If you're going to try the "race card," why don't you add in blacks and indians?

> NY mayor La Guardia commissioned a study of
> marijuana and found it to be no worse than
> alcohol, and better in a some ways, i.e. less
> addictive, easier on the liver, etc.

Who cares? As I said before, alcohol kills thousands each year, so why add to that problem by legalizing drugs.

> [snip] It's hard to believe that you support
> murdering citizens so the state can acquire
> their property which is exactly what happened
> in CA.

That is really sick, Cecil. Obviously, you'll say anything, attack anybody, in defense of your darn drugs. Are they really that important to you? If so, I really do think you need help.

It follows then that you would like to decrease the alcohol problem
by criminalizing the drug that is alcohol. Nothing's perfect, Dwight.
Legalized drugs would result in fewer problems than we have now.
We apparently didn't learn a thing from prohibition.

> I'm aware of so-called "medical" marijuana. However, I agree with

Wait until you can't keep anything down unless you smoke marijuana and
you will, no doubt, change your tune. Who cares if someone else is
suffering, eh, Dwight? If it's not Dwight suffering, then the
suffering doesn't matter?

> ... alcohol has nothing to do with drug legalization either.

Huh????? Alcohol is a legal drug. It has everything to do with
drug legalization.

> Cecil, we've already talked about this. The effects of illegal
> drugs goes far beyond your life or your living room. Therefore, this

Spoken like a true socialist. People with that attitude wind up with
no freedom at all.

The story is absolutely true, Dwight. Check it out for yourself. Members
of the LA County sheriff's office murdered a private citizen in order to
confiscate his possessions under the RICO(sp?) laws. This was covered on
"Investigative Reports" on one of the cable channels.

Fist off, they would need to use a fitting execution method, not the lame "just go to sleep now little boy" lethal injection. An execution should be punishment AND retribution if it is to have any real deterrent value. An electric chair or a Guillotine would guarantee incredible media market share.

As far as who would admit to watching the show, who cares as long as they watch (and the state makes it's money). But you know people would watch by the millions - just look at the popularity of all the "reality" and "WWF" type shows on the air today.

Well, this may be a bit "old" in the internet scale of things....

Around 1996 or 1997 I bought a product called "internet phone". At the time, they had point-to-point chat and also chat "rooms".

I recall joining a couple rooms that were "link-ups" to operators who connected their computer and their radio so you could talk on a repeater via the internet in another city/location. Using the voice chat software, you could actually talk with other amateur radio operators via that mode.

Does anyone remember this? I have looked and looked the past two days and the only thing I find are internet gateways to packet radio stations. Nothing for Voice that would allow you to use your computer and internet connection to connect into a repeater in another location and talk via voice chat software.

Is there anything like this that still exists???

Thanks

73, Ted KB9RPD

From the FCC website:

http://www.fcc.gov/eb/bccomplaints/unlic.html

"Written complaints alleging violations of Section 301 of the Communications Act should be sent to the Federal Communications Commission, Enforcement Bureau, Technical & Public Safety Division, 445 12th Street, SW, Washington, DC 20554."

"Complaints should include the name of the operator, if known, how the station identifies itself, the location of the station, the operating frequency, and whether the station's operation is causing interference."

Well they could do what was done during the French revolution. Use a guillotine to chop off the head where you can see the blood pulsing out of the neck stump afterward. Then to just to make it clear to the victim, since the head would still be alive for a few seconds because you could see the eyes move back and forth, blink etc, they would pick up the head so the eyes could now view it's now headless body. They say you could see the look of horror in the face of the severed head until the brain died. You think that would work?

Another method would like was done in the old Soviet Union. A condemned prisoner would not have a fixed execution date. All the prisoner knew is by a certain date he was to be dead. So each time the cell door opened the prisoner was in terror not knowing if he was going to get his food or the revolver was going to be pressed against his head. It was up to the prison etc, when they got to "off" the condemned prisoner.

For media coverage they could have a show called "Execution TV" on "Pay-Per-View" with a PG-13 rating. That way somebody can make a few bucks off the weeks' "Featured Condemned Prisoner ". They could even find some tall blond, with big boobs, to pull the lever to increase market share.

Ok, Mr. Letter of the Law.

And I bet you ALWAYS obey the maximum posted speed limit. If you wanted to speed, you would take the right approach to speeding legally - because, hey man, you do EVERYTHING right. You would put your mind to becoming a race car driver and do your speeding on the track where it belongs. You would follow the proper steps to becoming a race car driver:

1. Learn to ride a unicycle, because that's how it all started, man. Our forefather's rode unicycles before fast cars were around, so must you learn.
2. Learn everything there is to know about cars - including memorizing the answers to questions about walking, unicycles, horse and carriage, boats, planes, etc.
3. If you skip the step on learning to ride a unicycle, prepare to be chastised by old-timers that had to learn how to ride it and by some who love the unicycle and can ride it at over 20 mph! BTW - learning to ride the unicycle keeps bad people from becoming race car drivers.
4. Prepare to spend some money. Your standard car won't do - it doesn't fit race car specs! And every race track requires a different car and tire combination.

Is becoming a race car driver what you should do because you like to take those 15 turns of Bear Mountain road at an faster than the posted speed? Well, ham radio IS NOT a replacement for the "freeband" either. Ham radio doesn't fit everybody. Maybe its a bit of an extreme commitment for some. Hey, I can operate my equipment and make sure that it complies with the same rules the FCC mandates for hams. I can operate it responsibly. I can operate it courteously . I can use the minimum amount of power necessary for a contact.

Still, is it illegal to operate between 27.405 - 28.000Mhz ? Yes. Is it immoral? A crime against humanity? Absolutely not. To me - speeding in your car is a far more worse crime.

BTW, I do not condone operating on ham bands or intentionally interfering with any service that I am aware of. Yes, I know there are (very few, non essential) services allocated between 27.405 and 28Mhz. I support operations on 27.405 - 27.855 Mhz that follow the same regulations that hams follow.

Hopefully this metaphor can crack the thick skull of the "yes, but it's illegal, yes, but it's illegal, yes, but it's illegal" ham. This is issue isn't black and white.

Bob.

No amount of self justification will erase the simple fact that what you are doing is a crime. That makes you a criminal, and therefore not worthy of respect. You sound like the gang bangers in LA bitching because they are treated like hoodlums.

By the way, I do have a cherry 1974 427 FI ' Vette that I take out to LA County Raceway when I want to speed (it turns low 12's with street tires). When I am driving my Blazer on city streets, I obey the traffic laws. That's what honest people do...

FCC rules mandates amateurs operate on frequencies
authorized by their their class of license. How do you
manage to comply with FCC laws when:
]
1: operating out of band?
2: operating without a license?
3: operating non type accepted equipment?

Look dumbass...you ain't going to convince the people that have a license.
So quite trying to explain what you think is alright. The bottom line is
YOU ARE ILLEGAL. PERIOD.

Well, if allowing this renegade swatch of the social fabric to
choose not to obey laws is any example of where we are headed, I
guess we are all victims.

Actually, there was someone else (who I called the original poster) who
was telling people it was easy to modify a Kenwood HF rig to transmit
DSB who went by the name Skipp and then reamed on me about how long I've
been licensed but wouldn't give me his call when asked, to find out how
long He'd been licensed.

Hams don't break the law ... hams learned what they needed to know to get
where they are ... you took it ... you demean their effort ... go back on cb
(and trust me you aren't any more of a techie if you say 11m)

Bob,

Yours is the kind of misunderstanding that, try as people might, just can't seem to be overcome. I know FIRSTHAND that there are agencies that are assigned frequencies above and below the 11 meter CB band. Tell me, what is "unessential" about forest rangers. What is "unessential" about military comms? The difference is the type and duration of commercial and military comms as opposed to civilians who are there just to talk, often as much as possible, to as many people as possible. Business or military comms are short and to the point.

I know the regulars get tired of reading this example, but it is a perfect example of why NOT to "freeband". Some years ago, I was acting as communications officer for Civil Air Patrol on a live search for a light plane that disappeared during a storm. We planned to use a frequency near 11 meters which is a USAF frequency assigned to CAP. Like many rescue agencies, both civilian and military, we use our assigned frequencies so as to separate various kinds of traffic, take advantage of atmospherics (time of day), and keep from "interfering" with ourselves--air to ground on one freq., mobile to base on another, and yet another for "incidental comms" such as flight line, safety, or even sending out for food for the searchers. Another reason for choosing the low power 26 MHZ band was to prevent news hounds, ambulance chasers, and even possibly the family of the pilot from hearing adverse news via scanner. *Most* scanners don't deal too well with SSB. We quickly discovered that there was a "freebander" on that frequency calling, "BREAK, BREAK, skipland", etc with a linear that made it difficult or impossible to use this frequency forcing a lot of incidental traffic onto VHF. I was LIVID! There was NO excuse for this person operating on that frequency whatsoever. He was interfering with an active USAF authorized mission, a real emergency where a life was hanging in the balance. In the following week after the mission was suspended, I began to DF this pirate, determined to put a stop to his outlaw operations. One evening, I happened to be in a nearby town, and absently switched on one of my radios in the car not expecting to hear anything. The guy was pegging my meter and almost busted my speaker. On my way out of town, I made a screeching U-turn and went back into town, stopping at the town PD to ask if they recognized that voice. Yup, they knew the fella and where he lived. I drove to his house and confirmed the location. Outlaw was reported to FCC field office, and was busted for out-of-band operation AND interfering with emergency communications--a serious Federal offense. Betcha he got tired of eating beans from a .10 can!

There IS no excuse for operating on unauthorized frequencies. You might *think* these freqs are unoccupied and that the agencies thereto assigned are "non-essential". That is not for individuals to decide. Just because *you* don't hear anyone doesn't mean they aren't there and that there is no traffic being passed that you could hinder.

Finally, let's say I, or you, rent/lease a piece of property with a nice lake on it. Intending to do a little fishing, you stock that lake with a variety of game fish--bass, crappy, catfish, perch, or whatever. You are busy and don't get out to your lake real often, but one day you decide it would be a good day to go fishing; remember, it's "your" lake by virtue of your lease to use as you see fit within the guidelines of your agreement with the owner. When you arrive, you discover a large group of people on your property, at YOUR lake, catching the fish YOU stocked--in spite of the fact there are No Trespassing signs all over-even right where the trespassers are fishing. I'd be angry and I'd bring charges against each and every one that trespassed on my land. It doesn't make any difference if I don't come to the lake every day, it is STILL property assigned to me by virtue of rent or lease and nobody has any business on it without permission.

"Freebanders" don't have "permission" (license) to operate on frequencies outside the 11 meter band. They are trespassing just as surely as those people I cited in the above paragraph. And when they DO trespass, it pisses off those who are legitimately assigned said frequencies for their exclusive use and it don't make ANY difference if they "visit" (use) their "property" (frequency) once a minute or once a year--the "freebanders" are trespassing just as surely as if they just walked into your/my house uninvited. There is no respect due, and none forthcoming for trespassers, "freebanders", or outlaw radio ops.

Cecil,

If it were YOU on an international flight from London, and an outlaw operator decided to operate on 6.628 MHZ one of the HF aviation frequencies or even a tower frequency of 118.1 MHZ causing your plane to misread instructions, stray into the path of another plane and crash, would that hurt YOU? Of course. Operating on any frequency not assigned to an individual carries the risk of causing loss of lives or property--forest rangers attempting to determine, for example, the direction of a fire's travel in order to evacuate people from its path. US Forest Rangers DO operate above 27 MHZ. Would you want YOUR home destroyed or you life put at risk because somebody thought his hobby was more important than your life? Simply because there was someone with a "leen-yar" covering up fire comms keeping the fire fighters from getting the right instructions?

THAT is the potential harm. That is the reason it is illegal--not because FCC is trying to mess up somebody's fun.

Source record: 90103

Hi folks,
I was wondering if someone could direct me to a site that sells amateur radio attire. I am specifically looking for an Icom baseball cap. I will trade a new Yaesu cap for your new Icom cap if interested. Please e-mail me direct.

americaneagle352@iwon.com

In most cases, we aren't.

The most apparent case of damage is when freebanders get above 28MHz.

Actually, we learned a lot after prohibition ended. Alcohol use has increased virtually every year since prohibition ended. Alcohol abuse has increased virtually every year since prohibition ended. And the problems associated with alcohol abuse (DUI, etc) has increased virtually every year since prohibition ended. There is no reason to believe the results would be any different when it comes to drugs if we legalize those now illegal drugs.

> The story is absolutely true, Dwight.

I was not talking about your silly story, Cecil. I was talking about your darn insulting suggestion that I support murder. If you cannot keep the conversation civil, then I would rather not be involved in this discussion.

> fashionable again.

ROTFLMAO!

YOU may "feel strong enough about it for race riots and constrant strife" but it's well to remember that you're a blithering idiot who constantly drools over yourself when faced with insurmountable problems (such as trying to understand a crowbar).

I realize that what is "fashionable" for [clears throat] "those of your persuasion" (illegal, thankfully, in Mississippi) changes constantly as your superiors in the "swish-a-second" movement dictate but your betters do enjoy your "behavior" (or so this week's edition of "The Weakly Freaker" states).

I know I shouldn't condemn your sexual behavior but those of us who are either male or female have a great deal of trouble understanding your sex's behavior.

And I think that "people" such as yourself shouldn't engage in "race riots" simply because you prefer a "race" other than the human race. [Although, personally, I can't agree with you that "small, fuzzy animals" constitute a "race" no matter how much they've responded to your "sexual prowess".]

You really need to meet NoBurner Turner. You seem to have exactly the same goals, methods, virginity and intelligence.

Have you thought of getting your own shortwave program? Or, at the very least, you could save money as ole NoBurner Turner should have done and get telephone conference calling. That way, all three of you could discuss your "unusual" attempts at sexual "union" and your psychopathic beliefs and perversions.

But I must ask why you're flaunting your "exotic" behavior on a shortwave forum. You might be happier on another newsgroup such as "alt.psychopath.chipmunks.sexualbehavior.whiners&crybabies.coward".

This would seem to match up to your (lack of) intelligence, integrity, courage and decency. (Did I mention that you're a coward?)

[And, yes, I probably shouldn't pick on fourth graders but you shouldn't be up this late at night. Your [human equivalent would be "Father"] and your [human equivalent would be "Mother"] should have killed you at birth as they had so hoped for a human child and all they got was ... you ... .] They must have wanted to cry.

Gee whiz! When you guys gonna learn to keep your responses short and to the point? Don't write a darn book....nobody reads past the first two paragraphs anyway.
If you can't say it in a few sentences, nobody cares.
Save your editorializing for the New York Times....

Are you suggesting that drug use and abuse has not increased at the same
rate as alcohol abuse?

And how did you make these determinations? Did you take a poll of everybody who reads these newsgroups in order to validate your statements, or did you just make an assumption based on your own habits - in which case your statements are only a personal opinion (often referred to as an editorial) ? :>)

Hello,
here in Rome we are still testing our webcontroller ShortWave Receiver,
please test this site:

http://www.radio.rai.it/webradio

With real audio stream you can tune and listen a PCR1000 Receiver
located in the Saxa Rubra Rai center in Rome. The web interface in stil
in test
so any comment and ideas are appreciate,

Best Wishes, Andrea IW1CXZ

why do those who break the law always assume that everyone else does also and use that to justify what they do? this argument goes right around in a circle and shows how hypocritical these freebanders are... if you chastise someone by assuming that he is speeding and then tell him to go become a race car driver to do it legally, why don't you get down to work and learn how to be a legal ham so you can speed on the legal ham bands properly instead of slinking around illegally.

What I mean is that the definition of a ham does is not indicative of
breaking the law ... albeit some do. A freebander by definition is breaking
the law when they operate.

> has increased virtually every year since prohibition ended. ....

You're both right, but Dwight is missing a point. There are many people with alchohol problems but those problems primarily affect themselves and the ones who love them. The same would be true of drug problems if drugs were legalized. I've never heard of a wino mugging people to buy a $1.69 bottle of wine but addicts commonly rob and kill us to support $500/day habits that'd be $5/day habits if drugs were legal. Truth is drug laws have done little to reduce the supply, they have simply driven prices so high that innocent people are being robbed and worse.

Besides that, the WOD has given each and every one of us a "drug problem" in the form of overzealous laws and enforcement. For example a local man was on his way to buy a new motorcycle when police stopped him for looking like a druggie (profiles). They asked if he had any drugs or money. No and yes, he didn't use drugs but had $5000 to pay for the bike. Police promptly confiscated both the $5000 and the bike he was riding, leaving him to walk home! No arrest, no due process, just suspicion! He got a lawyer and months later got his bike and $2500 back. The other $2500? Well, that'd have been the cops share if he hadn't posted the bond and paperwork needed to get his stuff back and they'd already spent "their" $2500! He'd have to wait til they confiscated somebody else's $$$ to get his back. He was already out lawyer and bond fees even tho no drugs were found and he hadn't been arrested let alone charged!!! Now thats another drug problem that potentially affects us all.

What if somebody started a rumor among police that drug dealers were using ham radios to conduct drug deals? Remember, all it takes is suspicion .... :o(

James,

Many, many, MANY thanks for your comments. Once I found irlp.net's website, I started looking for keywords based on some of the terminology used. I'm finding more than I thought I would.

What I may do is incorporate these links in my new website. If no one objects, I'll post that link later when I'm done so I can share all the links I found with everyone.

I know some hams think it's "cheating" to do something like that. But, for us folks on a shoe-string budget, it's a great way to talk to folks in other states without expensive equipment and without having to use HF, and for those with just a Tech. license.

So when a freebander is transmitting with legal power levels on the
legal 40 they're still breaking the law?

I'm a CB'er (not for long. I take my written tests early this month),
and I, unfortunately, get sneered at for not having my ticket, simply
because there are those who DO choose to violate FCC rules.

I don't condone violations of FCC rules. However, I would like to see a
sideband only band above channel 40, but below 27.800, with a 50 watt
limit, for CB'ers to DX on... The frequencies allocated for this could
"go around" the currently allocated forestry, etc, frequencies, much in
the same way the CB frequencies skip over the RC freq's.

Just my two cents, here... Of course, your mileage may vary.

No when you transmit of the 40 channels you are authorised to use you are a cb'er. As soon as you turn up the power passed the 4/12 or go outside those channels you are breaking the law

> I'm a CB'er (not for long. I take my written tests early this month),

I have no problem with cb'ers ... I was one when I was a kid too ... I do however have problems with people taking what I had to work for.

Why? I regularily work world wide on 10m with as little as 10watts on ssb (min required for the autotuner to work) and that is from the car.

Because most HAM's know how to run their radios, and MOST CB'ers dont. A majority of CB'ers think that turning the modulation up past 100%, using negative peak modulation compression, and other "tricks" makes them louder. In reality, it makes for a noisy band. I know better... My GrantXL, with the 2 watt carrier, at 99% modulation, sounds better than most of the "export" radios in the trucks out there, and "walks" over them as well. Granted, I run a 5/8 dipole on the car (two 4' Wilson Silver Load antennae, over and under), tuned properly, so I'm probably radiating more than they are, but hey, it works.

At any rate, a band for those who do know how to run a radio would be nice... It's a pipe dream... one I won't have to worry about later this month, hopefully, but still.. it would be nice.

There already is one. 10 meters. You just have to get a
license. Whats the point in creating another special band for
people who don't want to get a license? You already have channels
1-40 and it got messed up. So now you've got FRS...It doesn't
make sense to just creating bands for people to use in a manner
inconsistent with the intent. Any unlicensed band is going to be
bedlam. Do you think if the FCC legislated a "freebander band"
from 27.455 to 27.800 that it would be any different? Would the
guys turn off the lean-yars and start using legitimate callsigns?

Uh, 8 feet is not 5/8 wave on 11 meters. A 102" (8-1/2') whip is 1/4 wave,
so a 5/8 wave would be a bit more than 17 feet long.

(you should try a 102" whip, I think you're likely to find it more effective
than the twin four-footers. Because you won't have loading-coil losses.
Mine worked *fantastically* well on 10 meters with a converted SSB CB.)

That isn't freebanding, that is operating on the cb channels legally.

Why should there be a need for that? If anyone wants to operate SSB at
50 watts or more and work DX legally, get a ham license.

Try and argue the point all you want, but there will never be any
respect for illegal freebanding except maybe from other illegal
freebanders. If you want respect do something that deserves respect.

These "freeband" morons think that if they listen to a frequency and
they don't hear anyone, it is OK for them to use it. That's why so many
are now moving up to 10 meters. It simply amazes me how anyone can think
that just because they don't hear any communications on a frequency it
must be OK for them to transmit on it. Typical of the cb mentality.

This make me curious. How do you tell how long someone has
been licensed, just from his call sign? If I look up my own
call sign it shows:

Effective: 23 May 2000 Expires: 23 May 2010

But that's only when I was granted a vanity call sign. I have
been license for over 35 years. I thought you could only find
out the latest upgrade, renewal, or callsign allocation.

Oh well, just curious.

Doug:

Hit Wilson's site and read up on what a Wilson Silver Load is....

Better yet, I'll explain it. a 4' Wilson Silver Load is a 5/8 (on 11M)
top loaded coil antenna. Two of them make 1 1/4 wave. Maybe I should
have said 1 1/4 wave dipole?

> channels you are breaking the law

A technicality overlooked by many is that Part 95 operation on 27MHz,
better known as CB, not only sets a maximum legal power level, it also
requires the use of a 'type accepted' transmitter/transceiver. So, even
if you turn the power down on an amateur transceiver and stick the CB
channels, it's still not legal. The law is that CB radios are used on CB.

Not that it functionally makes that much of a difference, but that's the
law.

Bill:

Apparently I shouldn't have voiced my opinion. With a few taps of your keycaps I've been crammed in with the freebanders. Perhaps I should go out and get an 800W linear, run at 130% modulation, start calling CQ on 28.085 AM, and forget about taking my Tech and General written exams next week?

What do you think?

Bob,
Over the years I've discovered that when someone defends an obviously
illegal activity, they usually have some ulterior motive. What is your
motive?
Do you operate outside the amateur bands?
Why in the world would you defend those who flaunt the laws that make
amateur
radio (and the other radio services) possible?
Steve

I don't know how you extracted that defense out of what I said,
but I have no problem with you voicing your opinion. I just don't
agree with the concept of a special band for illegal operators.
Maybe you were just being sarcastic, I dunno.
I support your studying and taking the exams and upgrading. Thats
very commendable. Check out some antenna theory on the side and
you'll also better understand some of the merchandising
terminology referred to in your other post.
Good luck to you. I hope you accomplish your goals.

>Maybe you should change that to: Most hams don't break the law.

Is that so? How then do you explain these common activities, engaged in by
licensed amateurs:

1) Using ham gear illegally on the CB frequencies

2) Using ham gear illegally on the FRS frequencies

3) Using modified ham gear illegally to cause intentional interference to
fast-food drive-thru radio systems, retail store comms, and business-band users

Don't say "it doesn't happen." Anyone who has spent any time at all monitoring
knows better.

Good work, Sherlock - you've pointed out it's illegal, *again*. We've established that.

How serious a crime is it? Your assignment - think of all the crimes you can, where does freebanding fit it? Maybe you should go spend your time protesting real crimes (I can provide a list if you need one, where do I start...how about NAFTA).

And, of course you don't speed. You're a decent, upstanding citizen - who turns in your neighbor for digging without a permit - thanks for making the world a better, safer place.

Bob.

The method that I have seen attempted in the past is to look
for harmonic content which maximises when you correctly resolve the
original.

Dan:

I honestly don't know how to respond to this. Your post below is so thick with sarcasm I fail to see your point. Perhaps you could tone it back a few notches and provide some facts (if you can find any) to back up your assertion that (1) I'm a liberal, (2) I'm lazy, (3) that I've operated illegally, and (4) Just what the SAT's have to do with it.

After you've done that, I may consider explaining my reasoning behind my opinion so that you might understand it.

Again, I caution you, do not include me amongst the freebanders; I'm neither one of them, nor do I condone what they do (as I stated in the very first sentence of the quote you so vitriously lambasted.)

So you are telling me theres no such thing as a pile up on a ham band ...
where there may be hundreds of people talking at the same time ? Happens on
them too ... my 10 does fine ... more is irrelevant.

Dave,

Any hunk of wire in the clear will do well. If he is just into listening it is not critical on any particular length. Of course if he is interested in a particular band then a resonate wire would probably help.

Also be aware that he may pick up more noise when he instals the wire. Hang it and see what happens.

The point I was trying to make, Bill, is this: If the frequencies get "thick" on a particular HAM band, HAMs have a multitude of other frequencies and bands to go to. Not to mention the fact that if the FCC would allocate a sideband-only band in the area I suggested for unlicensed CB, the people running on that band wouldn't be illegals. They would be transmitting in accordance with FCC rules.

> Maybe you were just being sarcastic, I dunno.

Only a little. I suggested the FCC allocate a new band for CB for sideband transmissions. Yes, it would be thick, but it would make the regular 40 less crowded, and give a spot for sidebanders to transmit without (hopefully) being interfered with by AM carriers and the like.

I did not suggest this to help support freebanding; quite the opposite. I suggested it as a way to give those CBers who enjoy transmitting on sideband (like I do) to do so with less interference from the riffraff who run dirty, over-modulated, noise-toy filled, echo-boxed, over-reverb'ed, export trash radios.

That's a pretty good question. Unless I'm missing something, I would
rank it right up there with driving on the shoulder of the road where
such is illegal.

That's pretty good. Or maybe it's like throwing beer bottles and
McDonalds wrappers out the window on the highway, or driving really slow
in the ultrafast lane, or parking in handicapped spaces. Ya know,
something Dennis Leary would sing about.

SSB-
I think I'm giving you the same answer that the FCC would. If you want radio communications as a hobby, get an amateur license. Allocating HF spectrum is an international concern, and really the FCC can't arbitrarily choose to do that. The only reason CB was able to be implemented back in the 50's, is because that spectrum was taken away from hams. The intent was "personal communications" for small business or those who had personal needs, and had no other good two-way radio option at the time. It never was intended to be a band for radio hobbyists and AFAIK, the FCC still looks at it that way.
They gave up trying to license operators on the Citizens Band many years ago, which to a lot of minds, was like throwing their hands up at the problem...and future concerns. To dodge the fact that their 27 Mhz creation became hopelessly useless for what it was intended for, they set up FRS to continue giving back the desired basic two-way service to the public.
I don't think they would be interested in cycling backwards. They have a place for hobbyists, and they have a place for 'personal business' communications. Nothing more is justifiable.

SSB,

I'm not arguing with your points here, but there is something that many
people are not aware of. Quite a bit of that spectrum, either above or
below, is not within FCC's power to give or even regulate--except in
the cases of unlicensed operators. Much of those areas are under
an agency called NTIA--National Telecommunications Information Agency.
They have more "pull" than FCC, and that spectrum is mainly under their
jurisdiction. NTIA assigns and regulates US Gov't frequencies includ-
ing US Forestry, and military, for example. The remainder IS assigned
to forest products and various state forestry/fire agencies. IOW, there
is no spectrum for FCC to give because what areas they do control are
assigned, the rest isn't theirs to "give". I hope that sheds light on
your proposal.

Do we really need this on r.r.a.homebrew? Please don't cross-post
this to a 'homebrew' discussion group.

Right on the button Jerry. What we're dealing with here is a severly
underfunded federal regulatory agency who has lost it's teeth and
would rather roll over and play dead and surrender to anarchy rather
than make a stink. Some day somewhere some people will die, there will
be CYA "congressional investigations", yeah, right: Too late as usual.

I think code will always be around. Those various tv and repeater
ID's are absoluty best heard by CW, and don't interfere with voice.

I always wanted to go for the highest level of testing myself. Felt
bad they stopped at Extra. Course I got my 2nd Telegraph.

I think all people should have rights to portions of our bands,
with only a price of a ticket. That in no way stops advanced levels
of testing from having special privileges. Heck, its more fun to talk
with the public on FRS, than trying to talk with a bunch of old buzzards
on ham radio. Don't even need an FRS license. You just go to the store
and your on the air.
I got interested in radio because it was interesting to me. Opperating CW
is always the best in fun and enjoyment looking back. Whatever it may be,
the newcommer must have something to interest them, and I don't really
see much there today. Too bad you don't need a han license to opperate
the internet!!

No, by definition this is not "free banding". There is no "legal" anything
if freebanding. If you are operating properly as a CB'er on the allocated
frequencies using authorized equipment and power levels, your not breaking
the law.

If your asking if your only a criminal while operating in the "free band",
I would ask is a person only a bank robber while committing the act, or are
they still a bank robber afterwards?

Yeah, they are call Ham Radio Bands, and all they need is a Ham Radio License like the one your getting. If CBers want to shoot skip, then let them get a license too. I doubt you had any big problem getting your license. The written exams up to a General are easy, and for those who want H.F. the 5 wpm code test is a reasonable speed until the requirement is eliminated.

What you propose to do is if the FCC can't enforce the rules, then heck, lets just make it legal, just like the folks who want to legalize drugs. The only problem with that is where does it stop? Today 26.965 -27.405, tomorrow 26.965 - 27.800, ? 26.965 -29.700, 12m - 10m, ..., you get the idea. 8-))

There is a major difference between something that is simply
unsightly, and something that is dangerous.

Freebanding is closer to the example of driving on the shoulder of the
road...or the wrong way on a one-way street....or driving without a
license...than it is to littering.

If you don't think it has caused problems, look at virtually ALL of
the HF amateur bands and many commercial bands. The free-band idiots
have ruined commercial services above and below 27 MHz, and are now
working on all other frequencies. It ranges from 160 meters up into
the two-way land mobile bands.

This is where enforcement come in. What we need to do, is catch a few
of them and fine them. If we find a few who fail to comply after
repeated warnings, we need to send them to jail. If that fails, we
need to execute them...and if that fails, we need to force them to
live with N1IR for a week. Eventually they will get the message.

You live in town but you purchased 20 acres of land out in the boonies with the idea of maybe moving there when you retire in the future. I come along and see your land and I don't see a house or anyone using the land. I observe this for a short while and come to the conclusion that no one is using this land. So I build a little shack there, plant my garden, run a cow or two. Is that OK with you? Don't I have a right to do that? After all, you aren't using it. Maybe I am doing something illegal, but after all, why should you object, you aren't using the land and I am apparently hurting no one and there are others committing much more horrendous crimes. Maybe instead of coming out and trying to get me off your land that you aren't using, you should spend you time protesting real crimes.

Of course it happens, no one has argued that, but not by MOST hams. Your
are talking about probably less than a fraction of a percent of the
total licensed hams who engage in what you describe below. You can't say
the same for the cb operators.

As Charlie Brown would say, "good grief". There is always someone who spouts this to try to compare the ham bands to cb. Have you listened to such and such band, such and such frequency? No one argues that there are morons on the ham bands who act like cbers and on certain frequencies you can find them, but on 99.99 percent of the other frequencies you find hams obeying the rules and engaging in courteous communication. Even with the few morons on the ham bands, there is no comparison between ham radio and cb. It's like comparing apples to a sewer pit.

Fact is, it wasn't cross-posted to r.r.a.homebrew, it started
in r.r.a.homebrew. You are right that it has nothing to do
with r.r.a.homebrew, but this is a unmoderated NG and you just
have to learn to ignore some of the postings. Somewhere down
the line, one of the participants in this discussion decided to
include a few other NGs.

Agreed, you can find a jerk ham on the bands if you look for them now and
then. But, unlike 11 meters, they are an exception - not the general
rule...

El Presidente has announced that he intends to split the INS into
two agencies - one that deals with immigration and naturalization
paperwork and the other that does enforcement (the Border Patrol).

Those of us in FCC field enforcement have advocated that sort
of split for the FCC for decades. Once freed from the "who gets
a license and which non-technical rules apply to whom" political
mess (which is the only "FCC" that The Congress can comprehend),
real enforcement can be done when the technical standards and
enforcement functions and people are absorbed into NTIA which has
scads of funds. The Canadians did that several years back when the
functions of the Ministry of Communications were split between
Industry Canada (the equivalentof the Department of Commerce, home
of NTIA) and the Canadian Radio and Television Commission (CRTC).

>If that fails, we need to execute them...

You are certainly making the jest, eh????

>and if that fails, we need to force them to
>live with N1IR for a week. Eventually they will get the message.

Hey, Richard Burton in Southern Cal has been prosecuted six
times, spent time in jail three times, and still operates on
ham radio without a license whenever he gets out.

When is HE going to learn?

Well, true, but since the FCC quit renewing licenses automatically
whenever a change was sent in, you can get some idea if someone was
licensed within the last few years anyways. My point when I asked him
for his callsign was really to find out if he actually had one and since
he never replied, I'll assume not.

Yes it shouldn't happen...but here is a tongue in cheek response....Well Ham Radio started with a bunch of 'Bootleggers' that ticked off the Navy and eventually they had to get a 'real' license. Just keeping up the tradition, maybe? HI.

Did you not suggest a band be set aside just for the illegal idiots? They
you should be able to figure out my response.

The SATs having to do with it is....the lowering of the bar. The reduction
of standards to accomidate some person and/or group that is unable, too
ignorant, or just STUPID. See my point?

Also there ALREADY exists plenty of places to work DX and have fun. Its
called Amateur Radio. Unfortunatly without a valid callsign you will be
attacked much worse than here.

That's exactly the way it is. Everyone decides which laws they should obey.
Lot's of people decide to obey them all assuming they know about them all.
Some people decide that they shouldn't obey the speed laws. Have you
ever driven faster than the speed limit? I personally don't like and
rarely wear a seat belt even though it is illegal to do so. Technically,
I am also in violation of the Texas motorcycle helmet law.

You picked a bad analogy. A person did just that on some land in my
home county of Madison in Texas. Nobody noticed him living there.
After N number of years he was discovered. The case went to court
and the trespasser was awarded the property under the Texas homestead
laws. So you better keep an eye on your property or some homesteader
will wind up owning it. Homesteading is a good description of what the
freebanders have done between the CB band and the ham band. Time was
when amateur radio operators homesteaded the radio frequencies.

The problem with your logic is you are using land that is being used.
Freebanders are screwing things up for licensed services, and have
been for years.

They are just to stupid or uneducated to understand that.

Sorta like the mentality that thinks it is OK to "borrow" things, like
someone's property or land, without asking because "they aren't using
it".

Borrowing something that isn't yours without asking the owner is
called "theft", but I guess we all have different morals.

Take a listen to ten meters, and tell me freebanders haven't cause a
big problem. Not only have they driven legitiment users off the
commercial areas around 27 MHz, and ruiened things for the R/C people
who used to use adjacent-to-CB channel frequencies, they are now
ruining ten meters.

They are also spreading to all other frequencies in the HF spectrum.

6507. Tuning Upgrader For Kenwood 940

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-04 01:26:25 UTC
From: John <hydro@fx2.com>

Hi
Have a tuning upgrader for the 940 Kenwood that I don't use anymore.
Slows vfo speed down for easy tuning. Have board & instructions. See website
below for more info..... $35.00 including shipping

thanks John KI4NR

http://www.qth.com/irsd/mods-upgrades.html#tuning

6508. A potential new band for CB'ers? [Was: Re: Respect For Freebanders]

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-04 01:35:22 UTC

Dan:

Well, apparently you missed the point; or is it that you choose to ignore it? Either way, your attitude towards me on this is a bit disconcerting. I'll state this again just in case it didn't get through the first time" I'm not a freebander, nor do I encourage ANYONE to violate FCC rules.

I'm sorry to hear about your mood disorder.

The point was this: Set aside another band for sideband transmissions only, to help alleviate some of the congestion on CM (they have no other place to go), and perhaps the encroachment on 10M frequencies would tone down; perhaps those frequencies between 27.405 and 28.000 that are allocated to other services won't be interfered with people calling CQ, and perhaps sideband operators on CB's won't get interfered with as much by AM carriers.

I'm not proposing a reduction in standards. Personally, I feel when the FCC removed the licensing requirement from CB they made a BIG mistake. I'm proposing a broadening of bandwidth to help alleviate the congestion on CB that causes people who don't know any better to venture onto the HAM bands and interfere with licensed operators. If the bands weren't so congested, CB'ers might not feel the need to run an amp, because they'd be able to make contacts on much less power.

If you're so shortsighted that you don't see the potential good this could do, then I'm sorry you feel that way.

Will some idiots out there still run illegal power? Probably. Will people who don't know any better still venture out onto bands and frequencies where they don't belong? Probably. Unfortunately, without a licensing requirement, the lack of knowledge by CB'ers helps cause this problem.

This is just my opinion. Your mileage may vary

So you're saying that HAMs are licensed to operate between 27.405 and
28.000? Wow! When did that happen? News to me. ::grimace::

> I doubt you had any big problem getting your
> license. The written exams up to a General are easy, and for those who want

Actually, I don't have my license yet. I go for my written tests next
week. I've been studying code for over two years (see the other thread:
Ticket test suggestions for more info on this) without much result. I
won't go into that rigmarole again here. It's already in that other
thread.

> What you propose to do is if the FCC can't enforce the rules, then heck,

>

That's a bit reactionary, Leland. I don't think legalizing drugs is an
option. I don't see the connection between the two.

I'm proposing additional bandwidth for a particular mode of operation in
order to help alleviate some of the congestion on an already overtaxed
and overused band, which may just help to reduce the encroachment by
unlicensed radio operators on HAM bands.

Someone transmitting with legal power levels on the legal 40 are not
breaking the law they are also not freebanding. They are operating in a
proper and legal manner as prescribed in the regulations. Any other
operation is illegal without FCC/NTIA authorization. No more no less.

One of the objectives of the creation of the GMRS Class D (i.e. Citizens Band) radio service was to provide low cost licensed radio communications for small businesses and family communications. This service was to be limited to 50 miles from the transmitting station and to a maximum power input of 5 watts. This was later changed to, I believe, 3 watts output. Modulation started out as AM phone only and changed to include SSB. For a special channel to be assigned which allows the use of more than 3/5 watts would be in violation of this principle.

Additional comment:

Will a tester come out to an invalid's house in order to test them? If not, how would someone who cannot leave the house get tested to attain their license?

I've heard the "if you want to DX and run power, get a license" argument ad nauseum. Some people are incapable of passing a code test due to dyslexia or other disorders. Some people are incapable of even leaving their house. How do those people attain their license?

No. Two 5/8 wave loaded antenna's do not make a 1 1/4 wave dipole. They make a dipole composed of two 5/8 wave loaded antenna's. This configuration will not make a truly efficient antenna. Read up on collinear antenna's and dipole antenna's. You will see that what you have is nothing. However for you sake I do hope it works to your satisfaction. I prefer something else...

This is a classic case of "adverse possession", a gem of
Anglo-American real property law. After X number of years of
use of the property without the owner objecting or otherwise
attempting to oust them, the user gains ownership of the
property. The number of years varies from state to state, and
there's a bunch of loopholes if the owner is unable to inspect
the property for a number of reasons.

"Homesteading" is something else, starting with lawful
occupancy.

In Anglo-American common law, theft requires an intent on the
part of the thief to deprive the rightful owner of the
property in question. If there's no such intent, it's called
misappropriation or unlawful possession.

Don't know about other states, but in Texas you have every right
to use property that does not appear to be in use by the owner.
If you use it long enough, it legally belongs to you.

Exactly, my "borrowing" would be nothing more than theft. Just like the freebanders "steal" what they called unused frequencies. It is beyond me how they can expect anyone to have respect for what they do..

>

Yep, freebanders (illegal operators) have intruded into the 10 meter band, and other frequencies, and are causing problems. I on occasion have caught an illegal operator on 10 and when challenged often the response is, "well, we didn't hear anyone on this channel so what does it hurt?" Typical of my analogy... no one is using it so I guess I have a right to take it.

"Close" only counts in hand grenades and horseshoes.

The maximum distance figure was (and for all intents and
purposes still is) 150 miles.

The transmitter power was originally defined as 5 watts DC
input (AM). This was later redefined to 4 watts carrier
output (AM), 12 watts PEP (SSB). No change for all intents
and purposes.

The answer is yes. Even back when the tests were only given
at FCC examination points, special arrangements were always
made for folks who could not travel or who were blind or
partially deaf.

If you really want to know the answer. Yes the Examiners will be more
than happy to go to an invalids house to administer an Amateur exam.
This is what amateur radio is also about. Helping anyone become a Ham.
Ham's will even go to the invalid's house and give them instruction in
order to gain the knowledge needed to pass the tests and become Ham's.
I should qualify the above to state that I would require the invalid to
be a long term invalid and not just have a cold.

There is no known correlation between drug and alcohol use/abuse.
For example, drug use had a dramatic increase in the mid to late
sixties, while alcohol use remained relatively flat during that same
time period. By comparison, alcohol use had a sharp, but much
smaller, increase in the late seventies, while drug use remained
relatively stable. In the early eighties, alcohol had a sharp
decrease, while certain drugs had a sharp increase. In the late
eighties, both saw a sharp increase. However, in the early nineties,
alcohol remained relatively flat, while certain drugs increase and
others decreased. People have looked for a pattern between the two
for years, but they just don't seem to follow the same patterns or trends.

What???? I saw a TV show on drugs yesterday that said alcohol is
the entry level drug of choice. Almost all illegal drug users
use alcohol first.

What you are saying Sideband is You are asking for a band that is set aside
for SSB only use, between certain freqs And you think this might help the
congestion, well this band already exists(27.405-27.999)and people are using
hundreds of watts with rules and regulations already in place and they are
not respected and are ignored, They already have this band yet they still
come on 10m. What will be any different then. We should be thankful the FCC
hasn't pulled the plug on 11m it is more trouble than what its worth. One
day they will cut their losses and axe 11m.

I'm not missing the point - I just don't agree with the premise. Yes, alcohol is a major problem for the family, but we cannot so quickly dismiss it's effects on society (DUI, lost production, on the job accidents, and so forth). Drugs, even if legalized, present the same problems for society.

More importantly, the use of alcohol did not decrease following the end of prohibition. In fact, alcohol use, and abuse, has increased every year since prohibition ended (and so have the problems associated with that). Therefore, there is no reason to even suspect that drug use will decrease if drugs are legalized. In fact, if prohibition is any gauge, the use and abuse of those now illegal drugs may actually increase. And, as I said earlier, why compound the alcohol-related problems in our society by adding the problems associated with a growing drug problem (even if we ignore the crimes associated with the illegal drug trade)?

Still more importantly, contrary to the popular myth, the illegal alcohol trade did not decrease after prohibition either. In fact, it actually increased in the years following prohibition as illegal alcohol peddlers simply switched to stronger alcohol products and new markets in smaller towns. In fact, the illegal alcohol trade still exists to this day, though on a much smaller scale than it did in the fifties and sixties (when the trade of illegal alcohol hit it's peak more than 20 years after prohibition ended). Therefore, again if prohibition is any gauge, there is no reason to believe that the illegal drug trade will decrease following any form of drug legalization either. As long as there is money involved, drug dealers will simply follow the early illegal alcohol peddler's lead by switching to even stronger drugs and/or new markets.

So, in the end, the premise that drug legalization will reduce the problems associated with the drug trade, or the problems associated with drug use, is simply not supported by our experience with prohibition.

Be careful how seriously you take claims on an antenna manufacturer's site. The major ham magazine QST no longer accepts claims of antenna gain in advertising, as there were too many attempts to compare apples & oranges.

We may have a difference in definitions.

In amateur radio, loading coils don't count when explaining how long an antenna is. It's the whip that actually does the radiating; loading coils serve to make the impedance of the antenna reasonably close to 50 ohms resistive, to keep the transmitter happy. (an important function certainly, but a very different one from that of the whip. If you redesigned the transmitter and feedline to accomodate the non-resonant load, the loading coil would be completely unnecessary and the antenna would radiate exactly as well and in the same directions.)

Amateurs often use 5/8 wavelength antennas for the 2-meter VHF band. 5/8 of a wavelength at 2 meters is approximately 125cm, or roughly 50". I just measured the one on my truck, it's 47" long. (well within the tolerance of my non-calculator-enhanced math!) There is a coil in the bottom of the antenna, but its sole purpose is to match the antenna to the transmitter.

Sorry, but in Texas if the owner is paying the taxes on the property, it doesn't matter if he never uses it, it still belongs to him and no one can claim ownership by just using it. I have some pasture land in west Texas that hasn't been used in some years, but I pay the taxes on it every year. You go and try to use it and claim it as yours and see how far you get. If however I fail to pay the taxes for a period of time and you come along and pay the taxes for a number of years (I don't off hand recall just how many years are required), then you may have claim.

Can I move next door to you and operate an illegal CB radio with an old 250 watt tube linear? After about a week of hearing me on your television, stereo, telephone, and who knows what else, I doubt you will consider it such a minor problem. But, don't get excited, I'm only going to be your neighbor for the rest of your life (or until you're forced to move).

And don't think for a moment you're going to filter your equipment to get rid of the problem - my over modulated radio, and my old tube type linear, are so dirty it will take a dozen filters just to cut some of the problem on your television (after that you can worry about all the other stuff you own). Besides, don't waste your effort - a friend has a 600 watt tube type linear that I want and it is in even worse shape then the one I have now.

Cecil, only a person who has never lived next door to one of these "freebanders," or a person running an illegal setup himself, would attempt to minimize the problem like you did above. Since I don't believe you're running an illegal setup, I can only assume that you've never lived next door to one of these fools.

If they're using the same radio they use to "freeband" with, yes.
The radio is either not approved for CB use or has been illegally
modified to operate outside the CB frequencies.

And what are you going to do with all of the users those frequencies
are already assigned to? I've seen a list of government frequencies
(especially military) and there is very little free space available
between the CB band and the 10-meter ham band. They all seem to be
special use (used under specific circumstances), but they are assigned
none the less.

You really are "out of the know". Do you really think Freebanding CBers are getting smarter and they are all spreading out over the entire HF band? 99% don't even know anything other than "40 below" and "40 above". HF? Multiband antennas? Yeah right.

Most of the interference I hear on HF is cause by spanish speaking stations from Central and South America. I have no problem working around interference, with DSP and my highly tuned directional antennas. Perhaps you should upgrade from that G5RV and maybe come up with some ways to deal with interference, you know try to advance the technology or your operating skills. Nahhh....I would rather listen to you bitch on this newsgroup.

Bob.

My main shortwave listening problem inside cities has been
noise. For me it seems like a loop antenna works well. It picks
up less signal than longwires, but also far less noise. I don't
have experience with dipoles though, so maybe those are better.

Damn, I guess I need to go and buy some wires to experiment
with some antenna types ;)

Sideband, since Dan was talking about your suggestion of a new band
for "freebanders," I think he was referring to "freebanders" when he
said "a bunch of LAZY illegal fools." Since you insist you're not a
"freebander," why would you get so offended by that? And he said you
"must" be a liberal, not that you "are" a liberal. There is a slight difference.

Take the chip off your shoulder and you might not be so offended by
what others are saying. You've raised a touchy issue in the ham radio
community, so you should not be overly surprised that you're hearing a
lot of strong opinions on the matter.

Hear! Hear! I've listened to 20 meters many times and have never
heard anything close to the garbage I hear all the time on the local
CB frequencies. I have the obligatory CB radio in my SUV and I'm
actually embarrassed to even turn it on while passengers are in the
vehicle. Even the worst of ham radio does not compare to CB.

The bottom line here is that "freebanders" are running illegally. No ifs, no ands, and no buts about it. Illegal is just that....illegal. Now go take on the day.

KC8JBO prefers those little UHF Family Radio Service HT's that are sold at K-Mart. He uses them to prowl the local amusement parks and shopping malls whereby he strikes up conversations with the kiddies and entices them to meet him at the candy counter. Since most of these mini UHF radios use triple A batteries, Roger keeps a bulk pack of 20 such batteries in his pocket and several more in his mommy's car. Roger's ultimate dream is in hoping that one day soon he will be able to afford a bus ticket to Disneyland.

For what it is worth, in my VE days in Wausau WI I went up to Merrill to administer an exam to a housebound man who for reasons known only unto him wanted DXCC before he died. I and my partners read an Extra to a blind man after a regular testing session in Wisconsin Rapids at about -35 degrees costing me a few bucks to get moving again.

I have a friend of many years standing who tried to learn code as both a left and right-handed activity at the same time and ran into a brutal 'hump' at about 6wpm. We had to literally tie his left hand in his belt, pump code into the right ear only, and such things to get him to do it only one way. As he holds an Advanced, it must have worked. This is not dyslexia by any means but 5wpm can be worked around.

I have long advocated the eventual outlawing of AM on CB freqs simply because it is nitro in the hands of children. To do this, it would seem that setting up a truckers band (FM, PL, the whole enchilada) to prevent these 'opinion leaders' into ownership mode instead of wandering farther afield would make sense. Adding a sideband segment might fit into this. Marine freqs are also plagued by this sort of thing. The early phone companies did not view pointless babbling and time wasting as valid activities either and lived to regret it. If your point is that we are making the same mistake I tend to agree.

Some years ago a university I happened to be attending built a new library. They installed a few paved paths in obvious places to get to it and waited a few years to pave the paths the students made. This was a simple and practical approach as opposed to putting them in right away and planting landmines to keep the students on the paths. As Flaubert, a French poobah, once said of taxation, the object of plucking a goose is maximum feathers with minimum hissing.

Actually, Dick, you just reminded me of this precise point, which I had wanted to make, yet had forgotten to.

AM is a volatile emission mode, IMHO. Of course, FM isn't much better; if the deviation is turned up too high, it "bleeds over" just as badly as over modulation and carrier instabilities bleed over on AM. I prefer sideband for a multitude of reasons. This is one of them.

If you're speaking of Calvin College, in Grand Rapids, MI, I attended the same School. Escher started this trend when the school was designed and first built, in keeping with his ideals of letting his buildings flow with nature as much as possible.

>
> Dick Nï¿½BK

Basically, CB needs to be revamped. CB'ers need to be educated about what's "loud" and what causes interference, what "gets out" and what bleeds over. Modes need to change, and bandwidth needs to be reallocated. Leave 1-40 for the AM'ers, and set aside a band for FM and a band for SSB either above 40 or below 1. There are some unallocated frequencies there, I'm sure. I DO NOT want to make HAMs give up any more bandwidth, and I don't want to take seldom used emergency frequencies from other services, but the whole of 27.405-27.800 can't be allocated.... at least I've never seen a chart that shows anything allocated in that area. (Maybe someone has a URL to a chart/page that lists all allocated frequencies?)

Hi!

I need some help with a strange transistor found in an Atlas 210x
amateur radio transmitter.
It's printed with "CTC CD2545" does anyone know a referring type or
where to obtain this transistor?

Thank you.

Ten emeters is already ruined, for the most part. There are SSB
operators and truck drivers all over the low end.

It is happening on 160 meters through ten meters, and even in the
two-way land mobile bands.

We don't need to reduce code requirements, or expand bands. The idiots
operating "freeband" are taking care of it all on their own. They have
no respect for anyone else, and demand we accept them and respect them
for ruining whatever frquencies they choose. And the SSB ops are the
worse of the lot.

What a joke.

What a laugh. You think a DSP filter will remove SSB or AM from over
CW?

Get a clue about how filters work.

A narrow signal can be removed from a wide one without affecting the
wide signal much, so a very strong CW signal can be removed from a
weak SSB signal with little ill effect on the SSB . The converse is
not true.

As for your "higly directive antennas" that doesn't work unless the
direction of the signals is quite diferent.

The point is the free banders are causing problems, and it is getting
worse year by year. Most people who operate HF legally, especially CW,
know that.

BTW, what is you callsign?

73 Tom

Do you really feel laws are an imposition, Bob? Are you referring to all laws or just the ones you happen to disagree with at any given moment? And, if you truly feel that laws are imposed on you by a government, what system of laws would you prefer instead - no laws, only the laws you agree with, only the laws I agree with, or something else? This "evil, big brother like, government forcing it's will on the people" nonsense is getting a little boring, people. Please do try to come up with something more creative and more accurate.

> Let me ask you this then, if you were around
> during prohibition (were you?), would you
> have disrespected bootleggers and consumers
> of alcoholic beverages up until the very
> point where the 18th amendment was repealed?

I have very little respect for those who blatantly violate the law and that would hardly change just because the law was later changed. In my opinion, that individual would still be a person who is willing to break the law and I could never really trust a person like that - once a person has chosen to break laws, I could never be certain what law that person might choose to break next. Now, please note I'm not talking about minor crap like spitting on the sidewalk or speeding. I'm talking about major laws like prohibition was in it's time, or the federal laws governing radio are today.

> Good thing all those amendments came along
> abolishing slavery and granting women the

> respect for women or Negroes.

Oh, come on, Bob. It is a little absurd to equate "freebanding" with slavery or the women's suffrage movement. The three are not even in the same ballpark.

CTC are (or at least WERE) a significant manuf of SOE HF/VHF/UHF power
transistors. They shouldn't be too hard to locate if they still
exist.

This doesn't necessarily mean that an increase in one automatically and
simultaneously causes an increase in the other. Read Dwight's post again.
AFTER the increase in alcohol use/abuse there was an increase in drug abuse.

One thing that I will note --- there hasn't been a decrease in either.

Kevin, WB5RUE
Why use a big word when a diminutive one will do?

What gave you the idea that I consider it a minor problem? I don't
consider illegally driving on the shoulder of the road to be a minor
problem, do you? Bicyclists can die because of that problem. Do you
care about the RF emissions of freebanders more than the lives of
bicyclists?

> Cecil, only a person who has never lived next door to one of these
> "freebanders," or a person running an illegal setup himself, would
> attempt to minimize the problem like you did above.

On a scale of crimes, is freebanding a minimum offense compared to
rape and murder? If you shoot the freebander, who would be in the
worst trouble? I am not attempting to minimize the problem, Dwight.
I am attempting to put it in perspective.

Seems you are the one who has minimized the problem of people illegally
driving on the shoulders of roads, putting bicyclists' lives at risk.

Illegal drugs present problems for society. I believe the set of problems
that illegal drugs present for society is more severe than the set of
problems legal drugs present for society. You believe the opposite.
What we are arguing over is the lesser of two evils.

A law is either good or evil, Dwight. When a law is changed, was it
good before and evil after, or was it evil before and good after.
Either way, it was evil sometime. I advocate getting rid of evil
laws.

One (positive) comment about IRLP, it connects repeaters to each other via internet, but there is no gateway by which you can get on the air (or even monitor) using only a computer. You have to use a radio (unless you are running an IRLP node, but that takes a dedicated computer and some special software and equipment that isn't readily available to non-HAM's).

There are two local repeaters that have IRLP links, and overall it works pretty well.

I said "a" point, not "the" point, an important difference.

> Yes, alcohol is a major problem for the family, but we cannot so
> quickly dismiss it's effects on society (DUI, lost production, on the
> job accidents, and so forth). Drugs, even if legalized, present the
> same problems for society.

No arguement! The point you miss, or avoid, is that while all
you say bad about booze is true, all of those ills pale compared
to the evils of prohibition itself. We *may* have had fewer
alchoholics during prohibition, altho that's arguable, but we
had innocent people being caught in the crossfire of shoot-outs
between bootleggers, police harrassment of ordinary citizens,
rights given up in hope of security; in short all of the ills
now associated with the WOD but no longer associated with
alchohol. I emphatically agree that " Drugs, even if legalized,
(would) present the same problems ..." as alchohol does but we
wouldn't have people being robbed and murdered so addicts could
afford drugs because drugs would be as cheap as wine. We
wouldn't have little kids and their grandmothers being killed by
warring dealers because the dealers would be settling their
disputes in courts just like liqueur store owners. We wouldn't
have police and innocent bystanders being, not to mention
addicts and dealers being killed in drug raids. All that'd go
away just like it did after prohibition, leaving us with
manageable social problems.

>
> Still more importantly, contrary to the popular myth, the illegal
> alcohol trade did not decrease after prohibition either.

That's because prohibition didn't end abruptly. Many states and
localities continued to outlaw alcohol, especially "by the
drink" until well into the 1970's and a few still do. But when's
the last time you read of a kid being shot in a fight over
illegal alchohol distribution, or of a wino killing anyone for

the price of a bottle of Ripple.
>
> So, in the end, the premise that drug legalization will reduce the
> problems associated with the drug trade, or the problems associated
> with drug use, is simply not supported by our experience with prohibition.
>

That's not true. Our experience with prohibition demonstrates
that legalization will not remove *all* problems but clearly
shows that legalization will practically eliminate the ones that
affect *me* and most other people who do not abuse drugs. It
will not reduce the # of addicts or help their families but it
will eliminate the need for addicts to rob and kill to support
their habits and it will minimize the assault on our rights, and
....

Woah now, those are serious crimes in my book. As a matter of fact, go gather 500 people from the local mall - ask them, which is a worse crime, "speeding, spitting on the sidewalk or freebanding." How many of them know what freebanding even is? Probably not even one...if it was such a serious problem to the public, the problem would have been fixed. It was hams who urged their senators to push for local enforcement of the CB laws...not the non-ham public.

I see you say you don't support a position, then go on to do just that. In anycase this will be my last on this one......you can not reward outlaw behavior by giving them more frequencies.

Based on the obvious dis-regard and dis-respect for regulations, already in effect, I see no possibility that the rag tag bunch you refere to would obey any new ones.

End of discussion.

SSB-
Your sentiments are commendable but since CB is unregulated and unlicensed,
who will to see to it that any proposed "new" CB regulations are enforced?
It is doubtful that folks who historically have proven they cannot voluntarily
obey ANY rules whatsoever would suddenly become trustworthy enough to limit
themselves operate within the bounds of moderately expanded power levels
or frequency allocations.

The problem will resurface with a vengeance in another 11 years unless the root cause is eliminated; i.e. the widespread manufacture and distribution of "export" radios designed to appeal to CBers and operate from 25 to 32 Mhz with a simple jumper mod.

> << SNIP >>

Wrong. The legislation was initiated as a direct result of the voters pressuring their representatives to do something to stop the interference being generated in their homes by high powered CB operators. And it only became a matter for the Congress when the homeowners and local police became frustrated with their inability to address the issue locally.

FYI, a quick search if the web found this news blurb:

"The bill was introduced bt Rep. Russell Feingold (D-Wisconsin). The text of his bill would allow states, cities and other municipal regulatory agencies the to prohibit the use of any equipment on the 11 meter band that is not specifically authorized by the FCC. This would mean that they could take a CB operator off the air (and presumably confiscate their station) for using things such as transceivers modified for out of band use and illegal high-power amplifiers. It also prohibits CBers from causing interference -- even if they are using legal equipment.

Feingold says that his bill is in answer to a myriad of consumer complaints about CB operators he has received. He points to all the interference coming from CBers and his bill specifically excludes all other radio services -- including GMRS, ham radio, cellular, broadcast, PLMRS, etc. from state/local oversight.

It appears now as if the Feingold bill has reasonable expectation of passage this congressional session. He calls it "a common sense solution to a problem that cannot be addressed under existing communications law."

Actually, he's serving his FOURTH sentence now, of 3 months. I think that they reduced (as compared to his last conviction) the sentence to 3 months only because of health reasons and the cost to the taxpayer.

To a point true, but I think you get my drift however. Until somebody makes a stand and says "NO MORE" they will just keep taking what is not theirs to take.

> I'm proposing additional bandwidth for a particular mode of operation in
> order to help alleviate some of the congestion on an already overtaxed
> and overused band, which may just help to reduce the encroachment by
> unlicensed radio operators on HAM bands.

You have to stop and think about the mechanics a little bit. If a new band was created, as you suggest, then there will appear commercial rigs to operate on the new band. Once that happens then hordes of other CBers, looking for a clear channel to talk on, will show up over running the operators there now. Now we have the same situation all over again. SSB operators looking for the open band. They have to learn to be happy with what they already "legally" have.

Ham Radio is not going to be any different either once you get your ticket. Sometimes the bands get crowed so you either put up with it, move, or turn the rig off. We don't just spin the VFO knob looking for an open frequency outside of our legal bands like the freebanders currently do on 11m. Hams seem to have much more respect for their privileges than freeband CBers do. I think Hams have more sense of respect for others rights to radio spectrum than the freebanders do. If there is any spectrum use disagreement it is taken up with the FCC, and let them decide. Hams don't just "occupy" spectrum outside of our bands because we feel we have a "right" to it.

A 2 watt carrier? do you just sit there and throw dead keys or do you talk.
If you do talk I am sure it is more than 2 watts so your deadkey figure is
irrelavent.

****
Might I suggest Morse Academy from http://ah0a.org. If you have a problem
recognizing sounds the freq can be adjusted as well as the spacing. If you
type decently, learn the code typing. Seven lessons, tried and true
software, read the instructions before installing. Buy a cheap set of cans
from Walmart before those near and dear berate you strongly about the head
and shoulders with large cudgels to stop the incessant beeping.

FM has the advantage of being receiver-dependent. Pump 15 kHz deviation
into a receiver expecting five and all you get is 'What did you say?'

Considering that 28-29.7 is a treaty ham band as is the 24.89-24.99 band,
the Commission could not give you them if they wanted to.

The 25-30 range are garbage frequencies to begin with so even the allocated
ones are probably never used. If they are used, it is with hardware that
probably takes three minutes for the tubes to lite and the dynamotor to come
up to speed. It is damned hard to tell just how vital these were and at one
time the FCC was going to a 99-channel CB and clearing everything up toe
27.99. There is no great way to tell. Below CB is also a land mobile
allocation. Hard to tell just what is there. The 11 meter broadcast band
has some STLs in it, one of which plays reggae to keep the freebanders away.
You should remember, however, that while the treaty definition of land
mobile is pretty broad, it really does not include hobbyists.

This thread has identified problems broader than the one you proposed
originally:

Equipment: So long as equipment that is within a pair of dykes of
out-of-band operation is allowed to come thru the ports we are dead in the
water. These things can be made more bullet-proof than they are and whether
intended for CB or 2 meter amateur or marine VHF they need to be. Time to
get Customs involved. Engineering firms can be hired to do the grunt work
just as they are for everything else; the FCC (properly) does no grunt work.

Enforcement: Phil Kane, as usual, makes a good point with respect to separating the enforcement and technical from the political. The priorities and funding are just too different.

History: It is not 1958 but some of the uses of the garbage band predate CB. There is a lot of history to wade thru. I agree fully that Ancient Modulation needs to be kept in the 40 until it dies. While it is an interesting nostagia trip, there is no good reason for ham gear to be AM-capable; another equipment problem.

Attitude: This is a tough one. While I tend to like to legalize facts on the ground to try to get people in the tent pissing out rather than outside the tent pissing in (TNX LBJ) the two good objections are the rewarding of outlawry and the lack of a guarantee that this will stop the problem. In this case, justice lies on the side of the truckers who are for the most part the English speakers on 28.085. There is a real use for a trucking service, it does meet the treaty requirements, and it could be designed to use the present antennas etc on an increasingly electronically-cluttered cab. As they are pretty much the 'opinion leaders' in CB circles giving them ownership interest in a band that was hard to bootleg (13.2 channel spacing for example and PL required) might ultimately help cool things down.

There is less justification for opening a new SSB-only hobbyist service on say 5kHz USB channels simply because you don't fit any reasonable definition of Land Mobile. This is the reason for the skip limits in the regs to begin with and the requirement in a number of countries that at least one party to a conversation be literally mobile. I tend to favor it only because it would accelerate the scrapping of Antique Modulation and the TVI, non-Linears, etc that go with it.

Download the CW software, use my e-mail (God, I love ATT) if need be, and let's get you on the ham bands before the spots go down

Richard:

Thanks for the kind words... You've brought up a few points that I hadn't thought of, and that I need to give some thought to before responding..

I take my written Tech and General tests on the 8th. I'm going to work on my code with KC8HEZ and others here in Livingston county on 2M when I get my set up. Once I get the code down, I'll take the code test, find an HF set, and hopefully be talking on HF by the end of the year.

The next problem is going to be an antenna here in the apt. I've thought of throwing out a longwire and using a tuner, trying to use the gutters on the building as a large loop antenna with a tuner, and a few other options. The 2M setup shouldn't be too difficult. I do have a rail outside my window I can mount an antenna to... I just hope it's high enough to get to the repeater.

Hopefully, by the 10th, I'll have a callsign to send you guys... and by the 15th I should have the domain name corresponding to that callsign.. I'm going to put a site up here at the house for those who are curious.

73's and Hopefully I'll be chatting with you all on the air soon.

I'm starting out taking the Tech and General written tests. Code will
come later this year, hopefully. I'm going to need a 2M set to start,
and an HF set later, once I've passed the code requirement.

I did get that, Leland.. But honestly, the problem with CB'ers venturing
out where they don't belong is twofold: (1) There just isn't enough
bandwidth for CB. and (2) Export Radios that do too much. I think we can
both agree on these two, so I won't go into it too deeply here.

No, but you can look for an open frequency within the bands HAMs are
allowed to transmit on. That's my point... HAMs have the bandwidth.
CB'ers don't. So when a CB'er goes off to find an empty frequency to
talk on, they're in violation of FCC rules when they go outside of the
standard-40. HAMs have MUCH more bandwidth with which to search for an
"open channel"...

I've turned down the carrier on my Grant XL to 2 watts. The radio swings to 5 on AM, and does 0-12 on SSB. the AM measurements are RMS, the SSB measurements are PEP.

> prohibition itself.

I clearly addressed that in my previous message - if we use alcohol prohibition as a guide, there is no evidence that the "evils" of the drug trade will be reduced if the now illegal drugs are legalized. In fact, if we do use prohibition as a guide, the opposite is more likely true - the illegal drug trade will continue to grow. As long as money is involved, drug dealers would simply switch emphasis to more dangerous drugs.

In other words, the only way your argument (the reduction of crime relating to the war on drugs) can hold true is if we completely legalize all drugs - heroin, crack, and so forth. Therefore, you cannot use that argument to advocate just the legalization of marijuana - the effects of the war on drugs will not decrease if marijuana alone is legalized.

However, if you are going to advocate the legalization of all drugs, you cannot continue to downplay their effects by comparing them to alcohol - the effects of heroin, crack, and so on, are not at all comparable to the effects associated with alcohol (on the individual, on society, etc.). Likewise, your attempt to use prohibition as an argument also goes right out the door - the growing use of hard drugs following legalization would be catastrophic on this society, far beyond anything ever experienced following the end of prohibition.

So, I guess we better clearly define the discussion before we go any further. Up to this point, I have been addressing alcohol and prohibition as they relate to Cecil's argument about the legalization of marijuana. However, if we're going to change the discussion to include the legalization of all drugs, then we really need to get off this alcohol nonsense (alcohol does not relate to the harder drugs). In addition, if we're talking about the legalization of all drugs, the emphasis of my argument would change. Instead of talking about the drug trade, I would instead center on the harmful effects of these drugs as the core reason why they should not be legalized.

In fact, to be perfectly honest, if we're talking about the legalization of all drugs, this conversation is effectively over. No

country in the world today has legalized all drugs, and no country in it's right mind would ever think of doing so. The possible effects would be so horrible, no country would even imagine doing such a thing. Therefore, to even discuss such a notion is a utter waste of time.

k4gj,
If you want to keep the 'ID' but at a lower level, do this;
1.turn radio upside down.
2.remove bottom cover.
3.locate "VR4" on top left corner of circuit board
on the right side of the radio. Adjust till sound
is at the desired level.
4.put everything back together.
Thats it...
'Doc

PS - Tell your friend to get a manual.

What anti-cancer drugs? Are you talking about the drugs used to help reduce the nausea associated with certain cancer treatments? If so, they are no more expensive than marijuana.

I must have missed that part - I don't remember any mention of
bicyclists. All I remember is a mention about driving on the side of
the road, which is indeed minor (unless you hit a bicyclist).

6595. True Stealth 2 meter PVC enclosed J-pole

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-05 08:13:41 UTC
From: nospam@sorry.net
Message-ID: <3af3b5b6.44608141@news.ev1.net>
Source record: 89974

SEE AND ORDER ON-LINE OR threw MAIL AT:
http://users2.ev1.net/~kd5met/antenna.html

This is a fine 2 meter PVC enclosed J-pole.
Take it along with you on a trip,Fits in a standard car trunk easy
setup for Motel, Hotel, Deer stand, Boat or portable HT work.
As a J-pole it does not need a ground or radials. Will Take 50 Watts
or more, Pre Tuned set with MFJ antenna analyzer.
Makes a wonderful Stealth antenna for deed restricted people.
Comes in 6 colors White, Black, Deep Forest Green, Khaki, Sky
Blue/White, Camouflage to cover any Stealth applications
Pull it up 100 Feet into a tree or Put it in your attic or use it hung
from small hook on ceiling (20-40" away from any metal) Been tested on
ground floor and can hit 20-45 mile away rpts ,Gets out fantastic !
3-4 dB Gain...1/2 Wave
Small Size ONLY as thick as your THUMB!
Aprox 57 inches long
Ready To Go Just Screw On Your Antenna Cable
Only $19.95
1313-1 White
1313-2 Black
1313-3 Deep Forest Green
1313-4 Khaki
1313-5 Sky Blue/White
1313-6 Camouflage

This isn't the 1620's, Bob. It is the year 2001 and this nonsense has been repeated over and over for decades. Republicans say it whenever Democrats do something. Democrats say it whenever Republicans do something. Political groups say it and those opposed to those political groups say it. Every person who has a gripe about some law says it. In fact, it has been repeated so much, the whole premise is getting a little tedious.

They may not recognize the word "freebanding," Bob. However, ask those very same people about CB'ers bleeding over onto televisions, and telephones, and I'm sure you'll get a very strong response. And that (heavily modified radios and big linears screwing up the neighbor's electronics) is just as much a part of "freebanding" as the use of frequencies outside the CB band. And notice I didn't exclude those "freebanders" who use modified ham radios - many of those radios are so heavily modified (modulation, power output, etc) they are not

much better then the cheap CB radios others have modified to use outside the citizens band (and that does not even include the dirty linears often used with those ham radios).

And I'm sure those forefathers (the men who wrote a constitution of laws and the first laws of this land) would think it a little silly to compare my views about illegal "freebanding" with their views about this country's creation. But this is exactly what I was talking about when I said the entire premise behind this "evil government forcing it's will on the people" nonsense is a little tedious. It is absurd to paint the laws against "freebanding" as some kind of oppression worthy of association with the struggles our forefathers faced while creating this country, and equally absurd to paint anyone opposed to "freebanding" as someone with views out of tune with those of our forefathers. Such hyperbole over a minor issue like this is neither accurate or effective. Hence it becomes very tedious to see it attempted over and over again with one minor issue after another.

I picked up a fairly nice Heathkit SA-2060A 2kw antenna tuner at Hosstrader's yesterday, but alas no manual. I'd like to rewind the balun in the back (it's been over-driven and repaired) and it would help to have the description.

I will buy a manual outright, or pay for a decent photocopy. Or if you've got it in electronic form, that's even better.

Thanks all!

Good luck with your tests, and welcome to ham radio! As far as antennas go, they are always a challenge in an apartment setting, but you can get creative and will learn much in the process!

Don't forget about going mobile if you are not able to get satisfactory performance with your base antennas or have RF interference problems with your neighbors. I have lots of fun with a Yaesu FT-100D and Hamsticks.

Yes but what you are saying is you are heard with a 2 watt carrier. It is irrelavent what your carrier power is when you are talking. If you had a 10 watt carrier and when you talk it went back to 5 watts then all you are doing is 5 watts not 10.

well, if a 2 watt carrier is full quieting 20 miles away, then the
antenna must be doing its job, wouldn't you think?

Full quieting is normally associated with FM use. Who cares and what does
it really mean you have a 2 watt carrier, unless you go around deadkeying
and never say anything . your carrier power is a useless figure. What is
your carrier power on ssb?

Not really. How about 4 million + miles per watt ?

(Full quieting? Then you must have been using FM emissions, an illegal mode
on 11 meters. :>)

The balun is a standard 4 to 1 winding, ARRL handbook has a diagram.
I would suggest a good 4:1 balun. W7RQT does an outstanding job
brewing these in his shack for a resonable price.

He is Patrick E. Buller in Issaquah, WA 425-747-7495

73, Kurt, K7UU, ARRL Technical Advisor

Fleaspeak - the vernacular of hamfest fleamarkets.

Fleaspeak English Translation

This rig puts out a BIG signal It's 50 kHz wide
This is a really good CW rig. It doesn't work on SSB.
This is a really good SSB rig. It doesn't work on CW.
This is a really good rig. It doesn't work on CW or SSB.
The transmitter is outstanding. It doesn't receive.
The receiver is really hot. It doesn't transmit.
This rig is really hot. It's stolen.
It seems to be a vintage regenerative type. It oscillates.
I just retubed it. Got 'em from questionable used tube stock.
I just aligned it. The slugs on the transformers are jammed
I don't know if it works. it doesn't work, probably never has.
It doesn't chirp. it doesn't chirp because it doesn't transmit.
The audio sounds great. The 120Hz buzz is faithfully reproduced.
I just had it serviced. I sprayed WD-40 over all the wiring.
It comes with the original box. Just brush out the kitty litter.
Better buy it now, cause it won't last. no transation needed.
Sure, it works at full power. It sucks all it can from the wall.
This rig has wide frequency coverage.
It drifts up and down and out of band.

Frequency stability is great.
The VFO doesn't work - you'll have to use crystals.

Real popular rig in its day.
There were whole HF nets on the repair and maintenance problems.

QST gave this one a really great review.
The language broke new ground for profanity.

It might need a bit of tweaking.
Marconi himself couldn't fix it, much less align it.

It was used in government service.
It was stored outdoors on a wooden pallet.

The dial drive may need lubricating.
the gears are stripped and the setscrews frozen.

I plugged it in to check that it lights up.
The light came from the two foot high flames.

I'm selling it because I have two of them.
I'm getting rid of my parts radio.

You won't find one at a better price.
Better from the point of view of the seller.

This is a collector's item.
the manufacturer just went belly up and won't honor the warranty.

It came from an estate sale.
If you have any problem take it up with the owner.

I had it on the air just last night.
And you thought the woodpecker was gone.

It worked last time I used it.
if it still worked I'd still be using it.

The only lightning damage was a fuse.
The only lightning damage I recognized was a fuse.

I have the [...] somewhere. I'll send it to you.
you'll never see the [...].
I'll help you carry it to the car.
I'll do anything to unload this boat anchor.

It works ok on 80 meters.
It had some parasitics
but I got in and really screwed it up and now I want to unload it.

The tubes used by this rig are worth the asking price.
The rig uses a rare 7360 beam deflection tube for a balanced
modulator, but it's blown and you'll spend \$80 to get a new one.

This is the rig of my dreams. I really wanted one of these as a
kid, but now <snif> I've got to let it go.
As I've gotten older, I've learned what a hunka junk it is.

The signal quality of this rig was easily recognizable in its day.
The high distortion and bad audio quickly identified this rig.

This rig will bring back the feelings and atmosphere of vintage
ham gear.
The bypass capacitors to the
AC line put enough voltage on the chassis to give you a shock
in the lips through the microphone, and it smokes so bad when
you turn it on that you'll probably start coughing and wheezing.

I'd keep this baby, but my wife is making me clean everything
out.
I finally got around to giving this thing the proverbial heaveho.

There are a couple of other people interested in it.
someone sat on it to tie his shoelaces while walking past the table.

You'd better buy it now, because I'm leaving soon.
The previous buyer and his brother,
Guido, are heading back toward the table and they aren't smiling.

6617. General

With apologies to Gilbert and Sullivan
Tim KF2UM

Oh, I am the very model of a modern Amateur General.
I turn on my new radio and send signals quite ephemeral.
I bought an old brass straight key and my fist is now exceptional.
Oh, I am the very model of a modern Amateur General.

I turn on my two meter rig and say that I m here listening.
I carry my black HT out to Four Weddings and a Christening.
I drive to K2KJI s garage and there with glee my eyes are glistening.
Oh, I am the very model of a modern Amateur General.

I spin the dial from dusk to dawn across the sagging low bands.
My children - what s their names now? - beg to make a snowman.
My spouse says either she or that radio s gonna go man.
Oh, I am the very model of a modern Amateur General.

I m really gonna miss her as she tossed her head quite prettily.
But chaps that write on packet turn their phrases oh so wittily.
There s a contest coming up and I m starting to get jittery.
Oh, I am the very model of a modern Amateur General.

I have a fascination for all things electronical.
I log on to the Internet and hunt for things Veronical.
I flame the geeks in cyberspace for being so sardonical.
Oh, I am the very model of a modern Amateur General.

I read CQ and QST because they are so factual.
I rack up points at Field Day cause my accent s quite theatrical.
I joined the Quarter Century Club as I m somewhat geriatrical.
Oh, I am the very model of a modern Amateur General.

Yes, I am the very model of a modern Amateur General.
Yes, he is the very model of a modern Amateur General.
Yes, he is the very model of a modern Amateur General.

6618. A little tail

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-05 22:04:03 UTC
From: Burt <k1oik@yahoo.com>
Message-ID: <nN_I6.9942$9j1.3225569@typhoon.ne.mediaone.net>
Source record: 89897

A Tail (spelled correctly) of Two Hams.

In a place far, far away in a time not so long ago
(actually Cape Cod 1991) there were two hams who were friends.
Moose, KF1OF, and Dick, KC1HOT. It came upon a great contest
weekend in November (yes I know great contest is a contridiction
of terms). The contest was called Sweepstakes not to be confused
with the so called "SS" infamous during World War II. Although
both SS's had a tendency to push out the small guy, the ham radio
version is more benign. KD1OF was intent on scoring big in the
contest. In fact he formed a special club called the Old Farts
of Cape Cod (he used the suffix of his call to get the name),
this club gathered huge sums of money by selling off the estates
of dead hams in the name of education and then spent the money
on Japanese radios, American beams, and computers in order to build
the ultimate contest station.

The great day came (pun?) and the members gathered
together. They pooled their best cliches (finest kind, Righto,
Fine Business, none of your beeswax, Ciao, HI HI,
Thunderbumpers, QSL, Let me be honest wid ya, anywho,
destinated, arrivanated, 59 (but never ever Six nine), let me
drop it (never said in mixed company). They all practiced
saying, "Cq Contest, contest, contest, contest contest, contest,
contest contest, contest, contest contest, contest, contest
contest, contest, contest contest, contest, contest contest,
contest, contest contest, contest, contest" and then listening.
They drank a few 807's (beers). They ate some popcorn and beans
(in order to sing the club song-named after the club). Finally
the big moment arrived (or should we say arrivaniated). But
where was the ham who could really score, KF1HOT, Dick? No one
could find him. It was decided a Contestpediation would be sent
out to Dick's house as the L A N D L I N E was all twisted up
in a knoted pair.

The Contestpediation arrived at Dick's house, all was
quiet, the beam was erect but not rotating, the dipoles were
lying in the trees softly, and the whip (on the car) was
slightly bent. The hams knocked on the door, but there was no
answer, even though a few lights were lit softly and both cars
were in the driveway. The hams gave up in despair, and they
headed back to prepare for the SS. On the way back they laughed
that Dick probably was doing "honey Dews" (honey do this, honey
do that-hams love to use this term). They lamented that Dick was
fixing the rugs, or hanging plants, or doing light plumbing.

Moose got suspicious that there was more to this disappearance, and headed back to Dick's QTH. When he got there he peeked through the blinds and what did he see? He saw that the lights were dim, but not out. He heard the music from the movie "10." He saw Dick's wife of 15 years dressed in a light silk blouse. As he watched it was clear that the love and affection of this couple was as warm as it was genuine. They playfully went from room to room with an occasional kiss and warm embrace. It was clear Dick was not going to be at the contest, but he was not going to miss it.

When Moose returned to the rest of the hams they inquired as to what was up at Dick's home. Moose replied to the hams, "you wouldn't understand", but Moose understood. Moose left the hams to their astonishment, and went home. Upon arrival his wife greeted him at the door and said, "Honey you are going to miss the contest!" Moose replied, "I will never miss another contest, there is nothing about contests to miss." Moose and his wife drew the curtains and began life.

Disclaimer: Nothing in this story relates to any hams living or dead (assuming any hams are alive in the first place). The story is complete fiction.

Um... Either you're being ignorant, or you're trying to test me...

either way.. my answer is...

DUH!

SSB radio emissions have no carrier.

-SSB

Rough Rider wrote:
>

Um.... Ok...

So I drive a truck.. Big Deal. I have never cophased antennae on my
truck. I find it counterproductive to even attempt to do so.

But if you want to play CB games...

Uh, 10-9 good buddy?

Who was that nutcase that said the "men in black" were pointing antennas at his house from a black van at three a.m.? And he was gonna "take out" the van with a roll of duct tape? Geeze!!! What's he gonna do? Duct tape it to the curb?
The only thing that Lib Net lacks is some background music. You know, like the theme from the Twilight Zone? Doo, do, doo, do......
He's not paranoid....no he's not. He's not paranoid....no he's not. He's not paranoid....no he's not. He's not paranoid....no he's not.
"Wait! What was that sound? Is it a helicopter? Look! Over there...somebody is hiding in the bushes! I have to go check my phones. They put infinity trasmitters in them when I go to the bathroom. Why, just last week I found a bugging device in my dog's collar! They can read my thoughts, too, with those ultra sensitive antennas and that is why I wear aluminum foil over my head and take Thorazine.
I'm not nuts. No I'm not! Did you hear those voices? I'm not nuts. No I'm not! Did you hear those voices? I'm not nuts. No I'm not! Did you hear those voices?"

6627. Toyota Prius and RF

Hello,

Anyone have experience in using HF and VHF/UHF in a Toyota Prius? I am about to purchase one but have no information as to whether RF (100 watts max on HF, 50 watts on VHF/UHF) will effect the electronics in this hybrid gas/electric car.

Thanks for any information.

Jim....

That sounds good. The credit for the written elements are good for a year I
think. If you
can find somebody to practice code with that would be great help I'm sure.
Depending on your finances, if your looking to save some money, check out
some of the local Hamfests in your area. The ARRL web site has a list of
them all over the country. A used radio can save you a big chunk of coin.
That's maybe your best bet until you figure out what you want or need in the
way of features in a rig. Once you know that then you are in a better
position to spend some money on a new, or newer, radio knowing it will do
what you want. Also don't let some of the Old Timers on this news group get
under your skin either about anything. Some like to take cheap shots at Tech
Class operators. Regardless of what class license you get, or the code speed
you test at, your a Ham at that point, and don't let anybody tell you
different.

Bottom line. Freebanding is illegal as per FCC rules and regulations.
What part of "illegal" is so difficult for the rogue CB'ers to understand?
For CB operators to run out of band, run more than the legally alloted
power, and to use illegally modified Ham radios to "play" in the netherlands
below 11 and into 10 meters is still grossly illegal.
Illegal is illegal.

I don't question the legality of freebanders. I quesiton the FCCs failure to do anything about them.

The last time anything was done was a sweep about ten years ago that nabbed nearly 40 violators. It's time to do it again.

I suggest not using it. You won't need the extra power on PSK31.
You don't even need the raw 150W, imho. I use about 50 max and
work the world.

You might call Toyota customer service and see if they have something they can send you on that.

I'll bet the car will slow down noticeably when you key the transmitter if you're in the electrical assist mode!

> It's printed with "CTC CD2545" does anyone know a referring type or
> where to obtain this transistor?
The ATLAS transistors can be obtained from almost any replacenment
transistor supplier in your part of the country as an NTE317 or from
http://www.rfparts.com as a matched pair of MRF412's for about $48.00 pr. I
just replaced the finals in my two of my ATLAS'es with a pair of MRF412's in
one and a pair of NTE317's in the other last month. The MRF412's were much
cheaper than the NTE's. $48.00 pair to $120 pr. Thus my choice to go to RF
Parts co. for the second pair.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

ARE WE HAVING A GREAT YEAR FOR DXING? Joe, W1JR, thinks so. Joe wrote to OPDX and states, "Just a note to tell you DX this year is doing well and possibly ahead of all years. Each year I try to see how many DXCC entities I can work. In a good year I can make about 280-290. Hence, on January 1, 2001 I started anew AGAIN. I guess I never learn! Yesterday (May 3rd) I worked XU7 for DXCC #270, all in just over 4 months. This is the earliest in the year that I have ever worked 270 entities. I figure I have missed about 10 others. I do keep a normal sleep pattern and don't catch them all! The DX is there. You just have to listen and work them!"

3B6RF THE AGALEGA DXPEDITION (Update/Change). It has been reported that the 3B6RF team is now on the island as this bulletin was being prepared, but not after a change in traveling plans. The team flew to Seychelles as planned but ended up taking a boat to Agalega instead of flying. It was reported that it took the team 34 hours by boat, with rough seas and waves 3 meters high, to reach the island. They are expected to be on the air by 1500z, May 6th. The official news and updates will be posted on the team's Web page at: http://www.agalega2000.ch/

9H, MALTA. To mark the event of the Pope's visit to Malta, the Malta Amateur Radio League is issuing a special Award and QSL Card. For further details, check out the Web page: http://www.9h1mrl.cjb.net

A2, BOTSWANA. Charles, A25/KY4P, has been pleasing the crowd on CW on 17/15/10 meters. Watch 10 and 15 meters after 1530z around 1 to 2 kHz up from band edge. Check around 18089 kHz later in the day (as late as 2100z). QSL via SV0LM.

AP, PAKISTAN. A good friend told me he needed AP on CW. Well, look for AP2ARS on 30 meters (one QSN said "NO TAKERS"). Look around 10103 and 10104 kHz as early as 1600, but generally as late as 1900-2100z. Also, check 17 meters around 18074 kHz between 1200-1500z. QSL via S53R.

DX ACTIVITY (Dayton HamVention).
The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

Visit the NJDXA Hospitality suite on the 12th floor of the Crowne Plaza. The suite should be open around 9 PM on Friday and will start hoping after the DX Dinner.

ET, ETHIOPIA. Claudio, ET3VSC, continues to please many on CW on the 17 and 12 meter bands. Look for him on either band after 2200z, sometimes as early as 1030z. QSL via K3IRV.

IOTA NEWS.....
AS-089. By the time you read this, UA1PBP should have started a two week operation as UA1PBP/9 from the Kara Sea Coast West Group. QSL to RK1PWA.

EU-038. Joel, F5PAC, will be active from Texel Island, as PA/F5PAC for the IOTA Contest at the end of July.

EU-113. (Possibly EU-158) Steve, G4EDG, informs OPDX that he intend to operate from Kythira Island as SV8/G4EDG and possibly EU-158 as SV3/G4EDG starting appox. May 7th, for 2 weeks. This is a backpacking trip and operation will be 20 meters CW only with 5 watts to a dipole. QSL via home call.

EU-148. Operators F5AUB, F5OSN, F5RVI, F5DBX, F5UOE, F5BJW, F5BKB, F4CLO, F5JBR, F5VV and F5XX will be active as F5XX/P from Fort Brescou, May 24-28th. However, during the CQWPX CW Contest, F5XX, F5VV and F5JBR will be active as TM5B.

NA-041. NODXA member Byron, KF8UN, will sign KF8UN/KL7, and will be active (time permitting) from Sitka City Island, Alaska. The dates are July 7 through 10th, and he will start at 0700z. Operations will be on 40 and 20 meters. QSL via CBA.

J5, GUINEA-BISSAU. Baldur, DJ6SI, and the J5X team continue to be active until May 11th. There has been plenty of active on RTTY and the WARC bands. This should be an easy catch if some one needs it.

JD/M, MINAMI TORISHIMA. Katsumi, JD1BCK, seems to really like 15 meters. Look for him between 21270 and 21290 kHz after 2300z. QSL via JM1TUK.

JD/O, OGASAWARA. You, JD1BIA, was heard this week and weekend on 15 meters around 21280 and 21290 kHz after 0000z and as late as 0830z. QSL via JD1BIA.

JW PHOTOS. Rag, JW5HE, reports photos from Svalbard can be viewed at: http://no.photos.yahoo.com/la5he

KH2, GUAM. Members of Mitsubishi Electric, JA1RTG, JF1CPE, JI1EOP, JK1EBA, JR3OET, JA5AGW and JI0PFJ will be active as KH2/JM1YGG between 0800z on May 10th through 0100z on May 13th. Activity will be on 40, 20, 17, 15, 10 and 6 meters CW/SSB. QSL via JM1YGG for the bureau or direct to JA1RTG.

KH2, GUAM. A group from the JA2 area will be active from here between June 9-12th. Activity will be on 160-6 meters. The callsigns and the QSL information are as follows:
K1HP/KH2 (Yoshi) via JE2EHP KH2/JH2QFY (Aki) via JH2QFY
N3WW/KH2 (Ban) via JF2WXS KH2/JJ2CYO (Yasu) via JJ2CYO
KH2/JH2CYU (Michy) via JH2CYU KH2/JS2ITP (Yasu) via JS2ITP

LIGHTHOUSE ACTIVITY.....
Operators G0KJW and G0OWE will be active as homecall/P on May 13th from Longstone Lighthouse (LH 0234 - WLH Award). QSL via their home callsigns.

Look for SK0QO to be active between August 18th to 20th from Soderarm Lighthouse (LH 0175 - WLH Award). QSL via SK0QO.

LU1ZA, SOUTH ORKNEY ISLAND (Update). The station LU1ZA has not been heard since April 21st. However, OPDX has received some info about this station. The operator's name is Claudio, and he is in the Argentina Army. He is a Ham but not a DXer. He does not speak English, but thanks to Raymundo, YS1RR, on April 21st a few people were able to work this station. His QSL route is as follows: Serv. Auxil. de Radioafic., de la Armada, Av. Del Libertador 8209, Capital Federal, CC 1429, Argentina.

OJ0, MARKET REEF. Operators Arne/LA3IKA, Bjorn/LA5UKA, Paul/LA6YEA and Trond/LA9VDA will be active from Market Reef's Lighthouse (LH 0542 - WLH Award) between August 5-8th. They will sign OJ0/LA3IKA, OJ0/LA5UKA, OJ0/LA6YEA and OJ0/LA9VDA. Lars, OH0RJ, has also been invited to join them. They plan to be active on 160-2 meters, SSB/CW/RTTY. LA5UKA (ex-LC3NAT) will be active in the 2m NAC contest. QSL to homecalls except for LA6YEA (QSL via LA9VDA). Look for more info later by checking the following Web page: http://www.qsl.net/la9vda

OY, FAROE ISLAND. Max/ON5UR and Wim/ON4CJI of the United Radio team will operate from Faroe Island (Stremoy Island - EU-018) with the callsign OY9UR, from May 28th through June 7th. They will be operating on 160, 80, 40, 20, 15, 10 and 6 meters. Wim is expected to be on PSK31. Also, look for them on May 26-27th and June 8-9th as a /MM. They will be active during the 6 meter contest on June 2-3rd. There will be a special full color QSL cards for both callsigns. QSL direct via OY9UR: United Radio, P.O.Box 33, Zichem 3271, Belgium. Remember: The QSO is short, the QSL is forever.

QSL INFO AND NEWS.......
Fran, EA7FTR, reports that he has the logs for BA1RB, and any station who needs a QSL can send via EA7FTR: Francisco Lianez Suero, Asturias 23, 21110 Aljaraque, Huelva, Spain. He is also the QSL Manager for Jack, HC3RJ.

QSL MANAGER CHANGE. Steve, DJ7AO, informs OPDX that he is no longer the QSL Manager for Ray, DL2GG/YV5. The new QSL Manager is Sigi, DL3AMA. Send direct via the CBA or via bureau.

Allan, VK2CA, reports that Norried, H44NC, will be leaving New Georgia Island (OC-149) shortly to return to the USA for approx. 12 months. He will be carrying the H44NC logs from July 2000 onwards with him. The new address for H44NC, as of the 1st of May 2001, DIRECT ONLY will be as follows: Norried F. Chaisson, P.O. Box 2262, Springfield, MO 65801, USA. QSLs before July 2000 will still be answered, but only after returning to H4.

QSL INFORMATION FROM THE DESK OF OH2BN: "Effective May 15th, late QSLing of E44DX, H40AA, 4W/N5KO and 4W/W3UR will be done by Steve, KU9C. The procedure we use is to keep answering all direct requests for 18 to 24 months from the time of the actual DXpedition. At the end of that period, all remaining QSOs will be QSLed through the bureau network. Because we do not print extra QSLs for another round, a "combo late request QSL-card" has been designed to confirm these late requests at KU9C.
In the case of TX0DX, we will keep answering all direct requests up to September 2001, when the bureau release will take place. All TX0DX direct requests have been answered as of today and we hold no backlog." de Jarmo Jaakola, OH2BN

Update on PW0S QSL Status by Steve, KU9C: "It appears that I will have the QSL cards for PW0S, barring unforeseen shipping problems, the weekend BEFORE Dayton. I expect them to arrive at my QTH on May 11th. If this happens on schedule, I plan to issue ALL direct QSL cards that are clean in the log by Tuesday, May 15th (it will be a busy weekend, but most of the preparation is done). Thus, many of you should have a shot at having your card in advance of the Dayton Hamvention. If the schedule slips, my plans are to do what I can do before leaving for Dayton, and finishing the process upon my return. Some of the PW0S members will be at Dayton, and will be hand carrying the paper logs, which will allow me to research any of the 'not in log' QSOs. Thus, if your card does not appear in your box immediately, please give me a few weeks to research the logs, as you may well be not in the log. I'll post a note when the QSL process is 'up to date'. Thanks to all of you that included donations with your QSL requests. The donations will be forwarded to the PW0S team to help pay down the expenses of this operation. If you would like further details, PY7ZZ's web site has a very detailed accounting of the DXpedition expenses, which you may find of interest. Go to the log search page at:
http://www.soutomaior.eti.br/mario
Click on the 'Costs' shortcut. Donations are still being accepted by myself and W9VA, Bill, as we are still trying to close the gap on expenses..... 73 es DX IS! Steve KU9C"

OPDX has been asked "What is the QSL status of the VK9XY cards?" Last we heard was cards were coming out (for the U.S.) the first past of the year. Does anyone have a more current update to report?

Doug, ZP6CW, informs OPDX that he has had a houseguest for the last thirty-some days, Ian, G4DIE. He obtained permission to operate and was active on CW and PSK. He has made over 400 PSK contacts to date. Ian was scheduled to leave May 1st. His QSL MANAGER is Doug's wife, Dani, ZP6CU. Doug states that, ZP6CU continues to be his manager, and manager for another North American there ZP6GG. She still has logs for S07UN and CN2UN, and they still have the cards on hand for those operations which are now QRT.

Raul, LU6EF, GACW Coordinator and QSL Manager, announced this week that "The GACW Group will accept eQSL cards to achieve the awards that they are currently using. Also, they will accept eQSL cards for any

special certificate of merit issued to relevant individuals and/or organizations. In other words, the GACW coordinators will spread the benefits of this system to more than 500 members in Argentina and some other countries to encourage and enforce the use of this very safe, quick and cheap method of confirming amateur radio contacts.

R1, FRANZ JOSEF LAND. R1FJL has been active on 12 meters lately. Check 24910 kHz around 1200z and after 0800z. QSL via UA3AGS.

SPECIAL EVENT. Peter McDonald, VK3DI, Secretary, EMDRC Inc., informs OPDX that the special event callsign AX3ITU will be operated by members of the Eastern and Mountain Districts Radio Club (EMDRC) to celebrate the International Telecommunications Day for 24 hours commencing 0000z on May 17th, on behalf of the Wireless Institute of Australia (Vic Div). This is a relatively rare prefix for those prefix hunters. All HF bands will be activated at some time during the period of operation. QSL via VK3ER: P.O. Box 87, Mitcham, Victoria, Australia 3132. All logged callsigns will receive a QSL via the Bureau unless a direct request with sufficient return postage is received within 90 days of event.

SPECIAL EVENT. Look for special event station EO56JM to be on by the Crimea Contest Club now through May 13th. QSL via KG6AR (Direct or Bureau).

SPECIAL EVENT. The club station PI4TIL will use the special callsign PA6T during the period May 27th through June 3rd. During the field day weekend they will enter the CW contest and the 6 meter contest. During the weekend of June 2nd and 3rd, they will be active on 80-6 meters, 2 meters, 70 cm, 23 cm and 13 cm. Operations will be on CW, Phone, SSTV, RTTY, PSK31, ATV and satellites. On Wednesday, May 30th, they will be active on SSTV from 1800-2200z around the usual SSTV frequencies on 10, 15 and 20 meters.

SPECIAL EVENT. The Old Barney A.R.C. announces a Special Event operation for the "International Lighthouse Activity Weekend". Station W2T will be operating from the "Tucker's Island Lighthouse" in the "Tuckerton Seaport", Tuckerton, New Jersey, at 1300z, August 18th, through 2300z, August 19th. Suggested frequencies are: 7280, 14280, 21380 and 28480 kHz (146.835/rpt). QSL via N2OO, PO Box 345, Tuckerton, NJ 08087 USA. Send a 9"x12" SASE with 55 cents postage for QSL and Certificate... or SASE/SAE+IRC for just a QSL.

TI, COSTA RICA. Philip, N0KE, will operate in the CQ WPX CW Contest as TI5X from TI5KD's station as QRP/All Band entry. N0KE will handle all contest QSLs for TI5X and TI5/N0KE outside the contest. ADDED NOTE: Over the previous two years contest operations were TI5N, and TI5KD handled the QSLs for this and other contest operations of TI5N.

USI ACTIVITY.......
The Roane County Amateur Radio Club (KW4JS) will be active beginning 1300z on May 19th, from Thief Neck Island, Tennessee. Thief Neck Island is in the Tennessee River in Roane County. Operation will be on all bands 20 through 10 meters. QSL via KW4JS. The USI reference number was not provided.

VO2, LABRADOR, CANADA (Update). Fred, K2FRD, want to make one last plug for his Labrador DXpdition before he leaves for the north country on June 1st. He expects to commence operations about June 6th and will operate daily until he QRTs on August 31st. This will give the worldwide hams an opportunity to contact CQ Zone 2 and ITU Zone 9 (which are usually not active/listed every week). In brief, Fred will be operating mostly SSB (with occasional CW) on 10, 12, 15, 17, 20, and 40 meters and CW on 30 meters per the schedule on his Web site. Normally, look for him near the MUF, which given the state of 10 meters recently, could be 17 or 20 meters. For more on his frequencies, bands, and schedule details, check his Web page at: http://sites.netscape.net/thefred3/labr1
Fred, K2FRD, states in his last press release: "I'd like to thank you (KB8NW) and the Ohio/Penn DX Bulletin, and the many hams worldwide who have provided encouragement and moral support for this trip. I will do my best to live up to everyone's (and my own) expectations. See you on the air......73, Fred K2FRD"

VP8, FALKLAND ISLANDS. Only a few more days to work VP8SDX. They will go QRT on May 9th. QSL via GM4FDM.

XU, CAMBODIA. The station signing XU7ABC has been active over the past week on 20/17/15/12/10 meters CW. Check around 18072 kHz, 24903 kHz and 11 kHz from band edge. QSL via G3XAQ. Meanwhile, XU7ABN, has been playing on RTTY on 20 and 15 meters between 1330 and 1400z, also after 1800z.

YO, ROMANIA. Jean Michel, F6AJA, will again be active as YO/F6AJA for the 8th year from Suceava (450km north of Bucarest). He will operate from the YO8FZ's QTH during his free time. Jean will be there from May 14-20th.

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active from here during May 7-17th. QSL via VE3HO.

Enforcement usually boils down to economics. The FCC handles a lot of spectrum, with a minimum of budget and manpower. As usual, the "customers" with the most money - like commercial interests - get the best service.

Since there are so many hams and members of the general public that support more enforcement maybe we could establish a fund that would be used specifically to subsidize increased FCC enforcement of the spectrum at issue. I would be glad to donate on regular basis to such a fund provided it showed results for my money.

I don't mean that we should just send our money in, and hope it gets used for the purpose intended. Rather, let the FCC establish a cost figure for the apprehension of each offender. Then, on a monthly or quarterly basis they could submit to the fund manager a list of those offenders caught during this time period- and the disposition of each case.

The fund manager would review the cases presented, and reimburse the FCC - on a percentage basis, 50-50, 30-70, etc. - for those apprehensions which were of benefit to the ham community.

It could be similar to the programs used by police where they get a piece of the proceeds from each drug bust where cash and/or property is confiscated. Since many of the offenders that would be caught would also be in possession of radio equipment that could be of value to legitimate radio services, this equipment could confiscated and auctioned off to licensed operators. The proceeds of these auctions would then be added to the enforcement fund to help pay for more apprehensions.

(and once a search warrant was executed I wouldn't be too surprised if they found drugs, stolen property, etc. during the search that could also be confiscated - and would generate additional criminal charges for the suspect)

Therefore, the harder the FCC worked, the more they would receive in return. This would change the FCC enforcement efforts from an overhead expense, into an actual profit center - a very rare thing in Government.

I have a Kenwood TS-570 and an Ameritron AL-811H. I am looking for a connection cable (shielded audio type cable with standard male phono plugs for the 811H) to interconnect with the 570 (7 pin male DIN connector). Hopefully this is a manufactured item as my old eyes are to weak to work with a DIN connector, and the hands are unsteady to attempt the fine solder. Thanks for your time and input. W2JRM Jim 73's

It appears the Michigan Militia is now giving
the United Patriot Radio clandestine station
billing on it's web page. It's at www.pbn.4mg.com
Lot of bizzare stuff, including a recipie for
some kind of a "de-toxification" drink that reads more like
the sasperella that Shemp Larry and Moe made up
on one of those great old two-reelers. Anyway check
out the site for references to the Kentucky radio
clandestine.

If enough examples are made of the ones that are caught, it will certainly have an impact - for awhile. All that's needed are some heavy fines and a lot of publicity.

6647. FS Collins 51S-1

Collins 51S-1 F S/N 9420
Comes with a 2.4 SSB Filter, and 800 CW filter
"BIG Round Emblem" Receiver. It looks and works great. It
is in a Collins 30L-1 case, and its in nice condition. The case has
been
repainted (with Collins color) , also looks great. New power cable,
and copy of the manual
included, the radio was aligned by my Collins technican Wayne Spring
W6IRD.

Much as I support your good thoughts, when the enforcers get a
"slice of the action", "the action" is open to widespead abuses, as
we have seen in the so-called "drug war".

The FCC has always prided itself on being "squeaky clean" and making
short shrift of its own folks who didn't want to be so, and I
for one would rather see it continue that way.

>(and once a search warrant was executed I wouldn't be too surprised if they
>found drugs, stolen property, etc. during the search that could also be
>confiscated - and would generate additional criminal charges for the
>suspect)

According to U S criminal law, that could only happen if the
contraband was in plain sight or in a place where one could expect
to find the items specified in the warrant. The U S Marshals do that
sort of search today.

Contraband is contraband - it is material that cannot be resold
to others. Again, seizing stuff for resale leads to "dirty
opportunities" when the enforcement agency gets a slice of the
action. That's why the FCC is ordered by the court to destroy all
equipment seized on its behalf by the U S Marshal Service.

Like it or not, CBers out number amateurs easily. You can find more people operating at any one given moment between 26.555 - 28.000 than you'll find on all the HF ham bands put together.

It would take an incredible amount of time and money to clean up that mess.

So you ALWAYS drove 55 when the national speedlimit
was 55? That 55 farce was instituted in 1973 to save fuel during
an oil crisis but the lamebrains in DC failed to set an expiration
for it and it took years before the safety nazis lost their
stranglehold on the legislators to finally end the 55 NHSL
only a few years ago.

So now the question is...Who determines which laws are good or evil and by this which do I "ignore" and which do I obey.

If I determine that grand theft-auto is an evil law, do I have to right to ignore that law and steal your car?

That's why I suggested that the payment of any monies be controlled by an
independent review authority on a case by case basis - the civilian
enforcement fund management.

> The FCC has always prided itself on being "squeaky clean" and making

I agee. Still, if implemented correctly, the plan could work to everyone's
(except the illegal operator's) advantage. I only spent five minutes
thinking about it. With some real effort and expertise I'm sure a workable
system could be put together.

> >(and once a search warrant was executed I wouldn't be too surprised if

>

Very true. However, in my past law enforcement experiences, it is usually the case that TV's, VCR's, stereo equipment, etc. are displayed in plain sight - stolen and legal stuff is often on the same shelf. And many of the druggies leave their stash and paraphenalia lying right on a coffee table or nightstand. Once one piece of stolen property - or a stash of dope - is found, a quick call to a judge (while still at the suspect's residence) and a telephonic extended search warrant will be issued.

> Contraband is contraband - it is material that cannot be resold
> to others. Again, seizing stuff for resale leads to "dirty
> opportunities" when the enforcement agency gets a slice of the

True, but as I understand it "contraband" is stuff that is illeagal to own by anybody. Things like fake Rolex watches, elephant tusks, tiger skins, etc. However, things which are otherwise lawful to own by the proper persons (like radio equipment) are often auctioned off by various police agencies every few years when they clean out their property rooms. Even firearms once used in a crime are sometimes re-sold to licensed dealers.

And, according to my suggestion, the proceeds of these auctions would go directly to the civilian enforcement fund administrator. Only later, on a case by case review basis, would the fund administrator release any of the funds back to the enforcement agency.

> Is this a terrible idea?

I can't forsee any circumsances in which I would want to use the AC wiring ground for any sort of antenna grounding.
If I had to rig an antenna to use on a second floor aparytment (for ham radio use) I'd rig something like a dipole using two Hamstick type whips (vendors sell a fitting for just this use, it has mounts for two horizontal hamsticks) with a temporaty mast so that I could set it up and take it down after each use. You could rig it to an old camera tripod or some such thing. And I'd forget a antenna ground, the AC ground is the safety ground, leave it at that. And run low transmit power to minimize RFI.
In some situations use of a random wire might be OK, but one must always be aware of all possibilities for lightning attraction and for problems involving any other persons in the area. THINK through it. Research it. And remember, all such mimimalist installations are compromises and work like them.

What news group did YOU think YOU were in? A TV-R7000 adapter about for an R-7000
makes perfect sense - to those who know enough to know what they are, what they are
connected to and what they are used for (e.g. VHF/UHF TV DX).

Most of the "Safety Nazis" were/are highway patrol men and women who see the 55 MPH limit as a great way to generate revenue through fines. The evidence that a crash at 65 MPH is less survivable than a crash at 55 MPH is anecdotal at best.

I think that laws respecting the life and property of others are pretty much universal, so let's use an example that has a little more common sense.

150 years ago, it was a felony to harbour a runaway slave in the free states. The crime was punishable by imprisonment of up to one year. Would you obey this law, or would you break it, knowing what the penalty would be if caught?

Maybe I've got my definitions confused, but isn't full quieting when a
transmitted carrier is strong enough to cover all background noise at
the receiver?

I don't recall ever hearing/being told/reading that Full Quieting
applied only to FM. I could be wrong.

Yes, my apologies, I thot that's what we were talking about.

> However, if you are going to advocate the legalization of all drugs,
> you cannot continue to downplay their effects by comparing them to
> alcohol ...

Agreed

> .....Instead of talking about the
> drug trade, I would instead center on the harmful effects of these
> drugs as the core reason why they should not be legalized.

The harmful effects are well know but *largely* affect only the
addict and people who love or depend on him/her. Rather or not
the WOD has alleviated these problems is questionable. It
certainly hasn't eliminated them.

What it has done is extend "drug problems" to those of us who do
not use drugs by increasing the price of addiction, and drug
profits 1000 fold. As you point out, the gangsters who used to
machine gun each other and innocent bystanders over liqueur
territory, etc., are now doing the same over drug territory,
etc. Perhaps worse, many drugs are even more addictive that
booze and by driving the cost of maintaining their addictions
thru the roof the WOD causes literally 1000s of crimes every
day: robbings, burglaries and muggings that too often become
rapes and murders. Call me selfish, but addicts have a choice of
whether to use drugs knowing there is a price. The victims of
these WOD-driven crimes do not.
>
> In fact, to be perfectly honest, if we're talking about the
> legalization of all drugs, this conversation is effectively over.

OK

> No country in the world today has legalized all drugs, and no country in
> it's right mind would ever think of doing so.

But I must disagree on that. The USA had *no* federal drug laws
what so ever for the first 100+ years that marked our greatest

expansion. Coca Cola was "the real thing". Every major city and town had opium dens. Some were eyesores and addicts wasted away and died just like alcoholics because they their spent every cent on drugs instead of food and other needs. But they weren't killing ordinary citizens like they are now.

Moreover, police were few and couldn't make warrentless (i.e. "unwarranted") arrests. If an officer tried to arrest you without a warrant you had every right to defend yourself as tho it was a kidnapping! We could buy guns thru the mail and dynamite at the hardware store! Yet there was less crime than there is today ... and all to protect drug addicts from themselves. I know people who are or were addicts. I'm sorry for them and sorry there are such a things as addiction or addictive drugs but there are and I'm not God. Neither is our government. I fail to see how blowing $billions every year, that should have been spent on schools, civic projects, or even new radio gear, has bettered the situation compared to, say, 1890.

Guess we'll just have to agree to disagree.

Using tank turrets to poke holes in a building where kerosene lanterns are
burning is a perfect way to start a fire. Using incendiary gas bombs is
a perfect way to start a fire. Why do you think the authorities lied about
them for so long?

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1236147097

It will Pick up 2 way radios, police, Aircraft, Fire, Cell phones, Cordless Phones, TV stations, just about anything.

Its range is from 29MHz - 956MHz

This is a well kept scanner in Excellent Condition and works perfectly, It was mainly used when

I was in aviation school 1993-5 and kept in the included soft case.

This scanner will do the *Test Mode* holding L/OUT, 2, and 9 at the same time at power on to allow

for "Full Spectrum" of frequencies.

I cannot help you with the test mode since I don't use that, but it does do it, you could

look this up on the internet If you were curious.

The date code is * 6A3 * or June 1993 a Good year no doubt.

It was stored in the Box and comes with the Whip Antenna, unused Belt Clip, and AA Holder Battery Pack.

It comes with the everything as if it were new packed in the box with manual and even the receipt from 1993.

It comes with a few extras like the optional Archer Power Supply and Carry Case.

Check the Tandy Page for more information.

Shipping will Be $10.00 UPS insured in addition to bid Price in continental US.

I accept Palpal and Money Orders (US Dollars) only.

Sold as-is but is in excellent working order will not be DOA. Contact must be made within 24hrs from end of auction with address and payment method. Payment must be made within 10 days or item will be relisted. I reserve the right to reject bidders with too many negative comments.

Thanks for looking and Good Luck Bidding!

From the IEEE Dictionary: "quieting sensitivity (frequency-modulation receivers) The minimum unmodulated signal input for which the output signal-noise ratio does not exceed a specified limit, under specified conditions."

Note the "unmodulated" requirement which would prohibit this term from being used associated with SSB.

A good rule of thumb is if you cannot identify a victim, it is an evil law. And no, society cannot be a victim. That is just socialist BS. The laws against oral sex between married couples is the ideal example of such an evil law. Do you advocate obeying such laws, Dwight?

When I lived in Queen Creek, AZ, there was a cash-cow section of road where the speed limit between two cotton fields was 30mph with not a house in sight. Do you think that was a good application of the law?

> If I determine that grand theft-auto is an evil law, do I have to right to
> ignore that law and steal your car?

That's not a victimless crime, Dwight. Theft implies the use of force and has been illegal for centuries. Smoking marijuana, OTOH, under a lot of circumstances, is a victimless crime and wasn't even illegal until the 1930's when the marijuana laws were passed to try to control the Mexican populations in the Southwest states, i.e. they began as rascist laws according to The History Channel.

So it could apply to an unmodulated AM signal, then? If so, my statement
was correct. If not, I stand corrected. I hope someone will let me know
which it is.

Funny you should bring this point up. My brother, a fellow Ham too (General Class), asked that question at the Detroit FCC office. He works with a guy, whose father was the head of that office until he died a while back. So he has some indirect connections to the FCC office. When he asked about confiscated equipment, figuring we could get some great gear (modified Ham rigs) cheap, we found out you can't buy any of it, period. In fact the Detroit FCC office has a contract with a local junk yard, they won't tell who, where they take everything. One it gets there everything goes right in to the car carcass crusher, no exceptions.

If you think about it that does make some sense. Why would the FCC put equipment back out on the "streets" where some licensed Ham will end up selling it back to some CBer who then uses it on 11m again. I can just picture some Ham bidding on a pile of used illegal 11m junk, then going around to local flea markets selling it back to CBers at a nice "mark up". That sort of defeats the propose of enforcement don't you think?

My problem with all this is that McVeigh will be executed and the other criminals responsible will be forgotten. Indeed they already are. Anybody remember John Doe #2 .. the guy several witnesses saw with McVeigh both in the truck at the scene of the crime and before? Well, some investigative reporters checked into who McVeigh had phoned in the weeks before the bombing and showed pictures of them to witnesses who in turn ID's John Doe #2 as a German intellegence operator in this country to spy on neonazis; but a couple jurors who demanded to pursue that got kicked off the grand jury that indicted McVeigh. Then there were the seismeographs that recorded multiple explosions. Perhaps more telling is the testamony of USAF General Partin (sp?), an expert on bomb damage assessment, who said that McVeigh's fertilizer bomb couldn't possibly have done all the damage, and other explosives experts who said that some of the building's critical supports had been taken down by contact explosives. And the list goes on to include the commo clad leg found in the bomb crater.

I'm not complaining about McVeigh's punishment, I just want to know what happened to John Doe #2 and whoever set the charges inside the building. Stinks worse than the JFK assasination.

That's a big 10-fer good buddy. I'm sure you gets lots of horizontal
gain with a 4-ft-long half-wave antenna. These dumbasses don't even
recognize marketing hype when it's served to them on a silver platter.

I don't see where it's that minor at all. If one of my kids got hurt because of someone driving down the side of the road, I'd hunt them down and slowly kill them. If someone scared them with a near-miss, their car would not be recognizable when I was done with it. In short, nobody screws with my babies, else I become the mother of all mother bears.

Lots of people take driving infractions lightly until someone gets killed. All of a sudden there is a great wailing and gnashing of teeth as everyone wonders what can be done to make our roads safe. For starters, might I suggest taking ALL laws seriously, not just the ones that fit your own personal agenda?

I'm with you, Gene. If you think I said "right down there", you are
mistaken. I ride a bicycle. Vehicles driving on the shoulder are
deadly weapons. What gave you the idea I consider it minor?

Maybe not you personally. Just making a point that while many people
might consider something a very minor violation of the law, it might not
be so minor (and perhaps even for a very good reason) to another person.

Agreed, the piles of crap radios, i.e. Cobra, RCI, Galaxy, etc. should all
be put under the hammer. However, a lot of these pirates are running good
Yaesu, Icom, and Kenwood gear which have only had the "MARS" diode clip mod
done.

Additionally, a system could be put in place where the items were sold to
specific licensed individuals for personal use only. There is a similar
program in place where the military sells surplus M1 Garrand rifles to
qualified civilians on a one by one basis.

Like I said in an earlier post, I only gave it five minutes of thought. If addressed seriously by the right people a workable system could be established. After all, this is America and I don't believe that all of the ingenuity and problem solving skills we once possessed as a country are all gone. I know there are current regulations which might prevent the concept execution, but regulations can be changed once it was shown that it would benefit the public and help with the enforcement effort.

I guess it boils down to one's mindset - is the glass half full, or half empty? :>) As with all issues, change takes effort. The greater the change the more effort it would take. But nothing is impossible, and if only half the effort put forth in complaining about the issue could be applied to creating a solution, it would become a reality.

But that's the catch. Just like the code issue, for many people it's easier to complain about it than to put forth the effort to achieve it. It's easy to get a large group of people to agree to a concept, but when you ask the individuals to "put their money where their mouth is" all of a sudden your group has evaporated...

If this thread has done nothing but made people think about solving the problem, then it had done it's job. Who knows what may develop over time...

Could start a new sport, "Pirate Hunt", to replace Fox Hunting, where the local Hams track down local CB Radio pirate operators, and collect enough evidence to get them busted. Then the Hams who took part in the evidence collection are given an opportunity to bid on the confiscated equipment, on auction day, as a reward for their "public service" to the community. I doubt most hams would pass up a chance to pick up a nice Yaesu, Icom, Kenwood rig, base or mobile, for $100. It's sort of like taking a chance that you might win something at a Hamfest for the cost of the entrance ticket. In large metro areas, with a large population of pirates, I'm sure there are many chances to win. ;-))

Sideband, I will put a cup out for you since you are begging to be correct about full quieting. Notice Cecils definition, frequency modulation recievers, does this give you enough of a hint- that it is FM only. Do yourself a favor while studying for the ham test don't just memorize the answers actually learn what the question mean. If it was fill in the blanks the ham population would decrease by two fold.

Now there you go! Another good idea - see what can happen when people start focusing on a solution instead of just complaining about the problem? There is no reason why there couldn't be more than one type of active program to address the problem. Several groups active in executing any type of solution would go a long way in reducing and/or eliminating the problem.

Pirate hunts... Excellent idea - a lot more fun, and considerably more rewarding.

But so does FM. True, the noise vs. signal curve is different but it's
still there.

The cited definition does specify FM, but really the concept of "full
quieting" is not at all meaningless on AM. Especially when you consider the
effects of AGC, which will back off receiver gain and take the channel noise
with it.

It's a bit more of a stretch, but really the concept of quieting isn't
completely meaningless for SSB either, again considering AGC effects.

An AM carrier without modulation looks just like an FM carrier without modulation. So it seems to me that "quieting sensitivity" could apply to an AM receiver as well although the term "full quieting" is generally understood to apply to FM.

Since we don't live in that time, your question doesn't really mean
anything. You don't even know what you would have done if you had
lived back then. Remember, you would not have known what you know
today - slavery was common back then and very few opposed it. What
makes you think that you would have been one of those few? For all
you know, you might have been a slave owner instead. In other words,
if we're going to talk about today, lets stick to realistic situations today.

Hi: I was reading through and old (1979) Popular Mechanics magazine and there was an article on slow scan tv. It looked pretty interesting and fun. I've messed around with ATV some, but DXing on slow scan looks like it would be a blast.
Does anyone still do this? What equipment would I need (preferebly cheap) to get into slowscan with my hf gear? What are the normal freqs/bands used?

Ok...

I stand corrected.

Allow me to rephrase what I'd originally stated, then..

My 2 watt AM carrier covered up all the background noise on the other guy's CB, which was roughly 20 miles away, according to his signal report.

Tom,

Sounds like you are not on HF much. Plenty of activity of 14.230 and
14.233. All that is needed is a computer with sound card, SSTV software
(bunch to choose from) and the HF rig. Simple. To find software and info,
use internet search for SSTV.

Nice attempt at diverting the issue, Dwight. The point is that your
attitude toward marijuana is just as unenlightened today as the
attitude toward slavery was 150 years ago. We are in another era of
prohibition. If we remain a free country, it will be repealed.

What percentage of freebanders get caught? What percentage of speeders
get caught?

6730. FA -Comet SMA3 Tri-Band HT Antenna - NEW

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-08 13:06:46 UTC
From: jcsarp@aol.com
Message-ID: <20010508090646.02417.00002265@ng-mc1.aol.com>
Source record: 89809

NEW - NEVER USED Comet model # SMA3 Tri-Band (3 band) HT and Scanner Antenna. Designed for TRANSMIT AND RECEIVE on the following frequencies ... 144 MHz to 148 MHz (2 meters) ... 420 MHz to 450 MHz (70 cm) ... and 902 MHz to 928 MHz. It is also a WIDE BAND RECEIVING antenna that covers 118 MHz to 160 MHz ... 250 MHz to 290 MHz ... 360 MHz to 390 MHz ... 420 MHz to 470 MHz ... and 820 MHz to 960 MHz. It is one of the finest handy talkie (HT) and scanner antennas that you can buy. The Comet SMA3 is 10" high and comes fitted with an SMA connector. It's ready for use on some of the most popular HTs on the market today like the Yaesu VX-5R and FT-50RD ... and the Icom IC-Q7ABC and IC-T81A. If YOUR radio has a BNC connector, there are low cost adapters available that will allow you to use this fantastic antenna on almost ANY HT or scanner. This is a brand new antenna and it comes packaged in the original factory vinyl carry pouch.

Check it out at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1236073912

6731. FA - Kenwood SC-35 Soft Case for the TH-78A - NEW

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-08 13:07:21 UTC
From: jcsarp@aol.com
Message-ID: <20010508090721.02417.00002266@ng-mc1.aol.com>
Source record: 89810

NEW - NEVER USED Kenwood SC-35 soft carrying case for the famous TH-78A Dual Band HT. This Kenwood SC-35 case fits the TH-78A with the standard size battery pack. The SC-35 case is no longer in production. If you have one of these great TH-78A radios, this might be your last change to buy a "new" factory carrying case.

Check it out at:

> would like to start one, but really don't know where to begin.

I'd start with Margie Bourgoin, KB1DCO at ARRL (kb1dco@arrl.org). In her job she has extensive dealings with educators, and might know of something already existing. If not, she would be able to publicize your idea to the right audience, and get feedback.

Also, go to http://www.arrl.org/FandES/newsletters/ARIC/ for more ideas.

FS: I have a Telrex rotor control box that is the correct control head
for the big Telrex chain drive rotor.
This one is in very nice clean looking condition. It also includes
an extra pair of selsyns so it could be
used with prop pitch rotors too. It also has the extra compass
plastic overlay for it. Price is $150 for it
(+UPS). Mike at (979) 693-1461 or email: gspubl@tca.net

In your case of hte squatter, you stated that noone had noticed him. The major and important difference here is that freebanders have been noticed and lots of people are raising hell about it. To bring your analogy into line with freebanding, the squatter would have had to hold onto the land for the required number of years through either armed force, or simple civil disobediance, not by not being noticed.

I have never run my CB this way. I do have an echo mic on my GrantXL,
but the echo "volume" is barely cracked open. According to three
different modulation meters, I'm set at 99% modulation.

The fellow I was talking to runs his radio in much the same way. He has
a Cobra 148 (same radio, basically), and has his set similarly.

Any more than 100% modulation is going to sound like crap, and probably
bleed over. I know this, and those CB'ers who know this try to avoid
bleeding over, etc...

Now, if you don't mind, I need a nap before I go down to the testing
center to test for my ticket. Have a nice day, Rob, and I hope "huked on
fonix" continues to help your English grammar. ("there's usefull"? Come
On!)

Sure....even if you're avenging the murder or attempted murder of your
child, you are still subject to the law and any resulting consequences.

So you let off the gas some more. It doesn't take a brainiac to figure
out that arriving at your destination a few seconds later is still much
better than dying in a high-speed crash on the freeway.

The freebanders go relatively unnoticed by the FCC and the FCC is
who matters.

And, of course, I never said anything about a half wave antenna, either.

Goes both ways, I guess.

> WHAT HAS THE ARRL DONE FOR YOU LATELY?

I kicked the ARRL habit 20 yrs ago. I now have a life and no
longer believe that the world revolves around ham radio. I often
wonder if the ARRL has ties to the Unification Church? It would
not suprise me if upon visiting the airport if I saw a Moonie, a Hare
Krishina and an ARRL member, each within 10 feet of each
other all in a row, with tables hawking their "brand of religion".
The Moonie would be selling subscriptions, the Hare Krishina
would be bangin his tamboreen and the ARRL guy would be
sending "jesus & morse code saves" via a 30 year old Lafayette
Radio code practice oscilator with a half-dead 9V battery inside it.
That's what I love about ham radio. Still the only hobby with more
per-capata screwballs in it than Bellevue State Hospital.

Actually you can run good sounding audio at more than 100%. This requires a modulation scheme other than you have in your 'CB' set. So this leads me to ask this....how can a meter read 'modulation' in the first place?

I was under the impression that in order to read Peak Power, than one needs a O-scope, one that is calibrated preferably.

Not to mention the fact, that unless you are running class C RF, and class B AF (for AM) then you can NOT ACHIEVE 99% anyway.

Cecil, It is much easier to catch speeders.
First Fact How many vehicles are on the road? It is like crapshooting.
Talked to a State Trooper today at 4:00pm 1/2 way thru his shift he had
written 14 tickets. Why because there are many asshole breaking traffic laws
daily, and there people out there enforcing the Law. How many people use the
freeband? As compared to the minute number of FCC agents enforcing the Law

Hello folks,

Don't get much chance to get on these newsgroups, too busy writing
software:-)

Just to say that you can download a trial of NuMorse Professional from my
website. This program is a completely rewritten 32 bit Windows Morse code
trainer program based on user feedback and suggestions from the tried and
tested 16 bit NuMorse Program.

There are plenty of bells&whistles and loads of new features. Currently
two complete code training courses are included with the program with the
possibility of more to come.

Hope you like it.

6769. Long Island Repeater Info Needed

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-09 12:55:24 UTC
From: Harris <aharris@bookworm.suffolk.lib.ny.us>
Message-ID: <07bK6.4442$DW1.204207@iad-read.news.verio.net>
Source record: 89749

Hi All,

I'm looking for accurate info on any 2M or 70cm repeaters on the east end of Long Island (east of Riverhead). The info in the ARRL repeater directory and artsi database is pretty sketchy and out of date.

Thanks,
Art Harris N2AH

Whatever piece of crap newsreader you're using, it just violated an RFC
by putting whitespace in the Newsgroups header. As a reslult, many news
servers are either going to chop off the second news group that you
added or else reject your post entirely.

No loss at all.

I would suggest you forget the echo completely when getting on the ham bands. It may please all the 12 year olds and those who think like 12 year olds on cb, but it doesn't fly on ham radio.

Don't take it too hard. Some folks simply can't comprehend what it must
be like to drive without constantly paying attention to potential hiding
places for cops rather than the road itself.

That's not completely correct. I believe that the time limit is about 4 years. If I went and 'established' myself on that land for long enough and no one said anything about it, then while I may have been there illegally in the beginning, I do have a legal right to be there, and the courts in Texas will back me up on it. I'm not sure if it falls under homestead or imminent domain, but it is the law, at least here in Texas. I know of people who have lost several feet off of their property line in this very same manner.

It works both ways. Some people can't comprehend the peace of mind
that you have when you don't care where the cops are hiding.

All you have to do is go a little slower then all those other
drivers, that are looking over their sholders for cops, and the
cops won't pay any attention to you. In the end, does it really
matter whether you get there a minute or two before me? If you
get there first, do you win? If so, what do you win?

Suggest you check with a lawyer, it isn't that simple. Homesteading and
imminent domain have nothing to do with it.

I don't <shudder> save Roger's posts, but there are others on the net who have immortalized him years ago. Since he is reposting old business, I thought I'd reciprocate by posting the URLs which lampoon and deride him.

They go back to 1997. I'll post several of them, but will partially quote only the first one.

At http://iacw.usenet-performance-art.org/guests/week3.htm we read the following:

"Wiseman, don't bother following this up. You are worse than the worthless cunt I thought you were 24 hours ago. You are a worthless cunt without a single shred of human decency, a pathetic little plagiarist caught out by one regular and TWO FUCKING NEWBIES who still tries to bluster his pathetic way out of a self-spun trap. If you are not so thoroughly ashamed of yourself that the contemplation of, at the very least, net suicide is going through your twisted little mind, then you are further gone than Gilbert T Sullivan. Fuck, Wiseman, even the HFW shun you, and that's saying something.

I shit on you, Wiseman. I piss on your lowly worthless carcass. You are a twat, a no-good fuck, a worthless scumbag. You stink, you're lame, and you are the lowest of the low. You are a complete and utter waste of a good fuck. Someone in your family tree should have worn a condom, permanently, or at the very least on the rare occasions where they were attempting sexual congress within their species. You are a walking advertisement for post-natal abortion. To refer to you as pond life would be an insult to amoebas.

Don't just fuck off and die, Wiseman. Fuck off and torture yourself to death, and take your fucking time.

* and although it may not be as good as the one you STOLE, this diatribe is original, cunt (c) Mark Bullock 14 October 1997"

Date: 1997/10/07

Roger Wiseman wrote another love note to JIIM:
>In article <617h3g$ij3@snews2.zippo.com>, parrot@squawk.com (BIIGOTED
>RACIIST JIIM) said:
>>Roger Wiseman prevaricated:
>>>Desperately parrot@squawk.com Liar (BIGOTED RACIST JIIM) Wilson whines:
>>>>Roger Wiseman did say:
>
>Hey Parrot. I think you are a fag. You big fag. <giggle, snort!>
>>><snort, sputter>
>>Say again, Rog?
>
>I am not Rog,

You can't help it, can you? You *have* to respond whenever anyone
says your name.

> but if you want to blow me again, go ahead.........

Roger blinks his bleary, mucus-crusted eyes as he steps forth from his
Dark Closet of Denial into the Light of the World. No longer will he
live a lie. Listen up, world; Roger Wiseman is Here and he is Queer,
and he wants the WHOLE WORLD to know....

>>>>>>And Craig Wilson and Jeff Boyd would have a contest to see who would wet
>>>>>>his 'nads to get saved.
>>>>>Hairline still receding, Wilson?
>>>>Sores still oozing, Leper?
>>>Tongue ready to soothe them, Liar?
>>
>>Do you still have a tongue, or has that rotted off too?

I guess that went along with your jaw....

><As Wilson> "Dear Hair Club For Men: I'm a short, balding
>geek who needsto get a date other than the livestock, can you
>help me out, fuckheads?....."

<As Wiseman> "Dear Ann Landers: Is it normal for a 45 year-old man to
grow breasts? What about hair growing on the forehead and palms? Is
this a normal sign of aging? Signed, Not Quite Human in NY..."

>>>>Well, look who finally popped his malformed head up out of his ass! It's
>>>>Craiggy the Bedwetter Wilson.
>
>Cwaiggy gets uptight when his problem with bladder control is mentioned...
>>>Cwaiggy admits his head is malformed.

Woger starts a one-man cascade! Let's have a round of applause!

>>Don't talk, Leper.
>
>Cwaiggy's head is reminiscent of the Rocky Mountains.........

Roger's head..... well, I guess that's his head. It's kinda hard to
tell. It's got eyes and a mouth on it, anyway....

>> At least I've still got my nose.
>
>And it is _still_ stuck up my rectum.....

The gods only know what you've got stuck up there, Rog. How long has
it been since you checked?

>> The Dark Spectre
>
>Cwaiggy's been using his comic books, oh, sorry, Cwaiggy, "graphic novels"
>for insipration

Insipration? <snicker> Typo-lamer Rog needs to spellcheck his own
posts, methinks...

>...usually he uses "Mad" magazine or "Cracked."

When in need of "insipration", Roger needs look no further than
Man-on-man Monthly.

>>of Leprosy spirited yours away some time back.
>
><blink> IKYABWAI ALERT ,/blink>
>To celebrate, Cwaiggy masturbates in a darkened theatre....

Bitter Leper Wiseman Whines. We are not surprised.

>>>>Ah, and here's my favorite net-stalker, Roger Wiseman!
>>>>How's life been treatin' ya, Rog?
>
>Aww, it huwt Cwaiggy _so bad_ he had to post edit!..........

Does post-editing bother you that much?

>>><whimper>
>
>There, there, Cwaiggy.............I'll let you blow me again.

No thanks, Rog. Call Gareth, see if he's busy.

>>That bad, huh?
>
>You never were _that_good.........

You never were good.

>>>>I've been yanking your strings this whole time, Rog.
>>>> Or haven't you noticed?
>>>No.
>>
>>You never were very perceptive...
>
>You never were _that_important....

You assume anyone gives 1/2 a damn about your opinion, Roger. Don't
assume.

>>>You are not that important.
>>
>>PKB.

When faced with the truth, Roger babbles...

><blink> IKNYABWAI ALERT </blink>

IKNYABWAI? <snicker>

>>>>Followup re-restored.
>>>Followup with a twist just to get your panties even more in a wad
>>
>>You can't set follow-ups, AOLamer.
>
>Then why are you whining about it, geek?

How can I whine about something that will never happen? You are an
AOLamer, Roger. You cannot set follow-ups.

>>>>You know you can never get enough punishment from Me.
>>>Says the Leong Jin Tai whipping boy, who devotes several threads to his
>>idol.
>>
>>The irony here is thicker than the walls of Jinny-poo's skull.
>
><blink> IKYABWAI ALERT </blink>

Assignment: In a three-part essay, explain your IKYABWAI. Give
references. Turn in tomorrow for a grade.

>he wants to give me skull.

Is Roger desperate with these trite one liners?

>>You're not just obsessed with Me, toady. You're obsessed with the
>>whole fucking Hausmann Collective. We've sent you running to the
>>soc.* groups for help. We've even got you threatening to post Our
>>addresses and credit card numbers (which isn't a worry cos you're
>>obviously too fucking stupid to manage it). You're backed into a
>>corner, and now you're responding in the only way you know how.
>
><mutter, mutter, mumble you fag mumble>

Roger falls head-over-heels as he attempts to sidestep my assertions,
his toothpick arms flailing wildly as he falls face-first into a
reeking pile of his own putrid offal. As Roger writhes on the ground,
he creates his own corrupt rendition of a snow-angel, a disgusting
shit-stain seraph.

>>>This "punishment" is about as dangerous as a nerf toy.
>>
>>"Me like NERF. It fun to play with NERF things like NERF balls to
>>throw and NERF sticks to bite and chew. NERF is fun to have. NERF,
>>yes." - Roger Wiseman tells us how much he likes "Nerf."
>
>Hey, Parrot. I think you are a homosexual.

Get some new material, Rog.

>>Next week, Roger will tell us his views on the latest toy action
>>figure releases. That is, if We can find a way to keep him from
>>eating the review material....
>
>Following a report on Cwaiggy's obsession with masturbating to the "Power
>Rangers" poster.....

WTF? Amazing! No fag lame! Your flames still betray a deep
obsession with deviant sex, however. You'll have to work on that.

ROGER WISEMAN'S GREYHOUND MEN'S ROOM BAND

Lead vocal: Dr. Winston O’Boogie

It was twenty years ago today,
Roger Wiseman forced the boys to be gay
He’s been going in and outa their rears
And he’s made them into ravin’ queers.
So watch out or I’ll force on you
The act we've hated all these years,
Roger Wiseman’s Greyhound Men’s Room Band.

We’re Roger Wiseman’s Greyhound Men’s Room Band,
Disciples of the Bucktoothed Choad,
Roger Wiseman’s Greyhound Men’s Room Band,
Sit back and watch us shoot a load.
Roger Wiseman’s Greyhound, Roger Wiseman’s Greyhound,
Roger Wiseman’s Greyhound Men’s Room Band.
It's wonderful to be here,
But Wiseman’s full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wiseman’s going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wiseman’s Greyhound Men’s Room Band.

>landlord tries to tell you.
> <...>
>
>But the piss-stained wallpaper gives the $25 a -week rent away,
>doesn't it?
>
<...>

I have noticed that Raven (AKA Roger Wiseman) displays these same tactics in almost every flame he posts. He attacks the educational, professional, and economic standing of those he attacks.

Besides being a pitifully simplistic method of attack, I think it shows an underlying insight into roger’s life. Now we all know that poor roger is certainly not the most intelligent person in the world. In fact if you were to rank the entire world population by intelligence, Roger would fall right between the bald kid in Deliverance and an above average planarian.

This leads me to believe that Roger, is suffering from a case of projection. He is transferring his flaws onto others, so that he can attack those flaws without attacking himself. It is sad really...not that raven is doing this, but that he is doing it in such an obvious way.

It is common knowledge that this simple bastard lives in a backwater shithole in the middle of West Virginia. It is very likely that raven’s continual mentioning of piss-stained wall paper and outdoor plumbing, are drawn from his own personal experience. It is more than likely that his TRS-80 is the most valuable thing he owns...after the

vat of penicillin. If I am not mistaken, West Virginia rakes in the 40's for standard of living and education.

We all know what an educational jewel Wes Virginny is in the crown of America. So I wonder what schools Roger attended. Does he even have a high school diploma? He must have gone to high school for a short while...he had to steal his thesaurus somewhere. Did he actually make it into a college? I seem to remember raven saying he had no need for higher education, but that could just have been one of the many people raven stole from stylistically.

So we are forced to garner knowledge of raven's background from the intellect he demonstrates in his flames. His knowledge of the intimate details of being a shack living welfare queen, are surpassed only by his wealth of knowledge on the subject of homoerotic behaviors. These are the meat and potatoes of raven's flaming menu. He writes what he knows, and folks, he doesn't know much.

The conclusion this leaves us with is hardly a surprise. Roger Wiseman is an uncreative moron, who has little chance of ever adding anything valuable to this group. Raven's ineptitude has been well known for some time now. However, this may add some insight into the many causes of his character flaws. Keep in mind that roger is using these methods of attack, because these are the things in his own life that cause him the most shame. As a result, he mistakenly assumes that those of us in the civilized world feel the same shame.

This is why he thinks he is a grand flamer. He believes his words are hurtful, and were any of us the same type of inbred trailer trash that he is, he might be correct. However, most of us are what Roger's ilk refer to as, "high livin' city folk." So his socioeconomic insults have no effect. He simply can't understand this...which is why he will always fail.

The point of this whole thing is that Roger is a weakling. He is a fragile little statuette of an individual, who if handled to roughly, will shatter. His Achilles heel is his standing in society. He comes here to build himself up, because the world tears him down. He hates himself because his biggest goal in life is to feel up his cousin behind the barn, after the square dance. He is the butt of America's jokes. He is the type of person that the rest of the world can look at, and feel better about themselves, because they aren't like him.

Why do you think that he hates Jewish people so much? He believes that Jews control the media, and the media is always making fun of hillbillies and trailer trash like him. He is so ashamed of his worthlessness as a human being, that he takes those things that make him worthless and projects them onto other people. He hates himself, and he can't blame you for hating him as well.

>
echo definately sucks on 11m sideband as well, especially thse jokers who
get their kicks by echoing their roger beeps. I never saw the need for the
modulation toys, I have only ever seen two good reasons for a power mic, one
was a friend of mine who had a really soft voice due to his suffering throat
cancer, and he had his setup on a O-scope and had it set at 100% (or as
close to it as possible) by a local radio sho that is owned by a local HAM,
the other was a friend who had a radio with weak modulation, he had it in
every shop in the tri state area and nobody could trace the problem, so he
had a power mic that he barely cracked open. Other than this, power mics and
modulation kits (connex boards) are a waste and useless for good sounding
radio.

FS: I have a very nice clean Collins 75A-2 receiver for sale. The
front panel is near mint with a very nice
light yellow original drum dial. Unit works fine and is its
original cabinet. The cabinet looks nice too. I
want $750 for it. If interested call Mike at (979) 693-1461 eves
and weekends or email: gspubl@tca.net
Trades for a Ten-Tec Paragon tranceiver, a Ten-Tec Centurion
amplifier, or equivalent would be
considered.

In article <9a0dos$m80$0@pita.alt.net>, SLee@houston-hunks.com says...
>
> The fact IS that the poster in question has sexually harassed women and
> men through cotse, and that the harassment continues unabated, despite
> many complaints from its targets.
>
> Freedom of speech has always carried associated responsibilities and
> limits. You can wave the flag of "freedom" all you want, but when
> you're enabling harassment -- sexual and otherwise -- and that
> harassment continues through your service for months, you're not
> behaving responsibly; you have <spit> joined the bad guys. You need to
> be stopped.
>

There is a big difference between unwilling and unable. Only these
hordes of people getting sexually harassed by this poster with the
supernatural ability to will them to read his posts can stop it. It is
called "subpoena logs and legally pursue the user in the proper forum",
but we have been through this before.

There is also another option, convince some LE that these posts are
against the law, we'll work with LE in legal issues. But, of course you
always have your preferred option, whine in the newsgroups about it.

BWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!

The GAY-TEAM
- In 1972, a commando unit was sent to prison by a military court for gay acts they committed. These men promptly escaped a maximum security penitentiary
to the San Francisco underground. Today, still wanted by the government, they
survive as soldiers of gay fortune. If you have a problem, if no one else can help, and if you can find them, maybe you can hire The Gay-Team. -

"Howling Mad" Eric Oyen- This flaming homo went insane after his participation in the deal a meal program failed one too many times. He now resides in a
mental hospital but The Gay Team frequently breaks him out when going on assignment. He constantly annoys Herpes but he is still a valuable member.

Sgt. Herpes Herbie- The enforcer of the group, he pities the fool who dont like drag queens. Although he can't stand Oyen, deep down he likes him and has saved his ass many times. His specialty is working on mechanical things such
as hooking a vibrator to a car battery and new ways to tie back his schlong so he appears as a woman.

"CUNTFace"Pubic - The best looking of the group, queers worldwide would do anything to get to see that fat naked ass. This smooth talking snake is the master of charm. Whether the assignment is infiltrating enemy lines or surviving on an island full of straight people, usually gets the blowjob done.

Hannibal Stagger Lee- The leader of the group. Using his vast array of eyeglasses and feather boas, he is truly the master of disguise. He can pass himself off as almost anything, from straight to bisexual. Stagger just loves it when a plan "cums" together.

Just don't bend over in the shower with them.......

Like a Gecko LARDASS LLLLLLLOYD n0vfp@aol.comWWCR (LLoyd Davies) took time
from slurping nutsack goo to babble:

<Snicker!>

It's about our resident idiot LLLlllllloyd (Imbecilicus Alabamaus).

That's a-Lllllllllloyd

When you can't get A+ though your head,
And you deliver pizzas instead,
That's a-Llllllllllllloyd

If you hate all "those Jews,"
And you slurp nutsack goo,
That's a-Llllllllllllloyd

When your Mom is your sister,
And for fun you just fist her,
That's a-Llllllllllllloyd

If at 30 it's certain,
That you're still a virgin,
That's a-Llllllllllllloyd

When your food stamps are late,
And two-day-old pizza's what you ate,
That's a-Llllllllllllloyd

If you blame all your tragedies,
On all the minorities,
That's a-Llllllllllllloyd

When you believe wacko preachers,
And you smell like old sneakers,
That's a-Llllllllllllloyd

If your code skills suck,
And you waddle like a duck,
That's a-Lllllllllloyd

When you suck up to Herb and kiss TR's ass
like a snake in the grass
That's a Lllllllllllloyd

If you live near a dump
but don't know how to hump(a woman)

That's a Lllllllllllllloyd

When the goo hits your eye
like a big pizza pie,
That's a Lllllllllllllloyd

If you do not wash your hair
But masturbate to Brother Stair,
That's a Llooooooyyyyyyd!

When sperm banks are robbed
it's a Davies' brothers job
That's a Lllllllllllllloyd

If you think Jews aren't human species,
Then masturbate in your own feces,
That's a Llloyyyyyyyyyddddddd....

The Great Pumpkin
Birmingham Post-Herald
October 14, 2000

Police arrested Lloyd A. Davies, a 27 year old white male, resident of Athens, Alabama in the Anderson Pumpkin patch at 11:38pm Friday. Davies will be charged with lewd and lascivious behavior, public indecency, and public intoxication at the Athens Municipal Courthouse Monday. The suspect allegedly stated that as he was passing a pumpkin patch, he decided to stop. "You know, a pumpkin is soft and squishy inside, and there was no one around here for miles. At least I thought there wasn't." he stated in a phone interview from the Athens Municipal Courthouse Jail.
Davies went on to state that he pulled over to the side of the road, picked out a pumpkin that he felt was appropriate to his purposes, cut a hole in it, and proceeded to satisfy his alleged "need". "I guess I was just really into it, you know?" he commented with evident embarrassment. In the process, Torrance apparently failed to notice the Athens Municipal police car approaching and was unaware of his audience until officer Brenda Taylor approached him. "It was an unusual situation, sure." said officer Taylor. "I walked up to (Davies) and he's... just working away at this pumpkin."
Taylor went on to describe what happened when she approached Davies. "I just went up and said, 'Excuse me sir, but do you realize that you are screwing a pumpkin?' He got real surprised as you'd expect, and then looked me straight in the face and said,
'A pumpkin? Damn... is it midnight already?"

>geoplus account?) and ^_^

Neuron, you are as poor at trolling as you are at flaming. Your
Average Bob flames thus far have been far too contrived for any
sentient person not too notice your in-built hatred of certain people
who have posted here.over the past few years.

It's plainly obvious that you had some kind of thing against Roger
Wiseman. I've been on alt.flame for nearly a year now and I never saw
a single post from him. Why on earth would some newbie hate someone he
has never met? I guess you'll say you read it on some web page, but
that poor excuse won't wash with me. "I" know you better than that,

"I" know you hate Roger because he kicked your sorry behind up and down the flame pits for quite some time.

Then there is HFW. Your hatred of us is legendary. We've beat you up badly plenty of times. You've made an ass of yourself many a time in front of us. The now famous "It was a typo and I meant to spell it wrong" stuff was just hilarious. I still laugh about it now.

Oddly enough, your present web page includes all of the above people with the obligatory derogatory comments. Strange that?

Then there were the two posts I sent your way. I dropped some large hints that I knew it was you hiding behind that address. You didn't even dare answer them for fear of giving the game away. The thing is, you still went right ahead and post a couple of bogus SPANK claims on BDZ and Cuch. Silly move, you must have known I pursue you further.

Then there is your spelling. I see you found a spell checker this time. I'm quite glad you took a little of my advice. It made it a little harder to spot you, all of an extra day. But your appalling spelling shines through like a lighthouse in the fog.

Your headers gave away another clue. MST3K was a group you invaded in October / November (?) last year.

A few things in your posts made me look twice. You mentioned Neuron quite a bit in them. bad move. Why is a newbie concerned with someone who hasn't posted here for quite sometime? You also mentioned quite a bit of his material in your recent threads. Again, you could have read it off web sites and Dejanews, but "I" know you better than that. You just can't resist having a sly dig at people who have flamed you so much that you just had to take a different alias. You even went so far as to TELL us you'd be coming back under an alias, silly boy.

It's good to see that you've at last admitted your links with the nosers. I knew you were never an independent and called you on it several times. Why don't you and Thacker restart the DMV and give us someone to flame? This HFW UIP is getting a little boring now.

The good people in alt.fan.backstreet,boys can take a look at your record. Checkout neuron96@ix.netcom.com at Dejanews for the full history of this poster. He's known for trolling certain groups.

Neuron, don't even try and deny it. I "know" it's you. You're too bleeding obvious.

Oh, incase you missed it last time...

SPANK, again.

There is a young man in my area that is legally blind, therefor he can
not drive, so he has a CB radio (I know this is a amateur group) hooked
up to his mountain bike running off a motorcycle battery, so the
installation shouldn;t be a problem. As for the generator to recharge,
you should be able to find some of the smaller lightweight pedal
generators, I know some hams in our area use them for their QRP rigs.

Hope this helps
Soon to be a ham

Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc,rec.radio.amateur.policy

(found this in the scanner NG. Thought i'd post it here for hams USA)

Alinco Announces New North American Distributor
Dealer and Customer Service Shifted to Ohio Firm

TORRANCE, CA May 1, 2001

USA Alinco Branch has announced a major change in its distribution structure serving North America. Effective May 1, 2001 Alinco products will be exclusively available to dealers and customer service will be obtained through:

Atoc Amateur Distributing, LLC
23 S. High St., Covington, OH 45318, (937) 473-2840

The Atoc Amateur Distributing operation will be headed by members of the Cota family, who also manufacture and distribute the Iron Horse and ATOC lines of antenna and radio accessories. The Iron Horse line also includes OEM and aftermarket accessories for large vehicles such as RVs, busses and trucks. They are also remembered in the industry as the creator and distributor of the Valor radio accessory product line in the past.

Alinco's corporate function would now concentrate on designing and manufacturing products from its headquarters in Osaka and its ISO 9002 qualified factory in Toyama , Japan. Alinco is a very committed, viable player in the Amateur Radio marketplace as well as branching into related areas, such as the design and manufacture of high quality scanning receivers and power-supplies available to the general public and institutional users such as law enforcement and the military. Alinco believes that having a distributor based in America is good for the dealers and most importantly, good for the growing Alinco customer base.

The transition for dealers should be seamless, as contacts and information will be handed over to the new entity. Evelyn Garrison, WS7A, a long-time Alinco associate, will continue representing the Alinco line for the new organization. Importantly, all Alinco warranties will remain in force and continue to be honored through their term. In addition, customer support and out-of warranty service will be available through the new operation. The repair units currently in the Torrance office will be repaired and returned to its owners within the month of April, while the units in transit will be received and or repaired in California, or transferred to Ohio and the owners will be noticed .For customer-service related information, please kindly visit the PARTS & SERVICE menu on this website for up-dated information. We are sorry that due to this transition our service capabilities are very limited at this moment. Please kindly understand and

be patient until the new office in Ohio becomes fully functional.

Alinco is going to exhibit at Dayton Hamvention 2001 as usual, sponsoring W1AW/8 special event station.

Finally, we at the USA Alinco Branch in Torrance, California appreciate your loyalty and patronage with our products, and we do hope that your continued support will be enjoyed in the future by the new organization.

Why can't the FCC set regulationd for the manufacturers to make the radios
so they can't be moded? From my understanding some radios already have this,
they may not be impossible to mod, but it should take a qualified, licensed
tech to make the mods, and then make it so that to have mods they have to
show proof of license and need for the mod. If someone mods a radio for
someone w/o a license they should be subject to penalty, and if someone
sells an "export" radio to someone living in the same country, they should
be penalized as well. Same goes for "export" radios, the FCC and customs
dept can crack down, if I am not mistaken export means shipping outside of
the US or whatever country or origin, so make it hard for US residents to
buy export radios from companies IN the US. And and radio dealers IMO should
ask for proof of license before selling amateur rigs. This will upset alot
of the people in the cb group but screw them, I am not a ham YET but will be
taking the test soon, I have been a radio enthusiast for years starting out
building HEATKIT projects with my uncle who was paralyzed, I became his
hands, he gave me a Drake SW reciever, and I started out talking on a CB my
license was KIP6489. I do not agree with using amps, mods, power mics, ect.

Once I get my ticket I want to get into QRP, as well as working with the local SKYWARN/ARES groups.

<UfXJ6.459$E65.42907@newsread1.prod.itd.earthlink.net>:

>> WHAT HAS THE ARRL DONE FOR YOU LATELY?

Gee, what has the ARRL done for my lately?

1. They have given me a loud voice in Washington

2. A voice in the ITU

3. They have provided VEs for my son, my wife and myself so
that we didn't have wait for months or travel long distances to
get our license.

4. They sponsor events, contest and award programs.

5. The co-sponsor JOTA with the Boy and Girl Scouts to get
our young people interested in amateur radio.

6. The provide me via email updates about real time amateur
news.

I could go on and on. Do I agree with ARRL all the time.
Of course not and I will bet you can find a single person
that you agree with all the time. Do I think I am getting
my moneys? You bet I do!

To paraprase Pres. Kennedy instead of asking what the ARRL
has done for you, ask what you can do for the ARRL? I know
it sounds corny, but gee whiz it is really true. If you
don't like the way they are doing something, then try to
work with them to change it. Make your case to your section
manager using logic, not this low life name calling. Just
think what could be done if every amateur donated an hour
a month to support the amateur radio in a focused effort what
could be done. Most of us won't even take the time to write
our congress person, never mind do some real work.

So you hate the ARRL, then don't join, don't use the buro,
don't get ARRL awards, watch TV instead of being at Field
Day or other ARRL sponsored events and most of all get a life!

First off (since the question was asked) r.r.a=rec.radio.amateur.

I don't know for sure, but I gather that an average detector is not appropriate here. I think they are more looking at a 1W max under any modulation condition.

As for directional (or any other kind of gain) antennae, with only 15m to work with, you can't really do much. The best you can do is put the transmitter physically on the ground, with a big-ass antenna tuner on the output. Bury some ground radials; they don't count as part of the 15m of combined antenna/feedline/groundline. Stick a 15m tall metal pipe on top of the rig (with some insulating materiel, e.g. PVC beneath it) and you are allowed to put up to a 15m radius capacity hat on top of the antenna. This essentially 1/117 wave base-loaded antenna. If carefully tuned, it may go some distance, but don't expect anything remarkable unless you have a remarkable degree of patience. Also, don't expect anyone but remarkably curious people to listen.... curious people are the only ones who will have radios that tune that low.

NEW - NEVER USED Comet model # SMA3 Tri-Band (3 band) HT and Scanner Antenna. Designed for TRANSMIT AND RECEIVE on the following frequencies ... 144 MHz to 148 MHz (2 meters) ... 420 MHz to 450 MHz (70 cm) ... and 902 MHz to 928 MHz. It is also a WIDE BAND RECEIVING antenna that covers 118 MHz to 160 MHz ... 250 MHz to 290 MHz ... 360 MHz to 390 MHz ... 420 MHz to 470 MHz ... and 820 MHz to 960 MHz. It is one of the finest handy talkie (HT) and scanner antennas that you can buy. The Comet SMA3 is 10" high and comes fitted with an SMA connector. It's ready for use on some of the most popular HTs on the market today like the Yaesu VX-5R and FT-50RD ... and the Icom IC-Q7ABC and IC-T81A. If YOUR radio has a BNC connector, there are low cost adapters available that will allow you to use this fantastic antenna on almost ANY HT or scanner. This is a brand new antenna and it comes packaged in the original factory vinyl carry pouch.

Has anyone heard much about what new equipment
that will be showing up at Dayton next week?

The one thing that I have heard is that the equipment
manufacturers feel that mid range equipment is not selling.
Therefore equipment will be priced below $1000 or above
$2000.

You are right moron, the bid on it is now $102.50, that is more than it
cost new 10 years ago.

Yes, you are a bright one a by golly!

Are you relating your life story to the newsgroup Roger? Its quite telling
of
you when everyone knows that you are 45 years old and still live with mommy.
Maybe theres more than meets the eye of why you live with Mommy. Or is it
because you cant find a decent woman who would put up with a white trash
loser
or your type. Or maybe is because the song is actually about you. Maybe you
should rename it Call Roger. It would certainly explain why you are a 45
year
old loser still living with mommy.

6841. THE SAD LIFE OF GLENDALE'S FAMOUS JBO

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-12 14:32:41 UTC
From: Hammer <hammer007a@MailAndNews.com>
Message-ID: <3B16072B@MailAndNews.com>
Source record: 89720

Does anyone know JBOs suppossed credentials that he brags so lustily about. We
all would like to know why he never announces his supposed credentials such as
college, prior work experience, or anything else of substantive value. Is
there a reason why he does so? Is it because he is most certainly inferior or
the other reason is that he has a lot to be ashamed of. Maybe his so called
alleged credentials arent what they seem. Its interesting to hear him brag
about his ultra intelligence. But then again, why does he live in a backwater
dump such as Glendale and its population of 1600 residents. Obviously, he must
be economically limited since the town is pretty much economically a
backwater. The closest medium sized city is Wheeling, WV with population in
the 40,000 range. If Roger is so brilliant then why is he not working in a
major metropolitan area where income and opportunities would be so much
better. Obviously he has spread a large amount of lies. Maybe someone could
clue us in on his background so that we can get a more appropriate picture of
who he is. By the way, does anyone have a picture of this infamous nitwit. We
would all like to see what this inbred piece of trailer trash looks like.
Thanks to everyone, Sincerely, THE HAMMER

Lardass Lllloyd pathetically post-edited From Hammer
<hammer007a@MailAndNews.com> pee wee hermaned:

>Roger telling about his deviant lifestyle again

Says the multiple arrestee LARDASS LLLLLLLOYD....
Irony alert!!!!!!!

[restored} Poooooooorrr LARDASS LLLLLLLOYD.
MWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!
Always an imitator, never an innovator, that's the Davies family way...
always looking for an easy way out...

Like a Gecko (Lllloyd)
(E. Presley/R. Wiseman)

And he eats flies....

On a cold and gray Belle Plaine morn
another little mutant child is born
like a gecko... [Chorus: Like a geckoooooo]

And his momma cries.....

For there's one thing that she don't need
is another little lizard-like child to feed
like a gecko.... [Chorus: Like a geckoooooo]

People don't you understand
Lllloyd doesn't have any hands
just got these little sucker things on his feet
Take a look at you and me
just don't look at that lizard-like freak
We'll just have to turn our heads and barf the other way

And he eats worms.......

And a ugly little boy with a pointed head and nose
hangs from the ceiling by the ends of his toes
like a gecko.... [Chorus: Like a geckoooooo]

And he eats trouser-worms......

And Lllloyd starts to roam the house at night
and he learns how to hide when you turn on the light
like a gecko..... [Chorus: Like a geckoooooo]

Then one day in desperation
the lizard-boy Llloyd runs away
He tries to run across the floor
but his tail gets caught in the door

And his momma cries......

As a crowd gathers 'round the lizard-like man
Somebody says "Hey! He's got suckers on his hands.."
Like a gecko..... [Chorus: Like a geckoooooo]

And his momma cries.....

It's about our resident idiot LLLlllllloyd (Imbecilicus Alabamaus).

That's a-Lllllllllloyd

When you can't get A+ though your head,
And you deliver pizzas instead,
That's a-Llllllllllllloyd

If you hate all "those Jews,"
And you slurp nutsack goo,
That's a-Llllllllllllloyd

When your Mom is your sister,
And for fun you just fist her,
That's a-Llllllllllllloyd

If at 30 it's certain,
That you're still a virgin,
That's a-Llllllllllllloyd

When your food stamps are late,
And two-day-old pizza's what you ate,
That's a-Llllllllllllloyd

If you blame all your tragedies,
On all the minorities,
That's a-Llllllllllllloyd

When you believe wacko preachers,
And you smell like old sneakers,
That's a-Llllllllllllloyd

If your code skills suck,
And you waddle like a duck,
That's a-Lllllllllloyd

When you suck up to Herb and kiss TR's ass
like a snake in the grass
That's a Llllllllllllloyd

If you live near a dump
but don't know how to hump(a woman)
That's a Llllllllllllloyd

When the goo hits your eye
like a big pizza pie,
That's a Lllllllllllllloyd

If you do not wash your hair
But masturbate to Brother Stair,
That's a Llooooooyyyyyyd!

When sperm banks are robbed
it's a Davies' brothers job
That's a Lllllllllllllloyd

If you think Jews aren't human species,
Then masturbate in your own feces,
That's a Llloyyyyyyyyyddddddd....

<space reserved for oblong-headed, almost 30 year old virgin LARDASS
Llllloyd's pathetic whinings>

6854. The first radio in a football helemt.

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-12 20:01:18 UTC
From: Jeff <jbigham@bigspamsucksfoot.com>
Message-ID: <9dk4ku$78k$1@cnn.Princeton.EDU>
Source record: 89730

Hello,

I'm looking for information about the first radio used in a football helmet. It was designed by John Campbell and George Sarles for coach Paul Brown in the 1950's. I was wondering if anyone knows more about the radio they used - specifically what frequency, modulation, and power they used. I do know that in one of the earlier trials the signal from the helmet was picked up on a police scanner if that helps narrow it down at all.

Thanks,
Jeff Bigham

Obsessed FATASSED FUCKWIT LARDASS LLLLLOYD Hammer
<hammer007a@MailAndNews.com> whined loudly:

>Does anyone know JBOs suppossed credentials that he brags so lustily about.

"Question mark!" BWHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!
"Supposed," christian academy pizza delivery boy.

>We

Who's "we," you sputtering, bumbling FUCKWIT? That gerbil you routinely
insert
rectally? The only person worried about my credentials is YOU, LARDASS
LLLLLLOYD.

>all would like to know why he never announces his supposed credentials such
>as college, prior work experience, or anything else of substantive value.

MWHAHAHAHAHAHAHAHAHA!!!! poor low-self-esteemed LARDASS, he has to brag and
boast about that little certificate in computer operations and builds it up
to
where anybody can figure out it's just for low-IQed and lazy bastards to get
when they can't put the time, money and effort in a real degree program.

> Is
>there a reason why he does so? Is it because he is most certainly inferior
>or
>the other reason is that he has a lot to be ashamed of. Maybe his so called
>alleged credentials arent what they seem. Its interesting to hear him brag
>about his ultra intelligence.

Mwhahahahahahahahaha!!!!! Your concern with other people's intelligence and
credentials lead us all to believe you don't have any. With every post you
PROVE you don't have any, LARDASS LLLLLOYD, the perverted, so-called
christian.

>But then again, why does he live in a backwater
>dump such as Glendale and its population of 1600 residents. Obviously, he
>must be economically limited since the town is pretty much economically a
>backwater. The closest medium sized city is Wheeling, WV with population in
>the 40,000 range. If Roger is so brilliant then why is he not working in a
>major metropolitan area where income and opportunities would be so much
>better.

Let's ask why LARDASS LLLLLOYD lives near Huntsville, AL has a supposed
certificate in computer operations but works as a <snicker> pizza delivery

boy
and sells used, obsolete computer parts at a <gawffaw> flea market in order
to
pay the measly rent on that HUD apartment he has to rent.

> Obviously he has spread a large amount of lies.

Obviously, you have your head up your ass.

>Maybe someone could clue us in

Even after eons of drilling information into your thick, oblong skull
you still couldn't be "clued in" if your life depended upon it.

>on his background so that we can get a more appropriate picture
>of who he is.

Who I am is somebody who's been making you dance like a puppet on a string.
Dance, puppet, dance.

> By the way, does anyone have a picture of this infamous nitwit.

"Question mark" **Irony alert!**
MWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!

Poor Lardass needs something to enable him to get a hard-on tonight...

>We

There's that "we" again, your head should keep the aforementioned gerbil
company...

>would all like to see what this inbred piece of trailer trash looks like.

Then why is it YOU are the only one desperately whing for my picture,
FUCKSTAIN?

>Thanks to everyone, Sincerely, THE HAMMER

FOAD. Lardass Llllloyd.

Cross-posted to: alt.law-enforcement,alt.radio.scanner,rec.radio.amateur.misc,rec.radio.scanner,talk.politics.misc

From http://www.strongsignals.net

Littleton CO
Cops say teen concocted radio calls

Suspected hacker also accused of pretending to be officer, taking cops off emergencies

By Brian D. Crecente, News Staff Writer

A 16-year-old boy using a handheld radio and a computer allegedly sent Denver police cruisers and a helicopter to fake emergencies and called officers off legitimate 911 calls for more than a month before getting caught.
Police said Thursday that the teen managed to hack into the department's computer-controlled radio system, program his radio to transmit on the department's frequency from his Southwest Denver home and then took on the alias of Jerry Martinez, a ficticious Denver police officer.

Division Chief Steve Cooper said the teen talked to dispatch pretending to be the officer more than a dozen times from March to May, including a March 19 call for backup that sent patrol cars speeding with lights and sirens to the scene of a non-existent crash.

About 8:30 p.m., the teen allegedly called police dispatch on his radio reporting a hit-and-run accident near West Jewell Avenue and South Sheridan Boulevard. He reportedly told the dispatcher that he was following the suspect at a high rate of speed. The dispatcher sent patrol cars to the area.

Detectives found their suspect with the help of the Federal Communications Commission and arrested him May 1.

Cooper said the teen was charged with a dozen felony and a dozen misdeameanor crimes involving wire tapping, eavesdropping and telecomminication fraud. He is being held at the Gilliam Youth Services Center.

Deputy Police Chief of Operations Dave Abrams said it's hard to estimate how much the teen may have cost the city in wasted manpower and equipment.

The police department plans to have experts review the security of their emergency radio system and will tell other departments across the country of the possible weakness in the system.

"This is an officer safety issue, a public safety issue," he said. "You can't have someone out there broadcasting emergency calls; the potential is

frightening. This kid had the ability to wreak havoc with our communications system."

The teenager was not satisfied with just the radio ruse, police said.

On April 6, he allegedly took to the streets of Littleton dressed in a Denver police jacket and driving a truck equipped with emergency lights and his radio.

Angered by another driver, the teen reportedly attempted to pull the man over. The man refused, drove to his home and had a neighbor call police.

The teen first told Littleton police he was an off-duty officer, but later burst into tears and admitted that he had made the story up, according to Littleton police reports.

He was issued a summons for impersonating a peace officer, false reporting to authorities and unauthorized use of emergency vehicle lights.

On April 26, the teen allegedly called dispatch requesting information on three license plates, but this time police were ready for him.

Dispatchers kept him on the radio for an hour and a half, telling him that one of the plates he requested came back to a wanted person who was armed and dangerous. An FCC agent used special equipment to track the broadcast back to the teen's house during the conversation.

The agent spotted the teen standing in his front yard, talking into a radio. The agent confiscated nine radios from the home.

The next day, a police informant called the teen and asked him to reprogram the informant's radio so he could listen to Denver police and transmit on their frequency.

On May 1, the teen brought the reprogrammed radio to the informant's house and was arrested. Police found a computer and other radio equipment in the basement of his grandmother's house.

Cooper said the teen's alleged penchant for talking to the helicopter when it was over his neighborhood and his mispronunciation of other officers' names tipped dispatchers off that they were dealing with an intruder.

Police have not determined how the teen allegedly hacked into their radio system. The police department's emergency radio system uses two sets of security identification codes and a computer to prevent unauthorized access.

"We have some guesses how he did it, but we're not sure," said Myron Kissinger, electronics technician supervisor for the police department's electronic engineering bureau.

In any case, the case gave police a scare.

"He had the potential for causing a lot of problems," Kissinger said. "As time went on, there is always the possibility that he would become more brazen."

Echelon Fact Finders Snubbed

By Juliana Gruenwald, Interactive Week
May 10, 2001 4:51 PM ET

A delegation from the European Parliament investigating the existence and impact of a global satellite surveillance system operated by the United States and other English-speaking allies abruptly ended a fact-finding visit to Washington, D.C., Thursday, after some Bush administration officials refused to meet with the group.

Leaders of the European Parliament's Temporary Committee on Echelon, the name of the alleged surveillance system, said they had meetings planned with the State Department and Commerce Department's Advocacy Center, an office that helps U.S. companies win foreign contracts, that were abruptly cancelled without a "satisfactory" explanation. While no firm meetings were set up, committee officials said Central Intelligence Agency and National Security Agency officials also had indicated ahead of time that they may be willing to meet with the delegation, but refused to do so, saying such a meeting would be "inappropriate," the committee's chairman Carlos Coelho said.

Coelho said during a news conference that he was "concerned and dismayed" by the refusal of the agencies to meet with the delegation. In a statement made during a meeting with House Intelligence Committee leaders on Wednesday, Coelho said the U.S. officials' refusal to meet with the delegation "can only increase the suspicion that there is indeed something to hide." The committee also met with officials from the Justice Department.

Coelho said he wanted to discuss with the national security officials allegations that the United States has used the Echelon system, which is allegedly being run in cooperation with Britain, Canada, Australia and New Zealand, to engage in economic espionage aimed at helping U.S. companies.

The committee is expected to release a report on its investigation at the end of the month, and the full parliament, the legislative branch of the European Union, may discuss the panel's recommendations in September.

"Given the nature of the allegations which have been made about Echelon, economic espionage and so on, it was extremely important that the United States authorities had the opportunity to respond," Coelho said.

In particular, the committee leaders said they had documents showing that the CIA has met with the Commerce Department's Advocacy Center and wanted to know why a spy agency would meet with an office set up to help U.S. businesses compete globally.

Gerhard Schmid, the parliament member responsible for developing the committee's report on the investigation, said there may be a legitimate reason for why the CIA was involved with the center, but questioned "why can't such a debate take place."

Both NSA and CIA officials have denied that the United States is engaged in industrial espionage. And even the European Parliament officials acknowledged that the committee has not substantiated any of the allegations.

"I recognize that it is standard practice for some countries to use their intelligence services to conduct economic espionage, but that is not the policy or practice of the United States," George Tenet, the director of central intelligence, testified last year before the House Intelligence Committee.

A CIA spokeswoman said the agency never made any promises that it would meet with the European Parliament delegation and that any information it could provide to them has already been stated publicly. She added when asked about whether the CIA met with the officials from the Advocacy Center that the CIA meets with different agencies for a variety of reasons and has stated "clearly" that it does not engage in economic espionage to provide unfair advantage for U.S. companies.

A NSA spokeswoman gave a similar response, saying, "We respectfully declined the EU request. We believe our director's testimony before the U.S. intelligence oversight committees last year provides a synopsis of the NSA's position on the issues at hand."

The United States has never formally acknowledged the existence of Echelon, a global system for intercepting satellite communications. But both Coelho and Schmid said they have no doubt that it does exist.

"Yes it exists and we can prove it," Schmid said. "It can have good purposes and can be misused."

Schmid pointed to the existence of special antennas on U.S. military bases around the world that are only used, he claims, for intercepting satellite communications.

Schmid was asked why the committee is so concerned given that it has been widely known for years that countries intercept satellite communications. He responded that this may be true but that citizens in countries that conduct such activities are often protected by their own constitutions, but there is nothing to protect them against the activities of other countries.

When asked what can be done about the situation, Schmid said he would recommend that EU countries encourage businesses to do more to protect their communications through the use of encryption and other means. He also suggested that the World Trade Organization adopt a requirement that members agree not to spy against foreign companies.

Must sell. Big screen TV, hardly used.

Creditors are calling us day in, day out and demanding payment for late bills. We must sell this big screen TV as a result. This sale is cash only and the TV is sold in "as-is" condition. If you buy it, you assume the payments and all liability thereafter. We are not responsible for the unit after it is sold.
We also have for sale some brightly painted pigeons that are great pets but are not housebroken.

Contact DimmyDaLoser@birdshitt.comm

All sales are cash only.

So, Suzy. Still loading up Spam in the mailboxes of everybody around you?
Pretty shallow, that. Is that all you learned from that third rate computer
school you went to?
Yer hacking attempts ain't working...now what? Gonna get that $80,000 a year
job? $40,000?
Not likely....fill out those job apps....you may find an entry level job at
$23,500...if you are lucky. A new job means going to work every day..no
staying up late drinking until four or five a.m. What if the new job means
peeing in a bottle? God Almighty! That means no more "twisties" for at least
30 days! Can ya hack that?

Dog fellator "Arf! Arf!" <DoggieDicksucker@Liberal.comz> took time out from molesting his own kids to babble:

>Roger...you will be the front-most contestant for Putz Of The Year.

That's better than being an anonymous coward who will get the ASSHOLE OF THE YEAR award, fuckstain.

> You spew filth,

Poor little baby. I bet you don't even subscribe to cable tv, because of the "filthy words" that come across the cable channels. Now, little boy, you sit there and masturbate to false profit stare and pretend you never use flithy words. Those posts over in alt.gay.pedophiles you posted have some of the nastiest, filthiest language yet. Don't ddeny you posted them, either, fuckhead.

> you plagiarize,

Suuuuure I do..... you

> you spend your whole life on the news groups. That is
>just for starters.

I'm not posting at the times YOU do, LOSER...of course, your pimply-ass, pock-marked face kind of repulses women, even if you has a sexual orientation
towards women. now, you post late at night when you come home from the gay bars, driving under the influence, teary-eyed when the old and ugly drag queens have rejected you yet again. Just another lonely ol' Saturday night, eh, doggie fellator arf arf? Well, maybe you can have sex with your dead grandmother's corpse, that you have propped up in the corner of that filthy, roach-infested apartment.

>Maybe you should spend some of your time watching television instead.

Maybe you need to pull your malformed head out of your ass. Maybe you need to
quit obsessing on me, little shitling.

> I understand that your buddy in Hiram, Georgia has a big screen TV for sale.
>He needs money fast, and you may get a good deal on it. Scrape the pigeon
>poop from the top of it and you may find another outlet for your time.

Poor arf arf.....molests his own kids and obsesses about W4AMP and KC8JBO.
He can't get on the radio, because everybody laughs at his shitty audio.

Full of "methane gas," "Lampshades" <Ovens@GasIsUs.comz> babbled:

>Hey! Does this mean that Lloyd delivers? I'd like to order a huge one with
>anchovies and sausage.

The only huge sausage you like is the one that reams your ass on a nightly
basis.

> How far does Lloyd's delivery area extend? Can he
>deliver one to Alaska?

LARDASS LLLLLLOYD couldn't find Alaska on the map.

>If he can't make it that far, maybe Roger can loan him the Yugo.....if
>Roger's mom lets him have it, that is.

We don't have a yugo, FUCKHEAD. Pull your head out of your ass and, well, I
guess you'd have to go to the hospital to do that. Only a Doctor could
preform
such a surgery.

You sound more familiar with the car, though? What's the matter, that all
you
can afford, up there in the high inflated consumer price state of Alaska?
MWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!!
Maybe you can dine on some of your obses mommy's whale blubber. She could
stand to use a few pounds as it is.

>Rog...push your inflatable girl friend out of the car and let Lloyd use it
>to deliver my pizza!

You think Llllloyd will use the so-called "inflatable girl friend" to deliver
a
pizza? Or do you need it because you only fuck those moose and you're tired
of
fucking moose? And you couldn't even get one of those fat eskimo girls up
there to give you a charity fuck? You mean you're that fucking ugly?
MWHAHAHAHAHAHA!!
Maybe you can get one of your gay buddies to give you a reach-around, or let
Lardass Lllllloyd do it. He has plenty of experience in such matters.

6871. OT: Something to reflect on this day

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-13 13:07:27 UTC
From: WebDoc <arcweb@bnnorth.net>
Message-ID: <3AFE870F.84D03266@bnnorth.net>
Source record: 89652

Someone sent this to me, I printed it out for my mother, for 5 minutes
lets forget about all the bickering and think about where we came from
and the women that took care of all of us.

WebDoc

Before I was a Mom
I made and ate hot meals.
I had unstained clothing.
I had quiet conversations on the phone.
Before I was a Mom
I slept as late as I wanted
And never worried about how late I got into bed.
I brushed my hair and my teeth everyday.
Before I was a Mom
I cleaned my house each day.
I never tripped over toys or forgot words to lullabies.
Before I was a Mom
I didn't worry whether or not my plants were poisonous.
I never thought about immunizations.
Before I was a Mom
I had never been puked on
Pooped on
Spit on
Chewed on
Peed on
Or pinched by tiny fingers
Before I was a Mom
I had complete control of my mind
My thoughts
My body
And I slept all night and got plenty of rest.
Before I was a Mom
I never held down a screaming child
So that doctors could do tests or give shots.
I never looked into teary eyes and cried.
I never got gloriously happy over a simple grin.
I never sat up late hours at night watching a baby sleep.
Before I was a Mom
I never held a sleeping baby just because I didn't want to put her
down.
I never felt my heart break into a million pieces
When I couldn't stop the hurt.
I never knew that something so small could affect my life so much.
I never knew that I could love someone so much.

I never knew what love at first sight really meant.
I never knew I would love being a Mom.
Before I was a Mom
I didn't know the feeling of having my heart outside my body.
I didn't know how special it could feel to feed a hungry baby.
I didn't know that bond between a mother and her child.
I didn't know that something so small could make me feel so important.
Before I was a Mom
I had never gotten up in the middle of the night.
Every 10 minutes to make sure all was okay
I had never known the warmth
The joy
The love
The heartache
The wonderment
I didn't know I was capable of feeling so much
Before I was a Mom.

Yes, there was an actual criminal trial held, and
the trial transcript is a public record available to
anyone who pays a copying fee to the Paulding
County Clerk of Court.

And yes, you have the correct e-mail
address.

Al

6873. IRLP's Version of Speak Freely

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-13 14:44:37 UTC
From: w7sta <>
Message-ID: <3b7tft0v3h0gt4lp4j8rf4njuud1veol8f@4ax.com>
Source record: 89651

Can anyone forward me a copy of the modified Speak Freely software
used in IRLP? Speak Freely is open source license so this is legal.
Please use my call sign @arrl.net.

Thanks, W7STA

Poor widdle fuckstain arf arf....gonna lick your mommy's dog's asshole as a
present to her this Mommie's day? Oh, that's right, after you "came out" to
your parents with your perverse lifestyle, they diowned you and forbade you
from ever visiting them again. Well, arf arf will spend this Mother's day
drunk and alone, hoping maybe his AIDS will terminate his miserable
existence.

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

BWAHAHAHAHAHAHAHAHAHAHAHHAHAH!!!!!!

Ohio/Penn DX Bulletin No. 511

The Ohio/Penn DX PacketCluster
DX Bulletin No. 511
BID: $OPDX.511
May 14, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W3RM, W3UR & The Daily DX, K4VUD, KO4MR, N4AA & QRZ DX, W4VQ, K6GNX, N6UB, K7BV, K8MR, K8YSE, KU9C, 4X6UO, 9A6AA, 9A7K, DL1EK & DX News Letter, E21EIC, EA5KB, F5NOD, G0KJW, G3XSV, G3XTT, HB9DLE, HP1AC, I2YSB, JA0DWY, OA4DJW, ON4BAM, PA1AW, RA4HT, SP5PB, UX7MA, UZ8RR, V31MX, VA3RJ and VK4CP for the following DX information.

FEW NOTES FROM EDITOR, TEDD, KB8NW: Because I will be attending the Dayton HamVention, I cannot guarantee that there will be a bulletin next week. If it does happen, it will probably be late Monday. Please, continue to send your information (you never know!).
The Northern Ohio DX Association (along with WVNO Radio) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel (old Stouffers) on Friday and Saturday evenings. All DXers/Contesters are welcome. Munchies and refreshments will be avaialble. Come and meet the members and friends of NODXA.

TIP OF THE YEAR (Get the hint!): When sending regular messages, turn OFF your "HTML" format in your mail programs and use plain text. This will save a lot of bandwidth. Using "HTML" usually makes the message twice as big and copies itself twice in one message!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6/May, through Sunday, 13/May there were 224 countries active. Countries available: 3A, 3B6, 3B8, 3B9, 3C, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E3, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J5, J6, J7, J8, JA, JD/m, JT, JW, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY,

LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/n, ZK1/s, ZL, ZL7, ZP, ZS
There were 39 CQ Zones available during the past week.
CQ Zones that were not active are: 2
There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,9,15,21,22,23,24,25,26,31, 34,35,43,58,59,68,69,70,71,72,73,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B6RF THE AGALEGA DXPEDITION (Update). It seems this DXpedition is now going QRT early. According to Sigi, HB9DLE, Headpilot Station for the 3B6RF operation, a "Huriccan Warning for Agalega" will make the 3B6RF Agalega DXpedition go QRT on Monday, May 14th. Check for official news and updates on the team's Web page at: http://www.agalega2000.ch/

5U, NIGER. Jim, 5U7JK, has been active recently on 10 meters. He was heard this past Wednesday, May 9th, on 28495 kHz around 1630z where he has been heard sporadically over the past few weeks. QSL Manager is Silvano, I2YSB.

5V, TOGO. YL Elvira, 5V7SE, has been active over the past week on 12 meters as well as 10 and 15 meters SSB. Check the following frequencies after 1600z for activity: 21275, 24965 and 28495 kHz. She has also been on a 40 meters net with Daniel, 5V7TD, on 7045 kHz around after 2130z. Daniel has been active mainly on 20 meters but has also been heard on 17/12/10 meters. QSL both via IV3TDM.

6Y, JAMAICA. Look for 6Y6L to be active October 23-30th from IOTA NA-097. Operation will be on all bands 160-6 meters, CW, SSB and PSK-31. QSL via WA8LOW.

C9, MOZAMBIQUE. Joe, G3MRC, is now active as C91MR/3 from Beira. You can usually find him on 24901 kHz (sometimes on 21052 kHz) between 1600 and 1830z (sometimes as late as 0700z). QSL via home call.

E4, PALESTINE. Guenter, E4/OE1GZA, was expected to operate from Ramallah over the past week with a linear amp. He is mainly looking for stateside contacts.

EN, UKRAINE (Island Operations). Operators UX7MA, US5MPO, UR0ML and others will be active as EN1MKN from islands on the river "Severskyi Donets" (the Ukrainian Island Award references numbers are: SD-06 and SD-07). Their activity will be on all HF bands CW/SSB, from June 13-30th. QSL via UX7MA, by the bureau or direct to: P.O.Box 22, Stakhanov 94000 Ukraine.

HK3JJH/HK0M WRAP-UP. Pedro, HK3JJH, wrote to OPDX and informed us that he returned from Malpelo late Saturday evening (May 5th). He states that it was a little hard, but he is glad to be home. Pedro made approx. 15000 QSOs on SSB on all the bands, except 6 and 160 meter, which had bad propagation. He now has to translate the hand written log to the computer and send all the information to Carl, N4AA. He plans to write about his trip/activity and send it to Carl for the "DX Magazine".

HOSPITALITY SUITE IN THE SUN. The Mad River Radio Club is pleased to announce that it will again be hosting the "Suite in the Sun" at the Dayton Hamvention Friday and Saturday May 18th and 19th. Located in spaces 3858-3860, they will be there with chairs, cold soda, munchies, and a roof overhead (think protection from sun, not rain!). Stop by to take a break, talk contesting, or even look over their fine selection of radio junk for sale.

HS, THAILAND. Champ, E21EIC, will activate the RAST club station HS0AC in the CQ WPX CW Contest (possibly as a Single Op). He will be active on 80 and 160 meters. Suggested frequencies are 3.524 MHz and 1.834 MHz. QSL via G3NOM.

IOTA NEWS.....
EU-016. Look for the following operators/callsigns Alfred/9A5KV/p, Matija/9A3VM/p and Tom/9A2AA/p to be active from Sveti Andrija Island May 18-20th. This DXpedition will be active, weather permitting. QSL Manager for all callsigns is: Alfred Raguz, 9A5KV, P.O.BOX : 286, 20000 Dubrovnik , CROATIA. Other reference numbers good for this operation are:
World lighthouse Award : LH-388
Croatian lighthouse award : CLH-143
The "Lighthouse Sveti Andrija" is valid for the Croatian Light House Award. Hams interested in the Croatian Light House Award can get all the details on the following Web page at:
http://www.qsl.net/9a7k

EU-038. Maurice, ON4BAM, will be traveling to Holland on a holiday. While there, he will activate the "Island of Terschelling" from May 24-27th. He will be active from his car while signing PA/ON4BAM/mobile, using his TS-50S and Outbacker Perth. He mentions that if there's enough free space, he will put up his DK8SQ tower and some wire antenna(s). His activity will be on 15, 12, 10, 18, 20 meters in that order depending on propagation. QSL via CBA.

NA-073. Jay, V31MX, will be operating from Caye Caulker, Belize, starting the evening of May 15th through May 17th. He will be operating on 15 and 20 meters SSB. QSL Manager is K0BCN.

SA-052. A group of enthusiastc Peruvian hams are planning to activate San Lorenzo Island. They are currently trying to solve/finalize all the paperwork to operate from the island, including the use of the special 4T prefix callsign. They inform OPDX that the island is under Peruvian Navy control. The operators are expected

to be Manuel/OA4AHW, Sergio/OA4DKC and Pablo/OA4DJW. They planned to have 2 stations active on 80-10 meters. The prearranged date is June 29th through July 1st, but these dates can suffer changes depending of the paperwork. The QSLs will be via OA4DJW.

LIGHTHOUSE OPERATION (Lights Out!). The information OPDX received and reported on in last week's bulletin about Eric/G0KJW and Terry/G0OWE going to Longstone Lighthouse (LH 0234) is not true. Eric contacted OPDX and confirmed this. We are not sure who started the rumor, but we are sorry for reporting it.

PJ2, CURACAO. Nine members of the Bristol Contest Group will be here and active from July 19-31st. Operators G6YB, G3RFX, G3TKF, G3XSV, G4FKA, G4HFX, G0WKW, M0AXF and M0WLF will provide plenty of activity as PJ2/homecall on all bands CW/SSB. They will also be active during the IOTA Contest on July 28-29th, using the special callsign PJ2Y. A special QSL for PJ2Y will be issued with G3SWH as QSL Manager. QSL all other activity to the home callsigns.

PY0F, FERNANDO DE NORONHA (Update). Dennis, K7BV, will begin operation on May 24th as scheduled. After an All-Band/Single Op effort in the CQ WPX CW Contest, he will operate through June 1st on all bands 160-6 meters, primarily on CW. A special callsign PV0F will be used throughout the operation. Rod, WC7N, < E-mail: wc7n@gb.wave.net > is building up a 9BDXCC chasers "work list" for Dennis including long path 160 skeds for Asia. Carl, N4AA (editor of QRZ DX), has joined the team assisting Rod keeping in touch with Dennis frequently to insure that every effort is made to fill the needs of the deserving. Carl, K9LA, is brewing propagtion guru magic to predict the best path/time for those QSOs. QSL via Steve, KU9C. Check the following Web site which will be updated frequently with Dennis's current status: http://www.qth.com/py0f

QSL INFO AND NEWS.....
Alex, PA1AW, reports that he now has all of the 5A24PA logs. Cards will be printed during the next month. Cards will start going out mid June 2001. QSLs for 5A24PA go to: Alex van Hengel, PA1AW, Schoener 85, 2991JK Barendrecht, The Netherlands.

QSLs for all valid callsigns in the A52UD log not previously answered direct have been prepared and sent through the bureau system. Work is now proceeding on outstanding requests for QSLs from K4VUD's activity as HS0ZCW, XW1UD, 9N1UD and 9N7UD. Questions should be directed to K4VUD.

Don, G3XTT, (D68C Publicity Manager), reports: "Phil, G3SWH, is receiving a lot of phone calls and e-mails asking about the availability of QSLs for our February Dxpedition as D68C. As most folk will realise, with the biggest DXpedition of all time (168k QSOs!), getting the cards printed has been a major task, especially as we have gone for a high quality 4-sided card, which will look good in everyone's QSL collection. The cards are being printed in Germany, and should arrive with Phil late May. However, Phil and his xyl have a week's trip to 8Q7 scheduled for early

June, and doesn't expect to get into the QSL activity until after his return (even QSL managers deserve a break occasionally!). Please be patient. The cards will be well worth the wait. And remember that SWL cards do not go to Phil, but to Bob Treacher (see previous bulletins for his and Phil's address)."

Jose, EA5KB, informs OPDX that he is the QSL Manager for following stations: CO2FN, CO8EJ, CO8OT, CO3JR, CO8CY, CM6QN, CM6YD, CE2LZR, YV6AZC, TG9AMD, TG9AAK, CX2AQ, CX5AO, CX2SA, CX3VB, HP1AC, CX1CCC and CW0Z (SA-030). QSL is OK via the Bureau or CBA.

FR/F6KDF/T QSL STATUS. Gil, F5NOD, one of the FR/F6KDF/Tromelin CW operators, reports that around 1500 QSLs were supposed to be mailed last week (The major part of it are QSLs received last year). A second QSL package (around 800) will be sent at the end of this month (The last package of QSL received last year). Gil states again, "Do not resend QSL requests yet ... Save your green stamps .. I will inform you when all QSLs were mailed! Please do not send me E-mail 'Did you receive my QSL?': Because I really don't know! Don't worry about your QSL! All QSLs received will be returned!"

Cam, HP1AC, informs OPDX that he now has a QSL Manager handling his cards after May 1, 2001. QSL HP1AC via his QSL Manager EA5KB:
Jose Ardid, P.O.Box 5013, 46080 VALENCIA, SPAIN.

Members of the United Amateur Radio Club (URAC), operated using the callsign N6UB from Catalina Island (IOTA NA-066) during last weekend (May 11-14th). Please QSL using a SASE or enclose an envelope with green stamps or an IRC to cover postage, direct to N6UB (good in the callbooks). URAC operates a Club Station at the Los Angeles Maritime Museum in San Pedro, CA (part of Los Angeles). Operators from the club will include Martin/N6UB, Dale/W7IXL, Neal/N7NW and Doug/WB6ROH.

Steve, KU9C, states that the PW0S QSLs have began to hit the mail. He is working hard to get as many out as he can before the Dayton HamVention. Some of the PW0S team will be there, and if you want to see them, look for them at the DX forum on Saturday morning or at the QRZ DX booth on Saturday 2-3 pm (booth #313). The PW0S QSL can be viewed at the following Web site: http://www.ku9c.com

Thanks to Vladimir, UZ8RR, for providing a short list of QSL routes.
SO8ZZ via UY5ZZ EM10UCC via UY5ZZ
EM7Q via UY5ZZ US0Q via UY5ZZ
QSL only direct to UY5ZZ: Box 4850, Zaporozhye, 69118, UKRAINE

The VK9ML QSL Cards have been received back from the printer. The card can now be seen on the VK9ML website (Go to News Bulletin #21) at:
http://www.qsl.net/vk9ml/

VK9XY QSL UPDATE. OPDX was informed of the following: Stefan, DH1SGS, has stated in late April that all VK9XY cards have not been sent out yet. There is some problem with mailing the cards at present, but when this is cleared up, all cards will go out.

RG, RUSSIA. Slava, UA4HTT, will be active as RG4H in the CQ-M, WPX and all major contests. QSL manager for Slava is RW4HB. Bureau cards are OK, for sending direct, send to: Serge Golobokov, P.O.Box 37, Samara, 443099, Russia.

S2, BANGLADESH. RASHID, S21AR, is active almost daily on 15 meters. Check around or inbetween 21260 and 21290 kHz, from 1100 and 1530z or after 0430z. QSL via JA1UT.

SPECIAL EVENT. Gil, JA0DWY, informs OPDX that a special event station for "International Telecommunications Day" will be active from Nagano, Japan (JCG: 09008), now through May 20th. The callsign will be 8J0ITU. Gil told OPDX that he will operate this station May 17-20th. The station will be active on 80-10 meters (WARC bands too) CW/SSB (however, mainly CW). QSL via JARL bureau.

SPECIAL EVENT/IOTA OPERATION. A group of Italian operators will be active May 23-27th from Santo Stefano Island (IOTA EU-045) Pontinian Archipelago with the special callsign IB0S. This special event is to commemorate the century of the first radio contact made by Guglielmo Marconi between Cornwall and Newfoundland through the Atlantic Ocean. A contact will be made with VO1WET on SSB and also on CW Saturday, May 26th at 1300z. QSL Manager for this special callsign IB0S is I0YKN: Carmine Meoli,
Via della stazione snc, 04010 CORI (LT) ITALY.

SP, POLAND (Lighthouse Operation). Peter, SP5PB, will activate the Niechorze Lighthouse as SP5PB/1 from May 18-20th. Activity will be on CW/SSB. This operation is valid for the "SP Lighthouse Award", SPL 13. QSL via the bureau or CBA.

TT, CHAD. Chris, TT8DX, has been very active on 10 meters over the past weekend. Check 28495 kHz starting around 1330z as late as 1800z. QSL via F5OGL.

VP5, TURKS & CAICOS ISLANDS. Dick/W3RM and Mike/N3MT will be active from the Providenciales Island (NA-002) from May 31st through June 14th as VP5/W3RM and VP5/N3MT. Operation will be on 80-10 meters, mainly CW, some SSB. QSL via home calls.

XW, LAOS. Charly, K4VUD, who has been active as HS0ZCW over the past week, should be in Laos by the time you read this. He did not mention what his callsign would be, but he did state, " I will be searching for the correct license there to satisfy ARRL DXCC." Charly hopes to be on the air on 20 and 15 meters with 100 watts. Check on CW about 20 kHz up from bottom of band edge (plus or minus Asian pirate QRM) and on SSB, check the usual frequencies.

ZL7, CHATHAM ISLAND. Ed, K8VIR, is active as ZL7IR. His length of stay is unknown, but his activity seems to center around 20/17/12 meters. He reportedly is working on the island and will be active during his free time. Operations seem to start around 0100z and sometimes last as late as 0700z. There have been a few QSNs as early as 1030z on 20 meters. Check the following frequencies: 14260, 14270, 18130 and 24950 kHz. QSL via W8WC.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

6890. Monkey Man JBO On The Lose

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-15 01:12:56 UTC
From: Arf! Arf! <DoggieDaze@Liberal.comz>
Message-ID: <9dpvq3$2c9$0@pita.alt.net>
Source record: 89669

India:
Ghaziabad is in the grip of panic. Not a day passes in this city without sightings of the weird monkey-man, KC8JBO. It appears that someone donning a rhesus monkey mask has been stalking various localities and mens' rooms of the city, spreading terror among its residents. The monkey-man has even injured a few.

The latest victim of this sinister simian is 30-year-old Shamir Begum, a housewife living in the Islamnagar area. The woman swooned when she came across monkey-man Roger squatting on her terrace.

"Shamir Begum screamed and collapsed. By the time we arrived at her side the monkey-man had fled," said a neighbour.

Although the Ghaziabad Police claim that there is nothing like a monkey-man, complaints of sightings, scuffles and looting by monkey-man Roger are pouring into police stations here.

Hi,

I am trying to find a website which shows where the Denver repeaters are (the actual locations, not that they are in Denver). There are loads of them listed, but apparently they are spread out far and wide, because my little HT could not reach a one while I was on vacation there.

Thanks,

Michael Adams

Source record: 89672

Can't help with the where, but would remind you that the typical HT has an antenna not much better than a dummy load. I have an HTX-404 and could use about 6 repeaters (absolute max) here in Rochester, NY. I ditched the dummy load antenna and bought an antenna about 16 inches high - it made a BIG difference. I can use perhaps a dozen repeaters now. I usually use the WB2KAO repeater (444.850) and, on high power, had some 'bacon frying' on my signal when I was at the vet's office (maybe 10 miles away). With the new antenna, I am full quieting on low power (at the vet's) - and can use the repeater from about 20 miles away if I wish! (I can also now use it from within my building at work!)

73 from Rochester, NY
Jim

Strange you couldn't hit any, as with our mountains, there always seems to be pretty good coverage (in Denver itself at least - now if you are actually in the mountains, well...)...Take a look at these sites:

http://www.colcon.org/
http://rmrl.hamradios.com/
http://www.qsl.net/cra/

Those will give you a good start, as they are 3 of the major players in Denver/Colorado...

6898. Monkey Testicle Slurper ARF ARF On The Loose

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-15 12:01:30 UTC
From: KC8JBO <rogerwkc8jbo@MailAndNews.com>
Message-ID: <3B0B0D0A@MailAndNews.com>
Source record: 89677

True confession from monkey testicle gobbler "Arf! Arf!"
<DoggieDicksucker@Liberal.comz> who jizzburped:

>San Francisco:
>Ghaziabad is in the grip of panic. Not a day passes in this city without
>sightings of the weird monkey testickle-slurper, ARF ARF. It appears that
>someone with a rhesus monkey facial features has been stalking various
>simians in zoos and mens' rooms of the city, spreading terror among its
>residents. The monkey-man has even injured a few of the monkey testicles
>in his nutsack slurping fervor.
>
>The latest victim of this sinister simian is 30-year-old Shamir Begum, a
>housewife living in the Palo Alto area. The woman swooned when she came
>across monkey-testicle gobbler ARF ARF squatting on her terrace, fellating
her
>pet dog, who was mistaken for a simian.
>
>"Shamir Begum screamed and collapsed. By the time we arrived at her side the
>monkey-testicle gobbler had fled," said a neighbour.
>
>Although the San Francisco Police claim that there is nothing like a monkey-
>testicle slurper, complaints of sightings, scuffles and looting by
monkey->testicle knosher ARF ARF are pouring into police stations here and
in
Athens >AL.

Poor arf arf, sucking down those dog testicles and gennitals in that drunken
stupor.

Cross-posted to: alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.swap

Like new TS450/SAT with YK-88C filter (500 Hz CW, $130 new) installed. All functions are perfect and cosmetics are 9.5 out of 10. Includes factory packing, mike, power cord, manual. Never been "tampered with". Also includes mobile bracket (but rig has never gone mobile).

Asking $650 plus shipping to ConUS by way of your choice.

Also have matching Kenwood MC-60A desk mike ($140 new), $95.

$725 for both radio and desk mike.

I need a smaller rig for the dash of the RV.

I'll consider a trade for a "like new" 706MkIIG.

Will ship on receipt of US Postal Money Order, or when your personal check clears. Will "double box" the original packing to keep it safe.

Email me if you have questions.

73s.....Rudi - WA6RW

Hi all,

I'd like to know for a friend with no usenet experience:

"I have here a mechanical IF filter , the Kokusai MF-455-150 G 4.
I want to use it in a receiver , but I do not know how to connect it. Is
there any-one , who can help me with info about this filter ? There are 6
connection points ,marked as follows : on the left side of the filter
there are the points N, B , and C and on the other side the points 1 , 2
,and 3 . Also there are 2 earth connection points"

If you have any info about this filter please let me know so I can help him.

Taking time out from his monkey and canine testicle slurping spree, the
Jizzswallowing "Arf! Arf!" <DoggieDicksucker@Liberal.comz> gibbered:

>Roger, you've got your head so far up your ass you can chew your food twice.

Aids infected Arf Arf the testicle gobbling pervert, you need to quit
stealing
other people's material. Fuckstick.

Do you ever wonder what life would be like if you'd had enough oxygen at
birth?
If ignorance is bliss, you must be the happiest person alive.

No go overdose on drugs like your other family member did. Or maybe you're
waiting for your father to come home and beat you and your mother again.

Hey people.
Sorry to interupt the day, but I just thought you might like to know that
our online radio station is online and running!

http://radiokaos.x5.ca

You can even use the web to send us requests, and they will be placed
automatically in the bottom of the rotation queue, radio on demand! :)

That's all, come and check us out, we have live, local programming (Windsor
and Essex County Area) every night at 7 pm.

Give us a try, see what you think, you can rach us through ICQ at: 114466114
, or by e-mail: newsgroup@radiokaos.x5.ca .

And now back to your regularly scheduled conferencing :)

Hi...
I am a postgraduate student doing research on exercise motives at
Bristol University in the UK and I need your help!

If you exercise for more than four hours per week then please, please,
please fill out my questionnaire at www.lds.co.uk/expo/nikki/index.htm

It's totally anonymous, confidential, non-commercial and of course FREE!
All the answers are collated together and analysed by a special statistical
software package. I'm not interested in individual responses at all, but I do need lots of
data
for the results to be valid.

Please help it will only take a minute or two - just check the most
appropriate box there's nothing to write.
www.lds.co.uk/expo/nikki/index.htm

Remember I'm only interested if you do four hours or more exercise per week.
I'd like to get the results by the end of May so don't put it off!
Thanks for your help.
www.lds.co.uk/expo/nikki/index.htm

I believe that anyone can use a ham station for distress traffic
(immediate threat to life or property), but only if normal
communications are not available.

>>on CB that the rest of the citezens don't

No clue, but it would be naive to think that it doesn't happen.

>Without proof of your accusations, you're committing libel against
>the entire amateur service.
>
>KH6O

I doubt it, since he is only talking about "some people", which may not even include hams, and certianly does not include "the entire amateur service."

6924. FS: Motorola GP-68 w/ 2 batteries, Quick Charger, and speaker mic.

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-17 09:34:38 UTC
From: foxblaine@aol.com

Source record: 89603

Greetings!

I have for sale a Motorola GP-68 VHF handheld radio. Includes 2 batteries in absolutely awesome shape. One is the standard GP-68 7.2v battery, and the other is a Kendoo 7.5v, 1800 mAH battery, that lasts forever, and ever!!! I've used this battery primarily in my job as a patrol officer, and it works great! Also included is the Motorola speaker mic for the GP-68 -- You won't find a better deal anywhere! Price is $325 (firm), plus $15.00 shipping. I prefer payment via PayPal.com, but will accept a USPS Postal Money Order, if you agree to OVERNIGHT it to me, at your cost of $11.75. I need the money, as divorce is pending, and I must liquidate that which is not necessary. This is a 'field progammable' rig, so ya don't have to take it to a dealer to get it programmed. Covers the amateur 2 meter band, as well as the 150+ megahertz business band. If interested, contact me via e-mail!

73 de N9LXX~~~

Scott,

I am unfamiliar with your Yaesu, so I cannot comment on whether it actually has DSB or if you have a failure. I would suggest you look in the owners manual to see what it says.

DSB used to be an inexpensive way to transmit SSB. The only real down side is that you are transmitting both sidebands. DSB with the carrier injected is AM. DSB with the carrier suppressed is DSB sideband.

I agree there seems to be no reason to include DSB if you already have SSB!

It may well be that the above article is forged. Whether it is or
not, the "incident" described deserves some comment.

It was known in informed circles that "Nashville Joe" Kane, KF4TOH,
was engaging in malicious and illegal intentional interference,
operating on HF without an HF license, and numerous other illegal
and grossly unethical acts long before Mr. Davies ever mentioned
him.

If there is some kind of "sin" in reporting Mr. Kane's infractions,
which I doubt, it pales in comparison to the multiple dishonorable
and disreputable acts committed by Kane.

With all good wishes,

Kevin, WB4AIO.

6935. TWIAR Looking for volunteers...

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-17 17:43:26 UTC
From: GW <me@you.com>
Message-ID: <25UM6.39002$4b1.3254874@bin1.nnrp.aus1.giganews.com>
Source record: 89614

If anyone is interested in helping out This Week in Amateur Radio please respond to the addresses below.

You can find out more about twiar at http://www.twiar.org.

Thanks for any help you can provide and 73's. Hope Dayton Hamvention goes well for everyone attending. Cant make it this time around :-(

*** WE'RE LOOKING FOR SEGMENT PRODUCERS ***
Are you knowledgeable about a particular segment of the amateur radio hobby? This Week in Amateur Radio is looking for hams that would like to join the on-air team of our weekly bulletin service.

You would be required to write, produce, and record a once-a-month segment about your topic of choice, with a running time between three and nine minutes.

Some suggested topics we're looking for are, computers in the shack, Amateur television, digital modes (take your pick) DX'ing, or any other amateur related subject.

For more information please contact our technical director W2XBS at kxkvi@global2000.nospam.net, or via packet at WA2UMX.

*** THIS WEEK IN AMATEUR RADIO LOOKING FOR NEWS ANCHORS ***
This Week in Amateur Radio is looking for, we guess you could say, frustrated broadcast announcers. If you always wanted to be a radio newscaster, why not come on board with North America's premier amateur radio bulletin service.

All you need is, a desire to be on the air, a commitment to a once every three or four week rotation with other anchors, a pentium based PC (or equivelent Mac) equiped with a decent microphone, and an internet connection.

TWIAR will supply all required software. So, if you always wanted to be "on the air", please contact our technical director via e-mail: kxkvi@global2000.nospam.net.

>
>I agree there seems to be no reason to include DSB if you already have
>SSB!
>
>73
>
DSB is more difficult to tune in than SSB if you don't reject one of the
sidebands in the receiver. In SSB you can tolerate a little slop in the exact
carrier frequency and the audio comes out "quacky" but still intelligible. In
DSB, if you're slightly off you get both "quacky" sidebands interfering with
each other.
To get 'sideband diversity' (if there is such a thing) you need to select either
one or the other sideband, whichever is better but not both.
This is why I use CW.

This post only really applies to Australia. But once you have read this,
consider the implications if this thinking were to start a global trend.

note, ACA = Australian communications authority

<snipped from Australian amateurs news bulletin>

ARE AMATEUR OPERATOR QUALIFICATIONS NECESSARY? TELL THE ACA!
In considering changes to the examination and certification
arrangements,
the ACA says it's appropriate to ask whether operator certification
is necessary in all circumstances.

It is open to debate whether a 'once only' demonstration of a person's
knowledge by examination, particularly given that most Amateurs use
commercially manufactured equipment, continues to serve those purposes.
Could, for example, interference and operating procedures be just as
well managed by licence conditions and by requiring that only
commercial
equipment of a certain 'standard' is used?

The ACA welcomes comments about whether operator certification is
always
necessary, and, if not, under which circumstances could the requirement
be dropped?

So one out of 700,000 is about 0.0001% of the ham population. But even if it were 1000 hams out of the 700,000, that would still only be about 0.1% -- one-tenth of a percent. That doesn't fall in the category of "much," or "many." It's almost insignificant.

>According to the FCC, much of the carrier throwing, music etc that
>appears on the CB bands is due to Hams.

Reference please. And is "much" your word or theirs? What percent of a quantity would you use the word "much," Bill? Say 25% ? That would mean the FCC (or you) believes that about 175,000 hams are QRMing 11m. Or would say that the use of "much" would mean, say, 10% ? That itself would imply that 70,000 hams are federal law-breakers. So is "much" your word choice or the FCC's, Bill?

If you are an extra and I am a CBer, why do you need me to quote you
regs? I "believe" that my previous statement came pretty darn close to
the meaning of 97.403, but in case I picked the wrong one, you might
want to check the other emergency rules pertaining to ham radio, which
are found at 97.401 through 97.407.

Close enough?

"BuggerzYouth" <Dimmie@FelonsRus.comz> took a break from molesting his own kids to babble in message news:9e1s7b$ts5$0@pita.alt.net...

> Good post, Roger.

Anytime, FUCKHEAD. Run along back to your kids you molest.
And congratulation for admitting you don't have the balls to enlist in the service.

> This from a 46 year old live-at-home mamma's boy

MWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!
Says the no-testicles coward who won't even post using his own name.......oh,
the irony!

> whose only "discharge"

Poor thing, that's not what my DD-214 indicates. Now you don't even know what
a DD-214 is, do you, draft-dodging COWARD? Or are you just one of those "pretend patriots" who join the NRA just for the self-esteem boost (unlike most nra members) and listen to the so-called liberty net? Oh, that's right, in your case you jam the so-caled liberty net.

>is that burning, drip, drip, drip that you are taking antibiotics for.

I am?? That's news to me, the only drip, drip, drip is going into your STD-laden mouth, from your wife's dick.

I have a few more of these units left if anyone would like to buy one:

FOR SALE:

Exciting novelty item: HAND-CRANKED MAGNETO GENERATOR!
Produces 120V AC. These will provide about 20 Watts depending
on your cranking speed! The size is about 3" diameter and
3" deep with a retracting handle. Fluke freq meter shows around
20 Hz on one pair of terminals and around 60 Hz on another.
You can mount these behind a sturdy front panel with a single
hole and the large nut provided.
Will sell for $25.00 each plus $6.50 USA shipping

Color may vary from the style shown here:

6958. Looking for ALINCO ALR-206T manuals/info

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-18 21:26:26 UTC
From: ai928@FreeNet.Carleton.CA
Message-ID: <9e4422$2i6$1@freenet9.carleton.ca>
Source record: 89537
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi, all.

Someone recently gave me an ALINCO ALR-206T to try out. The problem is, there was no manual with it. (My friend had obtained it used from someone else.)

This xcvr is discontinued and the manual is no longer available from the manufacturer. I would like to obtain the users manual along with any detailed technical information (especially a detailed pin description of the microphone connector, and any calibration procedure data). (For all I know, these may or may not be included in the ALR-206T manual(s).)

Is there anyone in the Ottawa-Carleton region with a manual for the ALR-206T? If so, would you be willing to loan it to me for a few days?

Alternatively, is there anyone else in Canada or U.S.A. who would be willing to photo-copy and snail-mail the copy to me? (Anyone willing to snail-mail a copy, please E-mail me and I will send you my mailing address.)

Alternative 2: Does anyone know where I can find a copy of the manual on-line? (I tried GOOGLE search, but to no avail.)

TNX ES 73,

Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.homebrew

DSB works well when the receiver contains the circuitry to extract phase information from the sidebands such that a properly phased carrier can be reinserted. Most commercial DSB broadcast systems - there are such things - transmit a small pilot carrier to facilitate proper carrier reinsertion.

A GE engineer named Costas did some pioneering work on advanced DSB transmission and reception systems back in the 50's while I was in grad school. I seem to recall that he published in one of the amateur magazines an article on the "Costas System" of DSB. Maybe someone with better recall can furnish a reference.

I make no claims for the superiority/inferiority of DSB vs AM vs SSB. But DSB systems do exist and are said to have advantages under certain conditions.

wrote:

:>> Can you provide the callsign of any amateur illegally using his
:>> ham gear on CB?
:
:>There is at least one who isn't doing so any more. Check the recent
:>FCC announcements. The call sign was listed.
:
:So one out of 700,000 is about 0.0001% of the ham population. But
:even if it were 1000 hams out of the 700,000, that would still
:only be about 0.1% -- one-tenth of a percent. That doesn't fall
:in the category of "much," or "many." It's almost insignificant.

But, that is not what you asked for. You asked for the call sign of
"any amateur illegally using ...". I didn't recall the sign, but
did recall the FCC action notice. You can look it up for yourself.

That fulfilled your request. Quit trying to squirm off the hook.

Further, you failed to address the fact that the FCC feels much of the
intentional interference on the CB bands is due to Hams. You can also
look that up.

You cruel dudes best stop picking on O'Brainless! He is getting quite the complex about it and whines to his buddies that he has done nothing to deserve such disrespect. You guys and gals are victimizing him big time. He just wants to be left alone so he can send hundreds of spam messages, a few dozen magazine subscriptions, do a little hacking here and there, make a few anonymous phone calls and sit back with a case of cheap beer. Leave him alone. He never hurt anybody, did he? Did he?
The guy is, after all, a recipient of at least ten Medals of Honor, a Distinguished Service award, the Silver Star, the Bronze Star, a Purple Heart with three clusters, a Navy Seal diploma, a Combat Infantry badge, Master Blaster wings, and expert sniper with at least 17 different weapons. The man is a walking, talking hero. He is a true American Hero and a Hiram Legend.
Give him a break already.

And it's a damned good Chipswitch too. I have had one of these for the past
6 or 7 years and I still have mine It's acually my third one after the
first got stolen,, I made the mistake of selling the second and finally I
bought a brand new HR-2510 about 3 & 1/2 years ago. They are a far cry
better than either the standard HR-2510 or the opened up modification.

6975. Is Roger Really Gay?

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-20 08:00:27 UTC
From: Pubic <ShortHairs@doofuss.comz>
Message-ID: <9e7thsvit0@pita.alt.net>
Source record: 89554

Roger likes gay bars. He vehemently denigrates those of the gay persuasion, but as was said in earlier posts, methinks he doth protest too much.
Could it be that Roger is a Closet Queen? Is Roger in vehement denial of his own sexuality? Does Roger in fact prefer cuddling up to a virile male? Roger will likely go berserk and spew his insane spittle after reading this post, but the doubt remains.
IS ROGER REALLY GAY?

6976. CwGet morse decoder 1.20 was released!

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-20 12:04:55 UTC
From: amx2@dxsoft.com
Message-ID: <3b07b22b.16685389@news.cis.dfn.de>
Source record: 89555

Hello All,

I just have uploaded CwGet 1.20 to the main site and mirror
http://www.dxsoft.com/cwget.zip
http://www.hamradio-software.com/cwget.zip .

Your comments are welcome.

Best regards,
Sergei mailto:amx@dxsoft.com
http://www.dxsoft.com

==========

CwGet Versions History.

V1.20
The "Setup->Logarithmic Spectrogram" menu command or
Alt-Z hotkey switch spectrogram window between linear or logarithmic
scale.
Analogously, the "Setup->Logarithmic Oscillogram" menu command or
Ctrl-Z hotkey change oscillogram window scale.
Background colors of spectrogram and oscillogram windows can be
changed now.
See "Setup->Spectrogram Background Setup" and
"Setup->Oscillogram Background Setup" menu commands.
CwGet can transfer received symbols to another software now.
Data exchange can be made by DXSOFTEX.DLL library. See
http://www.dxsoft.com/dxs-exch.zip for details.
V1.12
User can change spectrogram center frequency now. Press "Alt" key
and
click on the desired frequence by mouse left button to move the
frequency
to the window center.
The marker of TX frequency is made to help with zero-beat tuning.
The TX marker is short thick black line. To change the TX marker
position,
click on the desired frequency by right mouse button (or by left
mouse
button with "Ctrl" key pressed).
"Speed Lock" button was made. CW speed is fixed when this button is
pressed.
Hotkey for this button is Alt-K.
[...]
Windows HAM radio software at http://www.dxsoft.com

Got a Realistic Pro90 TrunckTrack at a Police Auction recently.. ($70/deal!)... NO MANUAL.. how-ever, WAS able to find out how to load the 'trunktrack' channels to the unit.. works great, how-ever... our Ambulance channels are in the 'conventional range' (154mhz) and I have my choice of 800mhz OR 154mhz, NOT BOTH!?...

Can someone supply (simple?) instruction on HOW to 'blend' the unit to 'trunktrack' and 'conventional' SCAN?.... or is this unit, unable to do the 'jump' nessesary for such a 'dream?'....

IF it can't be done on this unit, I'm at least grateful that I no longer HAVE to listen to CITY UTILITY CHANNELS (about 40!).. while attempting the monitor the 'good ones'!!...

Thnx in advance: Lou Kells <ap915@hwcn.org> - Hamilton Ontario Canada

From: Negroid <Afrikan@spookie.comz>
Message-ID: <9e99co$ue9$0@pita.alt.net>
Source record: 89558

Subject: Warning Notice: Amateur Radio License: KC8JBO

Dear Mr. Wiseman:

The Commission has monitoring evidence that you have been deliberately and maliciously interfering with the radio operations of other licensed Amateurs on the 14 MHz Amateur band. This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be self-policing. Operation of the type described above is contrary to the basis and purpose of Amateur Radio and degrades the service for legitimate users. This serves as a Warning Notice that such operation will not be tolerated. Additional incidents of operation of the type described above will result in a monetary fine being levied against you and in revocation proceedings before an Administrative Law Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

> be stopped.
>

There is a big difference between unwilling and unable. Only these hordes of people getting sexually harassed by this poster with the supernatural ability to will them to read his posts can stop it. It is called "subpoena logs and legally pursue the user in the proper forum", but we have been through this before.

There is also another option, convince some LE that these posts are against the law, we'll work with LE in legal issues.

>>> But, of course you always have your preferred option, whine in the newsgroups about it.<<<

6983. Ignoramus JBO argues about the word "scatologist"

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-20 22:58:57 UTC
From: SLee@houston-hunks.com
Message-ID: <scatologist.kc8jbo@houston-hunks.com>
Source record: 89562
Cross-posted to: rec.radio.amateur.misc,alt.radio.scanner.flame_fest

On Sun, 20 May 2001 18:14:14 -0400, KC8JBO whined:

: Besides, there is no word listed for "scatologist," only "scatology" or
: "scatological."

From the American Heritage Dictionary of the English Language,
accessable on the web at http://www.bartleby.com/61/79/S0127900.html,
you can find:

==
NOUN : Inflected forms: pl. -gies 1. The study of fecal excrement, as in
medicine, paleontology, or biology. 2. a. An obsession with excrement or
excretory functions. b. The psychiatric study of such an obsession. 3.
Obscene language or literature, especially that dealing pruriently or
humorously with excrement and excretory functions.

OTHER FORMS: scatï¿½ï¿½oï¿½logï¿½iï¿½cal (sktï¿½ï¿½l-jï¿½-kl) or scatï¿½ï¿½oï¿½logï¿½ic
(-k) -
ADJECTIVE

scaï¿½tolï¿½oï¿½gist - NOUN
^^^^^^^^^^^^^^^^^^^^
==

Again, Mr. Scatologist, as has happened with quadratic formulas and
English usage, as well as Usenet RFCs, I'm right and you're wrong
(again).

It's almost *too* easy to demolish you.

=====
IGNORAMUS kc8jbo@ovis.net was caught in his own lack of education and
thought that the following was such bad English that he put it in his
Sig:

"You too need to get a newsreader which generates a References header."

EDITOR'S NOTES: I know, just call me cazy! I returned from the Dayton HamVention about 4:45 PM (Sunday, local time) and decided to finish OPDX.512. "Just call me dedicated to my readers". BTW, I had a great time!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13/May, through Sunday, 20/May there were 229 countries active. Countries available: 3A, 3B6, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A9, AP, BV, BY, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HR, HS, HZ, I, IS, J2, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZK3, ZL, ZL7, ZP, ZS
There were 40 CQ Zones available during the past week.
There were 54 ITU Zones available during the past week. ITU Zones that were not active are: 4,15,21,22,23,24,25,26,31,34,35, 43,58,59,68,69,70,71,72,73,74,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

4W, EAST TIMOR. Thor, 4W6MM, is active again. Check 20 meters around 14002 kHz after 1200z.

6Y, JAMAICA (Change/Update). The DXpedition team activating 6Y1A in the CQ WPX CW Contest has a last minute change of operators. The group now consists of: KE7X, N6XG, K6ST, and K2KW. Activity will be from May 20-29th, on 80-6 meters with an emphasis on 6 meters and the WARC bands outside the contest. QSL 6Y1A and K2KW via WA4WTG, others via CBA.

CONTESTERS/DXERS HONORED. Bob, K3EST, from the CQ Hall of Fame, reported last week that the CQ Contest Hall of Fame Committee is pleased to announce the two inducees for 2001 will be Sig/N3RS and Algis/LY2NK. Both new members were officially inducted into the Contest Hall of Fame at the contest dinner on Saturday, May 19th, in Dayton. The DX Hall of Fame is also proud to announce the two inductees into the DX Hall of Fame for 2001 were Bob/K4UEE and Bob/W4DR. Both were officially inducted into the DX Hall of Fame by Steve, N8BJQ, during the DX dinner May 18th, also in Dayton. You can read their biographies in the June CQ and May/June CQ Contest.

EXTREME DXING (Bert will be one busy guy!). Bert, PA3GIO, has updated his plans for his DXpeditions in 2001. Here is his planned schedule:
1) Bert, PA3GIO, will be signing 5R8GY in Madagascar on Ile Sainte-Marie (Nosy Boraha), IOTA AF-090 (Rare), from May 30th or 31st through June 9th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO. Website: http://www.pa3gio.nl/5R/

2) Bert will be signing FH/PA3GIO/p on Grande Terre, Mayotte Island (AF-027) from June 11-18th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO.
Website: http://www.pa3gio.nl/FH/

3) Bert will be signing FR/PA3GIO/p on Reunion Island (AF-016), June 19-22nd (with LIMITED ACTIVITY). He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO.
Website: http://www.pa3gio.nl/FR/

4) Bert, PA3GIO, will be active as VK9XV on Christmas Island (OC-002), from September 6-13th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO.
Website: http://www.pa3gio.nl/VK9XV/

5) Bert, PA3GIO, will be active as VK9CQ Cocos-Keeling Island (OC-003) September 14-20th. He will be active on SSB only on 80/40/20/17/15/12/10m with 100w using doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO. Website: http://www.pa3gio.nl/VK9CQ/

6) Bert, PA3GIO, will be signing VK6GIO from Australia, September 22nd through October 8th (On route and VERY LIMITED ACTIVITY). He mentions that perhaps he may have a short visit to Kangaroo Island (OC-139) as VK6GIO/5.

7) Bert, PA3GIO, will be signing VK9LO on Lord Howe Island (OC-004) from October 9-15th. He will be active on SSB only on 80/40/20/17/15/12/10 meters with 100w using a doublet with open feeder line. QSL (preferable by the Bureau) to PA3GIO. Website: http://www.pa3gio.nl/VK9LO/

FG, GUADELOUPE. The Russian Contest Club is glad to announce that Jack/RW3QC and Igor/RN3OA will be active from here May 21-28th, as FG5BG (CQ WPX CW Conetst) and FG/KC8QKF (before and after contest). It will be their second RCC Contest\DXpedition. RW3QC will participate in the CQ WPX CW Contest as a Single Operator/Multi Bands/HP entry. RN3OA will operate out of the contest on 160-80 meters, including the WARC bands, RTTY and PSK-31. QSL via RN3OA, by the bureau or direct to: Igor Zakharov, P.O.Box 381, Voronezh, 394000, Russia. (They would like to thank Georges/FG5BG for his help.

HAM-COM 2001. The Lone Star DX Association will be sponsoring the DX program at this event in Arlington, Texas. Some of the guest speakers will be Wayne/N7NG (ARRL), Wes/W3WL (D68C) and John/ON4UN (Topband DXing), The featured speaker will be Martti Laine, OH2BH. The LSDXA will also have a Hospitality Suite available June 8th (7-11PM) at the Wyndham Hotel. For more details, check the Web page: http://www.dxer.org/lsdxa
Also, check the Web page: http://hamcom.org

HB0, LIECHTENSTEIN. A group from Germany will be active for four days from the Principality of Liechtenstein starting Friday, June 1st, ending on Monday, June 4th. They will participate in IARU Region 1 Field Day. In addition, they will be active on 6 meters and on 10 GHz looking for ES and Rainscatter openings. The operators will be DF5UL, DL1GGT, DL5EBT and DL6SAQ and their callsigns will be HB0/homecall. QSL via their homecall.

HB0, LIECHTENSTEIN. Rob, PA0RDY, will be active as HB0/PA0RDY from May 25-29th, especially for the CQ WPX Contest. He will be running 100 watts into a vertical on 10/15/20 meters, plus a dipole on 40 meters. There will be some activity on RTTY and SSB before and after the CW contest. QSL via homecall.

HS0, THAILAND. Charly, K4VUD, is back here again for a few days as HS0ZCW (ed. may be waiting for his XW license -- See XW below). He has announced that he will be active on 40 meters CW (maybe some SSB). Check around 7015 to 7020 kHz between: 2300-2400z, 0900-1000z and 1100-1200z. (ADDED NOTE TO CHARLY: The group from NODXA missed you at their Dayton HamVention hospitality suite this year. Hope you can make it next year.)

IOTA CONTEST 2001. Ric, DL2VFR, informs OPDX that once again you can find this year's summary of activities for the IOTA CONTEST 2001 on the Web page: http://www.iota-post.com
Last year he had 123 announcements - which was very useful for DXers/

Contests looking for a new one in the contest, and a good source for contesters having a look to see if the island they want to go to was already occupied. The list is growing daily.

IOTA NEWS.....
EU-048. Members of Clipperton DX Club, Fabrice/F5NBQ (CDXC1050), Pierre/F5RRW (CDXC942 and UFT 978), Eric/F5LOW and Christian/ F1SDQ will activate the Island of Houat in Morbihan, May 31st through June 4th. They will use the callsign TM1H and will be operational from 160-10 meters (including WARC) on SSB and CW on the usual IOTA frequencies. They will use two IC-706MKII and TS-50 (100 watts), a vertical line antenna on 40 meters, a G5RV for the WARC bands, a sloper for the low bands and Yagi TH3MK3 for 10/15/20 meters. QSL via F6ANA (operator of A52FH) to the bureau or direct to Alain Mesnier, Les Grands Bois, Chemin De La Bussiere, 16440 Mouthiers, France.

EU-110. Operators DF9MV, DL1GEO, DL9CHR and DE0MST will be active from the lighthouse on Porer Island (Rock, south of Pula) on August 12-17th. Other reference numbers are: CI-090 and WLHA 0240. QSL via bureau (DARC) to DE0MST. Direct-address is: Fredy Stippschild, P.O.Box 1406, D-83657, Germany

EU-128. Kurt/DF4XX and Holger/DL5XAT will be active from Fehmarn Island for the WPX Contest weekend. They will participate as a Multi-Operator/Mixed Mode entry. The callsign will be DF4XX/p. All incoming QSLs will be answered through the bureau or direct.

EU-177. Thomas/SM5NGK, Stefan/SM5WAF and Jorg/DF6JC, will be operating from Harstena Island between May 24-27th, signing 8S5T. QSL via DF6JC.

SA-026. Paul, PY3DX, informs OPDX that he is going to take part in the upcoming CQ WPX CW Contest as PU3A (special contest callsign), portable on Santa Catarina Island in southern Brazil. Some other DX friends from his area (PY3KK/Koetz, PY3FOX/Xris and PY3YY/Andy) will also be going with him, but as they are not contest enthusiasts, their goal is to activate this island on the WARC bands, mainly on SSB mode. Paul adds, "Thus, while I'm suffering under big CW pile-ups performing my contest, they plan to drink a coconut water, watch the girls hanging around and make some DX from the island, hi hi hi. I think as time goes by I'm becoming less smart than I use to be, hi hi hi." QSL cards for PU3A will be OK either through the bureau or direct via Paul's home call, which is OK on the www.QRZ.com or Buckmaster at www.buck.com .

J49, CRETE. Laci/HA0HW, Tamas/HA4DX and Bandi/HA5NG will be here between May 25th and June 7th. They will use the special callsigns J49HW (HA0HW), J49DX (HA4DX) and J49NG (HA5NG). They will take part in the CQ WPX Contest (just for fun). It was also mentioned that they will try to go to one of the islands of the newly created "Crete Coastal Islands Group" (EU-187),

June 2-3rd. QSL via home calls.

KH2, GUAM. Operators Ban/JF2WXS, Yoshi/JE2EHP, Michy/JH2CYU, Aki/JH2QFY, Yasu/JJ2CYO and JS2ITP will be active June 9-12th. Activity will be on 160-6 meters SSB/CW. QSL N3WW/KH2 via JF2WXS, K1HP/KH2 via JE2EHP, KH2/JH2CYU via CBA, KH2/JH2QFY via CBA, KH2/JJ2CYO via CBA and KH2/JS2ITP via CBA.

KH2/AH2, GUAM. Aki, JI3ERV/NH2C, Chairman of Guam Contest Club, informs OPDX that after being absent in the CQ WPX SSB Conetst, the Guam Contest Club (GCC) has decided to be on the air during CQ WPX CW Contest at the end of this month. This time they plan to set a target as the Oceanic leader in a Multi-Single category and World Top 5. Also, they are trying to build an Oceanic record in Muliti-Single category. Look for operators JG3RPL/N1BJ, JI3ERV/NH2C, JR7OMD/WI3O and JR8VSE/NH2N to sign AH2R in the contest from Guam Island (Zone 27,IOTA OC-26). Their Sunrise/Sunset is 1953/0843z. QSL via JH7QXJ (Direct or JA bureau, NOT KH2 bureau).

NEW LIGHTHOUSE AWARD. The "German Lighthouse Award" is out now and has been approved as an official DARC Club Award. You can find it detailed on the Web page:
http://www.lighthouse-award.de (Deutsches Leuchtturm Diplom)
Rules are available in German, English and Danish (TNX OZ2ZB). The award consists of 57 landbased LHs in Germany at the moment.

PY0F, FERNANDO DE NORONHA (Correction). Dennis, K7BV, reports that he is very sorry for making a mistake in listing the Web site for his PY0F DXpedition. Last week's announcement read " <http://www.qth.com/py0f> ". It should have been < http:.//www.qth.com/k7bv/py0f >. Please accept Dennis' apologies. Remember, he will begin his operation on May 24th. Look for him as an All-Band/Single Op effort in the CQ WPX CW Contest He will operate through June 1st on all bands 160-6 meters, primarily on CW. A special callsign PV0F will be used throughout the operation. QSL via KU9C.

QSL INFO AND NEWS.....
Mario, DJ2MX (aka T94DX, N0MX), QSL Manager for 9A/OE1EMS (Krk Island, IOTA EU-136, IOCA CI-046), reports that he has the logs and QSL cards. QSL will be OK via DARC bureau or direct to him. He is also QSL Manager for his last activity from Bosnia as T94DX in the 2001 ARI Contest. Please Note: If you send your QSL direct, please enclose 2 USD or 1 IRC (outside Europe) for air-mail return postage. Europe is 1 USD or 1 IRC.

Ric, DL2VFR, reports that QSL cards for his and DL2SWW latest DXpedition to EU-037 (SM7) and EU-002 (OH0) will be sponsored by the magazine "Funkamateur". QSLs should be printed within the next 8 weeks. They plan to answer the direct requests first. Logs are available at:
http://www.iota-expedition.com

OPDX received a request to find out, "What is the QSL status of FT5WH?" Can anyone help?

Steve Wheatley, KU9C, reported on the evening of May 13th, that about 70% of the direct QSL card requests for the February PW0S operation, roughly 2000 cards, are in the hands of the U.S. Postal Service.

QSL Manager Glyn, GW0ANA, reports that the final updated logs for ZD7K and ZD8K are on the Web site: http://www.dxpedition.co.uk He also states that they have sorted out the photographs that they are going to use for the QSL card. These will be sent off to their Italian printer as per the sponsors list ASAP. Once he has received them back, the QSL cards will go out.

Fabrizio, IN3ZNR (aka XW3ZNR, XU7AAY etc.), informs OPDX that all direct QSLs for his operations in the Kingdom of Cambodia and the Laos People Democratic Republic have been answered. If you did not receive yours, please contact Fabrizio via E-mail at: xu7aay@qsl.net

Uwe/DL9NDS (ZK1NDS) and Klause/DLNFK (ZK1NFK) have uploaded the logs for both their North and South Cook Islands on the Web. Check the following Web site to see if you are in the log: http://www.dl9nds.de

SPECIAL EVENT. Station SN45KDU will be active now through May 31st and again November 1-18th to celebrate the 45th anniversary of the Radio Club (SP5KDU) in Tarnowskie Gory, Poland. Activity will be on CW/SSB. QSL via bureau via SP9KDU.

VU4, ANDAMAN & NICOBAR ISLANDS. Nat, VU2NTA, announced again this week that no foreign amateur radio operators are allowed to operate from VU4. He has indicated that just the sheer number of foreigners attempting to put VU4 on the air is making the authorities say NO. There is hope, however. Nat states that, after working two years with the government and asking for suggestions for certain ammendments to the AMATEUR RADIO rules in India, they have just about succeeded. So, maybe something may come through, but he requests to please not press for the VU4 since right now even citizens of India are not allowed to carry radios there. Nat says, "I hope you understand the problems we face."

XW, LAOS (Update). As this bulletin was being prepared, Charly, K4VUD, is staying in the Saylom Yen Guest House in Vientaine and he is currently trying to obtain a license. He reported that he spent a couple of hours at the Lao's equivalent of the PTT office and was told that it may be a month or more before he is assigned a real XW ham license. Charly mentioned that three separate offices must touch/look at his application papers, and he may have to appear in person for an interview for the last step. He is expected to be here until August. (NOTE FROM EDITOR: This was written before I left for Dayton, however, Charly is back in HS0-land for a few days. Please see HS0 above.)

ZONE 2. Nenad, VE3EXY, reports that he has received confirmation authorizing him access to the Indian reserve in ZONE 2. He will be active 4 days (and 5 nights) from Wednesday, May 23rd evening to Monday, May 28th morning, around the CQWW WPX CW Contest weekend. Nenad will be active on the following modes: CW, RTTY, and PSK31 possible, but not guaranteed outside contest. Most of the CW will be during the contest (Not much phone at

all). From ZONE 2 (Loc. FO20), Nenad will sign VE3EXY/2 (Counts as VE2
in the contest). His sunrise will be 0912z and sunset 0035z. Suggested
frequencies will be (he will always work split -2 kHz CW, 5 kHz RTTY or
Phone):
CW - 1827, 3510, 7010, 14025, 18077, 21025, 24897 and 28025.
RTTY - 14090, 21090.
There will be no 6 meters. Reports will be something like "599Z2" which
will indicate Nenad is there. Outside of the contest, he will be active
on the WARC, RTTY and LF. During the CQ WPX CW Contest, look for him on
80/40/10 meters. Check around the greyline times. He will be either on
80 or 160 meters. There are some chances for EU and JA on those two bands.
QSL via VE3EXY (Home call). Nenad's QSL Policies: "For all my DXpedition,
I do not do blanket cover of all QSOs in my log. Instead I answer QSLs
when I receive them. You can send them direct with SASE (SAE +postage),
via the bureau, or direct without postage. QSLs with sufficient return
postage will be answered the same day (if in the log), or via the bureau
otherwise. QSL cards are already printed, and there is no reason to wait.
No special cards waiting for sponsors. E-mail requests are not accepted.
However, elQSL requests will be confirmed electronically, subject to
receiving notification and electronicQSL server address."

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

If the High-frequency, Active, Auroral, Research Program
(HAARP) is
causing QRM or other problems at your station, you should
take a look at
http://expage.com/page/vortron to learn about the Vortron
neutralizer.

I carry one with me wherever I go.

I do too, especially when I do my drugs.

This is true. Even jesus got lonely. You too get lonely.
I seem to remember a story about jesus being seen with a
naked boy. Not sure where though, probably my lover
Waldo told it to me.

However there is the most obvious example of jesus' being
gay, he was betrayed with a KISS. A kiss from a man.

6995. FT-817 Mods

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-21 19:41:01 UTC
From: nz8r@att.net
Message-ID: <89cf7896.0105211141.60ff6726@posting.google.com>
Source record: 89575

Greetings all,
I've just returned from Dayton, downloaded the mods for the 817 from qrz.com and find that they don't help. Anyone else having troubles? I did the "close jumpers 1-4, open jumper 5 and then reset the rig" mod.

Thanks in advance,

Greg

FS: by Fred WA5WZD
Reduced price, need the cash! ICOM IC-706 Mk1 in excellent condition
with box and packing. Power cord (about 6 ft) and all written material.
Included is a good working screwdriver antenna with the mounts used on a
pickup tool box and braces. Also included is an MFJ-815B HF peak reading
SWR/Wattmeter. This is the cross needles meter and makes tune up very easy.
The tuning system uses the inductor shunt at the base that allows tune up
any where within the HF range instead of having to switch caps with relays.
I'm an ex ICOM manager in Dallas so it's been treated with kid gloves.
Most operation has been on 40m and 2m ssb.
Asking $650 for the package and buyer pays a nominal shipping fee of $25
insured. Fred fred-palmer@msn.com 940-321-2029

Yeah, yeah, yeah ... boring and predictable ...

: Hey, Stupid, pay fucking attention, I'm not done smacking you around

Mr. Scatologist, you haven't managed to even come close.

: You'd better take a look at some of the posts..MWHAHAHAHAHAHAHAHA!!

Oh, I'll let you do that for me, since you're so interested in my
affairs that you keep track of forgeries in my name. As I said, the
whole site is blocked, and it is blocked precisely so that I don't see
anything which comes from it. Why should I undo my filters?

: Especially the ones that say they are from you. Waldildo's been really busy.

And my email correspondents tell me that Waldo's been kicking your ass
around the news group pretty thoroughly, but that's no accomplishment,
considering your limited capabilities.

You know what? I think I'm going to add cotse and mailandnews.com to my
filtering rules. I'm bored with you, Mr. Scatologist. Since I've
elicited responses from you, from Raoul Xemblinosky, and even from your
buddy Turd Phillips ("he does post filth") which prove to the world just
what an ignoramus and loser you are, my task has long ago been
completed.

As they say in Glen Dale ...

Hi All,

I have been given a Yeasu FT220, in a not working condition (well it does work to some degree).
I know this is an old radio, but I would like to try and get it working. I do not have much information on it, other then it operates from 144-146MHz on all modes, FM, SSB, and CW. It has a VFO + 4 Xtal channels in it.

Can anyone help with a copy of a circuit for this radio. A scan should do the trick

Thanks in advance.

Kevin, ZL1UDD.

If you have a need for an sma-to-bnc antenna adapter that is custom made to fit and protect your H.T. or scanner radio, I have the solution.

Adapter allows you to:
Quickly change antennas to base, mobile or different syle use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna changes.

Adapter features:
Gold plated contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna look.
The rubber base seals to the top of the radio with no spacers needed for moisture and dirt protection.
The base also provides an excellent support for any length of antenna or application.
No need to remove adapter once installed to make a quick and safe antenna change.

Sizes to fit radio models:
Yaesu: VX-5,VX-1,FT-50-R,VX-10,VX-150,VX-110,VXA-100,VXA-120
Icom: IC-T8A,IC-T81A,IC-Q7A,IC-R2
Kenwood:TH-D7(all models),TH-G71
Alinco: DJ-V5

I am doing spring cleaning in the shack and have decided to liquidate some items:

1) The first is a newly released book by the ARRL: "Antenna Zoning for The Radio Amateur; everything you and your attorney need to know to obtain a permit for your antenna-support system"; by Fred Hopengarten, K1VR. ISBN-0-87259-821-7

This book is brand new still in the shrink wrap and comes with a CD-ROM, the ARRL gets $49.95. I am selling it for $30 + 5 shipping.

2) Scanner Master Massachusetts Frequency Guide ISBN 068534567X, USED but like new condition. $10 + 5 shipping.

3) World Radio & TV Handbook 1998: Like New Condition $8 + 4 Shipping, lists all of the names and contact numbers for radio and TV outlets world wide.

4) 1997 Amatuer Radio Almanac by CQ publications: New condition. ISBN: 9780943016160 $4 + 3 shipping.

WOW! Thanks for the tip! I'll go scratch out all those RS satellite and
contacts and terestial SSB contacts in the log. I suppose my contests are
invalid for using a radio that doesn't work.

7030. KW TS-450S Hidden Menu

I'll be back on 3950 (and other frequencies) soon -- I just put up
my first antenna at my new home, with more to come. I am rebuilding
the station from the ground up, so it may be a few months before I
am transmitting.

Activity is already picking up among legitimate operators on 3950,
and the jammers and their sympathizers are becoming rarer and rarer.

With all good wishes,

Kevin, WB4AIO.

If you hear W6HLH, George "the Bigot" Lunge, CQing on his self appointed Band of 10 meters, do not give him the time of day. This poor excuse for a human is a bigot of the worse kind and doesn't even think twice about spouting racial slurs over the airways. It is a shame that his rhetoric is protected by free speech as it does nothing but disservice the Amateur Radio Community and decent people everywhere.

Yes, this guy is bad news as a ham radio ambassador. In 1960, when I
was just an SWL, I heard him lambasting me on 20M because the SWL QSL
card I sent him (I was 12 years old) wasn't very close to his
frequency. My old Zenith console 1940 radio didn't have any kind of a
bandspread whatsoever. Ridicule was his stock in trade back then. In
recent years, I've heard him come up on 20M calling CQ on top of an
existing qso, and then lambast them when they inform him the frequency
is in use. I just hope Riley hears him on the air someday, and kicks
his knickers off. He is not the kind of ham we need on the air
representing amateur radio in the 21st century.

Still does quite well. I have replaced it with a 847 so I really should
sell it. Has the add on digital display.

Yes its old but pretty stable if you leave it on for 12 hours. :-)

I haven't heard this particular operator (W6HLH), but I must disagree with the sentiment that "It is a shame that his rhetoric is protected by free speech...", as I happen to believe that there is nothing more important than this freedom. Thank God (and the wisdom of Founding Fathers) that we allow this type of talk.

"I may disagree with your words, but I will fight to the death for your right to speak them." ...or something close to that.

It provides the rest of us with the oportunity to hear those against whom we must be vigilant.

...and I seem to recall that Hitler abolished free speech pretty early in his time in power.

Just a thought, and...

Just my two cents.

W6HLH is "Blackie" in San Leandro, CA, and his usual haunt is
14.178...whether anyone else is there or not! I used to have run-ins with
him regularly when I lived across the bay in San Bruno many years ago. I
still hear him on backscatter...along with a chorus of people complaining
about his rude operating habits.

He's got to be in his 80's or 90's, so maybe soon he'll be QRV from the
nursing home and off 20 meters someday soon!

From the old days before the phone band expansion, on 14.205:

CQ, CQ, CQ. Double U Six, Hotellllll, Lima, Hotel, California calling.
CQ, CQ, CQ, DX. Listening on 14195 and on this frequency.
If you are transceiver equipped, turn your RIT to the far clockwise
position and call Double U Six, Hotellllll, Lima, Hotel.

I thought I remembered him as Blackie.

LRod

I thought I posted this, but it didn't show up on my server. Sorry if
it hit you twice.

Hey Toni - Did you never hear that saying if you donl
like what you hear then SPIN the VFO?????

Nobody makes you listen - so DON'T !

I personally thing we need more ham lightning-rods
like HLH. Does he operate 20 Meters? We need more
like the good ole days of 14313 IMHO. They were fun.

WOW Rick !! He's an old timer QRM'er.

I thought this classic line of fun ham radio Op's died out with the great K6KPS !
Remember him...???? "This is K6KPS in beautiful Southern Cal callin CQ...."

What frequency does HLH operate on..? Is he as much fun as the great (original) W2OY..?
He's another one from Radio history - "CQ CQ No lids no kids no space cadets"
Of course there's also the great Big Al - K4OKA - Old King Alligator who's another legend
from 75 Meters - but alas he's not on much anymore. I miss him too.

This guy may be just the shot-in-the-arm that ham radio needs since the demise of 14.313
and the
classic 75 Meter wars of the 70's and 80's.

That call sounds familiar, but I can't say I remember. I stand corrected on the frequency...it's 14.177.2...just close enough to 14.175 so that Advanced licensees couldn't squeeze in below him. And as far as he was concerned, God allocated that frequency to him, and he just calls CQ on it anytime he wants, even if there is a QSO in progress. That's about the same spot the "Hi Fi" guys (W2ONV et. al.) hang out, and they get an earful from time to time!

7063. ICOM-706 voice synthesizer

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-26 03:35:10 UTC
From: Marc Webb <kb1d@bellsouth.net>
Message-ID: <gTCP6.796$4q2.812400@news2.mia>
Source record: 89435

I recently got a IC-706 MKII
I installed the UT-102 voice synthesizer unit. The only thing it says is CW, SBB, RTTY, AM etc. Nothing about frequency or "S" meter readings.

Any suggestions about getting it to work?

Boy, this is a good example of why one has to "study" to get a ham license. :-)

Go to astatic.com and follow the prompts to CB (not commercial applications). In there, they have pin outs for all the major ham rigs. They have no page for ham or amateur, but under CB they have the ham gear listed. I found them a few nights ago looking for the pin out for an old TS700sp Kenwood 2m rig. Found them in 2 minutes and my rig in 30 seconds or less.

Regards,
Tom KB2FIK

Was monitoring Col. Steve on 3.260 United Patriot Radio last evening.
For those who don't know, United Patriot Radio is a self-declared "free"
radio station operating from Eastern Kentucky on the shortwave frequency
of 6.900 mHz (day) and 3.260 (night) mHz. Programming is "Patriot / Freeman /
Soveriegn Citizen" oriented. This station is also the new de-facto broadcast outlet
for the Miltia Movement in the United States. Some say it's a Clandestine. Other say
it's a Pirate. Whatever the flavor, the station is certanly the most curious transmitter
on the dial since the days when the legendary Wolfman Jack was broadcasting
into the USA from Mexico or the late Rev. Carl McIntire took his ship "Radio Liberty" off
of the New Jersey coastal limits to broadcast, sans-licence, in the 1960's.

Col. Steve said two pending changes with the station are in the works.
The first being operations on the freq of 3.260 USB will be terminated sometime around
the 1st weekend in June. Reason is the onset of Summer thunderstorm season
and the resultant high level of atmospheric (storm) QRN, all operations will
soon be on 6.900 USB only. Second, Steve reported that his "3 Kilowatt
Rock Crusher" amplifier should be up and running shortly, thus the
new transmitter power of 3000 Watts on 6.900 USB will allow for greater
coverage of UPR. Some of the station's "staff" apparently made the trip
to the 2001 Dayton Hamvention, and managed to obtain the balance of
components necessary to complete the proposed 3.0 KW power amplifier.
Hope that UPR has a small air conditioner and duct-work in place to cool that thing!

Finally, information on 6.900 UPR radio now appears to be being
hosted on the PBN web page which is at http://www.pbn.4mg.com
There is also an extensive write up on the station in the new
issue of Monitoring Times.

While strictly speaking, they are in the eastern half of the state,
please call them southern and not eastern. Sumerset is not eastern Kentucky
in cultyre. As an ex-patriot[(:-)] 'hill-billy', I take exception to the
nonesense spouted by this loon. While Eastern Kentucky is backward (maybe too
backwar to have an advanced radio station of this type), and true they handel
snakes, and vote democratic, and are way to ignorant, even they have more
pride and smarts to accept this crap. I listen because they are funny. Much
like the old VOA and Radio Moscow (we will have to talk one day about the time
I got pulled over in Perry county while RM was on my radio, boy was that FUN!)
I wish I could access the banking reocrods of the outfits that "advertise" on
this station. I can not beleive that anyone could make money with the crap
that is being peddled.
Eastern Kentucky has many (maybe too many) real problems, let us not liable
them with things they are not guilty of.

I've just managed to get hold of a Philips PRP73 handheld radio that has been programmed to work on 70cm. However, I could not get a charger. The battery has four metal contacts. Looking at the back of the battery the far right one is earth. Using this one as earth the first contact gives 7.6volts. I'm not sure what the middle two contacts are.

Could someone please suggest a way of charging. From the internet I think the battery is 7.5volts 1200mAh. Can I just use croc clips to the first and fourth contacts from a 7.5volts mains supply, with some sort of current limiter or can someone suggest a small charging circuit I can build.

Is there anywhere on the internet that gives details of this radio in English?

How can I reprogram the frequencies? (to, say, PMR446(?) frequencies, as the radio can cover these).

Thanks for any help,

Pete

I seem to remember these radios required a computer program to set them!
Also I think extra contacts were to tell charger state of charge and if you
charge at a 16 hour rate they are not needed. It is a long time since I
worked on these so maybe I have it wrong.

Ohio/Penn DX Bulletin No. 513

The Ohio/Penn DX PacketCluster
DX Bulletin No. 513
BID: $OPDX.513
May 28, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W3UR & The Daily DX, K4VUD, WN3VAW, N4AA & QRZ DX, N4GN, N4PL, NT4TT, K8YSE, WA9YYY, CO8TW, DJ2PJ, DL1EK & DX News Letter, DL2VFR, DL8AAM, EA7FTR, EI4GK, F5NOD, G3XDV, G4KHU, GM4SUC, I2WIJ, I2YSB, JH4RHF, JI3DST, LU5FF, OH2BH, OH6LI, OH6NJ, ON4AAC, ON4ADN, RZ9OU, SP5UAF, SV1IO, UA9UAX, UX2RY, VE2MBS and VE3EXY for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20/May, through Sunday, 27/May there were 228 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VQ9, VR, VU, XE, XT, XU, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS
All 40 CQ Zones were available during the past week.
There were 55 ITU Zones available during the past week. ITU Zones that were not active are: 21,22,23,24,25, 26,31,34,35,43,58,59, 68,69,70,71,72,73,74,75,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3C, EQUATORIAL GUINEA. Martin, 3C5J, continues to be very active from the oil platform in Equatorial Guinea, especially on 15 and 20 meters CW/SSB. It is great to see that he is an active operator, but he would please many if he could operate from the mainland for a few days so it wpuld count for DXCC. His main activity seems to be around 1300-1630z and again between 0530 and 0830z. QSL via MW0BRO.

CF2/CG2/VC2, CANADA (Special Prefixes). In celebration of the 50th anniversary of the founding of the "Radioamateurs du Quebec, Inc." (RAQI), Canadians have obtained from Industry Canada permission for all VA2/VE2s to use a special commemorative prefix. Effective from June 15, 2001, to July 15, 2001, all holders of callsigns with VE2 prefixes may use the special prefix CG2, and holders of VA2 prefixed callsigns may use the special prefix CF2. Daniel A. Lamoureux, VE2KA, president of the RAQI, also reports that they have obtained from Industry Canada a special callsign which can also be used between June 15th and July 15th. This callsign is VC2A, which can be used by an individual or group. Look for this callsign probably in contests. For more details and the latest RAQI bulletin, check the Web page at: http://www.marc.qc.ca/raqi0105.html

CQ AWARD SPONSORED. Ed, NT4TT (ex-AH2BE/KH9, KB6DAW/KH2/KH9, HL9MM, 8P9GI and HZ1AB), announced at the Dayton HamVention that starting this year in memory of those who loved Ed, W2MIG, he was sponsoring the CQ WPX Mulit Single Asia Plaque. Ed considered "MIG" a friend and appreciated all the help he gave him working the Carribean while he was out on some of Ed's (NT4TT) DXpeditions. Ed also sponsors the CQWW Multi Asia Plaque in memory of his ex-QSL Managers AA6BB and KA6V who have passed on due to cancer.

HS, THAILAND. Charly, W4VUD, continues to be active from here as HS0ZCW. He was heard this past weekend in the CQ WPX Contest. However, he reported this past weekend to "Please tell everyone...NO OPERATION ALLOWED ON THE WARC BANDS IN THAILAND. I am still getting requests for WARC contacts. NOT LEGAL IN THAILAND!!!"

ILLW/2001 WEEKEND (Update). Mike, GM4SUC, reminds everyone that the International Lighthouse/Lightship Weekend will take place from 0001z on Saturday, August 18th through 2359z on Sunday, August 19th. Already over 100 stations have confirmed their participation from either a lighthouse, lightship or maritime beacon. You can find the list of stations at: http://vk2ce.com/illw/2001.htm
Have a look and see if your station is mentioned and that the details are correct. If you have any questions or if there are any errors, please notify Mike at: gm4suc@compuserve.com

IOTA NEWS.....
AS-147. Takeshi, JI3DST, will be active from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) starting 0700z, June 2nd through 0200z, June 5th. His callsign will be JI3DST/8. Activity will be on 17/15/12/10/6/2 meters SSB. He requests to QSL ONLY via the bureau. Direct QSL will be mailed later.

EU-007. Sean/EI4GK and Declan/EI9HQ hope to operate from the Blasket Islands between June 1st and 3rd using the call signs EJ4GK and EJ9HQ. Operations will be mainly SSB on all bands 80-10 meters. QSL to home calls direct or via the Bureau.

EU-017. Stromboli Island will be activated by a group of Italians from May 31st through June 3rd using the special callsign ID9S. Operations will be on 160/80/40/20/15/10/6 meters in addition to 2 meters and 70 cm. Other reference numbers for this island are: I.I.A. (Italian Island Award) - ME 16, W.A.I.P. (Worked All Italian Provinces) - MESSINA (ME), and WW Locator - JM78. QSL Manager is IZ0EUI.

EU-037. Guenter, DL5CX, will be signing SM7/DL5CX from the Kalmar District, June 9-16th. Activity will be on 80-10 meters CW/SSB/PSK31/RTTY. QSL via home call.

EU-174. Frank, ON4AAC, reports that they will use the special callsign J48T on the Greek island Thassos now through June 3rd.

EA-184. A group of Finnish opeators will be active from Hailuoto Island as OH6AW/8 between June 29th and July 5th. Operations will be on HF, 6m, 2m and 70cm. Operators are Pertti/OH6HJE, Jarno/OH6NJ, Markku/OH6UV and Juha/OH6MTG.

NA-057. Ray, WA9YYY, will be operating as HR6/WA9YYY from Roatan Island, Honduras, from June 16-23rd. His primary bands will be 20 and 12 meters, mostly CW. His rig will be a FT-900 (and a memory keyer) to wire antennas up in the palm trees. QSL to his home callsign; bureau cards are OK.

OC-046. Kaoru, JA3MCA, will be on Tahiti from May 27-29th. Activity will be on 80-10 meters CW/SSB. QSL via JA3MCA.

J49, CRETE. Bob, I2WIJ, reports that he will be active from here July 23rd through August 6th. He will also participate in the 2001 IOTA Contest as J49R as a 24H CW 100w DXpedition entry. Activity outside the contest will be mostly SSB and on WARC bands. He hopes to be able to have a 160m dipole up, even if conditions in July may not be so good for that band. For more info and news, check his web site at: http://www.qsl.net/i2wij/

JW, SVALBARD ISLANDS (Reminder/Rare IOTA). Remember to look for JW0PK next weekend (June 1-9th) to be active from a rare Artic IOTA in the Spitsbergen's Coastal Islands (EU-063). The island is called Prins Karls Forland. Activity will be on all bands and modes. For more details, please refer to OPDX.509. QSL via SP5DRH. QSLs via the bureau are ok. If you prefer direct, QSL via: Mr. Jacek Kubiak, P.O.Box 4, 00-957 Warszawa - Poland.

LIGHTHOUSE ACTIVITY. The Nieuwpoort Lighthouse (BEL-004) will be activated for the very first time during the coming "Lighthouse-Lightship" weekend (August 18-19th), by ON4ADN, ON4CJK, ON5FP, ON6HH, ON1DPX and some other operators. They have been granted the special callsign OS4LHN. Activity will be on all bands (80-10 meters) mainly SSB and CW. QSL goes to ON4ADN, either direct or through the UBA bureau. There will be a multi-color QSL.

All replies to direct QSLs will be posted in Nieuwpoort and will bear the special "Nieuwpoort Lighthouse" postmark wich can be considered as a real collector's item. QSL Manager Geert, ON4ADN, states that he only needs reply postage, no envelope, and of course your address.

OH0, ALAND ISLAND. DL5FF/OH0JWL (Peter) and DJ2PJ/OH0JWH (Hadi) will be in their log cabin on the Aland Islands (in JP30TF), from June 10-22nd. Activity will include all bands, CW, PSK31, RTTY, and SSB. Special attention will be given to 50 MHz with 90 watts into a 6 element yagi. QSL only to their German callsigns, NOT via the OH0 Bureau!

OJ0, MARKET REEF. A united team of OH and JA operators are planning an operation from here during the 2001 IARU Contest. Activity will be from July 12-16th. Operators listed are: OH1VR/Seppo, OH1NX/Timo, OH1TX/Jaakko, OH0RJ/Lasse, JH1ARJ/Massy, JP1NWZ/Yo, OE1ZKC/JH4RHF/Jun and JR4PMX/Hiro. The contest callsign will be OJ0U. Outside of the contest operators will use OJ0/homecall (before and after the contest). Three stations will be active with activity on 160-6 meters CW/SSB/RTTY (possibly SSTV). QSL Manager for OJ0U will be JP1NWZ. For all others, QSL via their home callsign for other individual callsign.

P5 PIRATE. A station signing P5DX was having a real fun time this week with many individuals chasing him/her on 40/20/15 meters CW. Save your green stamps on this one!

QSL INFO AND NEWS.....
Last week OPDX received a request to find out, "What is the QSL status of FT5WH?" According to Gil, F5NOD, a F6KDF Club member and Chairman of the "Lyon DX Gang" Association, states all QSLs that were received direct have been sent (a long time ago...). They received a batch of monthly FT5WH QSL requests, and they answered them. A big batch of bureau QSLs had also been sent some months ago. So, the log is still open and you can resubmit a QSL if you didn't receive yours. QSL via F6KDF.

QSL 4G1A, which was active in the CQ WPX Contest, to VE7DP or DX1CW (the CW Philippines in Manila).

5U7JK's LOG is now available on Silvano's, I2YSB, Web page at: http://digilander.iol.it/i2ysb

Juan, CO8TW, states that his CQ WPX Contest log is available on the Web at: http://www.qsl.net/co8tw/
He was active as a Single Band (20m)/Low Power entry.

Javi, LU5FF, participated in the CQ WPX CW Contest as LQ0F on 10/15/20 meters. QSL via LU5FF.

NOT THE QSL MANAGER. Silvano, I2YSB, reports that he has been receiving QSLs for 3D2AG/p and Z21CS. He is NOT the QSL Manager for these stations. QSL both these stations to their CBA.

OG3M/0 was active on all bands in the CQ WPX CW Contest from Aland Islands. All QSLs will be sent via the bureau, no card needed. If a

direct QSL is wanted, send request via OH1VR's home address:
Ojakatu 3A18, 33100 Tampere, Finland.

OH0B was active from Aland Island in the CQ WPX CW Contest as a Multi-Single category. There were three stations on the air manned by young operators and old-timers. Operators were OH2BH, OH2JTE, OH2MM, OH2PM, OH2TA and OH8SR. QSL OH0B via OH1BV.

OH0V was active on all bands in the CQ WPX CW Contest. QSL via OH6LI: Jukka Klemola, Aarontie 5, 31400 SOMERO, Finland or via bureau.

Igor, RZ9OU (Asiatic Russia - CQ zone 18), was active as RG9O in the CQ WPX CW Contest as an All Band/Low Power category. QSL via home call. Bureau cards are OK, send direct QSL to: Igor Naumov, P.O.Box 69, Novosibirsk-90, 630090, Russia.

Fran, EA7FTR, informs OPDX that he is now the QSL Manager for Ratul, S21RA, in Dhaka Bangladesh, and Andrew, 5Z4FT (he has the previous log for 5Z4FT). Send QSL to the bureau or direct to: Francisco Liyez Suero, Asturias 23, 21110, Aljaraque, Huelva, Spain.

RUSSIAN MOUNTAIN DXPEDITION. Oleg, UA9UAX, reports that operators Vladimir/EY8HB, EY8AV, Nodir/EY8MM and a group of mountaineers are planning to be active/work from one of the anonymous mountains on the Pamirs (near Sarez lake), July 3rd. They will only be active for ONE hour from the peak (5800-5900m above sea level). Operations will be on SSB on 40 or 20 meters using an IC-706MK2G. INTERESTING NOTE: After the expedition, the mountain will be named "Radio Amateur's Peak"!

SILENT KEY. George Vernadakis, SV1AB (ex F9QN), became a "SK" on May 24th, 2001. George was born in Paris in the twenties and stayed in Marseilles, France, as F9QN until the mid-fifties. Then, he settled in Athens, Greece, as SV1AB and became a pionneer and a well known DXman on RF and mainly on VHF/UHF all modes and ways. He was an excellent technician as well and a founder of the "Radio Amateur Association of Greece" (RAAG: a IARU member), which he presided over during several years. OPDX and its readers would like to send out our deepest sympathy to his family and friends.

SPECIAL ACTIVITY ON LF. The RSGB LF Group reports: "Listeners may be aware that the UK Royal Navy are celebrating the Centenary of the Royal Navy Submarine service with a gathering of UK and overseas submarines in the Clyde. This year is also the 75th anniversary of operation of the GBR transmitter (Rugby). As part of this celebration 'It is hoped' that a special A1A Morse code transmission from the GBR long wave transmitter will be made. For those with an interest in VLF reception please listen to 16kHz (yes 16 > not 60kHz!) on Tuesday, May 29th, 2001, at 1200 GMT and 1345 GMT."

TX0, CHESTERFIELS ISLAND. It has been reported that an Oceania DX Group is planning a DXpedition to this newest DXCC entity later this year, possibly in September. The plan is to have at least five stations active 24 hours a day on 160-6 meters CW, SSB and RTTY. Apparently, Bill Horner,

VK4FW, is heading up the group and is looking for operators. If interested, contact him at: vk4fw@spiderweb.com.au

UR, UKRAINE (New UIA). Operators Andy/UX2RY, Alex/UY2RO, George/UY2RA, Irina/UY2RY, Witaly/UX2RV, Yuri/UT0RW, George/UY5XE, Eugen/US5UM, Vlad/U5UG, Vlad/UR4UKV and others will operate as UR4RZA/p from Pravednyi Island (not IOTA, UIA DN 051 [newone]) on June 14-17th. Activity is expected to take place on 80-10 meters CW/SSB and also the satellites. QSL via UX2RY either direct (Andy Asriyanz, P.O.Box 14, Slavutich-3, Kiev obl., 07100, Ukraine) or through the bureau.

VIETNAM PIRATE. Tom, 3W7CW, has confirmed that his callsign has been recently used by a PIRATE (i.e. on May 19th, 2001 on 18073 kHz, starting around 2200z). Tom has been QRT for the past several weeks due to a relocation from Hanoi to Saigon. His antennas at the new QTH will be ready in/around September-October. Tom will change his prefix from 3W7 to 3W5, so look out for him as 3W5CW.

ZONE 2 (UPDATE). Nenad, VE3EXY, is now active as VE3EXY/2. He started a day late than expected, however, he will be staying a day later than expected (May 29th, 1200z).

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Anyone have any success or or suggestions about the method and
equipment used to recover spread spectrum cordless telephone
transmissions? They are in the 902 to 927 mHz range. Thanks
for answering here, so that all may benefit.

You're not supposed to be able to decode spread spectrum. It is a secure mode!

Please visit my World Wide Web Site, you have never seen a page like it. You will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chick with really big knockers
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in". 7. The writings of me and others on ham radio, hear a typical ham contact. 8. The warm side of K1OIK, hear me speak, see me with famous people. 9. An amazing card game that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the Net+ Certification

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics
Net Plus Certified

How much you wanna bet this dufus starts chanting somehting like "well those signals are passing through my body so I got a constitutional right to know what they're saying", or "if they want privacy they should use landlines".

I worked on RF hardware and software design of spread spectrum phones. The US government would have a serverly hard time decoding a spread spectrum signal phone (its easier to just tap the line...hehehe). The base unit passes the handset a "seed" this seed corresponds to a psuedo-random high speed code on which the multichipped audio stream is EX-OR'ed with. Also there are control signals passed back and forth between base and handset....not to mention channel selection...etc. Sounds complicated yet?.....well there is more.....Your receiver archetecture only takes care of the physical radio demodulation......there is the software layer that is the BIG unknown, that layer takes care of EVERYTHING, if you have no clue how or what it does you will be spinning your wheels for years.

Best Regards,
MacGmaN

Top Ten Signs Roger Wiseman Is The Monkey Man

10. Answers phone, "Monkey Man residence -- I mean, Wiseman residence"
9. When "Planet of the Apes" is on television, he's cheering at the wrong parts
8. Goes to monkey cage at zoo and says, "Is that you, Mom?"
7. Lists his likes as sunsets, long walks on the beach, terrorizing residents of West Virginia.
6. He refers to Jane Goodall as "that nosy bitch"
5. At his family reunion, half the attendees are human and half are monkeys
4. Monkey Man or not, he's your neighbor and you should love him (#4 has been brought to you by the Church of Latter Day Saints)
3. For a snack, picks ticks off his dog
2. Those sounds coming from his bedroom could mean only one thing: wild monkey sex
1. He lost to Stagger Lee in Trivial Pursuit

Yes, Roger is a Ham. He is such a good Ham that Riley Hollingsworth has even sent him correspondence on a couple of occasions. Gee, Riley likes Roger so much he even had Roger retest for his General license. Isn't that right, Roger?

7110. Is this a serious discussion group?

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-29 01:01:18 UTC
From: Johan Vannebo <vannebo@online.no>
Message-ID: <5zCQ6.2721$vu4.276166@news3.oke.nextra.no>
Source record: 89389

Start to wonder - is this meant to be a serious place to discuss technical issues amongst hams - or is it a place to throw shit on others? Assume there are other places to do that:. Beeing a person, not born in a country with english as my mother tongue, I don't want to learn all these ugly words I find here.

Johan

7111. Re: Is this a serious discussion group?

Newsgroup: rec.radio.amateur.misc

Source record: 89390

Believe it or not, this once was a serious discussion group.

A few years ago, Riley Hollingsworth appeared on the amateur radio scene. Finally, someone made a serious and largely successful attempt to rid the HF bands of illegal operators. After years of inattention, these jammers, profanity-spewers, music-players, and overpowered stations began receiving NALs and disappearing from the airwaves.

Having had their illegal radio activities curbed by Riley, ham radio's "problem children" have largely migrated here. Internet newsgroups are now their mode-of-choice to harass and libel each other. Want proof? Notice who the major offenders are on this newsgroup. Then, go to the Rain Report and compare the list of bad apples here to those who have received FCC warning letters.

Same offenders, different mode-of-transmission.

Johan, this news group has become a catchall group because it has the
"miscellaneous" word attached to it. That in turn attracts some posters
who seem to think that they should come here to post any trash that is
on their minds. However, they pretty much leave the other groups alone.

Go to rec.radio.amateur.policy or one of the other rec.radio.amateur
groups, and you'll find very few garbage posters in there.

To answer your question: This is not a serious discussion group.
People didn't mean for that to happen, but that's the way it's turned
out. You will do well to join another group.

73's,
Reggie

Rodger, Rodger, Rodger... I thought you, me and your ISP had an understanding that you wouldn't pester me anymore.
Didn't your ISP tell you to leave me alone and threaten to kick you off if you didn't stop.
I think it's subpoena time for your ISP as they are the ones who gave you my name in the first place.
I've had enough. You lasted 3 weeks after your ISP told you to stop but here you are back.
Sorry charlie, I've been kind and graceful and given you all the chances in the world to leave me alone
but you simply won't stop. Time to take action. I'd rather be out $200 for a lawyer to tell you to shut the
hell up or go to court or prison than to have you drag my name through the mud when you shouldn't know my
name at all. Hope you have a lawyer and some money too. You might have to fly down to Dallas to make a court
appearance soon as i sure the hell am not filing it in the state at your local convenience.

Sad but true, but at least here - thank God - you can effectively eliminate
the QRM by the use of a kill file and/or spam filter...

Sir you are one sick puppy.

I have saved all your annoying posts and am forwarding them to the FCC with your call. You are mistaken if you don't think the FCC will turn away from this once they see your posts. Others have had their licenses revoked and equipment taken away for less.

I suggest anyone who wishes to put an end to this person's post also make the complaint include his posts to the following address: FCCINFO@fcc.gov Include his call and pertainent information.

The more that send in this info, the quicker will be the results.

This is the only way to deal with this individual.

Include the following information:

Callsign
Name
Short narrative and include posts.
Takes 5mins of your time and the FCC will certainly be in touch. The FCC takes bad conduct like this very seriously!

He will be sorry later!

7125. Question with RTTY on 30m?

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-29 14:37:00 UTC
From: rmclean@invalid.com
Message-ID: <3B13B3D7.D5D7689D@invalid.com>
Source record: 89404
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.misc

Ok, over the weekend I decided to take the plunge and try the various digital modes. The modes I've played with over the weekend include PSK31, SSTV, and RTTY. I know there are more out there, but I haven't had time to mess with them yet. Here is my question, dose RTTY on 30m use a different configuration than on the other bands. I can copy RTTY fine on 20, 40, and others, but on 30m I can't see to copy anything. While tuning what I thought was a RTTY signal with MMTTY I notice that the signale had a much larger sift that with RTTY on other bands. It there a different configuration for 30m than with other bands, or perhaps this is just another mode that sounds similar to RTTY. Any Ideas?

P.S Please reply to the newsgroup as other may have simular questions. If you must reply via e-mail please use the address listed in QRZ de WO5M

rec.radio.amateur.boatanchors,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.swap

Hi all. I have a Yaesu FT-50RD for sale. The unit works fine and
has never been abused. I have ALL the original packing, manual,
antenna and wall charger.

I'll even include the following battery packs, all tested good:

Quantity 2 FNB-47XH: 7.2V 1800MAH NIMH
FNB-49: 6V 600 MAH NICAD (original with radio)
FBA-15: AA cell holder for use with radio, looks like FNB-41

The reason for selling is that my aging eyes just can't read the tiny
print any more (sigh). Price is $225 plus shipping, firm. With the
included battery packs, this is a very good value.

I'm sure you'll like this tiny little powerhouse, don't miss out.
First money buys it.

You were likely listening to the 'non-amateur' TTY signal. I believe it is encrypted and using a wierd shift. So don't worry about it.

Like you I can't find much digital activity on 30mhz, wish more folks would get on the band. It is a decent band and needs used more.

I have heard a lot of non-ham rtty on 30M. This could well have been one.

Since you say it was wide shift, it probably was non-ham; 30M ham rtty
follows the same seto of conventions as all the other bands.

Hello:

Just wanted to post a message about a HAM/SHORTWAVE store here in Omaha, Nebraska that is shutting down in the near future. LADD ELECTRONICS is the name of the place. I just buy my monthly Monitoring Times magazine there but this guy has just loads and loads of collectible ham and shortwave equipment, for example a Hallicrafter Skybuddy and E.F. Johnson Thunderbolt in great condition.

I have no interest in the place financially. The elderly gentleman who runs the store is a really nice fellow and he just mentioned to me today about closing down the shop in the near future so I thought some folks here might want to call/check the place out for any interesting items.

His phone # is 402 556 3023. He's located at 111 N 41st Street in Omaha, Ne 68131.

This rig seems quite inriguing. Light enough to backpack yet a full featured transceiver. Currently, is there anything comparable on the market?

I currently own a Kenwood TS-430s. I may have to sell the current rig to purchase the FT-817. Any opinions on if this is a wise choice? I go camping monthly with the Boy Scouts so the back packer makes sense, but I do like the power of the base station.

Thanks,

73

7150. Alinco DJ-580 repair information

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-30 23:41:20 UTC
From: Thomas Baumann <fyrcap100@fuse.net>
Message-ID: <thb1cj6ohom521@corp.supernews.com>
Source record: 89428

Hi all,

I have an Alinco DJ-580 that is not working correctly. I wonder if anyone else has had similar trouble and might be able to shed some light about it. When trying to program the radio using the keypad I get the following results. Keys 1, 4, 7, * all come up as 1 on the display... Keys 2, 5, 8, 0 all come up as 2 on the display. Keys 3, 6, 9, # all come up as 3 on the display. When using the "function" key these same keys don't work correctly. The only keys that work correctly are 1, 2, 3 and their associated "function". I don't believe this is an actual keypad problem because if you listen to the transmitted DTMF you can hear the distinct numbers being sent. I believe this to be processor related. I called Alinco and they will only quote a repair price after I send it to them and agree to pay a $50.00 bench fee. The trouble is I don't want to spend $50.00 only to hear them say that it is not economical to repair or that it is too expensive for me to want to repair it. So... has anyone had a similar problem? If so... what was wrong and what did it cost to get it fixed?

Thanks in advance... Tom KE4DSK

7151. USA hams with the suffix 8C, 8C-, or 8C- - please respond

Newsgroup: rec.radio.amateur.misc
Date: 2001-05-31 02:39:28 UTC
From: nz8c@aol.com
Message-ID: <20010530223928.29743.00000079@ng-mo1.aol.com>
Source record: 89429

I would like to hear from US hams with the call suffix of 8C, 8C-, or 8C- -. I mainly want to hear from those who are into contesting and DXing. What I am wondering is if anyone with this call suffix has gotten any cards from the 8C manager/bureau lately? I am fairly new to the 8 bureau, having gotten my call last summer. I DX and contest alot so this past Feb. I sent envelopes and postage to the 8 bureau. As of yet I have not gotten anything back. My husband, who is also a ham, has already gotten 2 envelopes full of cards. As we work mostly the same stations I should have that coming too but as I stated I have gotten nothing yet. Is it common for the 8C manager to take this long to deliver cards? I have repeatly tried to contact the 8C manager but have heard back nothing to this date. Any help or info you can give me would be greatly appreciated! As I don't get a chance to read the newsgroups please respond direct to me at: NZ8C@aol.com. Thanks!
73,
Renee NZ8C

7152. WTB Vibroplex VIBROKEYER

Anyone have a Vibrokeyer in nice shape they would part with? This is the Vibroplex key that emulates the action of a bug, without the pendulum, for use with an electronic keyer.

Reply to my e-mail address, and please remove the word NOSPAM from my e-mail address before you send.

Folks,

a friend of mine is looking for the following Racal gear to complete a VRM 4125A station:

VRM4125A Manual (there may be more than one - not sure)
MA 4178 Power Supply Unit
MA 4106 Voltage Regulator Unit
MA 4142 Initiate Tune Box
VRA 549B Auto Antenna Matching & Tuning Unit (AAMTU)

Anyone with any of these units to sell or swop, please get in touch.

73s

x-no-archive

SCREW ARRL AND QST.......Enough of this expensive
magazine with 90%
ads.......and the rest is black and white junk.!!!

The ARRL hasn't done anything for Ham Radio in many years
that is
worth mention.......Just a publisher now..!!!!!

you need to send your money to jesus

I believe in a God that doesn't need heavy financing.

Do you think so? I know I would if I were God. I'd hang out with
all my other God friends and have a big party. We'd all get drunk
and create unliftable rocks, then try to lift them. It would be
loads of fun! Then I'd probably just destroy the rocks with a
lightning bolt.

he be on food stamps and welfare. he likes to experiance
weightlessness like tommy chong do when he lite up his
bong.
